UNIQUE FEATURES OF ISLAM

Please forgive us for any disturbance, but we have an important subject to address to you regarding FAITH, and we Don’t intend to overload your email with unnecessary messages…
Unique Features of Islam
Uniqueness of the Name
The name for the religion of Islam is much more than just a name because it expresses a deep spiritual meaning as well as an overall outlook on life and concept of worship. The word "Islam" is an Arabic word which means "complete submission to the will of Almighty God".

Other religions are named after their founders, such as Christianity and Buddhism; after a tribe or ethnic group, such as Judaism; or after a specific geographical region, such as Hinduism. Islam, however, is unique because its name represents its outlook on life and reflects its universal nature. Additionally, the name "Islam" was not thought up by its followers or applied by other people, as is the case with the names of other religions, but was revealed by Almighty God. This name expressed nothing new, because submission to the will of God, i.e. "Islam", has always been the true religion of God. Due to this fact, and since the teachings of Islam are straightforward, profound and logical, Islam is the "Natural Religion" of all human beings. The name of no other religion carries any significant message, or conveys the true sense of its outlook on life, as does the name "Islam".
Universality & Continuity of the Message
The command to worship none other than Almighty God and to submit to His will has been revealed by God to all of His prophets throughout mankind’s long history. The pure essence of the beliefs and teachings that were revealed by God to the Prophet Muhammad are the same as God taught to Abraham, who was one of the earliest and greatest prophets. So actually, Muhammad is the final prophet of Islam – not the first. Additionally, Islam is the true "religion of Abraham", because Abraham completely submitted himself to the revealed will of Almighty God. Islam is truly unique among the religions of the world because it is addressed to all of mankind. The scripture of Islam, called the Qur’an, repeatedly addresses all human beings by saying: "O mankind!" Additionally, in the Qur’an, Almighty God is never addressed as the God of a particular people or nation. From the very beginning of the mission of Prophet Muhammad, his followers came from a wide spectrum of individuals – there was Bilal, the African slave; Suhaib, the Byzantine Roman; Ibn Sailam, the Jewish Rabbi; and Salman, the Persian. Since religious truth is eternal and unchanging, and mankind is one universal brotherhood, God’s revelations to man have always been consistent and universal. Submission to the will of God, and

worshipping Him alone without intermediaries, has always been the only religion acceptable to Almighty God.

A Straightforward Concept of God

Unique among the religions of the world, the concept of God in Islam is completely based upon Divine Revelation. Not only is the concept of God in Islam characterized by purity and clarity, but it is also not marred by myths, superstitions or man-made philosophical ideas. In the pure and straightforward teachings of Islam, Almighty God has clearly revealed His unique nature and qualities to man in the way which He wants them to be understood. While other religions have either mixed man-made doctrines with divine revelation, or ignored the divine revelation almost completely, Islam’s concept of God is based totally on what God has said about Himself. Islam’s concept of God can be called pure and straightforward because there is a clear distinction made between the Creator and the created. As such, there is no ambiguity in divinity – it is made clear that there is nothing divine or worthy of being worshipped except for Almighty God. In Islam, calling someone other than Almighty God "Lord" or "Savior" is completely prohibited because such terms compromise God’s uniqueness and because all of our trust should be put in Almighty God – who is the Most Merciful and the Controller of all affairs. The only Creator – Almighty God – is Unique, Eternal and Transcendent above His Creation. Everything else besides Almighty God – meaning anything that you can see or even imagine – is part of God’s creation, and thus not worthy of worship. Almighty God, as He has described Himself in the Qur’an, is Absolutely One and "the Most Merciful of those who show mercy". Even though God is transcendent above His creation, due to His infinite Mercy He is constantly involved with the affairs of His creatures. Even though God is infinite, unique and incomprehensible, in the Holy Qur’an He has revealed Himself in a way suitable to the finite and limited human mind. By reaching out to man and sending revelations through all of His prophets, God has allowed Himself to be known through His unique and most-beautiful attributes. Because the concept of God in Islam was sent by God specifically for mankind, it appeals to the innate nature of the human being. Due to this fact, Islam does not ask man to accept irrational, ludicrous or man-made doctrines about God. The Islamic concept of God strikes a unique balance between various religions an because is avoids reducing God to just being some remote and impersonal "First Cause" or "Higher Power", while on the other hand it also teaches that a direct and personal relationship with God can be maintained without believing God to be like His creation or incarnate in it.

Direct Relationship with God

In other religions, even the ones which claim belief in "One God", people often approach God through an intermediary, such as a saint, an angel, the Virgin Mary or Jesus. However, it is only in Islam that a person is required only to pray to God. Some people also nullify a truly proper and direct relationship with Almighty God by mistakenly believing that they have a special relationship with Him simply because they are members of a certain ethnic group, tribe or "chosen

people". Additionally, in Islam there are no priests or clergy – each worshipper, man or woman, has a direct relationship with their Merciful Creator – Almighty God. Since God is the Owner and Sustainer of everything, as well as the only one who can provide true and complete forgiveness, it is completely futile to try to approach Him through anyone else. According to the teachings of Islam, praying to or worshipping anything or anyone besides Almighty God is the greatest sin a person can commit. Even though other religions believe in God, they nullify this belief by making the grave mistake of not always approaching Him directly. Some religions even go so far as to say that human beings, due to their sinfulness, cannot approach God without an intermediary – which mistakenly implies that God is unable or unwilling to forgive human-beings directly. Islam teaches that Almighty God has the power to do all things and that no one should ever despair of His mercy. According to the teachings of Islam, God is always ready to bestow His abundant Grace and Mercy on anyone who turns to Him in repentance. Even people who used to commit the worst sin of worshipping others besides God will be forgiven if they realize what they are doing is wrong and repent. Having a direct relationship with God, and understanding that He alone deserves worship and praise, goes hand-in-hand with the Islamic concept of God. This is because once a proper concept of God is established in the heart and mind, submission to God and complete reliance on Him alone comes naturally.

Unique Concept of Worship

According to the teachings of Islam, everything that a human being does with the pure intention of pleasing God is an act of worship. Due to this, Islam has an all encompassing concept of worship unlike any other religion. Almighty God has revealed in the Holy Qur'an that His purpose for creating human beings was to worship Him and Him alone. Like other religions, Islam has required acts of worship, however worship in Islam is not limited to rituals. Since Islam is an all-encompassing religion with guidance for all aspects of life. almost every action in a Muslim's life becomes an act of worship if it is done to build a better relationship with God. Since man's purpose in life is to worship and submit to God, worship in Islam has been defined by God Himself in an all-encompassing way. This is special uniqueness can also be seen in the fact that most other religions only require formal worship once per week, while Islam requires it five times a day. Even more importantly, all rites of formal worship in Islam are based on Divine revelation, while the modes of worship in other religions are a mixture of Divine revelation, man-made traditions, opinions of clergymen and religious councils.

Additionally, in Islam acts of worship such as prayer and fasting have been described by God and His Prophet in such detail that it gives human beings a feeling of assurance that the way they are worshipping God is pleasing to Him.

Based on Authentic Sources

The preservation of the scripture of Islam – the Holy Qur'an – is unique among world religions. No other religion has a scripture which is both as old and as well-preserved as the one possessed by Muslims

today. Even scholars who are hostile to Islam admit that the Qur’an that exists today is exactly the same as the one that existed in the time of the Prophet Muhammad. Even though many people mistakenly assume that the Qu’ran was written by Muhammad, it is actually the literal Word of God. Not only was Muhammad known by his people to be unable to read and write, but the Holy Qur’an clearly and repeatedly exclaims that it is from Almighty God – the Lord of the Universe. Unlike other religions, the followers of Islam have always considered their scripture to be the Word of God in toto. The scriptures of other religions are made up of writings that were not considered to be scripture until many years after they were written – the letters of (St.) Paul are a good example of this. Additionally, the Holy Qur’an has always been in the possession of the common believer, and as such was circulated very widely. In this way, Muslims know that their scripture is authentic, unlike other so-called "scriptures" which are still claimed to be scripture even though their authors are unknown. The Qur’an also remained pure and authentic because unlike other scriptures, it was written down and memorized in the lifetime of the prophet that it was revealed to. Also, its wide circulation prevented scholars, clergy and religious councils from deciding what should and should not be part of the scripture – since it was already in the hands of the people in its complete form. It has always amazed people to find out that the entire Qur’an was not only memorized word-for-word by hundreds of the companions of Prophet Muhammad, but that it has been memorized verbatim by thousands upon thousands of people until this very day in its original language of Arabic. It was only natural for Almighty God to preserve the scripture revealed to Prophet Muhammad, because he was the last Prophet and Final Messenger of God. In short, the Qu’ran is a unique scripture that has come down to us in its original form and unique language. Due to its pristine teachings and unquestionable authenticity, the Qur’an removes the need for man to wonder for himself how to worship and please God, since God Himself has clearly described these things.

An Eternal Message

Islam has just as much meaning and is just as applicable to people living in today’s "modern world" as it did for people living 1400 years ago. Since the message of Islam is eternally true it is also very robust, and as such still has a strong spiritual impact on millions of people living in the world today. The Pure Monotheism of Islam, as well as its universal brotherhood, strong morals and positive outlook on life, is still very relevant and meaningful to modern man. The continued relevance and applicability to both the spiritual and worldly life of human beings from all around the word is just one of the many proofs of the Divine origin of the message of Islam. Unlike the teachings of other religions, the teachings of Islam don’t need to be updated or watered-down in order to appeal to a human being living in today’s troubled world. Since the teachings of Islam are both spiritually true and eternally practical, they can be lived and implemented in the daily life of a person in order to make their life more fulfilling. In short, unique among world religions, Islam

has not had to sacrifice its integrity in order to be both applicable to "modern life" and to have enough spiritual impact to change people’s lives.

A Complete Way of Life

Islam not just a "religion" in the traditional sense, because it is not just confined to acts of worship, morality and other aspects of personal piety. The teachings of Islam, even though they do cover religious rituals and morality, also encompass all other aspects of life. The Prophet Muhammad’s mission encompassed not only spiritual and religious teachings, but also included guidance for such things as social reform, economics, politics, warfare and family life. Thus due to the diversity and success of Muhammad’s mission, Muslims have clear guidance from God and His Final Prophet on all aspects of life. This goes hand-in-hand with the Islamic belief that Almighty God does not leave human beings without guidance in their daily lives – thus His guidance is all-encompassing. Due to God’s wisdom, and because Islam is the final revealed religion, the guidance that God has sent is applicable for all times and for all places. This can be seen in the fact that the guidance for some aspects of life is much more broad and flexible than others. Additionally, in the Qur’an, Almighty God has revealed to mankind that the purpose of our creation is to worship and remember God in all aspects of our life, and to follow His guidance in everything that we do. Thus Islam does not accept a secular view of government and society, but only one based on the Law of God. Nor does Islam leave it to human beings to decide what is right and wrong, good and bad, moral and immoral based on their whims, desires or man-made idea. In short, Islam does not teach people to "Render unto Caesar the things which are Caesar’s" because, according to Islam, everything belongs to God. Like all of its other teachings, Islam’s view of other religions is balanced, realistic and moderate. Islam doesn’t view other religions as being either completely true nor completely false, but believes that all true religions were at one time divinely revealed. However, over time the teachings of the various religions, due to a variety of reasons, have become distorted and mixed with made-man ideas. But nonetheless, Muslims are required to be tolerant of other revealed religions since the Qur’an clearly says: "Let there be no compulsion in religion".

Moderation

The teachings of Islam, since they are divinely revealed, are balanced in all of their aspects. Even though Islam is an all-encompassing way of life, it preaches moderation and rejects extremism. On the one hand, Islam does not preach complete rejection of all worldly pleasures in view of the life hereafter; and on the other hand it does not teach that earthly life is just for pleasure and enjoyment. In Islam, wealth and worldly pleasures can be partaken of in this life as long as they are enjoyed in a way that is in obedience to God. However, Muslims are taught to keep in mind that the life hereafter is their ultimate goal, and therefore one should be charitable and not become too attached to worldly things. By maintaining a balance between man’s spiritual and physical needs, the teachings of Islam are

best suited for the needs of human beings in particular and society in general. Since Islam is based on clear guidance from God, it rejects all man-made religious excesses, such as certain forms of monasticism where people try to completely "reject the world" and other forms of extreme self-denial. Islam teaches that human beings have responsibilities at all levels – to other individuals, to their families and to society as a whole. By maintaining a unique balance between the physical and spiritual, and between the individual and society, Islam maintains a balance in all directions.

A Positive Outlook

Most people will agree that having a strong self-esteem and a positive outlook on life is conducive to achieving happiness and success. Unique among the religions of the world, Islam's view of both the nature of the human being and the purpose of life are extremely positive. Islam's view of the nature of the human being is balanced. On the one hand they are not viewed as being inherently evil, but on the other they are not considered to be perfect – nor are they expected to be so. According to the teachings of Islam, every human being, man or woman, is born with a clean slate and is equally capable of both good and evil. Since God has bestowed limited free-will on human beings, they will ultimately be held responsible for their actions. Believing that "salvation" is based on "faith alone" reduces human life to a near meaningless and fatalistic existence. The teachings of Islam make it clear that human beings, since their nature is basically good, are capable of positive action in this life, and that the best way to achieve a balanced, happy and fulfilled life is complete submission to Almighty God. Certainly, no person can completely submit to God by simply wanting to do so, but by first realizing that none has a right to be worshipped and obeyed except for Almighty God, and then making a reasonable effort to follow God's commands, all human beings can fulfill their reason for existence – which is to worship God alone. . The Holy Qur'an tells us that "man was created weak" and thus falls into sin often. On the other hand, man is not to think of himself as so evil and corrupt so as to despair of God's mercy. As a recourse to this, and since Islam condemns self-righteousness, a pious life can only be lived by trusting in God – since there is no power or strength except through God. As such, spiritual felicity is achieved by a combination of both faith and action. As such, the most righteous person is not one who thinks that repentance is unnecessary, but the one who admits and realizes his mistakes – and then repents. According to the word of Almighty God as revealed in the Holy Qur'an, mankind is God's trustee on earth; and as such the life of this world is a test, not a punishment. Even before God created the first man, He knew that he would sin, however God created man in spite of this. According to the Qur'an, God has bestowed on human beings a great trust and given them dignity. It is only by worshipping Almighty God, directly and without intermediaries, that a human being can fulfull their true innate nature and purpose of existence. In short, Islam is realistic. It portrays human beings just as they are and the life of the world just as it is. Since the outlook

of Islam is divinely revealed is not based on wishful or negative thinking, but simply on reality. Islam also has a positive view of mankind in general, since it teaches that the best person in the sight of God is the one who is most God-conscious. In this way the truth of Islam and the universality of God's message transcends all of the barriers of race, nationality, ethnic group and economic status.

My name isn't "Zydeco," Dave. It's "Rick Sabian's All-Star Canadian Assworm Zydeco Band". You don't know me well enough to simply refer to me as "Zydeco," and you're hardly qualified to make classic erroneous presuppositions about whether or not I've made an erroneous presupposition. Furthermore, if you insist on adding even more inane replies to this conversation, kindly do NOT set follow-ups because IT PISSES ME OFF! TIA...

RAC Bulletin 2012-010E - Good News from WRC12 &#65533; A New Band at 600 metre
s.
2012-02-14

At its Plenary meeting held 14 February 2012 in Geneva the World Radiocommunication Conference approved a new secondary frequency allocation to the Amateur Radio Service at 472 to 479 kHz. Having passed First and Second Readings it is normally a formality that this change be included in the WRC-12 Final Acts when the Conference concludes February 17th. The Table of Frequency Allocations would then be amended accordingly.

The new band at 600 metres will represent the return of amateurs to the medium waves - an area of spectrum we have not had access to since the earliest days of radio regulation.

As a secondary user, amateur radio shares 472 - 479 kHz with the Maritime Mobile Service who are the primary user in all three ITU Regions and with the Aeronautical Radionavigation Service who are a Secondary user except as noted in the following.

The new allocation to the amateur service is accompanied by several footnotes including, i) a number of countries will identify their intent to elevate the status of their Aeronautical Radionavigation Service to Primary as a step in ensuring protection from secondary users, and ii) the power which radio amateurs may use in 472 to 479 kHz will be limited to 5 watts (e.i.r.p.) except for amateur stations within 800 km of the borders of a number of countries - principally Russia, many of the former Soviet bloc and the Arab states. For those affected amateurs the limit will be 1 watt.

It is, of course, up to individual administrations to authorize use of the band by their amateurs. In the case of Canada, it seems certain that such authorization will be forthcoming; however, the process which has to be followed may take some time.

Canadian radio amateurs have played a central role in arriving at this successful outcome. The documents submitted through the ITU in support of this allocation were largely authored by Canadian amateurs - as was the important work done in assessing the efficiency of the antennas radio amateurs would likely use. Canadian amateurs have been present at ITU meetings in Geneva since 2009 to advance the cause of this allocation. Our regulator, Industry Canada, has been outstanding in their support of our work and in ensuring today's success. Finally,

our colleagues in the IARU, ARRL, RSGB, and DARC have all played major
roles.

Bryan Rawlins, VE3QN
Amateur Representative on the WRC12 Canadian Delegation

[IARU-R2-News 162] Special WRC Report Number Three - The Amateur Radio Service Gains A Band Near 500 kHz
2012-02-15

[Editors note: Subject to approval by Industry Canada, operation on this band is not permitted in Canada at this time. Radio Amateurs of Canada will be working with Industry Canada through the Radio Advisory Board of Canada (RABC) to work out the various details on amateur usage of this band in Canada.]
472-479 kHz. The worldwide amateur radio service has a new frequency band, 472 to 479 kHz. It is a secondary allocation. There are other services in that portion of the spectrum that must not be interfered with by the amateur operation.

The aeronautical radionavigation service is a primary service in the band 415-495 kHz in the following areas: Australia, China, the French overseas communities of Region 3, Korea (Rep. of), India, Iran (Islamic Republic of), Japan, Pakistan, Papua New Guinea and Sri Lanka.

The aeronautical radionavigation service is a primary service in the band 435-495 kHz in the following areas: Armenia, Azerbaijan, Belarus, the Russian Federation, Kazakhstan, Latvia, Uzbekistan and Kyrgyzstan.

The amateurs are allowed to use the band so long as it does not cause interference to this primary service or the maritime mobile service operating in the 472-479 kHz band. There are some countries that will not allow amateur radio operation in the 472-479 kHz band. The use of the frequency band 472-479 kHz in Algeria, Saudi Arabia, Azerbaijan, Bahrain, Belarus, China, Comoros, Djibouti, Egypt, United Arab Emirates, the Russian Federation, Iraq, Jordan, Kazakhstan, Kuwait, Lebanon, Libya, Mauritania, Oman, Uzbekistan, Qatar, Syrian Arab Republic, Kyrgyzstan, Somalia, Sudan, Tunisia and Yemen is limited to the maritime mobile and aeronautical radionavigation services. The amateur service shall not be used in the above-mentioned countries in this frequency band, and this should be taken into account by the countries authorizing such use.

The ITU Radio Regulations provide that radio amateurs are limited to 1 watt (e.i.r.p.) however administrations whose territory is beyond 800 kilometers from the borders of the following countries may increase the operating power to 5 watts (e.i.r.p.): Algeria, Saudi Arabia, Azerbaijan, Bahrain, Belarus, China, Comoros, Djibouti, Egypt, United Arab Emirates, the Russian Federation, Iran (Islamic Republic of),

Iraq, Jordan, Kazakhstan, Kuwait, Lebanon, Libya, Morocco, Mauritania,
Oman, Uzbekistan, Qatar, Syrian Arab Republic, Kyrgyzstan, Somalia,
Sudan, Tunisia, Ukraine and Yemen.

The change becomes effective with the adoption of the Final Acts of
the Conference. Of course, it will be determined by each
administration around the world as to what modes and bandwidths will
be used in this portion of the spectrum and when hams in that country
will have access to the spectrum.

More activities from the WRC-12 will be reported at the end of the
WRC. The WRC continues until 17 February. There is an effort underway
to place an amateur radio agenda item on the agenda for the next WRC
which will take place in 2015.

Are you really sure you want to go there with me? You don't know me.
Ask around. I'm a real fuckhead. I mean I'll really stick it to you
right out here in public, all embarrassing like. Be careful is all I'm
saying. I'll fuck your head if I have to, and I'm thinking I really
might have to if you don't get the hint.

Yes, do be careful, Hi has been known
to be positively excoriating.

Whatever. I thought you wanted to discuss scripture. I thought you might have a few misconceptions about what the passage you quoted really means in context. I thought you might be open to seeing the Bible in a new light. I thought you might have a personal interest. I actually thought you might be one of them frickin homos. Scuse me. I make misteaks two, ewe nose.

Ha. Ha. Ha. You must believe I'm smart enough to understand what you mean by that, otherwise you wouldn't have written it. I don't think you fully comprehend just how stupid I really am though, Fred. Seriously. Don't let the title and fancy duds fools you. I'm one dumb motherfucker, science notwithstanding.

==> + WRC-12: AMATEUR RADIO GETS SECONDARY MF ALLOCATION AT WRC-12

It's official -- delegates attending the 2012 World
Radiocommunication Conference (WRC-12) have approved a new
7-kilohertz-wide secondary allocation between 472-479 kHz for the
Amateur Radio Service. Agenda Item 1.23 had both its first and second
readings in Plenary Session on Tuesday, February 14; to become part of
the ITU's Radio Regulations, each Agenda Item must be read twice in
Plenary Session. While the Final Acts will be signed on Friday,
February 17 at the close of the Conference, the new allocation will not
take effect until it is entered into the Radio Regulations on January
1, 2013. In any case, no amateur can use the band until his or her
```

national regulations are revised to implement the allocation. Read more here <http://www.arrl.org/news/amateur-radio-gets-secondary-mf-allocation-at-wrc-12>.

==> WRC-12: IARU VICE PRESIDENT OLE GARPESTAD, LA2RR, CHATS WITH ITU

IARU Vice President Ole Garpestad, LA2RR, sat down for a video interview with the ITU Press Office at 4U1ITU (operating as 4U1WRC), the Amateur Radio station at ITU Headquarters in Geneva. During the interview, IARU Region 1 President Hans Blondeel Timmerman, PB2T, operated CW in the background. Garpestad discussed Agenda Item 1.23 and what it means to the Amateur Radio Service, what the IARU does at the WRC, the future of Amateur Radio, and what the Amateur Radio Service and the IARU are doing for the next WRC. Watch the video here <http://www.youtube.com/watch?v=eaxLAem_YMA>.

==> + WRC-15: WRC-12 DELEGATES PLACE POSSIBLE 5 MHZ ALLOCATION ON AGENDA FOR NEXT WRC

One of the responsibilities of each WRC delegation is to set the agenda for the next WRC. WRC-12 delegates approved an Amateur Radio-related agenda item for the upcoming WRC-15: To consider the possibility of making an allocation of an appropriate amount of spectrum, not necessarily contiguous, to the Amateur Service on a secondary basis within the band 5250-5450 kHz. This will be Agenda Item 1.4 at WRC-15.

"It is always a challenge to have items placed on the agenda for future WRCs," IARU President Tim Ellam, VE6SH, told the ARRL. "I am pleased that we were successful in having an Agenda Item for a potential allocation at 5 MHz on a secondary basis. There will be much work to do over the next ITU study group cycle. Much appreciation is owed to the IARU and the national delegation teams in Geneva for their hard work on this issue."

According to ARRL Chief Executive Officer David Sumner, K1ZZ, the original 5 MHz proposal came from Cuba. "The IARU team worked hard to line up support," he explained. "The factor that worked most in our favor was that at WRC-07, a proposal for a 5 MHz agenda item for WRC-12 failed to gain enough support, so there was a feeling that the Amateur Service deserved better treatment this time around. We did have active support from a number of administrations in Latin America which helped a lot, but a lot of others also had to agree to get it on the agenda. The coordinators of future Agenda Items on behalf of the regional telecommunications organizations, such as CITEL and CEPT, eventually agreed on a package of Agenda Items that included ours." Read more here <http://www.arrl.org/news/wrc-12-delegates-place-possible-5-mhz-allocation-on-agenda-for-next-wrc>.

==> +ON THE AIR: ARRL 500 KHZ EXPERIMENTAL GROUP SPARKED INTEREST IN MF OPERATION

In September 2006, the FCC's Office of Engineering and Technology granted a Part 5 experimental license -- WD2XSH -- to the ARRL on behalf of a group of radio amateurs who were interested in investigating spectrum in the vicinity of 500 kHz. Called the ARRL 500 kHz Experiment, this group of hams -- led by Fritz Raab, W1FR -- received permission to experiment and do research between 505-510 kHz using narrowband modes at power levels of up to 20 W effective radiated power (ERP), using CW and PSK31.

<http://www.arrl.org/images/view/News/Feb2012_600MeterStations.jpg>
The original 500 kHz license called for 23 discrete fixed sites across the US: at Raab's QTH in Vermont, as well as at sites in Arkansas, California, Colorado, Illinois, Louisiana, Massachusetts, Minnesota, Mississippi, New Hampshire, New Jersey, New York, North Carolina, Oregon, Rhode Island, Tennessee, Texas and Virginia. In 2008, the FCC expanded the scope of the experimental license, allowing for more frequencies, more stations and portable operations: The group could now operate between 495-510 kHz, the number of stations increased from 23 to 42 and participants could now operate within 50 km of their designated stations.

At the 2012 World Radiocommunication Conference (WRC-2012), delegates approved an amateur secondary MF allocation between 472-479 kHz. The ARRL would like to acknowledge the contributions of the participants in the ARRL 500 kHz Experiment to the recent approval of a new amateur secondary MF allocation, and to thank them for their efforts. Read more here
<http://www.arrl.org/news/arrl-500-khz-experimental-group-sparked-interest-in-mf-operation>.

==> + ON THE AIR: RAC TO SPLIT ONTARIO INTO FOUR SECTIONS

On February 6, Radio Amateurs of Canada (RAC) issued a statement on their website that the Ontario Section would be split into four new RAC Administrative Sections, effective September 1, 2012. The reason given for the restructure was "...to create a management model that better communicates with, and represents the interests of, the overall Ontario amateur population." The Ontario Section will be dissolved and be replaced with four new RAC Sections: Ontario North, Ontario South, Ontario East and the Greater Toronto Area. The new section abbreviations will be announced when final. Read more here
<http://www.arrl.org/news/rac-to-split-ontario-into-four-sections>.

==> + AMATEUR RADIO IN SPACE: NASA SELECTS AMSAT FOX SATELLITE TO JOIN PROGRAM

Project ELaNa -- NASA's "Educational Launch of NanoSat" managed by the Launch Services Program at the Kennedy Space Center -- announced on February 10 that the AMSAT Fox-1 CubeSat has been selected to join the program. NASA will work with AMSAT in a collaborative agreement for NASA to cover the integration and launch costs of satellites deemed to have merit in support of their strategic and educational goals. Read more here

<http://www.arrl.org/news/nasa-selects-amsat-fox-satellite-to-join-program>.

==> AMATEUR RADIO IN SPACE: TEXAS HAMS MAKE WORLD RECORD BALLOON ATTEMPT

A group of Amateur Radio operators hopes to establish a world distance record for an unmanned helium-filled balloon. The BLT-28 balloon will undertake a journey across the Atlantic and the Mediterranean, and then on to Nanjing, China. The South Texas Balloon Launch Team released the balloon at 3 PM (CST) on February 11 from Katy, Texas, just outside of Houston.

During the trans-Atlantic crossing, when out of range of shore based stations, the balloon's APRS beacon will operate on the International Space Station (ISS) packet digipeater frequency of 145.825 MHz. The balloon payload package weighs only about 5 ounces and contains a high altitude GPS tracking system and a 144 MHz FM APRS Amateur Radio transmitter. To conserve weight and battery life, no camera equipment will be on board. The maximum altitude is expected to be above 19 miles, with horizontal speeds between 100 and 150 miles per hour. Read more here <http://www.arrl.org/news/world-record-balloon-attempt>.

==> AMATEUR RADIO IN SPACE: NEW SATELLITES REACH ORBIT

On February 13, a European Space Agency Vega rocket lifted off from Kourou, French Guiana on its inaugural flight. It carried the Laser Relativity Spacecraft to orbit along with eight student-built MicroSats and CubeSats. The student satellites will transmit telemetry in the VHF, UHF and microwave amateur bands, with one satellite also including a voice repeater. Read more here <http://www.arrl.org/news/new-satellites-reach-orbit>.

==> SOLAR UPDATE

Tad "Certain as the Sun rising in the east <http://www.youtube.com/watch?v=oeoPtz0F2Ck>" Cook, K7RA, reports: We are more than halfway through the winter season, as Sunday, February 5 was 45 days after the winter solstice. Propagation should improve as we approach the vernal equinox on March 20. Solar activity is still in the temporary doldrums, with sunspot numbers below 100. But the weekly average of daily sunspot numbers rose this week by over 15 points to 55.6. There was a geomagnetic storm on Wednesday, February 15 (UTC). Early in the UTC day (Tuesday night in North America), the planetary K index went to 5, and the planetary A index was 22. The College A index in Fairbanks was estimated at 46, which is quite high. The disturbance was probably from a CME a few days earlier. Aurora in North America was seen as far south as Minnesota. The latest forecast has solar flux about 55-60 points lower than last month's prediction for the ARRL International CW DX Contest <http://www.arrl.org/arrl-dx> this weekend. Latest predicted flux values are 105 on February 16, 110 on February 17-20, 105 on February 21-22, 110 on February 23, and 115 on February 24-26. The predicted flux values bounce around from 105-110 from

February 27-March 13, then go back to 115 on March 14-16 and again on March 20-24. The predicted planetary A index for February 16-23 is 10, 5, 8, 8, 5, 5, 5 and 9, then 5 on February 24-March 1. Look for more information on the ARRL website on Friday, February 17. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Disney's Beauty and the Beast <http://en.wikipedia.org/wiki/Beauty_and_the_Beast_%281991_film%29>.

==> THIS WEEK IN RADIOSPORT

This week:

- February 17 -- NCCC Sprint Ladder
- February 17-18 -- Russian PSK WW Contest
- February 18 -- Feld Hell Sprint
- February 18-19 -- ARRL International DX Contest (CW) <http://www.arrl.org/arrl-dx>; AWA Amplitude Modulation QSO Party
- February 20 -- Run for the Bacon QRP Contest
- February 22 -- SKCC Sprint
- February 22-23 -- CWops Mini-CWT Test

Next week:

- February 24 -- NCCC Sprint Ladder
- February 24-26 -- CQ 160 Meter Contest (SSB)
- February 25-26 -- Mississippi QSO Party; North American QSO Party (RTTY); REF Contest (SSB); UBA DX Contest (CW)
- February 26 -- High Speed Club CW Contest; SARL Digital Contest
- February 26-27 -- North Carolina QSO Party
- February 27 -- CQC Winter QSO Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> + ARRL HQ: ARRL HEADQUARTERS TO CLOSE IN OBSERVANCE OF PRESIDENTS DAY

ARRL Headquarters will be closed in observance of Presidents Day on Monday, February 20. There will be no W1AW bulletin or code practice transmissions <http://www.arrl.org/w1aw-operating-schedule> that day. ARRL Headquarters will reopen Tuesday, February 21 at 8 AM Eastern Standard Time. We wish everyone a safe Presidents Day holiday.

==> + BE A STAR! DEADLINE FOR SECOND ANNUAL ARRL VIDEO CONTEST IS FEBRUARY 29

If you've ever wanted a way to show the world how exciting Amateur Radio can be, here's your chance: The ARRL is sponsoring its Second Annual Video Contest! Shoot a ham radio-related video and send it our way. All videos must be postmarked by February 29, 2012. Burn your video to a CD or DVD using the appropriate software and mail it to ARRL Video Contest, 225 Main St, Newington, CT 06111. Do not attempt to send it via e-mail, as our e-mail system cannot accommodate large files. Read more here <http://www.arrl.org/news/be-a-star-deadline-for-second-annual-arrl-video-contest-is-february-29>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- February 17-18 -- ARRL Southwestern Division Convention <http://www.arrl.org/hamfests/southwestern-division-convention-1>, Yuma, Arizona
- February 18 -- ARRL Arkansas Section Convention <http://www.arrl.org/hamfests/arkansas-section-convention-1>, Hoxie, Arkansas
- February 25 -- ARRL Vermont State Convention <http://www.arrl.org/hamfests/vermont-state-convention-ham-con-2>, South Burlington, Vermont
- March 3 -- ARRL Santa Clara Valley Section Convention <http://www.arrl.org/hamfests/santa-clara-valley-section-convention-radiofest>, Del Rey Oaks, California; ARRL South Texas Section Convention <http://www.arrl.org/hamfests/south-texas-section-convention-greater-houston-hamfest-2>, Rosenberg, Texas
- March 3-4 -- ARRL Alabama Section Convention <http://www.arrl.org/hamfests/alabama-section-convention-birminghamfest-1>, Birmingham, Alabama
- March 9-10 -- ARRL Louisiana State Convention <http://www.arrl.org/hamfests/louisiana-state-convention-52nd-annual-acadiana-hamfest>, Rayne, Louisiana; ARRL Oklahoma State Convention <http://www.arrl.org/hamfests/oklahoma-state-convention-green-country-hamfest-1>, Claremore, Oklahoma
- March 10-11 -- ARRL Roanoke Division Convention <http://www.arrl.org/hamfests/roanoke-division-convention-charlotte-hamfest-tm>, Concord, North Carolina
- March 17 -- ARRL Nebraska State Convention <http://www.arrl.org/hamfests/nebraska-state-convention-end-of-winter-hamfest>, Lincoln, Nebraska; ARRL Southern Florida Section Convention <http://www.arrl.org/hamfests/southern-florida-section-convention-2>, Stuart, Florida; ARRL West Texas Section Convention <http://www.arrl.org/hamfests/west-texas-section-convention-57th-annual-st-patrick-s-day-hamfest>, Midland, Texas

- March 23-24 -- ARRL Maine State Convention
<http://www.arrl.org/hamfests/maine-state-convention-2>, Lewiston,
Maine

To find a convention or hamfest near you, click here
<http://www.arrl.org/hamfests>.

Right. And look where it got him. I swear, some people never fucking
learn.

Amateur Radio Newsline(tm) Report 1801 - February 17 2012

Amateur Radio Newsline report number 1801 with a release date of February 17th, 2012 to follow in 5-4-3-2-1.

The following is a QST. WRC 2012 ends and ham radio get a new 600 meter allocation. Also, the 2 Gigahertz band comes under attack in Sweden; ham radio gets an exclusion from a proposed Illinois distracted driving law; a high altitude ham radio balloon heading from Texas to China disappears over the Gulf of Mexico and spray on antennas become a reality. All this and more on Amateur Radio Newsline(tm) report number 1801 coming your way right now.

(Billboard Cart Here)

**

RADIO LAW: WARC 2012 ENDS - THE OUTCOME FOR HAM RADIO

The 2012 World Radiocommunications Conference, better known as WRC 12 has come to a close. Bill Pasternak, WA6ITF, is in the Newsroom with some good news for ham radio:

--

At its Plenary meeting held on February 14th, the World Radiocommunication Conference approved a new secondary frequency allocation to the Amateur Radio Service from 472 to 479 kHz. Having passed its First and Second Readings it is normally a formality that this change be included in the conferences Final Acts when the gathering concludes and the Table of Frequency Allocations would then be amended accordingly.

As a secondary user, amateur radio shares 472 to 479 kHz with the Maritime Mobile Service which is the primary user in all three ITU Regions and with the Aeronautical Radionavigation Service which is a Secondary user except as noted in the following footnotes:

One footnote reads that a number of countries will identify their intent to elevate the status of their Aeronautical Radionavigation Service to Primary as a step in ensuring protection from secondary users.

Also there is a footnote that says that the power which radio amateurs may use in 472 to 479 kHz will be limited to 5 watts effective radiated except for amateur stations within 800 km of the borders of a number of countries. These are principally Russia, many of the former Soviet bloc

nations and the Arab states. For those affected amateurs the power output limit will be 1 watt.

It is, of course, up to individual administrations to authorize use of the band by their amateurs. How long it will before the band is available to hams in the United States? That's up to the bureaucrats in Washington D.C.. At this point that is unknown.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

The new band at 600 meters will represent the return of amateurs to the medium waves. This is an area of spectrum that hams have not had access to since the earliest days of radio regulation. More on WRC 12 in future Amateur Radio Newsline reports. (RAC)

**

RESTRUCTURING: SSA SAYS HAM RADIO AND BROADBAND CAN SHARE 13 CM

The 13 centimeter ham band is under threat of reallocation in Sweden. This as that nations Telecommunications regulator the Department of Post and Telecommunications has suggested that the 2300 to 2450 MHz spectrum be transferred for use by broadband systems. Amateur Radio Newsline's Heather Butera-Howell, KB3TZD, is here with the details:

--

As part of the rule making process the Swedish national amateur radio society, the SSA, has submitted it's response to Sweden's telecommunications regulator on this matter. In it, the SSA argues that the nations amateur service should remain in the 2.3 GHz band and if needed share this spectrum with any other users.

SSA notes that wideband digital systems are becoming less sensitive to narrowband signals. This it says improves the possibilities for such a form of band sharing arrangement.

Among its position points the SSA believes that communication with amateur satellites in the band from 2400 to 2450 MHz should continue to be permitted.

The SSA is also requesting a meeting with the Department of Post and Telecommunications to discuss the technological basis for continuing the amateur service in the this band.

For the Amateur Radio Newsline, I'm Heather Butera-Howell, KB3TZD, near Pittsburg, PA.

--

More on the amateur radio response to the proposed reallocation translated into Google English is on-line at

tnyurl.com/SSA2300MHzResponse (Southgate, SSA)

**

RADIO SCIENCE: COMMUNICATIONS LOST WITH BLT-28 TEXAS TO CHINA HAM RADIO BALLOON

Communications with a high altitude amateur radio floating balloon that was launched from Texas with a final goal of reaching Nanjing China has been lost. BLT-28 transmitting callsign KT5TK-11 on APRS was lost at 00:50 hours UTC on February 12th. This was only 3 hours after the balloon was lofted skyward from Katy, Texas, just west of the city of Houston.

Signals were lost when the balloon was passing through the 45,700 feet over the Gulf of Mexico about 110 miles south of Holly Beach, Louisiana. This was possibly the coldest part of the journey to that time with the last telemetry reporting a temperature of -50 degrees Celsius.

There is some speculation that the lack of signals from the balloon may have been caused by the batteries freezing up. There is some hope that a so-called watchdog circuit will keep the electronics package alive until the batteries have rejuvenated, if they ever do.

There was some hope that BLT-28 may have actually crossed the Atlantic Ocean sometime Monday morning, February 13th, but that has yet to be confirmed either visually or by a resumption of electronic tracking. If the APRS transponder does return to life, it should be transmitting on 144.800 MHz and will eventually appear on various world wide APRS tracking websites such as aprs.fi.

BLT-28 was the latest in a long series of high altitude ham radio balloon launches sponsored South Texas Balloon Launch Team. Their website is in cyberspace at www.w5acm.net. (ARNewsline(tm), Southgate, WB5ITT)

**

RADIO LAW: ILLINOIS DISTRACTED DRIVING LAW WONT AFFECT HAM RADIO

Amateur radio as well as 11 Meter CB and several other services have won a complete exemption from a proposed Illinois state law aimed at curtailing the activities of distracted drivers on that states roads and streets. Amateur Radio Newsline's Matthew Chambers, NR0Q, has this follow-up report:

--

There were actually two proposed measures before the Illinois state legislature aimed at accomplishing the same thing. As originally written, both House Bill 3972 introduced by Representative John D'Amico and House Bill 3970 by Representative Karen May would have banned the use of all electronic communication devices with a very few limited

exceptions. These were the use of two-way radio by law-enforcement and operators of emergency vehicles; cellphones used in a hands-free or voice-activated mode or in parked vehicles. And that was it.

Now, after consultation with representatives of the Illinois ham radio community, Representative D'Amico has amended his proposal to exclude numerous types of two-way radio based communications from his measure. This, while leaving the original intent of the proposed law aimed which is primeraly aimed at curtailing texting or using a hand-held cellular telephone while ta vehicle is in motion.

Item 7 of the Amended D'Amico measure is the part that's important to the ham radio community. It states that a driver using two-way or citizens band radio services or twoway mobile radio transmitter or receivers for licensees of the Federal Communications Commission in the Amateur Radio Service are exempt from the proposed law. And that's good news for anyone with radio gear in their car driving in or through the state of Illinois.

For the Amateur Radio Newsline, I'm Matthew Chambers, NR0Q, reporting.

--

While this still leaves House Bill 3970 by Representative Karen May as active as originally written, it's believed that this measure will shortly be amended to follow the House Bill 3970, if this has not taken place already. (ARNewsline(tm), others)

BREAKING DX NEWS: LONG AWAITED VK0HI HEARD ISLAND OPERATION CANCELLED

Jim Linton, VK3PC, reports that Chris Dimitrijevic, VK3FY, has announced the permanent cancellation of the 2013 VK0HI Heard Island DXpedition. Linton notes that VK3FY was also the team leader of the cancelled DX0DX Spratly Islands DXpedition. VK3PC was serving as the Publicist for the Heard Island 2013 DXpedition. More DX information later on in this weeks Amateur Radio Newsline report. (VK3PC)

WITH NEWSLINE: OUR NEW WEBSITE

Amateur Radio Newsline's new website with its all new look is now on-line and fully operational. One of the new features is that from

this week forward that all newscasts will remain on the very front page as an ongoing audio and text blog. This should make it easy for those who may have missed the previous week need not look anywhere else to find it.

Also, the Young Ham of the Year Award and its associated forms now have their own tab at the top of the front page. Click it and you are at the place where you can download the 2012 nominating form as well as learn about the award programs history.

For now, if you find you are having any problems reaching the site, you can use the temporary URL of arnewsline.squarespace.com. This is because it may take up to a week before all the Domain Name Servers around the world have update www.arnewsline.org to the new host.

Lots more changes will be coming soon to make the overall site easier to navigate. Our thanks to Robert Sudock, WB6FDF; Kevin Trotman, N5PRE and Dale Cary, WD0AKO, for spearheading the new design and for the smooth transition to our new web host Squarespace.

Please check www.arnewsline.org and let us know what you think. (ARNewsline(tm))

RADIO LAW: FCC SAYS IT WILL SEEK TO CANCEL LIGHTSQUARED PROPOSED BROADBAND NETWORK

The Federal Communications Commission says that it will seek public comment on revoking LightSquared's permit to build a proposed national high-speed wireless data network. This, after concluding that such a system held the potential in some cases jam personal navigation and other Global Positioning System or GPS devices.

According to news reports, the FCC had seen LightSquared's proposal as a way to make more spectrum available to feed the need of the public and industry for added broadband capability for a wide variety of fixed and mobile devices. But the manufacturers of GPS receivers and those who rely on them feared that GPS signals would suffer from adjacent spectrum interference caused by the proposed LightSquared network.

As previously reported here on Newsline, after conducting tests, the National Telecommunications and Information Administration said that it found interference with dozens of personal navigation devices and aircraft control systems that rely on GPS for positioning. The NTIA concluded that there's no way to eliminate the risk of interference with such GPS devices.

As we go to air, LightSquared, which is based in Reston, Virginia, had not made any comment to the press on this latest development.

ENFORCEMENT: FCC REDUCES STUDIO TO TRANSMITTER LINK FINE BY $800

The FCC has reduced a fine for Gila Electronics that was based on a studio-to-transmitter link violation two years ago. Amateur Radio Newsline's Jim Davis, W2JKD, reports:

--

During a September 2009 inspection of KUKY - FM located in Wellton, Arizona, agents discovered what appeared to be a 950 MHz Studio to Transmitter or S-T-L that was relaying KUKY programming's main studio in Yuma to its transmitter site near Wellton.

Gila provided the agents with a copy of the license for the relay station which authorized operation on 956.65 MHz as a Private Operational Fixed Point-to-Point Microwave radio station. The licensed location was listed as Telegraph Pass, Arizona near Wellton but the microwave station was installed at the KUKY studio in Yuma, about 15 miles from the licensed location.

In January 2010, the San Diego Office issued a Notice of Apparent Liability for Forfeiture for $4,000 to Gila for failing to operate the relay at its authorized location and for providing a private carrier service not in accordance with the rules applicable to its particular radio service.

In its response, Gila had not disputed the facts. However it asked for a reduction because it said there were no interference reports from other licensees nor any substantial potential for interference to other users. This based on the sparsely populated desert terrain.

But the FCC was not persuaded by this argument. It noted that the absence of public harm is not considered a mitigating factor in a rule violation. However, the agency did give Gila a break based on the company's past good behavior, noting that the company has not received a prior violation during its more than 20 year history. That's why it cut the fine by $800.

I'm Jim Davis, W2JKD.

--

Gila was given the customary 30 days to pay the fine or to file a further appeal. (FCC)

PUBLIC SERVICE: HAMS NEEDED FOR BOSTON MARATHON COMMUNICATIONS

Bob DeMattia, K1IW, of the Marathon Amateur Radio Communications group tells Amateur Radio Newsline that his organization is still looking for approximately fifty more volunteers. This, to help on the ham radio team at the Boston Marathon.

This years run takes place on Monday, April 16th. Bob says that positions are available in Hopkinton, along the route, and in Boston

itself. If you are a ham living in that area or plan to be at the event, and if you are interested in volunteering, please visit marc.mmra.org on the World-WideWeb.(K1IW)

RADIO READING: BAY AREA RADIO

Arcadia Publishing is set to release "Bay Area Radio," detailing the key events and history of radio in the San Francisco Bay Area. The book highlights some of the area's early events, including Charles "Doc" Herrold's broadcasts in 1909 from his radio school in San Jose to a young NBC settling its West Coast headquarters in 1926.

"Bay Area Radio" was written by noted radio historian John F. Schneider with assistance from the California Historical Radio Society and the Bay Area Radio Museum. It goes on sale March 5.

(RW)

**

RADIO READING: A DOT OF BUTTER AND A DASH OF SPICE FIELD DAY COOKBOOK

And "A Dot of Butter and a Dash of Spice" is a new cookbook dedicated to Field Day culinary delights from UK amateur Steve Norman, M0MVB. In explaining his new work Norman says that as we all need to eat, he has combined his love of doing field day and of food by writing a BBQ cook book aimed at the ham radio operator. "A Dot of Butter and a Dash of Spice" contains over 100 recipes as well as covering what is the best BBQ to take on field days and loads of other help. Priced at £9.99 British Pounds or $15.75 US dollars, it can be ordered on-line in the United State from Amazon.com and other booksellers. (M0MVB)

**

NAMES IN THE NEWS: N6SL SAYS QCWA 40 METER CW NET SPPED LOWERED TO 15 WPM

Some names in the news. First up is Ben Russell, N6SL. He says via the Quarter Century Wireless Association's remailer that to encourage more participation the 40 meter QCWA 40 Meter CW Net hat the code speed has been reduced to approximately 15 words per minute. Russell, who is the Net Control Station, says that this net meets every Wednesday evening at 8 PM Eastern Time on 7 point 035 MHz +/- any QRM. Anyone interested in QCWA and its activities is invited to take part. (N6SL via QCWA Remailer)

**

NAMES IN THE NEWS: JIM LAPORTA, N1CC, NAMED NEW QCWA GENERAL MANAGER

Jim LaPorta, N1CC, of Marbank, Texas, has been selected as the new General Manager of the Quarter Century Wireless Association. He will

assume the position on or about March 26th. LaPorta replaces Chuck Walbridge, K1IGD, who will be terminating his current contract as General Manager on March 31st after seven years in that position. (N0UF)

**

HAM HAPPENINGS: HAPPY 5th BIRTHDAY TO REC.RADIO.AMATEUR.MODERATED

And a big happy birthday shout-out to the rec.radio.amateur.moderated Usenet newsgroup which will be five years old this month.

The group was founded on February 22, 2007. It was created as a moderated alternative to the chaotic problems on many of the un-moderated newsgroups of the time. Since then it has become a model that other hobby radio Newsgroups are attempting to emulate.

If you haven't participated on Usenet in a while you might want to take a look at rec.radio.amateur.moderated. Its quite a bit more mature than other hobby groups in the Usenet genre.

As an aside, Amateur Radio Newsline has been distributed on rec.radio.amateur.moderated almost since that Newsgroup was formed and we hope that we helped in some way in the group's long term success. (ARNewsline(tm))

**

HAM HAPPENINGS: SARL LEAP YEAR CHALLENGE

Hams are invited to take part in the South Africa Radio League-sponsored Leap Year Challenge on Wednesday February 29th. The challenge starts at 00:01 and ends at 23:59 South Africa Time. Modes acceptable include phone, CW and digital activity on all bands including HF, VHF, UHF and microwaves.

The objective is simply to make as many contacts as you can on this day. The rules permit you to work a station once only regardless of band, mode or call sign.

Logs go by e-mail to zs4bfn (at) netactive (dot) co (dot) za and must be received by midnight Friday March 2nd, 2012. A South Africa Radio League membership is up for grabs for the log received with the most QSO's made.

Also this reminder: If you do not take part, you will have to wait until 2016 to put the date February 29th into your logbook! (SARL)

EMERGING TECHNOLOGY: A SPRAY-ON ANTENNA

Ever found yourself without a signal and wished you could just spray one on like magic? Soon, you may be able to do just that. Michael Grebert, N4OZ is here with more:

--

Chamtech Enterprises, of Sandy, Utah, has developed a sprayon antenna material that it says is more lightweight and energy efficient than current technology.

Revealed at Google's inaugural "Solve for X" symposium, the company says than an antenna can be painted onto almost any surface including trees, walls and even on fabrics.

Chamtech says that it is already talking with governmentbased customers, and as such can't give too much detail on how it works. However it has released information that its material uses organic elements that have the ability to interact with magnetic and radio-frequency fields.

The company's Chief Technology Officer is Rhett Spencer. Spencer is quoted as saying the antenna could increase mobile energy efficiency by 10 percent. Also that it was found to work particularly well under water. Observers at the event say that being organic could make it ideal for subaquatic telecommunications infrastructure.

Prelimnary tests on current a generation cell phone showed that the product was able to boost signals by an impressive 20 dbm when painted over the standard internal antenna.

>From our point of view, for ham radio operators living in antenna restricted areas such as apartments or condominiums, the possibilities of a product such as this could be endless. All a ham might need is a bit of imagination and some of the spray-on antenna paint to get on the air with a signal much stronger than from the rubber duckie on his or her HT.

For the Amateur Radio Newsline, I'm Michael Grebert, N4OZ, not far from Music City, Nashville, Tennessee.

--

For more information about the Chamtech spray-on antenna material you can take your web browser to www.chamtechops.com. A video with a talk about the technology involved is on-line at tinyurl.com/spray-onantenna. (N4OZ, FutureTech)

**

HAM RADIO IN SPACE: ESA FIRST VEGA LAUNCH A SUCCESS

The maiden voyage of the European Space Agency's new Vega launch vehicle has successfully lofted a research satellite along with eight student built microsats into space.

The first Vega launch took place from the ESA spaceport in Korou, French Guiana at 10:00 UTC on Monday, February 13th. The primary payload was the Italian Space Agency's Laser Relativity Spacecraft. Its primary mission is the measurement of the Lense-Thirring effect, also known as frame-dragging. The satellite may also be used for measurements in the fields of Geodynamics and Satellite geodesy.

The secondary payload of the eight student-built MicroSats will transmit telemetry in the VHF, UHF and microwave amateur bands. One of the tiny birds named PW-Sat includes a voice repeater in addition to its telemetry transponder. Its uplink is at 435.020 MHz with its downlink at145.900 MHz. PW-Sat sends its telemetry using1200 baud packet as well as CW on 435.020 MHz. (ESA, AMSAT)

**

RADIO IN SPACE: RUSSIA SAYS RADIATION CAUSED PHOBOS-GRUNT FAILURE

Russia is blaming solar radiation for a computer glitch that doomed its Phobos-Grunt Mars moon mission, but space industry experts cast doubt on the findings of an investigation into the crash of what was to be Moscow's first deep space mission in two decades. Amateur Radio Newsline's Cheryl Lasek, K9BIK, reports:

--

The Phobos-Grunt spacecraft was stranded in Earth orbit after launch in November and crashed into the Pacific Ocean in January. Russian Space Agency Chief Vladimir Popovkin said that in the opinion of the commission, the most likely reason for the mishap was the local impact of heavily charged space particles that led to a failure in the memory of the main onboard computer in the second stage of flight.

Popovkin went on to say that foreign-made counterfeit or defective microchips were partly to blame for the failure of the $165-million spacecraft, designed to retrieve soil samples from the Martian moon Phobos. He said that a burst of space radiation caused the onboard computers to reboot and go into standby mode.

But others doubt this to be the case. Rather experts on spaceflight say that Moscow was blaming external factors for the loss of its ambitious Mars mission to distract from chronic failings with its

once-pioneering industry.

Alexander Zakharov, was the mission's lead scientist. He has been quoted as saying that even if this was the true which cannot be completely ruled out because it does happen, then there is some kind of problem with the flight system or the programming, which were not designed to guard against space radiation.

Another space industry source said potentially damaging bursts of radiation were highly unlikely in low-Earth orbit, where hundreds of satellites circle within the protective bubble of the planet's magnetic field.

But Russia's State News Agency has cited an industry source of its own. That unnamed source inferred that the critics are incorrect saying it was absurd to think that the PhobosGrunt had not been made to withstand cosmic rays on its two year interplanetary mission.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

The failure of the Phobos-Grunt spacecraft to leave Earth orbit was the latest in a series of mishaps that have plagued Russua's spavce program the past year. (Various published news reports)

WORLDBEAT: RADIO AUSTRALIA MAY BE BACK ON THE AIR FROM FIJI

Radio Australia may broadcast again from Fiji. Andy Sennit reports via the Media Network blog that Fiji's coup installed military government has signaled it is looking at allowing Radio Australia to broadcast inside the country again.

Power to the two transmitters, one in Nadi and the other in Suva, was switched off by the interim government in 2009, three years after the 2006 coup led by military commander Frank Bainimarama. But Fiji's permanent secretary of information, Sharon Smith Johns told Pacific Beat's Geraldine Coutts that she is looking at reversing the policy. (Media Network)

DX

In DX, Albania will be on the air during the 2012 CQ WPX SSB Contest. This with word that TA1HZ will operate from that nation as ZA1TC for the period of March 23rd to the 26th that includes the contest weekend. During his spare time outside the contest he will try to work some PSK31, especially on 30m band. Details and QSL info is on www.qrz.com.

Lastly, HA5PP will be active from Malta as 9H3PP

on May 26th and 27th during the CQ W W WPX CW

Contest as a SingleOperator Single-Band entry.

Activity outside of the contest will be on 6 and

12 meters, and possibly s 17 meters as well. QSL

via HA5PP.

(Above from various DX news sources)

THAT FINAL ITEM: COORDINATING THE SUPERBOWL

And finally this week, a tale of frequency coordination to the stars. Not the stars in the sky but those on the football field at this years Superbowl. It's also the story of the part played in the process by a number of Hoosier state radio amateurs. Here's Jack Parker, W8ISH:

--

INDY SUPER BOWL HAMS

Actuality Audio: "Check one two three four.This is about a team an organization.I've just gone from hotel to stadium..It was a great experience oversall."

--

>From mic checks to Manning to Madonna to the man on the street the airwaves around downtown Indianapolis were full of frequencies from over 3500 hundred transmitters. For two weeks prior to Super Bowl 46, and through the game itself, hundreds of radio and television stations were vying for radio spectrum in their efforts to cover the greatest show in professional football.

Keeping interference to a minimum is the job of the Super Bowl Frequency Coordination Committee. It is a team of 46 six, including 17 Amateur Radio operators from central Indiana. Their mission was to log, tag and tune all wireless transmitters from broadcast media from around the world.

As Super Bowl Sunday approached the job of preventing interference became a super task. The Indianapolis Super Bowl village, Lucas Oil Stadium and major hotels are located in a one mile square area. According to one volunteer, that is a lot of RF in a small area.

According to organizers the area of frequency control was expanded on game day stretching out about 30 miles into the suburbs of central Indiana.

The bottom line for all this effort, was to make sure the radio transmitters to each quarterback on the field was interference free throughout Super Bowl 46.

--

Actuality Audio: "Check one two..two..everyones good."

--

Reporting from Indianapolis, I'm Jack Parker, W8ISH.

--

Radio frequency coordination has become an important part of many broadcast sports, but few other than the Olympics require the amount of spectrum as does the Superbowl each year. (W8ISH)

http://books.google.com/books?id=L3mSCfXYNpgC&printsec=frontcover#v=onepage&q&f=false
British psychoanalyst Kahr (Senior Clinical Research Fellow in Psychotherapy
& Mental Health, Ctr. for Child Mental Health, London) has written the most
engrossing study of human sexuality since the Kinsey and Hite reports. To
investigate the role of sexual fantasies in the lives of people not
afflicted with mental illness, he surveyed 22,000 British and American
citizens. The resulting book is a fascinating collection of personal
narratives, along with the author's analysis of fantasy in everyday life.
Kahr examines the function of fantasy from a psychological perspective,
exploring the relationship between individual fantasies and experiences. He
concludes that there are 14 functions of sexual fantasy, including wish
fulfillment, self-comfort, and self-medication. Like Michael J. Bader's
Arousal: The Secret Logic of Sexual Fantasies and Iris and Steven Finz's
Unspoken Desires , this book is highly recommended for large public and
academic library collections.-Lynne F. Maxwell, Villanova Univ. Sch. of Law,
PA

"Nice" k'lame, but irrelevant, until it's substantiated with
undoctored pics of Gav, with and without Mark, at which time I shall
enjoy a bout of laughter at your expense, due to your raging
homophobic obsession. Until you can show how his marriage to either a

man or a tranny (assuming you can arrange to prove even that much) makes him a k00k, I shall continue to believe in your own unhinged homophobia. Indeed, since over five years of the Fan Club's foaming santorum have only served to substantiate your^H^H^H^Htheir kookiness, I'm inclined to dismiss any and all such k'lames as the usual gay lames emanating from RRAP like an endless series of SBD farts.

Snarky

Ah, post editing ala chilton. How long have you been sucking craigs
dick?

Yet another pwned fucktard thinks you can't read the previous poast
and see where they edited it. Thanks though for a brilliant tap dance.
Can you do it in black face next time?

> Sick fuck.

It sez while looking in a mirror.

You wear what looks like a buttplug on your head and still have the
gall to call someone a kook. Dude, you look deformed.. Did your mother
use thalidomide while she was pregnant with you or what? I did not
think I would find one of the elephant mans relatives in these froups.

> Blobby.

What the fuck is Blobby? You can't spell either. They probably kept
you locked in a closet rather than waste the time it would take to
attempt to educate you.

> Snarky

You are more like Snookie cupcake.

657> Newsgroups:
alt.slack.goathead,alt.usenet.kooks,rec.radio.amateur.policy,comp.os.os2.advocacy,alt.slac
k

657> Remember these guys?

657> "Ohhhhh, Yeeaah Yeeaaaah! Let me... Let me smell that shit, man.
657> Awwwww, fuck That's a hell of a lot better turn-on than those
657> poppers."

657> Again and again, the boy sniffed the stench into his lungs. His
lips
657> parted, his tongue crept out, curling spoon-like into the warm,
fresh
657> softness which only minutes earlier his stud's bowels had issued
to
657> him. Eagerly, he began to pull the brown waste into his hungry
mouth.

657> "Please, Sir! I'm hungry. I'm starving for that funky turd.

657> "Oh, Stud! Give it to me! Let mehave it! Make me take it from
you.
657> Tonight, I'm your shitlicker, turd sucker, crap-eater. Force me
to go
657> all the way in serving you." In the back of his mind he wished
this
657> scene could go on forever. Hs needed to be possessed by a man who
657> could really put him to use.

657> "That's it! Do your worst, Stud!"

657> "Jerk my yearning jaws open, stuff my hungry mouth with that
beautiful
657> offering from your big, hairy, full shitter. "Yeah, force-feed
me!
657> Shit fuck my crap craving mouth."

657> "All of it, Mister."

657> "Son-of-a-bitch, I want to eat all of it. Shove it on me; push it
down
657> my throat. Use me as your filthy toilet, Sir."

657> "Look at me, SIR!"

657> "Look at your shit in my mouth. Now you know me for the kind of kid I
657> really am, so put me through your paces. Don't let me miss anything."

657> "Oh, Yesssss! Use me! Make me serve you, your buddies."

657> "Come-on, shit-face! Chew that fucking load up. Swallow that turd
657> slowly or I'll cram this huge ram of mine inside that full mouth and
657> pile-drive every bit of that shit straight down into your waiting
657> belly.

657> "That's it, boy! Take it slow. There's a hell of a lot more where that
657> came from, and I want to give it all to you before the night's over."

657> What a fucking turn-on this kid had become, laying there on the floor,
657> chewing up the last of the giant turd, his enormous horse-like pecker
657> clutched in his grimy hand.

657> From the rock hard erection he was displaying, to the look of total
657> satisfaction across his face, it was easy to see that he was enjoying
657> the hell out of everything that was happening to him.

657> Swallowing the last of the stud's load, he looked up and saw the man
657> laid back not far from him.

657> Slithering across the floor, he cried out, "Let me lick your filthy
657> hole clean, SIR. Oh, SIR! Push more shit into my mouth. MORE! MORE
657> SHIT!!!"

657> "I'm so fucking hungry, hungry for your shit."

657> He loved groveling on the floor before this filthy asshole. He needed
657> to be dominated, used, abused.

657> "MORE!" This time it was the tongue raped man making the demand.
657> "MORE! Use your fist!"

657> "That's right, fucker. There's a lot more shit up this big butthole of
657> mine, but you've gotta dive in there and get it yourself."

657> Knowing exactly what had to be done, the kid quickly reached out,
657> scooping up as much of the softened shit and slimy spit as he

could
657> find, and began smearing the gooey mixture around the gaping
crapper.

657> Forming a giant wedge, the fingers began sliding inside the man's
butt
657> as he strained to take them all the way.

657> "Come-on, Shit-Freak, work on that asshole," the guy cried as he
felt
657> the fist turning, twisting, pumping deep inside his shit tunnel.

657> It was obvious that he was really getting off on it the way he
kept
657> moaning, working his own body on it as he jerked his own fist up
and
657> down the colossal column of hard, rigid flesh which was
stretching
657> straight upward from his overgheated crotch.

657> "That's it, boy! Spread that big ass apart and search for your
657> dinner."
657> "Yeah! Fuck the living shit out of my hole.

657> Hs felt the kid's fist sliding in and out of his butthole and
knew
657> that he was driving beyond the wrist, working in a big part of
his
657> forearm.

657> Pushing down, he tried to suck more of the arm with his eager
hole.

657> The kid loved the way the taut asscheeks were working up and
down,
657> around his impaling fist, but he was anxious to get his whole
face in
657> there.

657> Hs pulled back, the asshole clutching, bulging outward like a
giant
657> pair of brown, puckered lips.

657> The steaming chute didn't want to let go of that plunging raper,
that
657> plowing fist. Twisting around onto his knees, the fisted guy,
half-
657> demanding, half pleading, cried out, "I want this asshole fucked
wide
657> open. Bust it with something. Get something big and shove it in
there.

657> Spotting an enormous rubber dick laying in the corner, the kid grabbed
657> it. "You sure you want this dildo?" he asked.

657> The man turned his head so that he could get a good Look at the size
657> of it. "Hell, never in my life have I seen one as big as that, but I
657> know that I want to have it. Yeah, I have to see what it's gonna feel
657> like in my ass."

657> He started moving his ass beck and forth, grinding the huge set of
657> lips against the head of the dildo.

657> "Come-on, kid! I can't wait to have you bust my ass with that thing."

657> "Shit, man! You got some big, fucking asshole," the kid moaned as he
657> screwed the incredible head of that gigantic dick all the way through
657> the extraordinary sphincter.

657> Squirming, thrusting, bucking with his hips, he wanted it! He wanted
657> it all! He wanted it bad and the kid sure as hell was not going to
657> hold back. No! He rammed the rubber dick into the man's gut with
657> unrelenting fury, pounding the shit out of the super eager butthole.

657> Harder and harder, deeper and deeper, he pummeled the stud's asshole
657> with the big, thick tool watching as his panting became very rapid as
657> if he were suffering uncontrollable pain, but his cries were those of
657> sheer, unabated pleasure.

657> "Go down on it, kid! You can take it! Hell, that grubby mouth of yours
657> is every bit as big as my crapper. So, if I can take it, you can,
657> too."

657> All the kid could think of was shit as he strained, his jaws aching,
657> fucking the dildo in and out between his lips. The deep ramming caused
657> him to gag. Shitty vomit rose into the back of his mouth, and he
657> swallowed, reeating the bellyful, time and time again.

657> He had lost control, didn't care any longer how he was used. Any time,
657> any place, any way, this shit fucking stud could have him, could use
657> him, could give him away to be used by others. He had found what he
657> needed. Now he would find a way to hold onto it.

657> Unconscious of what was happening, he suddenly realized that he had
657> taken his own prick into his hand, and without moving a finger, he had
657> bolted a. long, sticky, steamy supply of scum out of his horse-dick
657> and across his body. Humbled but totally unashamed of all that had
657> happened, he lay at the feet of his STUD.

What does any of that have to do with

==> + LEGISLATIVE NEWS: PAYROLL TAX BILL INCLUDES PROVISION FOR AMATEUR
RADIO STUDY

A bill that passed both the House and the Senate on February 17 -- and
signed into law by President Obama on Wednesday, February 22 --
includes a provision for a study of the uses and capabilities of
Amateur Radio Service communications in emergencies and disaster
relief.

Section 6414 of the Middle Class Tax Relief and Job Creation Act of
2012 mandates the completion of the study, with a report of the
findings to the House Committee on Energy and Commerce and the Senate
Committee on Commerce, Science, and Transportation. This study would
"use the expertise of stakeholder entities and organizations" to
recommend how to best use radio amateurs in emergency communications
```

and disaster relief efforts, and how to best utilize the Amateur Radio Service in coordination with the federal government in these efforts. In addition, the study would also discuss the effects of unreasonable or unnecessary private land use restrictions on residential antenna installations and recommend ways to remove such impediments.

The bill passed in the House by a vote of 293-132. In the Senate, it passed by a 60-36 vote. Read more here <http://www.arrl.org/news/payroll-tax-bill-includes-provision-for-amateur-radio-study>.

==> + ON THE AIR: REPUBLIC OF SOUTH SUDAN ASSIGNED Z8 PREFIX

After a wait of more than seven months after being accepted as a member of the United Nations <http://www.arrl.org/news/the-republic-of-south-sudan-is-now-a-dxcc-entity>, the Republic of South Sudan received its prefix block from the International Telecommunication Union <http://www.itu.int/online/mms/glad/cga_callsign.sh?lang=en> (ITU): Z8. On July 14, 2011 -- after South Sudan's admittance to the UN -- the new country became a DXCC entity by way of Section II, 1(a) of the DXCC rules <http://www.arrl.org/rules>. -- Thanks to The Daily DX for the information

==> + ON THE AIR: ONE DOWN, ONE TO GO: THE ARRL INTERNATIONAL DX CONTEST GEARS UP FOR SSB

With the CW portion <http://www.arrl.org/news/the-2012-arrl-international-dx-cw-contest-takes-to-the-air-next-weekend> of the ARRL International DX Contest <http://www.arrl.org/arrl-dx> now a series of fading dits and dahs in the memories of participants, preparations for the SSB portion of the DX Contest -- the weekend of March 3-4 -- are already underway.

According to ARRL Contest Branch Manager Sean Kutzko, KX9X, for this contest, stations in the US and Canada work only DX stations, and DX stations work only the US and Canada; Alaska and Hawaii are considered DX for this contest. DX stations will be trying to make QSOs with all US states and Canadian provinces. The contest exchange is simple: US and Canadian stations send a signal report and their state or province, while DX stations send a signal report and the amount of power they are transmitting with.

"The CW portion had a lot of twists and turns," Kutzko recounted. "The solar flux index was down considerably from the great conditions we experienced in the last quarter of 2011. We were also dealt a blow with a solar storm on Saturday afternoon, generating some strange phenomena on the bands. Ten meters -- which earlier in the contest season was open to Europe and Asia for hours at a time -- barely showed up this past weekend. Despite all of this, hams worked tons of DX on 15 and even 10 meters."

Will these conditions improve? It's hard to say -- the SFI remains around 100, and just a week before the contest, the A and K indices are reasonably low. "Check the K7RA Solar Update each Friday on the ARRL website for the most current solar forecast," Kutzko advised. "But one thing is for certain: The number of participants in the 2011-2012 contest season has exploded, and more activity means lots of DX."

The ARRL International DX SSB Contest <http://www.arrl.org/arrl-dx> runs from 0000 UTC Saturday, March 3 to 2359 UTC Sunday, March 4. Complete rules and forms can be found online <http://www.arrl.org/contest-rules>. Electronic logs should be submitted via e-mail <dxphone@arrl.org>; paper logs can be sent to ARRL DX SSB Contest, 225 Main St, Newington, CT 06111. Paper logs must be postmarked no later than 0000 UTC Tuesday, April 3, 2012.

==> +HAM RADIO IN HOLLYWOOD: BLOCKBUSTER MOVIE FEATURES MORSE CODE, HOMEBREW EQUIPMENT -- AND SEA MONSTERS!

In the movie Journey 2: The Mysterious Island, Sean Anderson (played by Josh Hutcherson) receives a coded distress signal that comes from a mysterious island where no island should exist. Sean decides to follow the signal with the unwilling assistance from his stepfather Hank (played by Dwayne "The Rock" Johnson).

The movie opens in Dayton, Ohio with Sean on his motorcycle, being chased by police officers. Sean had been caught breaking in to a "satellite facility." When questioned by Hank, Sean confesses that he had received a coded message from his grandfather (played by Michael Caine), but his equipment was too weak to copy it; he decided to go somewhere where there were bigger antennas. The message -- a string of one and two syllable words taken from the books of Jules Verne -- makes no sense to Sean. Hank, a former US Navy cryptographer, offers to help decode the message; he feels this will be a good chance to bond with his stepson.

Immediately, Hank figures out that the message is really in Morse code: each one syllable word is a "dit," while each two syllable word is a "dah." Hank translates the message, which gives clues to the location of the grandfather's whereabouts. Read more here <http://www.arrl.org/news/hollywood-movie-features-morse-code-homebrew-equipment-and-sea-monsters>.

==> + W1AW: MARCH QUALIFYING RUNS

The W1AW and West Coast Qualifying Runs were inadvertently left out of the March 2012 issue of QST. Here is the missing information:

W1AW Qualifying Runs are 10 PM EST Friday, March 9 (0300 UTC March 10) (10-40 WPM) and 7 PM EDT (2300 UTC) Tuesday, March 20. The West Coast Qualifying Run will be transmitted by station K6KPH on 3581.5, 7047.5, 14047.5, 18097.5 and 21067.5 kHz at 2 PM PDT (2200 UTC) Saturday, March 17. Unless indicated otherwise, speeds are from 10-35 WPM. You can find the upcoming schedule here <http://www.arrl.org/qualifying-run-schedule>.

==> + SECTION MANAGER WINTER ELECTION RESULTS

Two ARRL Sections -- Eastern Pennsylvania and Louisiana -- will get new Section Managers as of April 1, 2012. Two other Sections -- San Diego and Virginia -- will keep their incumbent Section Managers. Ballots for these races were counted Tuesday, February 21 at ARRL Headquarters. Read more here <http://www.arrl.org/news/section-managers-winter-election-results>.

==> SOLAR UPDATE

Tad "Behind the clouds the Sun is shining <http://www.youtube.com/watch?v=7b6fBnPmhmc>" Cook, K7RA, reports: We don't know if this is a significant trend, but solar activity has really leveled off recently. Not everyone is unhappy about this: During the recent long minimum, 160 and 80 meter operators were very excited about conditions, and that enthusiasm seems to have increased of late. The average indicators this week were almost exactly the same as last. The average daily sunspot number rose from 55.6 to 55.7, while the average daily solar flux declined 2.6 points to 105. In an unusual coincidence, the average planetary A index and mid-latitude numbers were the same this week as last, 8 and 6.7 The latest prediction shows solar flux at 105 on February 23-24, 100 on February 25, 95 on February 26-29, 100 on March 1-4, 105 on March 5-11, 110 on March 12-13, and rising to 115 on March 14-19. The prediction also sees planetary A index at 8 on February 23, 5 on February 24-28, 7 on February 29, 5 on March 1, 8 on March 2-3, and 5 on March 4-6. Look for more information on the ARRL website on Friday, February 24. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Disney's Cars <http://en.wikipedia.org/wiki/Disney_Cars>.

==> THIS WEEK IN RADIOSPORT

This week:

- February 24 -- NCCC Sprint Ladder
- February 24-26 -- CQ 160 Meter Contest (SSB)
- February 25-26 -- Mississippi QSO Party; North American QSO Party (RTTY); REF Contest (SSB); UBA DX Contest (CW)
- February 26 -- High Speed Club CW Contest; SARL Digital Contest
- February 26-27 -- North Carolina QSO Party
- February 27 -- CQC Winter QSO Sprint

Next week:

- March 3 -- Wake-Up! QRP Sprint
- March 3-4 -- ARRL International DX Contest (SSB) <http://www.arrl.org/arrl-dx>
- March 4 -- DARC 10 Meter Digital Contest
- March 6 -- ARS Spartan Sprint; AGCW YL-CW Party

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> SILENT KEY: BILL SIMONS, W9BB, SILENT KEY; DEVELOPED SHURE MICROPHONES

William A. Simons, W9BB (ex-W9YXJ), passed away in Minnesota on January 2. He was 84. He earned his Class B ticket in 1941 at the age of 14 and converted a cathedral radio into his first transmitter. Later, Simons earned DXCC using homebrew gear of his own design. Eventually, he earned a top spot on the ARRL DXCC Honor Roll. Read more here <http://www.arrl.org/news/bill-simons-w9bb-silent-key-developed-shure-microphones>.

62> Classic erroneous supposition that I made a classic erroneous
62> presupposition, Tholen.

Incorrect, given your claim that I misattributed something that I
did not, in fact, misattribute, miguel.

62> The irony is that you told another poster that since you asked
your
62> question first, he was required to answer it.

Classic unsubstantaited and erroneous claim.

62> Yet I asked you first to prove that you're not a tool.

And I asked you about the relevance of your question to OS/2, miguel.

62> So far you've engaged in classic evasions to my simple request.

How ironic, coming from the person who has engaged in classic evasions
to the question of newsgroup relevance.

62> So, Tholen, prove you are not a tool.

What does your demand have to do with alt.slack,
alt.usenet.kooks,rec.radio.amateur.policy,
comp.os.os2.advocacy, miguel?

RADIO LAW: A PERMANENT 5 MHZ HAM ALLOCATION TO BE DISCUSSED AT WRC-15

Some more good news out of Geneva, Switzerland. Somewhat overshadowed by last weeks announcement of the approval of a new ham radio band from 472 to 479 kHz at the now concluded WRC-12 comes word that yet another possible new ham radio allocation near 5 MHz. One that could become a reality at the next World Radio Communications Conference to be held in 2015. Amateur Radio Newsline's Heather Butera-Howell, KB3TZD, has the details:

--

The band being proposed is from 5.250 to 5.450 MHz. According to ARRL Chief Executive Officer David Sumner, K1ZZ, who attended WRC-12, the original proposal came from Cuba.

In the ARRL Letter Sumner is quoted as saying that the International Amateur Radio Union team worked hard to line up support for this item. He said that the factor that worked most in their favor was that at W-R-C 07, a proposal for a 5 MHz agenda item for WRC-12 failed to gain enough support. As such, there was a feeling that the Amateur Service deserved better treatment this time around.

Sumner noted that there was active support from a number of administrations in Latin America which helped a lot, but a lot of others also had to agree to get it on the agenda. The coordinators of future Agenda Items on behalf of the regional telecommunications organizations, such as CITEL and CEPT, eventually agreed on a package of Agenda Items that included this item.

Tim Ellam, VE6SH, is the President of the International Amateur Radio Union. He noted that it always a challenge to have things placed on the agenda for future World Radiocommunication Conferences. As such Ellam says that that he is pleased that we were successful in having an Agenda Item for a potential allocation at 5 MHz on a secondary basis on the agenda.

Ellam does however caution that there will be a lot of work to do over the next International Telecommunications Union study group cycle. He adds that there is much appreciation is owed to the International Amateur Radio Union and the national delegation teams in Geneva for their hard work on this issue.

For the Amateur Radio Newsline, I'm Heather Butera-Howell, KB3TZD, near Pittsburg Pennsylvania.

--

The permanent 5 MHz amateur band proposal will be Agenda Item 1.4 at WRC-15. More about it and the rest of what took place at the 2012 conference is on line at the ARRL website. A direct link to the story is at tinyurl.com/wrc-2012-wrapup. (ARRL)

**

RADIO LAW: REPUBLIC OF THE SOUTH SUDAN AWARDED Z8A TO Z8Z CALL SIGN BLOCK

The International Telecommunication Union has announced the official callsign allocation prefix block for the newly crated nation of the Republic of South Sudan will be Z8A through Z8Z. The Republic of South Sudan joined the United Nations on July 14, 2011 at which time it became the 193rd member of that august world body. (Facebook DX Forum)

**

RADIO FUNDING: FCC ASKS $346,000,000 BUDGET FOR FISCAL YEAR 2013

The Federal Communications Commission is asking Congress for more money to ramp up its operations including enforcement. Its also talking new license fees. Amateur Radio Newsline's Bruce Tennant, K6PZW, has the details:

--

The FCC has asked Congress to approve a 2013 fiscal year budget of $346 million. That compares to an approximate $6 million increase over the approximate $340 million the agency received for fiscal year 2012.

If approved as is by Congress, there would be 141 new FCC staff members, bringing the total to 1,917 over the current 1,776. The number of full-time staffers at the Media Bureau would increase from 197 to 213. The Enforcement Bureau would go from 276 to 299 and the Office of Engineering & Technology would increase from the current 81 to 87 staffers.

Part of the money would also be used for eight new vehicles and to replace obsolete signal analysis equipment with new direction-finding and wireless monitoring gear in existing vehicles. These are the mobile units that field agents use to detect unauthorized transmissions and resolve interference issues.

The commission would also have new authority to set user fees on un-auctioned spectrum licenses as a spectrum management tool. Fees would be phased in over time to determine the appropriate application and the monetary amount.

The FCC tentatively plans to begin levying such fees sometime this year, and estimate those could total $4.8 billion through 2022. Its unknown if such licensing fees would or even could be applied to Amateur Service, FRS or 11 meter Citizens Band operations. The latter two would be highly unlikely due to the non-licensed nature of operations on those bands. Amateur Radio is already bringing in a profit through the Vanity Callsign program.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

The agency's budget request is part of President Obama's total budget submission of $3.8 trillion for fiscal year 2013, which begins October 1st. (RW)

**

RADIO FUNDING: BROADCAST BOARD OF GOVERNORS SUBMITS REDUCED BUDGET

The United States Broadcasting Board of Governors which oversees government supported broadcasts to other parts of the world has sent its 2013 fiscal year budget request to congress. The $720 million request is lower than its 2012 budget and includes program, transmission and staffing reductions at the Voice of America, Office of Cuba Broadcasting, Radio Free Europe, Radio Liberty, Radio Free Asia and the Middle East Broadcasting Network. Four broadcast language services are proposed for elimination including both Greek and Chechen. The 2013 request also calls for another $21 million in cuts in administrative and technical support services costs across the agency and of the board itself.

But what's not going into on the air operations has another destination. Referring to the so called new media, the 2013 budget request contains $9 million in increases for elevated social media and building out the agency's digital infrastructure. It also asks for $11.6 million in fighting Internet censorship.

The Broadcasting Board of Governors estimates the five government funded civilian broadcast networks it oversees currently reach 187 million people each week. Its 2013 budget request contains an overall 4 point 2% decrease over current spending levels that the Board hopes

will be enough to meet the approval on Capitol Hill in this era of extreme economic austerity. (B&C)

**

COMMUNICATIONS LAW: NHTSA PROPOSES VOLUNTARY ANTI DISTRACTED DRIVING GUIDELINES

Ham radio operators and other two-way radio users can breathe a proverbial sigh of relief. At least for now. This with word that the National Highway Traffic Safety Administration will not seek mandatory regulations regarding what types of technology controls will be placed on auto makers to help thwart distracted drivers. Instead they are issuing voluntary guidelines to the auto makers as we hear from Amateur Radio Newsline's Cheryl Lasek, K9BIK.

--

The National Highway Traffic Safety Administration has proposed voluntary safety guidelines for auto manufacturers, including a recommendation that they design dashboards so that distracting devices are automatically disabled unless the vehicle is stopped and the transmission is in park.

The guidelines, which are directed at passenger cars and sport utility vehicles, would exempt safety devices such as electronic warning systems that alert drivers to potential collisions or lane changes. GPS and other navigation devices that provide directions also would be permitted while driving, but the safety administration is asking that the systems be designed so drivers can't manually enter a destination unless the car is in park.

Other dashboard technologies recommended for automatic disabling include text-messaging, Internet browsing, social media browsing, phone dialing and computer screen messages of 30 characters or more that are unrelated to driving.

The guidelines would make exceptions for these devices if they are designed only for use by passengers and can't be accessed or seen by the driver. Also there is no mention of any cutoff to external power receptacles such as cigarette lighters which are used by many hams, CB'ers and G-M-R-S operators to power low-power two way transceivers.

David Strickland is the groups Administrator. He told the press that while his agency recognizes that manufacturers want to build vehicles that include the tools and conveniences expected by today's American drivers, that the guidelines they are proposing would offer real-world guidance to automakers. Also that it would help them develop electronic devices that provide features consumers want without disrupting a driver's attention or sacrificing safety.

Manufacturers also are urged to take steps to improve the safety of technologies that drivers are allowed to use while driving. That

includes reducing to two seconds or less the amount of time drivers must divert their eyes from the road to use a device. Devices should be designed so drivers don't have to use more than one hand or glance through extraneous information.

According to Transportation Secretary Ray LaHood, one reason National Highway Traffic Safety Administration decided to pursue voluntary guidelines instead of mandatory rules is that officials wanted to do something quickly. He noted that the process for writing federal rules often takes years to complete.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, near Zion Illinois.

--

The final impact these new guidelines on the ability of hams to permanently install after-market two way radio gear in their vehicles will not be known until the new designs appear in car showrooms. And that's likely several years away. (NHSTA release, other published reports)

YHOTY: NOMINATIONS SOUGHT FOR 2012 AMATEUR RADIO NEWSLINE YOUNG HAM OF THE YEAR

The nominating season for the 2012 Amateur Radio Newsline Young Ham of the Year Award is now open.

Created in 1986, this award is offered to recognize the accomplishments of a radio amateur age 18 or younger for his or her accomplishments in service to the nation, his or her community or to the advancement of the state of the art through amateur radio.

Nominees must reside in the United States 50 states or its possessions or in any of the 10 Canadian provinces.

As in years past, Yaesu USA will transport the winner to the Huntsville Hamfest in Huntsville , Alabama, where the award will be formally presented. Yaesu will also provide Hotel accommodations as well as convention tickets and a prize of amateur radio equipment to the winner. CQ Magazine will again treat this year's recipient to a week at Spacecamp-Huntsville. Heil Sound Ltd. will be presenting this year's winner with an additional prize. Amateur Radio Newsline will present

the winner with the official Young Ham of the Year Award plaque which again this year is underwritten by Dave Bell, W6AQ, of DBA Entertainment in Hollywood, California.

If for some reason the person selected is unable to travel to the Huntsville Hamfest, Amateur Radio Newsline will attempt to arrange a special award ceremony where the recipient resides, such as at his or her school or amateur radio club.

Please note that the prizes given to the recipient are second in nature to the actual Young Ham of the Year Award. All nominations and materials required by the official rules must be received by ARNewsline before May 30, 2012.

Complete details, rules and a required nominating form in Adobe .pdf format are available on our website at www.arnewsline.org/yhoty. Nominating forms can also be obtained by sending a self addressed stamped envelope to Amateur Radio Newsline Inc., Young Ham of the Year Award, 28197 Robin Avenue, Santa Clarita California, 91350.

Please note tat all nominating forms and support materials become the property of the Amateur Radio Newsline and cannot be returned.

Again the cutoff date for nominations is May 30, 2012. Nominating forms are on-line at www.arnewsline.org/yhoty. (ARNewsline(tm))

**
ENFORCEMENT: FCC WANTS ANSWERS ABOUT WISCONSIN FM TRANSLATOR

The commission's Media Bureau wants answers from Radio Power Inc. about W250BN, a translator on 97.9 MHz in Wisconsin. The translator started out in the city of Beloit is now living on the air in West Allis. This after a series of moves in the last two years. Amateur Radio Newsline's Don Carlson, KQ6FM, is in Reno, Nevada, where Power Radio has its headquarters:

--

Last November the Milwaukee Free Radio Group wrote to the FCC, calling Radio Power's actions in relocating its translator from site to site a preconceived scheme to move a translator a distance of 69 miles from Beloit to Milwaukee. It insinuated that Radio Power was trying to accomplish this by using minor changes so as to circumvent the requirement to wait for a window for filing a major change.

Now the FCC is acting. Peter Doyle is the chief of the FCC's Audio Division of the Media Bureau. He has sent what is described as a strongly worded, certified letter to Radio Power in Reno, Nevada. In part the letter states that the Media Bureau is investigating potential statutory and rule violations and related instances of potential misrepresentation and/or lack of candor on the part of Radio Power Inc. Specifically, it is alleged that the licensee abused commission processes by effectuating a major change in the facilities of Station

W250BN, now licensed to West Allis, Wisconsin by a succession of serial minor change applications.

The FCC told Radio Power to answer its questions within 30 days. It wants to know if Radio Power had a reasonable assurance that the specified sites would be available for the intended use. It demanded a copy of all documents relating to the securing of reasonable assurance of site availability; and it wants to know the precise length of time during which the licensee broadcast from each of the facilities.

The FCC also wants a copy of any documents relating to the station's operation for each of the locations The FCC also wants to know the precise length of time during which the station was silent for more than 30 days, and why.

For the Amateur Radio Newsline I'm Don Carlson, KQ6FM, in Reno.

--

The FCC also wants to know what community the licensee of W250BN ultimately intends to serve, the primary station it intends to rebroadcast along with copies of all documents relating to the relocation of the station away from the city of Beloit. (FCC, RW)

**

RADIO LAW: CONGRESS TO INVESTIGATE FCC OVER LIGHTSQUARED FAST TRACK

The FCC appears to be on the hot seat with congress over the way its been handling the entire matter of the licensing of LightSquared's proposal to create its high speed Internet service in spectrum adjacent to that used by the Global Positioning System or GPS.

In an e-mailed press statement, Iowa Senator Charles Grassley who has been investigating the FCC's interactions with LightSquared, said that the agency put this project on a fast track for approval with what appears to have been completely inadequate technical research. As a result, Grassley is blocking two Obama administration Commission nominees until he gets more documents about the matter from the FCC.

Now the House of Representatives is also about to look at the LightSquared matter. Oregon Representative Greg Walden, W7EQI, chairs the House Subcommittee on Communications and Technology. He has said that he plans a hearing on how the agency's handling of the LightSquared application for its broadband network led to a year of dispute. (Published reports)

**

ENFORCEMENT: SOME PEOPLE DO NOT LEARN THE FIRST TIME

>From the some people never learn file comes a story you may find hard to believe. It's about a person to who after being accused of running an unlicensed station and then paying a reduced fine apparently went

right back on the air again. Jim Damron, N8TMW, reports:

--

ENFORCEMENT: FCC ISSUES A FLURRY OF FLORIDA FINES

There's been a lot of unlicensed radio station fines issued by the FCC's Enforcement Bureau to Florida residents in recent weeks.

The Commission has issued a new $25,000 Notice of Apparent Liability against Whistler Fleurinor of Ft. Lauderdale, Florida. This for allegedly operating an unlicensed transmitter on 99.5 MHz in 2011.

The agency says that it raised the fine by $15,000 over the base amount because Fleurinor continued operating an illegal station on the same frequency from the same commercial property after he was issued an earlier fine of $20,000. In that instance, the FCC lowered the penalty to $500 based on Fleurinor's proof of inability to pay the higher assessment.

In issuing the new forfeiture order the FCC noted that the fact that Fleurinor had again committed the same violation, and did so multiple times after he had already been found to be in serious violation in the first N-A-L. It said that this action by Fleurinor demonstrated not only the egregiousness nature of the violations, but also his deliberate disregard for the Communications Act and for the FCC's rules.

For the amateur Radio Newsline, I'm Jim Damron, N8TMW, reporting.

--

Fleurinor was given the customary 30 days to pay the fine or to file an appeal. If he does the latter and basses his appeal on his inability to pay, it will be very interesting to see the FCC's response this time around. (FCC)

**

HAM HAPPENINGS: W7W CELEBRATES ARIZONA STATEHOOD CENTENNIAL FEB 25

Arizona's Superstition Amateur Radio Club will be operating a special event station W7W on February 25th as in the city of Mesa. This is the annual celebration of The Lost Dutchman Mine story at the museum in Apache Junction. It is also in observance of the Arizona Statehood Centennial . More information can be found on line at WB7TJD.org. (K2DFE)

**

HAM HAPPENINGS: SEVHFS CONFERENCE REGISTRATION OPEN

Registration is now open for the 2012 Southeastern VHF Society Conference slated for Charlotte, North Carolina, from April 20th to the 21st. The meeting will feature technical programs, noise figure and

antenna gain testing, banquet prizes, vendor displays, and an equipment auction. ARRL President Kay Cragie, N3KN, will be the banquet speaker. A downloadable registration form in Adobe .pdf format is on-line at tinyurl.com/southeastern-vhf (WA2ODO, VHF Reflector)

**

HAM HAPPENINGS: IOTA DINNER AT THE INTERNATIONAL DX CONVENTION

The 17th annual Islands on the Air or IOTA Dinner will be held in conjunction with the 63rd annual Visalia International DX Convention on Friday evening April 20th. The venue will be the Plaza Room of the Holiday Inn Hotel on Airport Drive in Visalia, California

This dinner is open to all who are active in the Islands on the Air program or who just want to see beautiful pictures of far away islands. Also, as at previous IOTA dinners, admission is free for those wishing to watch the programs without dining but paid attendees will receive priority seating.

At this time, buffet service is set for 50 attendees. The cost is $33 per person. Reservations must be prepaid by April 10th and go to Ray Benny, N6VR, 462 South Reed Road, Chino Valley, Arizona, 86323.

More about this years International DX Convention is on-line at dxconvention.org. (IOTA)

NAMES IN THE NEWS: ZL1TGC ASCENDS TO NZART PRESIDENCY

Some names in the news: First up is Vaughan Henderson, ZL1TGC, who has assumed the presidency of New Zealand's national society, the NZART. This following the resignation of Roy Symon ZL2KH on Monday, February 20th.

According to a press release, Symon had served as NZART President for the last three years and was completing his last term. He was due to finish at the 2013 Annual General Meeting where he had planned to hand over to his successor. Instead he tendered his resignation to the NZART citing personal reasons.

In accordance with the organization's constitution, ZL1TGC who was serving as Vice-President became the new President. The NZART Executive Council will now have to elect a new Vice-President. (NZART)

**

NAMES IN THE NEWS: WA6ILE AND KG6YPI TO SPEAKER MONTEREY RADIOFEST

Back in the United States, Scott Avery, WA6LIE and Brandon Hansen, KG6YPI will be guest speakers at the New Ham Forum at his years Radiofest being held in Monterey, California, on March 3rd. The two will be discussing remote radio operations and its applications. More information is on-line at www.raiofest.org. (WA6LIE)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

WORLDBEAT: D-STAR COMES TO NAMIBIA

D-Star is truly going places where it has never been before. This with word that radio amateurs in Windhoek, Namibia now have their own D-Star repeater operational and on the air.

Reportedly, the biggest challenge to getting the system operational was obtaining a stable data connection to the internet. This was solved with a 3G connection and the help of the biggest cellular telephone service provider in Namibia.

Right now the system is at a temporary low level location. According to V51JP, the Repeater will be moved to its final site as soon as everyone is satisfied that it is performing correctly. V51JP also says that he thanks DL1YBL and DL5DI for their assistance in getting the new D-Star repeater up and running.

More about this new D-Star system in Namibia is on-line www.qsl.net/narl. (V51JP)

**

WORLDBEAT: QF RADIO TO SWITCH FORMATS ON FM

QF Radio will launch an all-English broadcast on 91.7 FM in Quatar. The station is an operation of the Qatar Foundation, a social and educational foundation based in Qatar. It delivers its programs across all segments of society by means of on-air broadcasts, the Internet, smart-phones and other developing technologies. In addition to music and news, the station airs programs for students, featuring cultural and scientific issues. The station will also switch to an all Arabic format on 93.7 FM, where it currently airs a mix of Arabic and English-language programming. (MN)

**

WORLDBEAT: ITU ENACTS NEW RULE TO STOP SATELLITE JAMMING

The International Telecommunication Union has called upon the world's nations to take all 'necessary actions to stop intentional interference with satellite transmissions. The change in regulations, which was approved at the just concluded World Radiocommunication Conference came after numerous complaints that international satellite TV programs in

the Persian and Arabic languages were suffering from deliberate interference.

The new rule says that administrations shall ascertain the facts and take the necessary actions when they encounter jamming. What actions these might be were not spelled out in the document.

The two satellite operators that have been targeted are Eutelsat and Arabsat. They claim that the jamming signals originate from Iran and Syria. The interference, which has increased since September, 2011, has affected numerous broadcasters including programming from the British Broadcasting Corporation, Germany's Deutsche Welle, and RFE's Radio Farda.

Joining in backing the revised ITU anti-jamming rule to fight this willful and malicious interference to satellite transmissions were Radio Netherlands Worldwide and the European Broadcasting Union. (MN)

**

WORLDBEAT: PHILIPPINE ARC CELEBRATES GOLDEN ANNIVERSARY

The Philippine Amateur Radio League is celebrating its Golden Anniversary in 2012. To commemorate this milestone the organization is sponsoring an on-the-air operation that will award a special commemorative certificate to hams world-wide who make contact with its members.

Also throughout 2012 the club will be operating with the special event call sign of 4G0LD. QSL information along with the rules to qualify for the Golden Anniversary award can be found at www.dx1l.dxhams.net/Awards.htm (DU1XX, NZART)

**

RADIOSPORTS: SARL DIGITAL CONTEST FEBRUARY 26

>From the Radiosports file comes word that the first in the series of South African Radio League sponsored digital contests will be held on Sunday, February 26 from 13:00 to 16:00 UTC with PSK and RTTY activity on 80, 40 and 20 meters. The exchange is a simple R-S-T report and a serial number starting at 001. Stations maybe contacted twice per band, once on PSK and once on RTTY. Other contests date will be announced in the future. More is on-line at www.sarl.za. (SARL)

**

HAM TECHNOLOGY: COLORADO 6 METER BEACON BACK ON FREQUENCY

Dave Clingerman, W6OAL, reports that the Colorado 6 meter beacon is back up and running on its published frequency of 50.065 MHz. The beacon had gone into wander mode for a few days after a suspected crystal oven failure had it sliding around its normal operating frequency.

According to W6OAL, a spare local oscillator unit can sometimes come in handy. Installing it apparently was the fix. Dave adds that beacon reports are appreciated whenever the band is open. (VHF Reflector)

**

DX

In DX, word that W5JON will once again be active as V47JA from his vacation home at Calypso Bay, St. Kitts from February 28th through March 28th. His activity will be on 80 through 6 meters using SSB. While on the island he plans to operate during the ARRL International DX Contest on March 3rd and 4th and the CQ WPX SSB Contest March 24th through the 25th. ALL QSL's to W5JON either direct

ON4AVT will be on the air as C5AVT from Gambia from February 28th to March 20th. He will be active mostly on 15 meters using the digital PSK mode. QSL via home call.

G3SWH and G3OLU will be operational from western Swaziland as 3DA0PW through February 29th. Their main objective is to work as many European and North American stations on as many different bands as possible and hope to make at least 15,000 QSOs. QSL via G3SWH, either direct, via the bureau or using the facility on www.g3swh.org.uk.

Members of the Malaysian Amateur Radio Transmitter Society and the 9M4SDX Team will be active as 9M0L from Pulau Layang Island from April 10th to the 24th. If you work them QSL direct to 9M2TO either direct or via the bureau to Malaysian Amateur Radio Transmitter's Society. More details will be forthcoming shortly.

DF7ZS, will be on the air from Aruba stroke P4 from P40V's QTH between March 21st to the 27th. Activity will be casual but he will operate during the CQ WPX SSB Contest using the callsign P41P. QSL P4/DF7ZS via DF7ZS. QSL P41P via W3HNK.

Nine members of the 'A DX Group' will be active from Coloane Island between May 17th and the 23rd. Operations will be on 160 through 6 meters, including the 30, 17 and 12 meter bands. Modes used will be CW, SSB and RTTY. There will be at least three stations on the air at the same time on different bands and modes. The group's callsign will not be announced until the beginning of their operations. QSL via EB7DX, direct or by the Spanish Bureau. All QSO's will be confirmed electronically via Logbook of the World.

Lastly, DL1NL will be operational portable OA4 from Lima, Peru, until early March. His activity is only in his spare time on 160-10 meters CW, with some SSB, from the Radio Club Peruano station. QSL via DL1NL, either direct or via the bureau. No electronic QSL's are accepted by this station.

(Above from various DX news sources)

THAT FINAL ITEM: THE AMPLION SPEAKER FROM 1926 VIDEO

And finally this week, the history of the early 20th century Amplion loudspeaker is a story told in a recently released video by Trilith Films in the United Kingdom. Bill Pasternak, WA6ITF, is in the newsroom with more:

--

Titled "A Tale Retold" the video tells the story of UK radio amateur Frank Marshall who in 1998 told Trilith pictures about a collection of old motion picture films that had been stored under his workbench for decades. He thought that among them might be one film he had particularly enjoyed as a boy. It was an advertisement for an early loudspeaker called the Amplion. One that had been used in local cinemas in the 1920's and by his father's pioneering radio business on the Isle of Portland.

When rescued from the pile of rotting nitrate film it was discovered that the film entitled "The Tale of the Amplion" was a here to fore unknown work by the famous illustrator William Heath Robinson. It is almost certainly the only animated cartoon that Robinson ever made.

The tale is retold by Frank Marshall who preserved the film, Gerry Wells of the Vintage Wireless Museum in London and Geoffrey Beare of the William Heath Robinson Trust. Included is the film as it originally appeared but with a especially composed musical sound track created by composer Stephen Deutsch.

A very interesting 20 minutes indeed.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

This video was shot and edited by John Holman for Trilith and now appears on Transition Vision's Heritage Channel. Its available for world-wide viewing on-line at YouTube. It can be found at tinyurl.com/amplion. (Southgate, ARNewsline(tm), others)

Still suffering from reading comprehension problems, persent?
At issue is not WHAT you're asking, but rather WHERE you're
asking it. Do you go into a hardware store and ask where you
can find the bread section? Do you go into a clothing store
and ask where to find laptop computers? Do you go to a drug
store and ask where you can talk to an insurance agent? Do
you have any concept of relevance at all, persent? In this
case, relevance to
alt.slack,alt.usenet.kooks,rec.radio.amateur.policy,
comp.os.os2.advocacy,alt.test, persent?

Mont. Radio Operator Hams It Up from His Home:

Posted: 23 Feb 2012 04:21 PM PST
http://www.eham.net/articles/27782

LIVINGSTON, Mont. (WTW) -- There are not many hobbies where you can relay messages for emergency personnel during an unfolding disaster one day, talk to astronauts on the International Space Station another, then talk to your buddies in Morse code at a rate of 35 words per minute, well, every day. But that's Shields Valley resident Doug Dunn's hobby. Dunn, a retired 65-year-old, is an amateur radio -- more commonly known as "ham radio" -- operator. And like so many ham radio aficionados around the world, he is passionate about the hobby. A small den in Dunn's home 16 miles north of Livingston is dominated by radio gear. On a recent afternoon, it crackled with activity as Dunn, whose call sign is K7YD, communicated with friends using voice and rapid-fire Morse code, tapped out at a blinding pace on a semi-automatic Morse key set -- the descendant of the old telegraph set of the 1800s.

//
Arlington Seeking Licensed Ham Radio Users:

Posted: 23 Feb 2012 04:19 PM PST
http://www.eham.net/articles/27781

Arlington is putting out a call for a local licensed ham radio operator to help the town with a back-up emergency communication system. The town has issued a notice seeking an amateur radio operator to volunteer with Arlington's public safety departments in case communications systems, such as police and fire radios and telephones, fail during an emergency. Arlington Fire Chief Robert Jefferson said it would likely have to be a very extreme scenario for the town to resort to using a ham radio, but the medium does offer some extra redundancy to other communication methods. "You never know," the chief said. Several years ago Arlington used a grant from the U.S. Department of Homeland Security to purchase a ham radio for emergency use. But Jefferson said the town was relying on other communities in the Battle Road Regional Emergency Planning Committee to supply someone who was trained at using the equipment.

Republic Of South Sudan Assigned Z8 Prefix:

Posted: 23 Feb 2012 01:02 PM PST
http://www.eham.net/articles/27771

After a wait of more than seven months after being accepted as a member of the United Nations, the Republic of South Sudan received its prefix block from the
International Telecommunication Union (ITU): Z8.

//
The ARRL International DX Contest Gears Up for SSB:

Posted: 23 Feb 2012 01:01 PM PST
http://www.eham.net/articles/27770

According to ARRL Contest Branch Manager Sean Kutzko, KX9X, for this contest, stations in the US and Canada work only DX stations, and DX stations work only the US and Canada; Alaska and Hawaii are considered DX for this contest. DX stations will be trying to make QSOs with all US states and Canadian provinces. The contest exchange is simple: US and Canadian stations send a signal report and their state or province, while DX stations send a signal report and the amount of power they are transmitting with.

//
Blockbuster Movie Features Morse Code, Homebrew Equipment, and Sea Monsters

Posted: 23 Feb 2012 01:00 PM PST
http://www.eham.net/articles/27769

In the movie Journey 2: The Mysterious Island, Sean Anderson (played by Josh Hutcherson) receives a coded distress signal that comes from a mysterious island where no island should exist. Sean decides to follow the signal with the unwilling assistance from his stepfather Hank (played by Dwayne "The Rock" Johnson).

//
W1AW March Qualifying Runs:

Posted: 23 Feb 2012 01:00 PM PST
http://www.eham.net/articles/27768

W1AW Qualifying Runs are 10 PM EST Friday, March 9 (0300 UTC March 10) (10-40 WPM) and 7 PM EDT (2300 UTC) Tuesday, March 20. The West Coast Qualifying Run will be transmitted by station K6KPH on 3581.5, 7047.5, 14047.5, 18097.5 and 21067.5 kHz at 2 PM PDT (2200 UTC) Saturday, March 17.

//
Bill Simons, W9BB, Silent Key; Developed Shure Microphones:

Posted: 23 Feb 2012 12:59 PM PST
http://www.eham.net/articles/27767

William A. Simons, W9BB (ex-W9YXJ), passed away in Minnesota on January 2. He was 84. He earned his Class B ticket in 1941 at the age of 14 and converted a cathedral radio into his first transmitter. Later, Simons earned DXCC using homebrew gear of his own design. Eventually, he earned a top spot on the ARRL DXCC Honor Roll.

With that attitude, it won't be long before you'll wind up in
jail, persent. What does your desire to do anything you want
have to do with alt.slack,alt.usenet.kooks,rec.radio.amateur.policy,
comp.os.os2.advocacy,alt.test, persent?

i've already been to jail its a small price for doing as you please ,
show me where i said my desire to do as i please has anything to do with ,
alt.slack,alt.usenet.kooks,rec.radio.amateur.policy,comp.os.os2.advocacy,alt.test
and if you can't show me where i said it does then i'll keep doing as i
please ,
where i live you can even have a computer in your jail sell so ,
you can keep doing as you please while being detained for doing as you
please ,
that pleases me

Town Seeks Amateur Radio Users for Emergencies:

Posted: 24 Feb 2012 04:28 PM PST
http://www.eham.net/articles/27787

Arlington officials are seeking amateur radio operators willing to help the town with emergency response. In a statement, officials said they're looking for licensed ham radio operators to become volunteers and help out in case the town's communications systems stop working during an emergency. Fire Chief Robert Jefferson told the Boston Globe it would take an "extreme scenario" for the town to resort to using amateur radio. "You never know," Jefferson told the Globe.

//
Solar Superstorm Could Be On the Way:

Posted: 24 Feb 2012 04:27 PM PST
http://www.eham.net/articles/27786

I USUALLY try to vary my topic from month to month but my February reflection on the aurora brought in a couple of intriguing queries from readers. One was about "the Carrington Event" and what effect, if any, the recurrence of such a phenomenon would have on the modern world. The other was sparked by a US newspaper headline from last year proclaiming, in very large letters, "NASA warning of solar superstorm in 2012". The two are closely related in that the Carrington Event, named after the British astronomer who made scientific observations of it, was arguably the greatest solar outburst of recent history. The flare, a great mass of hot plasma unleashed by a giant sunspot on August 28, 1959, caused an extraordinary display of auroral activity which was visible not just in the high latitudes but as far south as the Gulf of Mexico in the Americas and over Mediterranean areas in the old world. As well as providing our forebears with an incredible light show for several days - brighter than moonlight across much of the surface of the Earth, and much more colourful - the flare and its associated coronal mass emission imparted so much energy to the Earth's magnetic field that very strange things started happening to what was then a state-of-the -art communication system - the telegraph. The system failed across great swathes of Europe and America with telegraph poles all over the place, and the paper used to record the Morse imprints at the most sophisticated transmission stations, being set on fire. And the machines kept on churning out nonsensical signals despite being disconnected from their power sources. COULD something like this

happen again? The answer has to be yes, given that we owe our lives to being right next door to a turbulent star, the workings of which we do not fully understand and which we have only just begun to observe systematically.

//
Propagation Forecast Bulletin #08 de K7RA:

Posted: 24 Feb 2012 09:41 AM PST
http://www.eham.net/articles/27785

We don't know if this is a significant trend, but solar activity has really leveled off recently. Not everyone is unhappy about this. During the recent long minimum, 160 and 80 meter operators sang the praises of great conditions.

Emergency Attention Message?

Theoretically transmission of a certain alpha sequence, (changed daily), indicates a heightened state of alert or an actual breakout of hostilities. Most EAMs are less important.

Like an EBS closed circuit test that broadcasters had to do, when we actually got to open the big envelope.

RFinder for Apple iPhone/iPad/iPod impending release!!!

Posted: 24 Feb 2012 01:59 PM PST
http://forums.qrz.com/showthread.php?335167-RFinder-for-Apple-iPhone-iPad-iPod-impending-release!!!&goto=newpost

For immediate release

From the shack of W2CYK

2/22/2012

By popular demand, we are pleased to announce the impending release of RFinder - The Worldwide Repeater Directory (WWRD) for iOS! We hope to have the iPod/iPhone/iPad version in the App Store by March 7th!

RFinder already runs on the Android platform, open source via CHIRP on Windows/Linux/Mac and of course, the world wide web. We are working diligently with RTSystems to incorporate the Worldwide Repeater Directory (WWRD) into their suite of radio programming software. We have opened up the directory so anyone with a Windows application can request our API toolkit to incorporate the WWRD into their applications.

Your annual subscription to the WWRD works on all platforms. Just use the same user/password combination on any WWRD enabled application and you are ready to go!

Some recent enhancements:

Callsign lookup, improved data for Italy, France and Israel

Look in future releases of iOS and Android:

DStar! We have improved the back end to support this and are working to automatically syncronize DStar data.

Satellite data with footprint visualizations!

Kids can Discover Amateur Radio at the Surrey Museum:

Posted: 25 Feb 2012 04:12 PM PST
http://www.eham.net/articles/27789

Hurricanes, fires, floods, and earthquakes happen, but you can count on amateur (or ham) radio to provide vital links to agencies and city services such as fire, police and ambulance. On Tuesday, March 20 from 2-4 p.m., join the Surrey Museum and the Surrey Emergency Program Amateur Radio Society (SEPAR) in an amateur radio emergency communications workshop for kids. The workshop will focus on how amateur radio provides communities with emergency communications when commercial systems are not operational. The workshop will provide kids with a hands-on experience of how amateur radio systems work and the technology used. (For ages nine and over. Admission is free. Space is limited so please pre-register by calling 604-592-6956. Held at the Surrey Museum, 17710 56A Ave.). Communications infrastructure (cellphone, regular phone, or the Internet) is usually one of the first services to fail in a major emergency due to damage, lack of electricity and/or overload. Ham radio uses direct radio to radio communication independent of commercial systems, allowing emergency messages to get through.SEPAR operates under the direction of the Surrey Fire Department and would be called out at the request of the Surrey Emergency Program.

//
Gary R. Goodwin, KC8TGP (SK):

Posted: 25 Feb 2012 04:11 PM PST
http://www.eham.net/articles/27788

Gary R. Goodwin, 76 of Dade City, Fla., (formerly of Marietta) passed away on Friday (Feb. 3, 2012). He was born May 3, 1935, in Marietta. He graduated in 1953 from Marietta High School and served in the United States Army. He retired in 1992 from Monongahela Power Company after 34 years where he worked as an electrician. He was an avid Ham Radio Operator, call letters KC8TGP.

Surfin: Hunting Broadcast Radio Transmitters [FONT=Century Gothic]

TAGS: AM radio, antenna towers, Bob Mudra, displays, google map, Internet, radio stations, Stan Horzepa, technical information, transmitter, TV station, valley, WA1LOU blog, watr

02/24/2012

By Stan Horzepa, WA1LOU

Contributing Editor

This week, Surfin wonders where the transmitter went -- and finds it on the Internet.

It was easy when there were only three AM radio stations in town. The antenna towers of WATR were only two blocks away and dominated my neighborhood. WWCO's tower was clearly visible up the valley about three miles away, and WBRY's towers were a little further north -- not visible from my home -- but an easy spot when traveling around the north end of town.

But things got complicated.

WATR added a TV station to the mix, call signs changed, WATR TV moved from the AM radio site, FM stations came on the air, FM stations changed hands and changed call signs, new towers went up here, there and everywhere. You couldnt tell a radio site without a scorecard.

Need a scorecard?

Radio-Locator fills the bill. It claims to be the most comprehensive radio station search engine on the internet with links to over 10,000 radio station web pages and over 2500 audio streams from radio stations in the US and around the world.

You can search by location or call sign. When Radio-Locator finds a station, it displays its technical information including the coordinates of the stations transmitter. Click on the coordinates and a new browser window

opens a Google Map, displaying the transmitters location. How cool is that?

Thank you, Bob Mudra, AK9RM, for reminding about Radio-Locator.

Until next time, keep on surfin

Titans in Space Near Space Upcoming Balloon Launch - LEO-1

Posted: 26 Feb 2012 06:01 PM PST
http://forums.qrz.com/showthread.php?335496-Titans-in-Space-Near-Space-Upcoming-Balloon-Launch-LEO-1&goto=newpost

The Olde Towne Middle School Radio and Technology Club & Science Club would like to announce their upcoming near-space balloon launch. The launch will take place March 3rd at 9:30 plus or minus a little for wx delays. The balloon and payload will be named Leo-1 after Leo McGehee K5LEM (SK) who was a vital member of our chase on our first balloon launch last Spring. This year we are focusing on using the balloon as a payload delivery system for science projects that are dependent on getting into the stratosphere.

One major change is that we are attempting a HF and VHF telemetry reception record as shown on arhab.org. Please let your friends in South America and Europe know about the flight and what to listen for. If you copy telemetry from either unit, email or snail mail me(N5VEI or KC5NXD) your copy to receive a QSL card. We need all the reports we can get, ESPECIALLY THOSE FROM OVERSEAS OR SOUTH OF THE BORDER!

Below are the flight details:

Olde Towne Middle School Near-Space Exploration Program 2011-2012

Mission name: LEO-1 (dedicated to Leo McGehee, K5LEM (SK))

Date: Primary March 3, 2012 - 9:30am Central time, backup - March 4th 1pm Central time

Launch location: Gluckstadt, MS near the Nissan Plant (142 Calhoun Parkway, Madison, MS)

Payload: Balloon - Kaymont 1200g, Gas - He, Parachute - modified 5 ft. rocket chute

Radio payload:

Big Red Bee APRS - KC5NXD-12 (webpage: aprs.fi and search for the callsign), SPOT Locator, GOPRO HD camera, voice beacon on 146.565 Mhz, HF telemetry - Frequency: approx 14.104 (plus 1500 on the waterfall) 1 minute on and 1 minute off - DominoEx-16, RTTY 110, CW (DominoEx16 ☐ full telem., RTTY 110 ☐ full telem., Hell and CW are Altitude only). Common software for all modes is FLDigi. #Google: FLDigi high altitude balloon. #Set it up to relay telemetry to the internet if you can - setup guide: http://ukhas.org.uk/guides:tracking_guide.

Science payload:

Mini Wx Station, high speed particle test, DNA mutation bacteria, adhesion test, extreme battery test, low pressure expansion test, elasticity test, water loss test, sound distortion test

Tracking: 1) go to the following webpage: http://aprs.fi and search for the callsign KC5NXD-12

2) go to http://spacenear.us/ and look for either KC5NXD or N5VEI

Prediction page: http://nearspaceventures.com/w3Baltrak/readyget.pl

Radio and Tech Club Goals:

1) Reach 85,000 feet

2) Recover the payload

3) Get students interested in science experimentation

4) Get the students and the public interested in amateur radio and near space exploration

5) Encourage science techniques, experimentation, and developing engineering skills

Science Club objectives:

1) Engage students in STEM related hands-on learning

2) Promote critical thinking skills

3) Increase science awareness with real-world applications

4) Develop sound experimental designs utilizing the scientific method

5) Conduct quantitative analysis to aid in scientific skill development

Possible mission scrub causes: Excessive winds, rain, severe weather

Sponsors: ###

1) Frank Howell, K4FMH - k4fmh.com - Big Red Bee GPS unit

2) Mississippi State University - Helium gas

3) Bill Richardson, N5VEI - OTMS Radio and Tech Club sponsor

4) Bobby Robinson - OTMS Science Club sponsor

###

Equipment: GOPRO Camera, Big Red Bee Balloon APRS unit, Doppler DF Instruments voice beacon, SPOT Locator, WB8ELK HF telemetry unit, and one unregistered geocoin to count as possibly one of the first if not the first to go to the stratosphere.

Needs:

Sponsors

Tracking teams

Local monitors for APRS and other tracking systems

MAJOR CANADIAN CHRISTIAN MISSIONARY CONVERTS TO ISLAM
By: Dr Garry Miller:
A very important Christian missionary converted to Islam and became a major herald for Islam, he was a very active missionary and was very knowledgeable about the Bible...

This man likes mathematics so much, that's why he likes logic. One day, he decided to read the Quran to try to find any mistakes that he might take advantage of while inviting Muslims to convert to Christianity.... He expected the Koran to be an old book written 14 centuries ago, a book that talks about the desert and so on...He was amazed from what he found. He discovered that this Book had what no other book in the world has.... He expected to find some stories about the hard time that the Prophet Mohammad (Peace Be Upon Him) had, like the death of his wife Khadijah (may Allah be pleased with her) or the death of his sons and daughters...however, he did not find anything like that... and what made him even more confused is that he found a full "sura"(chapter) in the Koran named "Mary" that contains a lot of respect to Mary(peace be upon her) which is not the case even in the books written by Christians nor in their bibles.
He did not find a Sura named after "Fatimah"(the prophet's daughter) nor "Aa'ishah"(the Prophet's wife), may Allah(God) be pleased with both of them. He also found that the name of Jesus(Peace Be Upon Him) was mentioned in the Koran 25 times while the name of "Mohammed"(Peace Be Upon Him) was mentioned only 4 times, so he became more confused. He started reading the Koran more thoroughly hoping to find a mistake but he was shocked when he read a great verse which is verse number 82 in Surat Al-Nisa'(Women) that says:

"Do they not consider the Koran (with care)? Had it been from other than Allah, they would surely have found therein much discrepancy".

Dr Miller says about this verse: " One of the well known scientific principles is the principle of finding mistakes or looking for mistakes in a theory until it's proved to be right (Falsification Test) …what's amazing is that the Holy Quran asks Muslims and non-muslims to try to find mistakes in this book and it tells them that they will never find any". He also says about this verse: no writer in the world has the courage to write a book and say that it's empty of mistakes, but the Quran, on the contrary, tells you that it has no mistakes and asks you to try to find one and you won't find any.

Another verse that Dr Miller reflected on for a long time is the verse number 30 in Surat "Al-Anbiya'"(The Prophets): " Do not the

Unbelievers see that the heavens and the earth were joined together (as one unit of Creation), before We clove them asunder? We made from water every living thing. Will they not then believe?"

He says: " This verse is exactly the subject of the scientific research that won the Noble prize in 1973 and was about the theory of the "Great Explosion". According to this theory, the universe was the result of a great explosion that leads to the formation of the universe with its skies and planets".

Dr Miller says: " Now we come to what's amazing about the Prophet Mohammed (PBUH) and what's pretended about the devils helping him, God says: "No evil ones have brought down this (Revelation), it would neither suit them nor would they be able (to produce it). Indeed they have been removed far from even (a chance of) hearing it" (26:210-212). "When thou do read the Quran, seek Allah's protection from Satan the Rejected One" (16:98).

You see? can this be the devil's way to write a book? how can he write a book then tells you to ask God for protection from this devil before reading that book? those are miraculous verses in this miraculous book! and has a logical answer to those who pretend that it's from the devil". And among the stories that amazed Dr Miller is the story of the Prophet (PBUH) with Abu-Lahab… Dr Miller says: " This man (Abu Lahab) used to hate Islam so much that he would go after the Prophet wherever he goes to humiliate him. If he saw the prophet talking to strangers, he used to wait till he finishes and then ask them: what did Mohammed tell you? If he said it's white then it's in reality black and if he said it's night then it's day. He meant to falsify all what the prophet says and to make people suspicious about it. And 10 years before the death of Abu Lahab, a sura was inspired to the prophet, named "Al-Masad". This sura tells that Abu Lahab will go to hell, in other words, it says that Abu Lahab will not convert to Islam. During 10 years, Abu Lahab could have said: "Mohammed is saying that I will not become a Muslim and that I will go to the hell fire, but I'm telling you now that I want to convert to Islam and become a Muslim. What do you think about Mohammed now? Is he saying the truth or no? Does his inspiration come from God?"
But Abu Lahab did not do that at all although he was disobeying the prophet in all matters, but not in this one. In other words, it was as if the prophet (PBUH) was giving Abu Lahab a chance to prove him wrong! But he did not do that during 10 whole years! he did not convert to Islam and did not even pretend to be a Muslim!! Throughout 10 years, he had the chance to destroy Islam in 1 minute! But this did not happen because those are not the words of Mohammed (PBUH) but the words of God Who knows what's hidden and knows that Abu Lahab will not become a Muslim.

How can the prophet (PBUH) know that Abu Lahab will prove what is said in that Sura if this was not inspiration from Allah? How can he be sure throughout 10 whole years that what he has (the Quran) is true if

he did not know that it’s inspiration from Allah?? For a person to take such a risky challenge, this has only one meaning: that this is inspiration from God.

“Perish the hands of the Father of Flame (Abu Lahab)! perish he! No profit to him from all his wealth, and all his gains! Burnt soon will he be in a Fire of blazing Flame! His wife shall carry the (crackling) wood; As fuel! A twisted rope of palm-leaf fibre round her (own) neck!” (surat Al-Masad).

Dr Miller says about a verse that amazed him: one of the miracles in the Quran is challenging the future with things that humans cannot predict and to which the “Falsification Test” applies, this test consists of looking for mistakes until the thing that is being tested is proved to be right. For example, let’s see what the Quran said about the relation between Muslims and Jews. Quran says that Jews are the major enemies for Muslims and this is true until now as the main enemy for Muslims are the Jews.

Dr Miller continues: this is considered a great challenge since the Jews have the chance to ruin Islam simply by treating Muslims in a friendly way for few years and then say: here we are treating you as friends and the Quran says that we are your enemies, the Quran must be wrong then! But this did not happen during 1400 years!! and it will never happen because those are the words of The One who knows the unseen (God) and not the words of humans.

Dr Miller continues: can you see how the verse that talks about the enmity between Muslims and Jews constitutes a challenge to the human mind? “Strongest among men in enmity to the Believers wilt thou find the Jews and Pagans; and nearest among them in love to the Believers wilt thou find those who say, "We are Christians": because amongst these are men devoted to learning and men who have renounced the world, and they are not arrogant. And when they listen to the revelation received by the Messenger, thou wilt see their eyes overflowing with tears, for they recognize the truth: they pray: "Our Lord! We believe; write us down among the witnesses” (5: 82-84)

This verse applies to Dr Miller as he was a Christian but when he knew the truth, he believed and converted to Islam and became a herald. May Allah support him.

Dr Miller says about the unique style of the Quran that he finds wonderful: no doubt there is something unique and amazing in Quran that is not present anywhere else, as the Quran gives you specific information and tells you that you did not know this before. For example: "This is part of the tidings of the things unseen, which We reveal unto thee (O Prophet!) by inspiration: thou was not with them when they cast lots with arrows, as to which of them should be charged with the care of Maryam: nor was thou with them when they disputed (the point)” (3: 44).

“Such are some of the stories of the Unseen, which We have revealed unto thee: before this, neither thou nor thy People knew them. So persevere patiently: for the End is for those who are righteous” (11: 49). “Such is one of the stories of what happened unseen, which We reveal by inspiration unto thee: nor was thou (present) with them when they concerted their plans together in the process of weaving their plots” (12: 102)

Dr Miller continues: “ No other holy book uses this style, all the other books consist of information that tells you where this information came from. For example, when the (distorted) holy bible talks about the stories of the ancient nations, it tells you that a this king lived in a this place and a that leader fought in that battle, and that a certain person had a number of kids and their names are…. But this book (distorted Bible) always tells you that if you want to know more, you can read a certain book since that information came from that book”.

Dr Garry Miller continues: “this is in contrary to the Quran which gives you the information and tells you that it’s new!! And what’s amazing is that the people of Mecca at that time -time of inspiration of those verses- used to hear those verses and the challenge that the information in those verses was new and was not known by Mohammed (PBUH) nor by his people at that time, and despite that, they never said: we know this and it is not new, and they did not say: we know where Mohammed came from with those verses. This never happened, but what happened is that nobody dared to say that he was lying to them because those was really new information, not coming from the human mind but from Allah who knows the unseen in the past, the present and the future”.

May Allah reward Dr Miller for this nice reflection on the Book of Allah

> glasses and all .

You're erroneously presupposing that it's a fact.

> .

You're erroneously presupposing that it's a fact.

> .

Classic unsubstantiated and erroneous claim, laced with invective, as
expected from someone who lacks a logical argument.

>Freaking Faggot!

Classic invective, as expected from someone who lacks a logical
argument.

Well, well, well... Captain Butt Pirate himself. How was your imaginary
date with the two twins? Do you have blisters on both palms now? Be
sure to post pics to "prove" you were with two hot 18-year-old twins as
soon as you get through Photoshopping them. LOL!

Response from Ofcom on 5 MHz NoV:

Posted: 26 Feb 2012 04:26 PM PST
http://www.eham.net/articles/27791

Following proposals from the RSGB to Ofcom, aimed at harmonising our NoV access to 5 MHz with that access enjoyed by radio amateurs in other countries, the Society has received an offer from the primary user, which in the UK is the MoD. As has been reported earlier the MoD was unable to meet our request for access over a continuous range, i.e. a band, but has offered a number of small frequency blocks, which includes all of the present 3 kHz wide channels.

//
VA3XPR Global 360 Net:

Posted: 25 Feb 2012 04:00 PM PST
http://www.eham.net/articles/27790

On April 27, 2011, a large tornado tracked across Tuscaloosa County, Alamaba, including the southern and eastern portions of the city of Tuscaloosa. Join in to the VA3XPR Global 360 Net to hear a firsthand account from our guest speaker Richard Ranson, KD9Q, on how Amateur Radio provided vital emergency communications during this natural disaster.

That is hilarious. No bot is intelligent enough to generate the
variety (alright maybe you did not notice it because it is so subtle)
that tholen has. Ken, do not be foolish, that tholen has clearly
passed the Turing test. and if you do not see it you are a dummy.

Did you just say fifth grade? I have been working for centuries on
how to get my four dimensional thoughts into you and your fellow
human's three-dimensional heads, but no one ever allows me to build
one step of a bridge to wherever the f**k I want the bridge to go.

Earle Smith, VE6NM - SK

Posted: 27 Feb 2012 11:46 AM PST
http://forums.qrz.com/showthread.php?335591-Earle-Smith-VE6NM-SK&goto=newpost

Earle Smith, VE6NM - SK

It is with regret that Radio Amateurs of Canada has learned that Earle Smith, VE6NM, a RAC past President, passed away peacefully after an illness on Friday, February 24th.

Earle had served as President of RAC from late 2004 to the end of 2007 and was well respected by amateur radio operators both within Canada and Internationally. He was a gentleman and friend to all hams and a strong advocate for amateur radio and for the Radio Amateurs of Canada.

All who knew Earle respected him as a leader, a friend and a force for good in the amateur radio community. We will miss him.

The amateur community can post condolences which will be forwarded to the family at http://earlesmith.rac.ca.

Geoff Bawden, VE4BAW

President and Chairman

Radio Amateurs of Canada

Patrick Germond: Help with the Hams:

Posted: 27 Feb 2012 04:23 PM PST
http://www.eham.net/articles/27794

"No worries, mate, no worries. Give your Sheila a kiss for me. Sydney, Australia clear." "Copy that, Sydney. Take care and I'll talk to you later. This is Kilo Delta Zero Juliet Alfa India out, and the frequency is clear." What you just read was part of a short wave (ham radio) conversation I had with a fellow from down under last October. I would like to take a moment to share with you some of the details of ham radios, and why it's a growing hobby among future electrical engineers, hobbyists, and preppers.

//
Ham Radio Operators Check in to the Battleship:

Posted: 27 Feb 2012 04:17 PM PST
http://www.eham.net/articles/27793

WILMINGTON, NC (WECT) - The Battleship North Carolina is used to getting visitors from all over the world. But today, some of those visitors visited the ship through the airwaves. Sunday was North Carolina's QSO Party. QSO is code that amateur radio operators use when they've made contact with someone else. The battleship is one of four locations across the state where people who successfully QSO them can get extra points. Each week a different state has a QSO party and this weekend, ham radio operators from every North Carolina county participated. "The possibility of potential is worldwide," said Azalea Coast Amateur Radio Club member Allan Pellnat.

HRD Software, LLC releases version 5.11a

Posted: 29 Feb 2012 05:21 AM PST
http://forums.qrz.com/showthread.php?335871-HRD-Software-LLC-releases-version-5-11a&goto=newpost

Tampa, FL February 29, 2012: HRD Software, LLC announced today they have released version 5.11a of Ham Radio Deluxe.

This latest version follows the release of version 5.1 on Feb 10, 2012 and is another step in the continuing project of the company to eliminate outstanding issues found in previous versions of HRD. Rick Ruhl, W4PC, co-owner and lead programmer said, "We□ll continue to update the 5.1x releases with "bug fixes" as the development of enhancements for the 6.0 release continues.

To facilitate both bug fixes and enhancements to Ham Radio Deluxe, the development team is to moving the program source code from the obsolete Visual C++ 6.0 development environment to current Visual Studio 2010 development environment. This major step enables a more straightforward, bug-free development process and better program integration using the more powerful VS 2010 and its support tools for enhancements to HRD."

The 5.x releases of HRD are free. HRD Software LLC does have direct paid support with phone and email for the 5.1x products for an introductory price of $59.95. This pricing plan includes version 6.0 at no additional charge. The introductory price expires upon release of Ham Radio Deluxe 6.0.

The scheduled release of Ham Radio Deluxe 6.0 is May 18, 2012 at the Dayton Hamvention and on line. The MSRP for Ham Radio Deluxe 6.0 with support will be $79.95 when it is released.

CircuitLab: Sketch, simulate, and share schematics

Posted: 28 Feb 2012 07:23 PM PST
http://forums.qrz.com/showthread.php?335829-CircuitLab-Sketch-simulate-and-share-schematics&goto=newpost

Anyone who has ever tried to use SPICE and its extensions to simulate electronic circuits is likely to have met a great deal of frustration. Now, CircuitLab has deployed a web-based application that enables users to whip up their own simulated electronic circuits and test them. This ought to be a boon for technically inclined amateur radio operators!

HSMM-MESH

Posted: 28 Feb 2012 04:24 PM PST
http://forums.qrz.com/showthread.php?335805-HSMM-MESH&goto=newpost

HSMM-MESH (High Speed MultiMedia) is a great new technology that we as amateur radio Operators can take full advantage of. It's Wi-Fi on steroids!

We don't have to be hobbled by part 15 limitations, we can also use OUR frequency allocations, and avoid a majority of interference by part 15 devices.

Common, inexpensive off the shelf equipment is used and or simply modified for this application.

HSMM-MESH can enable Hams to have a robust mesh network for uses such as VOIP, callbook lookups, communication, SAR, mapping, EM-Comm, etc. The applications are endless!

AMSAT NEWS SERVICE

ANS-057

ANS is a free, weekly, news and information service of AMSAT North

America, The Radio Amateur Satellite Corporation. ANS reports on

the activities of a worldwide group of Amateur Radio operators who

share an active interest in designing, building, launching and

communicating through analog and digital Amateur Radio satellites.

Please send any amateur satellite news or reports to:

ans-editor@amsat.org

In this edition:

* AMSAT Theme at Dayton 2012: Running with Fox

* ARISS School Events Now Number Over 700

* ESA Reports Vega Cubesat Success

* MASAT-1 (MO-72) Team Releases Software and Web Page Updates

* Dedicated CubeSat Radio Spectrum Discussed at WRC-12

* Arizona Centennial Event K7UGA Station Reports 122 Satellite QSOs

* AA5UK Announces Plans for Hawaii Satellite Operation

* Satellite DX: XF1AA on Isabel Island

* Volunteers Needed for AMSAT at Timonium, MD on March 31

* ARISS Status Report - 20 February 2012

AMSAT News Service Bulletin 036.01

From AMSAT HQ SILVER SPRING, MD.

February 5, 2012

To All RADIO AMATEURS

BID: $ANS-036.01

AMSAT Theme at Dayton 2012: Running with Fox

The 2012 Dayton Hamvention will be held this year on 18 - 20 May 2012. As has been the case for the many years Hamvention will be at the Hara Arena Complex on the north side of Dayton. AMSAT will occupy the same booths (444-449) in Ball Arena, right across from the ARRL area and just inside the door from the Satellite Demonstration area.

The AMSAT theme for 2012 is "Running with Fox". We will have multiple exhibits of the new AMSAT satellite on display.

Visit AMSAT's Dayton Hamvention page for all details on activities:

http://www.amsat.org/amsat-new/hamve...012/Dayton.php

Some of the activities will include:

+ Life size Fox models will be on display as well as diagrams of the modules inside the 10cm square satellite.

+ Operational prototype of ARISSat-1 on display.

+ AMSAT Thursday Night Get-together at the Tickets Pub & Eatery.

+ The sixth annual AMSAT/TAPR Banquet will be Friday night May 18 at the Kohler Banquet Center. The price for the Banquet is $30. Seating is limited and reservations are required. Follow the links on AMSAT's Dayton page.

+ The AMSAT Forum will be on Saturday May 19.

AMSAT has a limited block of rooms reserved at the Country Inn & Suites in Fairborn, OH. Please contact Martha at the AMSAT office for room price and availability during Hamvention. Priority for rooms will be given to those volunteering to work in the AMSAT booth for multiple 2 hour shifts during Hamvention. The hotel web page is:

http://www.amsat.org/amsat-new/hamve...2012/Hotel.php

The phone number for the AMSAT office is 301-589-6062. Other hotels in the immediate area of the Country inn & Suites include the Fairfield Inn, Ramada Inn, Hampton Inn, Fairborn Holiday Inn, Red Roof Inn and the Homewood Suites if additional accommodations are needed.

Further information on Hamvention 2012, including advance ticket sales and motel accommodations, can be found at http://www.hamvention.org.

ARISS School Events Now Number Over 700

ARISS Operation Team Mentor Charlie Sufana, AJ9N reports that the total number of ARISS ISS-to-Earth school events is now at 701. ARISS offers an opportunity for students to experience the excitement of Amateur Radio by talking directly with crewmembers on-board the International Space Station.

Teachers, parents and communities see, first hand, how Amateur Radio and crew members on ISS can energize youngsters' interest in science, technology, and learning.

ARISS is an international educational outreach program partnering the participating space agencies, NASA, Russian Space Agency, ESA, CNES, JAXA, and CSA, with the AMSAT and IARU organizations from participating countries. Further information on the ARISS program is available on the website http://www.ariss.org/ (graciously hosted by the Radio Amateurs of Canada).

The 700th school event was with The Academy@Shawnee City in Louisville, Kentucky via a telebridge contact with ON4ISS on February 14. ARISS says the special John Glenn event to commemorate the 50th anniversary of Perth, City of Lights was successful on February 20. This marked event number 701.

Planned school contacts for this coming week include:

+ ESA-ESTEC, Noordwijk, Netherlands, telebridge via IK1SLD. The schools that are involved are: American school of The Hague, International School of Amsterdam, and The British School in the Netherlands on Monday, February 27 at 12:45:29 UTC.

+ Parkside Elementary, Atlanta, GA, telebridge via K6DUE on Friday, March 3 at 16:42:29 UTC.

+ 5th Geniko Lykeio Katerinis, Katerini, Greece, direct via SX2ISS on Friday, March 3 at 17:03:52 UTC.

Each contact may have multiple schools sharing the same time slot. A list of all of the ARISS School Events can be found at:

http://tinyurl.com/ARISS-Events

[ANS thanks ARISS Operation Team Mentor Charlie Sufana, AJ9N for the above information]

ESA Reports Vega Cubesat Success

The ESA provided a summary of the success of the cubesats launched on the Vega mission on February 13. The web report said, "Shortly after the seven ESA student CubeSats started their adventure in space on board the Vega launcher yesterday, the university teams and radio amateurs all around the world pointed their 'ears' towards space and started to receive the first signs of life from the tiny spacecraft."

+ The Spanish XaTcobeo CubeSat was heard a couple of hours after launch (13 February 2012, 11:00 CET) during its first pass over the University of Vigo's ground station, and its signal was also tracked by many radio amateurs. The first data received show that the satellite's batteries are properly charged and that telemetry and telecommand systems work well, representing a very promising start for the mission.

+ The Hungarian team received the first signals from Masat-1 from a radio amateur in Florida less than two hours after launch, and by many others shortly after. A couple of hours later the team's ground station in Budapest gathered the first 'official' satellite data which confirmed that the spacecraft is in perfect shape.

+ PW-Sat, the Polish student CubeSat, was also heard loud and clear only a few hours after the launch. The signals have been heard both by the team's ground station and by several radio amateurs from the UK, India, Germany and the Netherlands.

+ The Italian UniCubeSat-GG team heard the first signals from the satellite, although they have not been decoded yet, shortly after launch, first from a Kentucky (US) ground station and then from the dedicated Rome ground station.

+ Initially weak signals were reported from the Italian e-st@r. On February 15 the e-st@r team reported signals from their CubeSat heard by their control ground station and other ham radio stations.

+ Weak signals have been received so far from the Romanian Goliat and the French Robusta CubeSats. These teams currently believe that their spacecraft may not have yet achieved a stable orientation after separation and sufficient battery charge level in orderfor their communication systems and antennas to transmit properly to the ground station. The situation will evolve in the course of the next several days, and further attempts to establish good communications links with those satellites will continue.

A joint effort from all CubeSat teams and radio amateurs from the AMSAT network has now started, in order to be able to clearly detect the satellites.

The full ESA report can be found on-line at:

http://www.esa.int/SPECIALS/Educatio...2ZYXHYG_0.html

[ANS thanks the ESA for the above information]

MASAT-1 (MO-72) Team Releases Software and Web Page Updates

The MASAT-1 team said this week that updated client software for telemetry reception and decoding is available on their web at: http://cubesat.bme.hu/en/radioamator...iens-szoftver/

Some of the upgrades include:

+ The "Offline" label removed, the status of the automatic packet reporting is displayed.

+ Battery voltage constant (on the EPS panel) updated.

+ User selection between 626/1250 bps decoding.

+ The waterfall display shows tracks for the 0, CW and 1. The decoder has been reported to be most successful if tuning is set upward by 50-100 Hz from the tuning indicators. User experiences are invited to be sent to mezei@cubesat.bme.hu.

The automated received packet upload from the client software has been updated to accept ham@cubesat.bme.hu or a@a.a as mail address for those not wishing to send their actual address. Users can change the e-mail address by editing the registration.txt file in the program folder of the software package.

A statistics web page reporting on the numbers of packets forwarded by amateur radio operators has been added:

http://cubesat.bme.hu/en/radioamator...i-statisztika/ The site has successfully received over 50000 packets from around the world. The latest updates to the web and client software should address initial concerns that 'no packets' have been received.

The MASAT-1 team thanks amateur radio operators for your outstanding support. The MASAT-1 Important News for Radio Amateurs page is at: http://cubesat.bme.hu/en/2012/02/19/...ioamatoroknek/

The MASAT-1 mission home page is: http://cubesat.bme.hu

[ANS thanks the MASAT-1 Team for the above information]

Dedicated CubeSat Radio Spectrum Discussed at WRC-12

AMSAT-UK reports on their web that the recently concluded WRC-12 conference agreed to a resolution by the SmallSat, CubeSat, and NanoSatellite community for dedicated spectrum allocation outside of the 435 to 437 MHz

amateur satellite band.

Wouter Jan Ubbels, PE4WJ with the Dutch space development company ISIS says he was able to introduce a resolution at WRC-12 submitted by a number of countries, led by the Netherlands to propose an agenda item for WRC-2015 to conduct studies to identify the spectrum needs of nano-and picosatellites, and furthermore to study the associated regulatory constraints.

After the discussions at WRC-12, the resolution received partial acceptance to begin study of the regulatory aspects for WRC-2018.

Wouter concluded, "This is very good news, and could mean that the ITU notification process for nano-and picosatellites can become greatly simplified in the future. We first of all would like to thank all the supporting administrations for their support and would like to invite the community to, through their administrations, participate in the studies, so that the outcome will be as much as possible line with the needs of the community. We will continue to work on this subject and keep you updated through these lists and at the various small / nano / picosatellite conferences and workshops."

The full news item can be viewed on the AMSAT-UK web at:

http://www.uk.amsat.org/4950

[ANS thanks Wouter Jan Ubbels, PE4WJ and AMSAT-UK for the above information]

Arizona Centennial Event K7UGA Station Reports 122 Satellite QSOs

Arizona AMSAT Area Coordinator, Patrick Stoddard, WD9EWK/VA7EWK and Tom Kramer, NQ7R provided the satellite contacts for the K7UGA special-event station. K7UGA was sponsored by the Central Arizona DX Association in its commemoration of the Arizona statehood centennial.

Patrick reported, "Between Tom NQ7R and myself, we made 122 satellite contacts. Tom worked his passes from his home in Casa Grande AZ (grid DM42). For passes I worked at the start of the week through Thursday afternoon, I operated from DM43 in the Phoenix area. For the passes I worked Friday and Saturday, I was at the Yuma Hamfest. On Sunday morning, I parked next to the Yuma Territorial Prison State Historic Park overlooking the Colorado River. Both Yuma sites are in grid DM22."

Patrick posted videos of his K7UGA operation:

+ SO-50 pass on Friday (17 February) morning at 1751 UTC:

http://www.youtube.com/watch?v=BKaIKgjuSMM

+ AO-27 pass on Friday afternoon at 2032 UTC:

http://www.youtube.com/watch?v=AIA_VANTdpQ

+ AO-27 pass on Saturday (18 February) afternoon at 2004 UTC:

http://www.youtube.com/watch?v=YiXTjgD5nD8

+ VO-52 pass on Sunday (19 February) morning at 1538 UTC:

http://www.youtube.com/watch?v=l0AAB3A7Xy4

The K7UGA page on QRZ.com states that all QSL card requests be sent with SASE to: K7BHM, 1623 N. Los Altos Ct., Chandler, AZ 85224-8357.

[ANS thanks Arizona AMSAT Area Coordinator, Patrick Stoddard, WD9EWK/VA7EWK for the above information]

AA5UK Announces Plans for Hawaii Satellite Operation

Adrian Engele, AA5UK says he will be traveling to Hawaii between March 21 and April 4. This is primarily a vacation trip for sightseeing and scuba diving but satellite operation is also planned.

He will try to get on the satellites as often as his schedule permits within vacation activities. His primary focus will be on FO-29, VO-52 and AO-7 Mode B passes. SO-50 and AO-27 may be attempted if conditions permit.

+ March 21 - Fly from Chicago to Honolulu and Hilo.

+ March 22-25 - Operation from south of Hilo.

+ March 26 - April 1 - Kailua-Kona, Big Island in Hawaii.

+ April 2 - April 4: Oahu, Waikiki beach.

Adrian invites you to stay tuned via AMSAT-BB and his Twitter feed @AA5UK for latest schedule information. He will also update his page on QRZ.com in the coming weeks with additional information.

[ANS thanks Adrian Engele, AA5UK for the above information]

Satellite DX: XF1AA on Isabel Island

The OPDX Bulletin 1050 is reporting that a team of 10 operators, from the Aguas-Calientes Amateur Radio Club will activate Isabel Island, grid DL71, using the callsign XF1AA. The planned dates are March 16th through the 21st.

Ismael, XE1AY, is one of the operators and is active on the satellites. If you should hear Ismael on the birds, please give him the airtime to work as many as he can. Good luck with the operation!

[ANS thanks John Papay, K8YSE for the above information]

Volunteers Needed for AMSAT at Timonium, MD on March 31

Pat Kilroy, N8PK says that volunteers are needed to staff the AMSAT display and for satellite operating demonstrations at the Greater Baltimore Hamboree and Computerfest on Saturday, March 31 in Timonium, Maryland. This event is one of the largest Amateur Radio and technology shows on the East Coast.

In addition to the AMSAT display and satellite demonstrations Pat is planning to show the FUNcube Dongle and present show'n'tell talks for visitors to the AMSAT booth.

Please contact Pat soon by e-mail (pat@patkilroy.com) if you can help!

For more info about the hamfest visit: http://www.gbhc.org/

[ANS thanks Pat Kilroy, N8PK for the above information

ARISS Status Report - 20 February 2012

1. Kochi Youth Radio ISS Astronaut

Kochi Gakuen Kochi Junior High School in Kochi, Japan experienced a successful Amateur Radio on the International Space Station (ARISS) contact on Monday, February 13. Students asked Dan Burbank, KC5ZSX, 11 questions about living in space. The contact was integrated into the science curriculum. Media coverage included three television stations and three newspapers.

2. Astronaut Dan Burbank Speaks with Louisville Students

On Tuesday, February 14, youth attending The Academy @ Shawnee participated in an Amateur Radio on the International Space Station (ARISS) contact with on-orbit astronaut Dan Burbank, KC5ZSX via telebridge station ON4ISS in Belgium. The contact took place at the Challenger Learning Center in Louisville, Kentucky with the assistance of the Louisville Astronomical Society. Approximately 40 people were in attendance and listened as Burbank chatted with students about experiments on board the ISS and the effect space has on

the human body, among other topics. The Academy, an inner city high school of 500 students, has been designated as the Aerospace Magnet School for Jefferson County Public Schools. The contact was part of a comprehensive education plan to pique students' interest in Science, Technology, Engineering and Math.

3. Astronaut Training Status

Astronaut Alexander Gerst passed his amateur radio license exam on February 13 and is waiting for his callsign to be assigned. He is scheduled to fly with Expedition 40 in May 2014.

An introductory session is planned for Gregory Wiseman, KF5LKT (Expedition 40, May 2014) on Monday, February 27 and a preflight session is scheduled for Expedition 32 astronauts Sunita Williams, KD5PLB and Akihiko Hoshide, KE5DNI on Monday, March 5. Williams and Hoshide will fly later this year.

[ANS thanks Carol, KB3LKI, for the above information]

/EX

In addition to regular membership, AMSAT offers membership in the President's Club. Members of the President's Club, as sustaining donors to AMSAT Project Funds, will be eligible to receive additional benefits. Application forms are available from the AMSAT Office.

73,

Arlington Seeks Ham Radio Operators:

Posted: 28 Feb 2012 04:51 PM PST
http://www.eham.net/articles/27799

Arlington -- In the town's continuing efforts to be prepared for all emergencies, the Arlington Emergency Management Agency is currently seeking amateur radio operators (ham radio) who would be willing to assist the town during an emergency.

//
AITI Holds Amateur Radio Direction Finding Competition:

Posted: 28 Feb 2012 04:50 PM PST
http://www.eham.net/articles/27798

The Authority for Info-communications Technology Industry of Brunei Darussalam (AITI) recently organised an ¡®Amateur Radio Direction Finding (ARDF) Competition 2012¡ä at Sungai Basong Recreational Park in Tutong District. Two local amateur radio clubs ¨C the Brunei Darussalam Amateur Radio Association (BDARA) and Persatuan Gemilang Daerah Tutong ¨C jointly supported this event. The ARDF competition allowed participants to compete and show their skills in amateur radio direction finding. It required the skills of orienteering and navigating of radio direction finding in locating hidden transmitters called ¡®beacons¡¯ or ¡®foxes¡¯ within an area using the bearings of the transmitted signal in pedestrian mode. A total of 10 teams participated in the ARDF and every team consisted of three members with at least one person in the team holding a valid amateur radio station licence. The ARDF competition started at 7.45am and lasted for two hours. During the competition, each team also displayed their capabilities in the design of their homemade directional antennas.

NASA: Spike in Sun's Activity Produces Five Eruptions in 2 Days:

Posted: 28 Feb 2012 04:48 PM PST
http://www.eham.net/articles/27797

The Sun has been very active in the last week. NASA scientists say our star flared up producing five major eruptions in two days that generated spectacular northern lights displays over the weekend. NASA scientists say the solar flares which burst from nearly all areas of the Sun occurred between February 23 and 24, and came from "top, bottom, left and right

sides of the solar disk." According to NASA, four of the five flares occurred within a time-span of 24 hours.

//
Former RAC President Earle Smith, VE6NM (SK):

Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

==> + ON THE AIR: ARRL PUBLISHES NEW GUIDELINES FOR 60 METERS

Thanks to the FCC's Report and Order
<http://www.arrl.org/news/fcc-releases-new-rules-for-60-meters> issued
November 18, 2011, radio amateurs will enjoy a number of new privileges
on the 60 meter band, beginning at midnight (EST) March 5. These new
privileges include a boost in effective radiated power from 50 to 100
W, as well as the ability to use CW and certain digital modes.

Late last year, the ARRL HF Band Planning Committee surveyed 60
meter operators to gather opinions about how to best use the new
privileges. On the subject of creating a specific band plan, the survey
results indicated little consensus beyond the fact that 5403.5 kHz
should retain its status as a de facto "DX channel." On the other hand,
survey respondents made a number of suggestions for general operating
practices.
```

Based on the survey results and subsequent research, the committee declined to propose a specific band plan for 60 meters at this time. Instead, the committee created a "Recommended Practices" document (click here <http://www.arrl.org/files/file/Regulatory/Recommended_Practices_for_60_Meters%20-%20Version%206_4.pdf> for the document). The 60 meter pages <http://www.arrl.org/60-meter-faq> on the ARRL website have been updated to reflect the changes brought about by the Report and Order.

The April issue of QST will also include an article by ARRL Regulatory Information Manager Dan Henderson, N1ND, offering a detailed discussion of the new 60 meter privileges and recommended operating practices.

==> + W1AW: W1AW VIDEO TOUR AVAILABLE ON ARRL WEBSITE

In case you missed the live web tour of W1AW <http://www.arrl.org/news/save-the-date-take-a-virtual-tour-of-w1aw-on-february-12>, the Hiram Percy Maxim Station at ARRL Headquarters, you can now watch the 18 minute video on the ARRL website. On February 12, W1AW Station Manager Joe Carcia, NJ1Q, led Emmy Award-winning meteorologist Geoff Fox, K1GF, on a tour of the famed station. Al Petrunti, KA1TCH, of the New Day Group <http://www.newdayhd.com/> followed Carcia as he led Fox and viewers through the station, recording it for viewers to watch.

"We wanted viewers of this live Internet tour to feel as if they are actually at W1AW," Carcia explained. "If you came to W1AW in person, you would see the same things that we showed on the virtual tour: The three operating stations, the transmitter racks that we use to send out our bulletins and use for the code practice transmission, the control console and 'Old Betsy <http://www.arrl.org/images/view/web_008.jpg>,' Hiram Percy Maxim's personal spark gap transmitter."

You can view the video of the tour <http://www.arrl.org/w1aw> on the ARRL website (scroll to the bottom of the page).

==> + DXCC NEWS: MALYJ VYSOTSKIJ ISLAND ADDED TO DXCC DELETED ENTITIES LIST

According to the Finnish Ministry of Transportation and Communication, the Saimaa Canal Treaty between Finland and Russia has been finalized by relevant Finnish and Russian authorities through ratification. Malyj Vysotskij Island (MVI), R1M, is no longer included in the Treaty. Thus, MVI was deleted from the DXCC List as of February 17, 2012, and added to the DXCC Deleted Entities List. Read more here <http://www.arrl.org/news/malyj-vysotskij-island-added-to-dxcc-deleted-entities-list>.

==> +ARRL ANNUAL AWARDS: NOMINATIONS FOR ARRL AWARDS NOW OPEN

Each year, the ARRL Board of Directors has the opportunity to select recipients for a number of awards in various categories that honor Amateur Radio operators. The nomination period is now open for the ARRL

awards that are designed to recognize educational and technological pursuits in Amateur Radio, as well as an award to honor a young Amateur Radio operator. ARRL members can nominate hams for the Herb S. Brier Instructor of the Year Award, the Hiram Percy Maxim Award, the ARRL Microwave Development Award, the ARRL Technical Service Award, the ARRL Technical Innovation Award and the Knight Distinguished Service Award. Read more here <http://www.arrl.org/news/nominations-for-arrl-awards-now-open-1>.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

This feature is a concise monthly update of some of the things that the ARRL is doing on behalf of its members. This installment -- which covers the month of February -- takes a look the 2012 World Radiocommunication Conference, a new law that has a provision for an Amateur Radio study, new rules for 60 meters, happenings at W1AW, a new movie that features Amateur Radio, reports from the Official Observer Desk and more. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-43>.

==> + W1AW: MARCH QUALIFYING RUNS

The W1AW and West Coast Qualifying Runs were inadvertently left out of the March 2012 issue of QST. Here is the missing information:

W1AW Qualifying Runs are 10 PM EST Friday, March 9 (0300 UTC March 10) (10-40 WPM) and 7 PM EDT (2300 UTC) Tuesday, March 20. The West Coast Qualifying Run will be transmitted by station K6KPH on 3581.5, 7047.5, 14047.5, 18097.5 and 21067.5 kHz at 2 PM PDT (2200 UTC) Saturday, March 17. Unless indicated otherwise, speeds are from 10-35 WPM. You can find the upcoming schedule here <http://www.arrl.org/qualifying-run-schedule>.

==> SOLAR UPDATE

Tad "The dawn of the great black Sun that shines on me <http://www.youtube.com/watch?v=OooxwBrIzsA>" Cook, K7RA, reports: In tomorrow's K7RA Solar Update, we'll have a review of recent sunspot number averages. The average daily sunspot number for the month of February 2012 was 50.1, the lowest since January 2011, when it was 32.2. The average daily sunspot number for the three months ending on February 29, 2012 was 83.3, the lowest since the three months ending in September 2011, when it was 79.6. This is a three month moving average, so there is a figure for every month that includes data from the two previous months. Look for more information on the ARRL website on Friday, March 2. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by The Alarm's Black Sun <http://en.wikipedia.org/wiki/The_Alarm>.

==> THIS WEEK IN RADIOSPORT

This week:

- March 3 -- Wake-Up! QRP Sprint
- March 3-4 -- ARRL International DX Contest (SSB)
<http://www.arrl.org/arrl-dx>
- March 4 -- DARC 10 Meter Digital Contest
- March 6 -- ARS Spartan Sprint; AGCW YL-CW Party

Next week:

- March 10 -- AGCW QRP Contest
- March 10-11 -- Idaho QSO Party; EA PSK63 Contest
- March 11 -- North American Sprint (RTTY); SKCC Weekend Sprint
- March 11-12 -- Wisconsin QSO Party
- March 14-15 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> + SILENT KEY: FORMER RAC PRESIDENT EARLE SMITH, VE6NM (SK)

Earle Smith, VE6NM, of Grand Prairie, Alberta -- who served as President of the Radio Amateurs of Canada (RAC) from 2004-2007 -- passed away Friday, February 24. He was 81. An active radio amateur since 1948, first licensed as VE1SA, Smith enjoyed meeting amateurs from all over Canada and the world. "Earle was well respected by Amateur Radio operators both within Canada and internationally," said current RAC President Geoff Bawden, VE4BAW. "He was a gentleman and friend to all hams and a strong advocate for Amateur Radio and for the Radio Amateurs of Canada. All who knew Earle respected him as a leader, a friend and a force for good in the Amateur Radio community. We will miss him." Read more here <http://www.arrl.org/news/former-rac-president-earle-smith-ve6nm-sk>.

==> + ARRL RECOGNIZES: PHIL SALAS, AD5X , WINS FEBRUARY QST COVER PLAQUE AWARD

The winner of the QST Cover Plaque Award for February is Phil Salas, AD5X , for his article "A Relay-Based Full Break-In TR Switch for Your Vintage System. " Congratulations Phil! The QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll web page <http://www.arrl.org/cover-plaque-poll> . Cast a ballot for your favorite article in the March issue today.

Glades Amateur Radio Operators Asked to Participate:

Posted: 29 Feb 2012 05:12 PM PST
http://www.eham.net/articles/27809

CQ, CQ, CQ! To All Licensed Amateur Radio Operators! MOORE HAVEN, FL. -- All licensed Amateur Radio Operators, please be aware that Terri and Austin Moorhouse will hosting as the Net Control Operators for the Amateur Radio Emergency Service (ARES) and the Radio Amateur Civil Emergency Service (RACES) for Glades County under the support and control of the Glades County Emergency Management EOC. The ARES-RACES Network was established to provide emergency communications during civil emergencies such as floods, hurricanes, tornadoes or any other civil emergency. All licensed Amateur Radio Operators in or near the Glades County area are invited and encouraged to participate in the ARES-RACES Net test drills held every Thursday evening at 8:00 p.m. on the two-meter frequency of 147.300 Hz on the Glades County Repeater W4TEJ 147.300 + 600 PL 100.00 HZ.

//
Kevin Baynes, KI4AAD (SK):

Posted: 29 Feb 2012 05:12 PM PST
http://www.eham.net/articles/27808

Family, motorcycles and CB radios went hand in hand for Kevin Baynes. As a child he took notes from a favorite uncle, who taught him how to ride and how to work the radio, things he continued to enjoy as an adult. ."You knew which house on the street was ours," joked Tunya Baynes, his wife of more than 20 years, who lives in Ellenwood. "The one with the big antenna. He loved that CB radio and had a ham (radio) license and everything." Mr. Baynes' love for amateur radio was widely known in his family. Most relatives knew his handle in the amateur radio world was Mr. One-zero-six, but not a soul knew why he picked that sequence of numbers. But there was no mystery to the name he identified with when riding his beloved Kawasaki Ninja ZX-14, and in the motorcycle world. There he was simply known as Philly, a nod to his hometown of Philadelphia. He rode with DD214 Military Riders out of Atlanta, and loved to race at the racetrack, Mrs. Baynes said.

http://www.eham.net/articles/27807

Russ Stover, left, and Evan Sasman rehearse for the radio comedy "Rural Mail Carrier." Stover plays Ham, the HAM radio operator, while Sasman is the writer/producter.

//////////////////////////////////////
Richard L. Daniels, NASA Official, W4PUJ (SK):

Posted: 29 Feb 2012 05:12 PM PST
http://www.eham.net/articles/27806

Richard L. Daniels, 79, a senior NASA manager who retired in 1994, died Feb. 14 at his home in Arlington. He died of lung cancer, said his wife, Jacquelyn Daniels. Mr. Daniels joined NASA in 1961 as the first management intern assigned to the Office of Space Flight Programs. He retired as deputy director of information resources management in the division of management systems. His honors included NASA's Exceptional Service Medal. Richard Lester Daniels was born in Cincinnati and graduated in 1956 from the University of Cincinnati. In 1957, he received a master's degree from the University of Pennsylvania's Wharton School of Business. Mr. Daniels was a 40-year volunteer with the Radio Amateur Satellite Corporation, where he planned and helped build and launch satellites serving thousands of amateur radio operators around the world. For this work, he received NASA's Spaceship Earth Award for community service.

//////////////////////////////////////
City to Reassess Rules for Radio Antennas:

Posted: 29 Feb 2012 05:10 PM PST
http://www.eham.net/articles/27805

OTTAWA -- The city will take another look at its proposed rules for antennas after amateur radio enthusiasts complained Tuesday that they're too restrictive. The city doesn't officially have control over them -- they're regulated by Industry Canada, but the federal department gives municipalities a say if they want one and Ottawa is working up a formal policy. The rules draw a distinction between commercial antennas, which are proliferating as cellphone companies struggle to keep their networks up to speed, and antennas for personal use, though the policy would restrict both. Among other things, the city policy would oppose antennas in front and side yards, and potentially require public consultations for any antenna more than 15 metres tall. Several amateur radio operators addressed city council's planning committee Tuesday, pointing out that they sometimes put antennas in their front or side yards for better reception but they're often highly unobtrusive. Furthermore, the proposed policy doesn't distinguish between urban front yards and rural front yards, which could be set very far back from any road and be hundreds of feet from the nearest neighbour.

and it was refused. Here is the message again.]

[IARU-R2-News 168] Reinaldo Leandro YV5AM
2012-02-28

To: IARU Region 2 Member Societies

I would like to share with you this letter that IARU President Tim
Ellam VE6SH sent to IARU Region 2 President Reinaldo Leandro YV5AM
about his contribution to our recent success in Geneva during WRC-12

President Reinaldo Leandro was key player in obtaining a 472 kHz band
and on the inclusion of the Cuban proposal for a possible amateur
radio band in 5 MHz on the agenda for WRC-15.

We congratulate President Leandro and make his success ours in Region 2.

Congratulations Reinaldo!

73

Ram&#65533;n Santoyo V., XE1KK
Secretary - IARU Region 2

Amateur Radio Newsline(tm) Report 1803 - March 2 2012

CLOSED CIRCUIT ADVISORY:

The following closed circuit advisory is not necessarily for air. With some words about our new website presence and the latest from the Newsline Support Fund here's our producer Bill Pasternak, WA6ITF:

--

By now you have probably noticed that amateur Radio Newsline has a new look on the World Wide Web. Candidly, this was not planned but came about because our old web host notified us that they were leaving the shared server web hosting business by the end of February. We had to act fast and thanks to three people: Robert Sudock, WB6FDF, Dale Cary, WD0AKO and Kevin Trotman, N5PRE, the move was accomplished in less than two weeks. For this I thank them very much. But the move was not without financial cost to Amateur Radio Newsline. We had thought we would be OK through the end of May but that's no longer the case. So we are coming to you a bit earlier to ask your assistance in keeping these newscasts on the air. You ca make a donation on-line by clicking on the Pay Pal button on our website home page or by sending a donation to the address you will here at the end of this weeks newscast. Either way, we at the Amateur Radio Newsline thank you for your ongoing support. I'm Bill Pasternak, WA6ITF. Now this weeks newscast.

--

Thank you Bill. Now, amateur Radio Newsline report number 1803 with a release date of Friday, March 2nd, 2012 to follow in 5-4-3-2-1.

The following is a QST. Bad batteries may have lead to the loss of communications of a ham radio balloon from Texas to China. Also, Australia begins an evaluation program to see if its hams should be granted a power increase to a full kilowatt; Hams in Senegal to get access to 6 meters; M V Island is deleted from the DXCC and the role of social media in times of emergency reporting. All this and more on Amateur Radio Newsline(tm) report number 1803 coming your way right now.

(Billboard Cart Here)

**

RADIO NEAR SPACE: BAD BATTERIES MAY HAVE CAUSED BLT-28 FAILURE

Failure of the batteries that powered the ham radio payload of a high altitude balloon that was designed to float from Texas to China seems the likely cause of a total communications failure with the near space project. Amateur Radio Newsline's Heather Butera-Howell, K-B-3-T-Zed-D, is here with the rest of the story:

--

The South Texas Balloon Launch Team lofted the high altitude scientific balloon experiment known as BLT-28 on February 11th from near Katy, Texas. The balloon was supposed to rise to over 100,000 feet and float for several days and hopefully reach its target of Nanjing, China. But as reported here on Newsline, contact was lost with the balloons APRS tracker just south of the Louisiana coast at an altitude of 45,763 feet.

Andrew MacAllister, W5ACM, is part of the group that launched BLT-28. In a note to Lloyd Colston, KC5FM that was forwarded to Newsline, McAllister says that right now the highest probable failure mode was the batteries that powered the electronics payload on BLT-28.

W5ACM notes that the power supply was made up of commercial 1.5 volt lithium cells. According to post flight experiments, MacAllister says that several of the same type of batteries were put directly on some dry ice where they went from 1.5 volts down to two tenths of a volt. And when warmed up, they did not return to normal output.

MacAllister speculates that it could have been that cold just after reception of the last packet message from BLT28. He notes that the temp sensor system was not guaranteed below minus 40 degrees Celsius.

MacAllister confirms that there will be a second attempt to float a balloon from Texas to China, but first up will be a test flight of the thermal insulating system for the batteries and payload. W5ACM speculates that should happen sometime in May.

For the amateur Radio Newsline, Im Heather Butera-Howell, KB3TZD,near Pittsburg, PA.

--

W5ACM indicates that if all goes well in May, that another attempt to fly a balloon from the United States to China could happen before years end. (South Texas Balloon Launch Team, KC5FM)

**

RADIO RULES: AUSTRALIA'S ACMA AND WIA IN STUDY TO SEE IF VK HAMS SHOULD HER 1KW POWER LIMIT

Advanced class ham radio operators in Australia are being invited to take part in a study to see if it is possible to raise the power limit down-under to a full kilowatt. This as the Australian Communications and Media Authority, better known as the ACMA publishes details of the trial of higher power transmitter output on its website. Michael Owen,

VK3KI, is the President of the Wireless Institute of Australia:

--

The ACMA has published on its website details of the trial of higher power transmitter output for Advanced amateur radio licensees.

The trial will commence on 1 March 2012 and will continue until 31 August 2013.

The ACMA has advised the WIA that the 18 month authorization is intended to provide the ACMA with time to evaluate the success of the trial after a 12 month period and to consider permanent regulatory arrangements, if warranted, while avoiding dead air between the evaluation time and the implementation of permanent arrangements, if appropriate The paper is in the part of the ACMA site dealing with amateur matters and is an information paper.

A brief article also appears on the Engage part of the ACMA website, where anyone can record their comments.

--

The Wireless Institute of Australia Board of Directors has cautioned those hams considering obtaining a higher power permit that this is only a trial. As such, if problems do emerge, it could affect whether amateurs down-under will permanently continue to be able to use the higher power. In particular, if interference is caused to others, the WIA advises that the VK radio amateur involved must immediately do whatever it takes to stop the interference, and must resolve the problem. (WIA News)

**

RESTRUCTURING: HAMS IN SENEGAL TO GET 6 METERS

Six meters is coming to Senegal. This with word from its national ham radio society that following its application to the Regulatory Agency for Telecommunications and Posts, the band 50 to 51 MHz has been officially allocated to that nations amateur service on a primary basis. This allocation becomes effective when the new ITU Radio Regulations come into force. Therefore any contacts made on 6 meters before that date have to be considered as unauthorized. (6W7RT)

**

DXCC NEWS: MV ISLAND DELETED FROM THE DXCC ENTITY LIST

As of February 17th, Malyj Vysotskij Island, better known as MV Island in ham radio circles has been deleted from the D-XC-C. This after an announcement by the Finnish Ministry of Transportation and Communication that the Saimaa Canal Treaty between Finland and Russia has been finalized and that MV Island is no longer included in it.

For amateur radio this means that M V Island was deleted from the DXCC and added to the Deleted Entities List. Also that the entry level for DXCC Honor Roll number has dropped to 331.

We will have more DX news later on in this weeks newscast. (N1CL)

**

RADIO RULES: ARRL PUBLISHES NEW RECOMMENDATIONS FOR 60 METERS

With new privileges on the 60 meter band beginning March 5th, the ARRL announced some new "Recommended Practices" for operating on that band.

These new suggestions are based on survey results and subsequent research. The committee evaluating the new 60 meter rules declined to propose a specific band plan at this time, but instead created a "Recommended Practices" document now available in .PDF format at tinyurl.com/arrl-sixtymeters

Also, look for the April issue of QST magazine to include an article by ARRL Regulatory Information Manager Dan Henderson, N1ND. It will offer a detailed discussion of the new 60 meter privileges and recommended operating practices for that band. (ARRL)

**

HAM RADIO IN SPACE: ARISS CELEBRATES 700th ISS TO SCHOOLROOM CONTACTS

A milestone for manned ham radio operations from Earth orbit. ARISS Operation Team Mentor Charlie Sufana, AJ9N reports that the total number of Amateur Radio on the International Space Station or ARISS sponsored ISS-to-Earth school events has passed the 700 mark.

The 700th school contact was with the Academy at Shawnee City in Louisville, Kentucky. It took place via telebridge with ON4ISS on February 14. The special John Glenn event to commemorate the 50th anniversary of Perth Australia's, City of Lights on February 20th marked event number 701.

For those hams not aware. ARISS offers an opportunity for students in schoolrooms to experience the excitement of amateur radio by talking directly with crewmembers on-board the International Space Station. Further information on the ARISS program is available at www.ariss.org. (ARISS)

RESCUE RADIO: THE ROLE OF SOCIAL MEDIA IN REPORTING EMERGENCIES TO THE PUBLIC

"Emergency Management Without Social Media.Fail" is the title of a very interesting op-ed article by author Tim Burrows posted across several social media websites. In it, Burrows looks at both the positive and negative effects on the public that social media can have in accurately disseminating and updating information of a disaster, accident or other event that the public needs to know. Amateur Radio Newsline's Norm Seeley, KI7UP, has more:

--

The scenario Tim Burrows writes about involves a railroad accident that took place on February 26th. That's when a VIA Rail Canada train en route from Niagara Falls to Toronto was involved in a derailment that occurred in the Burlington, Ontario area. Official news reports say that the three engineers riding in the cab of the locomotive were killed. There were no fatalities among the 75 passengers but 45 were injured.

Burrows article details the role of the mass media along with the self involvement of individuals in putting out news bulletins regarding the accident, many of which were not properly vetted before being released into cyberspace. He notes that while there was an incredible amount of information flying around there was no "voice of authority" speaking. He also takes note that official media sources were also quoting unsubstantiated sources such as one outlet that quoted an emergency agency from another jurisdiction.

On the other hand, Burrows praised several VIA Rail employees who used Twitter to keep accurate information flow of the accident even though they were being chided at on Twitter because the system suffered delays. Burrows said that even though they had just lost three members of their working family they answered everyone professionally and systematically.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

Whether you agree or disagree with Burrows assessment of the role of social media in regard to the accuracy of the information being made public, his article is a very interesting evaluation for anyone involved in the world of emergency communications. This being especially true during events where no official JIC or Joint Information Center is available. You can read the entire story on-line at tinyurl.com/emergency-social-media. (Wordpress.com, Facebook)

**

RESCUE RADIO: MA TOWN SEEKS STANDBY RESCUE RADIO ASSISTANCE FROM LOCAL HAMS

Yet another city has discovered the value of having trained ham radio operators as a part of its emergency communications plan. This as community leaders in Arlington, Massachusetts, announce that they are seeking radio amateurs willing to help the town with its emergency response network.

In a statement issued to the press, officials say that they're looking for ham radio operators to become volunteers and help out in case the town's communications systems was to stop working during an emergency. Arlington used a grant from the U.S. Department of Homeland Security to buy a ham radio gear for emergencies. Any Massachusetts ham living in the area who is interested in volunteering should contact Fire Chief Robert Jefferson by e-mail to rjefferson(at)town(dot)arlington(dot)ma(dot)us. (Arlington Partch, eHam.net)

**

RESCUE FROM RADIO TOWER: NAKED CLIMBER REMOVED FROM ATOP LOS ANGELES RADIO TOWER

>From the believe it or not file comes the story of a naked man atop a downtown Los Angeles radio tower who was wrapped in a blanket and lowered to safety by a makeshift pulley system on Wednesday night February 8th.

The unidentified tower climber was believed to be in his 30s or 40s and possibly an Arizona resident. It was unclear why he climbed the 220 foot high structure, which is part of a city personnel building just west of downtown L.A..

Witnesses say that he removed items of clothing after he began scaling the tower about 4 p.m. Pacific time just prior to sundown. His rescue went without incident after he asked to be given some MacDonalds hamburgers.

The mission which involved a heavy presence of Los Angeles Fire Department personnel was completed at about 9:45 Pacific Standard Time. Police said that the man will not be charged with a crime and his name will not be released. (LA Times, LA Weekly, others)

**

ENFORCEMENT: FCC ISSUES A PAIR OF UNLICENSED OPERATION FINES IN FLORIDA

The FCC has issued a $20,000 Notice of Apparent Liability for Monetary Forfeiture to Florida resident Robens Cheriza. This, for operating an unlicensed radio transmitter on the frequency 107.3 MHz from his residence in West Palm Beach.

In this case the FCC says that it received an interference complaint from the Federal Aviation Administration about illegal transmissions reported by its control tower at the Palm Beach International Airport. The FCC traced the transmissions on 107.3 MHz to Cheriza's residence

and said they saw an FM transmitter connected by coax to the transmitting antenna.

Cheriza admitted operating the station for about a month and said he knew that was illegal. On the night when the airport experienced interference, Cheriza told agents he had broadcast a party from his home.

Also, Mercius Dorvilus received the base fine of $10,000 for operating a station illegally on 92.7 MHz in Pompano Beach, Florida. He told a detective from the Broward County Sheriff's Office that he bought and installed the gear in his rented room and that he was responsible for operating the transmitter. The FCC, citing Florida business records, said Dorvilus is doing business as "Radio Vision FM 927, Inc." and has registered the domain name, www.visionfm.org.

Both Cheriza and Dorvilus were given the customary 30 days from the date of the issuance of the fines to either pay or to file an appeal. (FCC)

**

COMMUNICATIONS LAW: FCC ADOPTS RULES TO STRENGTHEN CONSUMER PROTECTIONS AGAINST UNWANTED TELEMARKETING ROBOCALLS

The FCC has again slapped the hand of telemarketers to further protect consumers from unwanted autodialed or prerecorded calls, often referred to as robocalls.

On February 15th the Federal Communications Commission on approved changes to its telemarketing rules to combat unwanted telemarketing calls and texts which were consistently in the top three consumer complaint categories at the FCC in 2011.

The FCC says that robocalls invade consumers' privacy, and can, in the case of calls to wireless numbers, use up their minutes. The new rules reduce regulatory uncertainty with minimal burden on industry and maximize consistency with those of the Federal Trade Commission.

Specifically, the rules protect consumers by requiring telemarketers to obtain prior express written consent from them, including by electronic means such as a website form, before placing a robocall to a consumer. The new rules also require that telemarketers provide an automated, interactive "opt-out" mechanism during each robocall so that consumers can immediately tell the telemarketer to stop calling. They also strictly limit the number of abandoned or "dead air" calls that telemarketers can make within each calling campaign.

On the other side, the revised rules also ensure that informational calls, such as those related to school closings and flight changes, continue to be available to consumers who wish to receive them. (FCC)

**

RADIO POLITICS: COMMITTEE FOR US BROADCASTING OPPOSES BBG FY 2013 BUDGET PLAN

The Committee for U.S. International Broadcasting has blasted the recent Broadcasting Board of Governors budget proposals for Fiscal Year 2013 that we reported on last week.

The Committee says that it is outraged by the proposal to cut and reduce Voice of America English and foreign language programs and positions. It also takes issue with reductions to programs and positions at Radio Free Asia and at other U.S. government-funded international broadcasting entities managed by the Broadcasting Board of Governors.

The Committee for U.S. International Broadcasting is a private nonprofit interest group focusing on broadcast and news distribution. Its website is located in cyberspace at www.cusib.org. (RW)

**

NAMES IN THE NEWS: HAMRADIONOW - THE ORLANDO INTERVIEWS

Some names in the news this week. Gary Pearce KN4AQ is releasing a series a videos shot at the Orlando HamCation in mid-February. This, as a part of his Ham Radio Now series that features interviews with the true movers and shakers of the hobby in the 21st century.

His latest release includes a very in depth interview with CQ Magazine editor Rich Moseson W2VU. In it Pearce talks to him for almost an hour about how CW is faring now that it's no longer required; about the CQ family of magazine's new digital option, and a little about ham radio video production.

This video is titled Ham Radio Now Episode 2: The Orlando Interviews. More about this new series is on-line at arvideonews.com. (Southgate)

**

NAMES IN THE NEWS: THE ERIC JAMIESON INDIAN OCEAN AWARD CREATED IN VK

And the Wireless Institute of Australia Board has accepted the offer of Eric Jamieson, VK5LP, to sponsor awards for first amateur radio contacts on the two meter band spanning the Indian Ocean between Australia and Africa. There will be three honor give. One each for voice, for CW and for the digital modes. As one might expect this program will be known as the Eric Jamieson Indian Ocean Awards. More on this is on line at www.wia.org.au. (WIA News)

**

NAMES IN THE NEWS: LIGHTSQUARED ANNOUNCES LAYOFFS FOLLOWING FCC DECISION AGAINST ITS NETWORK

LightSquared Inc. the wireless company whose controversial plan to operate in spectrum adjacent to that used by the space-based G-P-S navigation system says that it plans to lay off nearly half of its

employees to save money. In a press release, the company said it will cut 45 percent of its 330 employee workforce and called the move a necessary cost savings measure to ensure the long-term success of the company.

As previously reported, the Federal Communications Commission dealt the company a severe blow when it said it would revoke permission for LightSquared to move ahead with its wireless network. This, after tests found that it would interfere with Global Positioning Systems used by the military, the airlines and the general public. (Published news reports)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

EMERGING TECHNOLOGY: PASNASONIC TO RELEASE TEXT TO SPEECH TV

Panasonic plans to release a new line of televisions in March with text-to-speech capabilities. This according to a podcast from the UK-based show Early Edition.

On the netcast, Panasonic's Nigel Prankard is quoted as saying that users will be able to obtain channel information, browse the user guide, and use the built-in electronic program guide among other features.

He went on to explain that the company felt it was the right time to include accessibility features and that Panasonic planned to include it in all models. This based on the company stating that a user shouldn't be limited in the choice of a television by which ones included accessibility features.

Apple is credited in part for proving the technology could be added without much additional cost. This initial release of these new televisions sets appears to be targeted toward the UK market. No word when these sets will be released world wide. More information is on-line at tinyurl.com/first-accessible-tv. (KC9RP via Insight Radio)

**

HAM RADIO IN SPACE: AMATEUR RADIO CELEBRATES JOHN GLENN OVER PERTH AUSTRALIA

50 Years of anticipation all worked out on the day that Australia and the world celebrated John Glenn's orbit in Friendship 7 over the city

of Perth on Monday, February 20th. And ham radio was an important part of the event. Onno Benschop, VK6FLAB, reports:

--

We had John Glenn, the Premier of WA, the Lord Mayor of Perth, Lyn Beazley the WA Chief Scientist and many other dignitaries on hand to celebrate. We even managed to squeeze in some David Bowie and a video on how to become an astronaut.

The crowds filled the Northbridge Piazza and much anticipation culminated at 10:24 UTC. Orbital calculations all worked out and the International Space Station made it across the horizon. There were some chilling seconds when Mike was calling from Honolulu, but in the end, the contact was a great success.

Of course, an event like this could not have been possible without a little help from some friends, Captain Dan Burbank on the International Space Station, the WA State Records Office, the WA Museum, the City of Perth, ARISS, NASA and the Hills Amateur Radio Group.

A full credit list is being prepared on the Hills Amateur Radio Group website, but two people require a special mention, Tony VK5ZAI the Australian ARISS mentor and Meg VK6LUX who energetically kept the multitude of interested parties moving along making it all possible.

We managed to get Amateur Radio into the news on ABC Online, ABC radio and local television, who knows we might pick up some more amateurs along the way.

Alex VK6FLOL and Donald VK6PDS scored a place in history as prize winners for the contact.

I'm Onno Benschop, VK6FLAB

--

By way of background, on February 20, 1962, John Glenn became the first American to orbit the Earth in the Friendship 7 spacecraft. On this mission, Glenn flew over Perth and the people of Perth turned on their lights to acknowledge his mission. Glenn observed that the city was visible from space and Perth become known worldwide as the City of Light. (WIA News)

**

WORLDBEAT: RSGB ATTEMPTS TO HARMONIZE 5 MHZ ALLOCATION

The RSGB report that it has received an offer from the primary United Kingdom user of 5 MHz, which is the Ministry of Defense aimed at working with the British ham radio community on band access issues.

As has been reported earlier the Ministry of Defense was unable to meet an RSGB request for access over a continuous range but has offered a number of small frequency blocks. These include all of the present 3

kHz wide channels.

The new offer is quite complex and the RSGB's view is that it need to seek input from members and non-members of the UK amateur community as to how it responds. As such the RSGB announced that it would be launching what it calls a second "Litmus Test" discussion entitled "New 5 MHz NoV proposals".

The details of the offer and a draft response from the RSGB should have been uploaded to www.rsgb.org/consultations by March 1st. (GB2RS)

**

ON THE AIR: TARC REMEMBERS THE APRIL 2011 TUSCALOOSA TORNADO VICTIMS

On the air, the Tuscaloosa Amateur Radio Club will be operating special event station W4XI on April 28th from 11:00AM to 5:00PM local time. This in remembrance of the 44 people that died when an F-4 tornado struck that city on April 27, 2011.

Operation will be from the top of the western parking deck at Druid City Hospital Regional Medical Center in Tuscaloosa. The operating frequencies will be 7.270 and 14.270MHz, +/- any QRM. The club will also have a RTTY station in the data portion of both the 40 and 20 meter bands. QSL information is on the club website at www.w4kcq.org. (N4EDT)

**

ON THE AIR: THE IRTS CELEBRATES ITS 80th ANNIVERSARY

The Irish Radio Transmitters Society is now celebrating its 80th anniversary and is on the air with the special callsign EI80IRTS. An attractive certificate sponsored by Dundalk Amateur Radio Society will be available to all who make contact with the station. More details are on-line at www.ei7dar.com/ei80irts.html. (IRTS)

**

DX

In DX, JI3DST, will be on the air signing portable 9M2 from West Malaysia between 0000 UTC on March 10th and 0900 UTC on March 11th. His activity will be on 80 through 6 meters including most of the WARC bands. Modes to be used will include CW, SSB and FM. QSL via JI3DST.

DJ0IF and SP7VC will be on the air from Madeira Island through the 7th of March signing portable CT9. QSL via their home callsigns.

F6ITD will operate SSB and digital modes on the HF bands from Guadeloupe until 13th of March. QSL via his home callsign, either direct or via the bureau.

Lastly, K5LBU, VE7MID, VE7DS and N5JR will be

active from the Lotsane Safari Lodge in Botswana

between March 18th and the 27th. The group

plans to be active in the CQ World Wide WPX SSB

Contest from March 24th to the 25th as A25HQ.

They will have three radios and both a log

periodic and wire antenna covering 160 meters

and up. More details in future Amateur Radio

Newsline reports.

(Above from various DX news sources)

**

THAT FINAL ITEM: NASA SHUTS DOWN LAST MAINFRAME

There was a time when IBM's mainframe computers were the cutting-edge machines for scientific and engineering calculations. Now, for NASA that's all come to an end. Cheryl Lasek, K9BIK, has the details:

--

The day of the giant mainframe computer began in the 1960s, when IBM's System 360 rewrote the rules of computing and before humans walked on the moon. When NASA acquired two of the then super-speed System 360 Model 95 mainframes in 1968, IBM touted the machines' mathematical abilities.

But February marked the end of the era in NASA computing. This as the space agency powered down its last IBM Z9 mainframe that was located at Marshall Space Flight Center.

Linda Cureton is a Chief Information Officer who once programmed a System 360 mainframe in assembly language at the Goddard Space Flight Center in Greenbelt, Maryland. She is quoted as saying that mainframes are really not so bad and they have their place. She notes that things like virtual machines, hypervisors, thin clients, and swapping are all old hat to the mainframe generation though they are new to the current generation of what she termed as cyber youth.

But for many in the industry, mainframes had become so burdened with a reputation for a bygone era of computing that they became synonymous with dinosaurs. To counter this IBM fought back, boosting performance, adding new technology. The company succeeded in that these newer mainframe systems remain a fixture in some corners of the computing industry.

In the old days, mainframes were the size of several large rooms. Today these units are only the size of a refrigerator. And even though NASA has shut down its last one, there is still a requirement for mainframe capability in many other organizations.

For the amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

By comparison with days gone bye, today's fastest mainframe supercomputers can perform 10.5 quadrillion calculations per second. (NASA, Science OnLine)

HILLSBOROUGH: The Lagan Valley Amateur Radio Society will be holding its annual Rally tomorrow (Saturday) at the Hillsborough Village Centre.

//
Amateur Radio Club to Host 'Pelican Island Special Event':

Posted: 01 Mar 2012 04:22 PM PST
http://www.eham.net/articles/27822

WABASSO -- Vero Beach Amateur Radio Club is hosting its fifth annual "Pelican Island Special Event" on March 10 from 9 a.m. to 4 p.m. to commemorate the 109th Anniversary of the Pelican Island National Wildlife Refuge, our country's first National Wildlife Refuge. The event will be located on the Wabasso Causeway Park (County Road 510) between the Wabasso bridge and U.S. 1. Formed in 1961 with 11 members, the Vero Beach Amateur Radio Club has grown to more than 50 members and includes all of Indian River County. Since its onset, the club has been helping our community with communications assistance both to non-profit organizations during fundraisers and our government in times of emergency. Amateur Radio is both a hobby and an emergency service. As the American Radio Relay League comments, "Ham radio provides the broadest and most powerful wireless communications capability available to any private citizen anywhere in the world."

//
Rural Affairs Committee Agrees That Proposed Antenna Rules Need Tweaking:

Posted: 01 Mar 2012 04:22 PM PST
http://www.eham.net/articles/27821

OTTAWA -- Proposed rules for where private radio operators can put their antennas need another look, council's rural-affairs committee said Thursday morning, two days after the planning committee said the same thing. The city can't actually control the placement of antennas, private or commercial, because they're regulated by Industry Canada. But the federal department does give municipalities a chance to comment when it's making decisions and the rules describe what the city thinks is OK. They're aimed at restricting big and intrusive installations while staying out of the way

of small ones, but amateur radio operators warned city councillors that they don't quite hit the mark. Antennas on residential properties would be exempt from public consultations as long as they're under 15 metres tall and at the back of a house. The radio operators said that actually leaves little room for a working antenna above many trees and roofs, it unduly restricts unobtrusive antennas that would be less visible in front yards than telephone wires, and it doesn't distinguish between an urban house and a rural one, where neighbours might be much too far away to care which yard has an antenna in it.

ARRL Publishes New Guidelines for 60-Meters:

Posted: 01 Mar 2012 03:02 PM PST
http://www.eham.net/articles/27818

Thanks to the FCC's Report and Order issued November 18, 2011, radio amateurs will enjoy a number of new privileges on the 60 meter band, beginning at midnight (EST) March 5. These new privileges include a boost in effective radiated power from 50 to 100 W, as well as the ability to use CW and certain digital modes.

//
W1AW Video Tour Available on ARRL Website:

Posted: 01 Mar 2012 02:59 PM PST
http://www.eham.net/articles/27817

In case you missed the live web tour of W1AW, the Hiram Percy Maxim Station at ARRL Headquarters, you can now watch the 18 minute video on the ARRL website. On February 12, W1AW Station Manager Joe Carcia, NJ1Q, led Emmy Award-winning meteorologist Geoff Fox, K1GF, on a tour of the famed station. Al Petrunti, KA1TCH, of the New Day Group
http://www.newdayhd.com/ followed Carcia as he led Fox

and viewers through the station, recording it for viewers to watch.

//
Malyj Vysotskij Island Added to DXCC Deleted Entities List:

http://www.eham.net/articles/27816

According to the Finnish Ministry of Transportation and Communication, the Saimaa Canal Treaty between Finland and Russia has been finalized by relevant Finnish and Russian authorities through ratification.

//
Nominations for ARRL Awards Now Open:

Posted: 01 Mar 2012 03:00 PM PST
http://www.eham.net/articles/27815

Each year, the ARRL Board of Directors has the opportunity to select recipients for a number of awards in various categories that honor Amateur Radio operators. The nomination period is now open for the ARRL awards that are designed to recognize educational and technological pursuits in Amateur Radio, as well as an award to honor a young Amateur Radio operator.

//
ARRL in Action: What Have We Been Up To Lately?

Posted: 01 Mar 2012 02:58 PM PST
http://www.eham.net/articles/27814

This feature is a concise monthly update of some of the things that the ARRL is doing on behalf of its members. This installment -- which covers the month of February -- takes a look the 2012 World Radiocommunication Conference, a new law that has a provision for an Amateur Radio study, new rules for 60 meters, happenings at W1AW, a new movie that features Amateur Radio, reports from the Official Observer Desk and more.

//
March Qualifying Runs:

Posted: 01 Mar 2012 02:58 PM PST
http://www.eham.net/articles/27813

The W1AW and West Coast Qualifying Runs were inadvertently left out of the March 2012 issue of QST. Here is the missing information:

//
Former RAC President Earle Smith, VE6NM (SK):

Posted: 01 Mar 2012 02:57 PM PST
http://www.eham.net/articles/27812

Earle Smith, VE6NM, of Grand Prairie, Alberta -- who served as President of the Radio Amateurs of Canada (RAC) from 2004-2007 -- passed away Friday, February 24. He was 81. An active radio amateur since 1948, first licensed as VE1SA, Smith enjoyed meeting amateurs from all over Canada and the world. "Earle was well respected by Amateur Radio operators both within Canada and internationally," said current RAC President Geoff Bawden, VE4BAW.

//////////////////////////////////////
ARNewsline Report 1803 -- March 2 2012:

Posted: 01 Mar 2012 02:57 PM PST
http://www.eham.net/articles/27811

The following is a QST. Bad batteries may have lead to the loss of communications of a ham radio balloon from Texas to China. Also, Australia begins an evaluation program to see if its hams should be granted a power increase to a full kilowatt; Hams in Senegal to get access to 6 meters; M V Island is deleted from the DXCC and the role of social media in times of emergency reporting. All this and more on Amateur Radio Newsline report number 1803 coming your way right now.

MSU Satellite Surpasses Goal; NASA Taps MSU to Queue Up for Another Launch:

Posted: 02 Mar 2012 04:01 PM PST
http://www.eham.net/articles/27830

The Montana State University satellite that rode into space on a NASA rocket has now gathered information longer than the historic U.S. satellite it was built to honor, says the director of MSU's Space Science and Engineering Laboratory (SSEL). Almost four months after the Oct. 28 launch and shortly after learning that NASA selected another MSU satellite for possible launch on a NASA rocket next year, SSEL Director David Klumpar cheered as he suddenly realized that Montana's only satellite had collected data for 111 days as of Feb. 15. Since then, the satellite has well surpassed the entire 111-day mission of its history-making predecessor, Explorer-1, the first successful U.S. satellite. Ham radio operators play an important part in the mission because they contact MSU whenever they hear HRBE's "heartbeat," a beep that occurs every 15 seconds, Klumpar said. A map in the Space Operations Center keeps track of those operators. They live in Germany, Australia, Sudan, Japan, all over the United States and the rest of the world.

High School Sends Balloon to Edge of Space:

Posted: 03 Mar 2012 04:14 PM PST
http://www.eham.net/articles/27833

A high-altitude weather balloon jammed with cameras rose far, far higher than jets fly over the weekend, traveling to the edge of space during a journey that thrilled its "pilots" back at San Diego's Mt. Carmel High School. The $90 balloon was sent aloft Saturday by the school's Amateur Radio Club, which tracked it to a point more than 100,000 feet high. The journey lasted 2 hours and 41 minutes, ending when the balloon landed east of the Ocotillo Wells airport. It was recovered by dirt bikers, who declined a $100 reward. "This was a huge success for our students! We are already planning our next project," said John Earnest, the physics teacher who serves as the advisor to the Amateur Radio Club. "We were able to transmit live pictures during flight as well as telemetry data on temperature, pressure, acceleration, position, and altitude. We also had HD video that was retrieved after flight."

//
Radio Amateurs Occupy Hughes Center:

Posted: 03 Mar 2012 04:12 PM PST
http://www.eham.net/articles/27832

Radio amateurs will occupy the Hughes Center today as part of the Arkansas River Valley Amateur Radio Foundation's (ARVARF) annual Hamfest event. Hamfest is open to the public and will be conducted from 8 a.m. until noon. Admission is $5. Vendors will offer amateur radio equipment and door prizes. Some of the prizes will include radio equipment, which require a valid amateur radio license to win. "It's a lot of fun," local ham Kenneth Zelnick said. "We get to meet people who we may not know other than a voice on the radio." Radio amateurs, also known as hams, will have the opportunity to purchase new equipment from commercial vendors or older or original equipment from flea market vendors, according to Hamfest chairman and former head of Arkansas Tech University's (ATU) music department Andy Anders. "There's just so much stuff, it's incredible," Anders said. "There's a lot of various radio gear and related things that are going to be on tables to see ... and of course, all you have to do is ask somebody about it, and hams love to talk about their gear."

//
Something Good in Memphis:

Posted: 03 Mar 2012 04:12 PM PST
http://www.eham.net/articles/27831

lexander H. Hilliard has been nominated for recognition in MIFA's Something Good in Memphis campaign by Sandra Mathias. Mathias writes: "For 39 years, Alexander H. Hilliard has offered his time, talent and expertise to his community by sharing his knowledge of radios and emergency communications. An active amateur 'ham' radio operator with an extra class license, Hilliard also has a commercial license, is a radio instructor and a volunteer test examiner.

1589. IF JESUS WAS GOD !!!!!!!!!!!!

Newsgroup: rec.radio.amateur.policy
Date: 2012-03-05 10:13:36 UTC
From: BV BV <bv8bv8bv8@gmail.com>
Message-ID: <204fbf66-e223-4ef5-951c-c9a361f8299d@s7g2000vby.googlegroups.com>
Source record: 250687

IF JESUS WAS GOD

If Jesus was GOD, then why in Mark 12:29 Jesus said "Here, O Israel: The Lord our God is one Lord." The words "our God" indicate that Jesus had a higher God over him, a stronger God than him. Jesus didn't say "Your God". He said "our God" which includes Jesus as the creation of GOD.
If Jesus was GOD, then why in John 20:17 Jesus said I ascend to my God and your God? This tells us that we and Jesus have a common GOD.
If Jesus was GOD, then why in John 8:28 Jesus said "I do nothing of myself"? Can't GOD do anything he wills?

If Jesus was GOD, then why in John 14:28 Jesus said "My Father (GOD) is greater than I"?If Jesus was GOD, then why in Luke 23:46 Jesus said "Father (GOD), into thy hands I commend my spirit"?
If Jesus was GOD, then why in Matthew 19:16 Jesus said "Why call me good, there is none good but One, that is GOD"?

If Jesus was GOD, then why in Matthew 26:39 Jesus begged his GOD to have mercy on him and to pass the cup to death (kill Jesus in another words) before Jesus goes through the pain of
crucifixion? Also see: Jesus's crucifixion in Islam

If Jesus was GOD, then why in John 18:38 he didn't reply when he was asked about the truth?

If Jesus was GOD, then why in Matthew 24:36 Jesus told his followers that no one (including Jesus) knows when the judgment day will come, only GOD knows?
If Jesus was GOD, then why in Isiah 11:2-3 GOD had put the spirit of fearing GOD in Jesus?

If Jesus was GOD, then why in John 5:31 Jesus told his followers that if he (Jesus) bears witness of himself, then his record is not true?

If Jesus was GOD, then why in John 5:30 Jesus told his followers that he can't do a single thing of his own initiative?

If Jesus was GOD, then why in John 5:36-38 Jesus said that GOD had assigned him (Jesus) work and GOD is a witness on Jesus?

If Jesus was GOD, then why in John 5:32 Jesus told his followers that they have never seen GOD at anytime nor ever heard his voice?

If Jesus was GOD, then why did he pray to his GOD in Luke 5:16?

If Jesus was GOD, then why in Matthew 26:39 Jesus fell on his face and prayed to his GOD?

The "God" Title:
How come Christians take the "God" (theos in Greek) title literally with Jesus in Isiah 9:6 and they don't take it literally for the rest of the prophets and people who were called Gods ?
The Prophets who were called "God" in the Bible are as follows:
Prophet Moses in Exodus 7:1
The Devil in Corinthians 4:4 (the word for God in this verse is theos in Greek, the same used for Jesus that was translated as "God")
Multiple Prophets in Psalms 82:6
King David in Psalm 45:3
Note: The only unique title given to GOD in the Bible that was not given to others at all are Jehova, GOD, and GOD LORD. "God", "Most Mighty" and "Almighty One" are titles that were given to Jesus, other Prophets and to Satan himself in the Bible.

Very important note: Did you know that in the languages of Arabic and Hebrew the father of the house can be called the God of the house? Jesus was the God (father or leader) of his people and their father according to Isiah 9:6. Jesus being the leader and the king, it is normal for him to be called the father of his people (Father in Isiah 9:6), and because he is their father he automatically becomes their God. My father is my God in Arabic and Hebrew.

The "Son" Title:
How come Christians take the "God's Son" title literally with Jesus and they don't take it literally for the rest of the prophets and people who were called the Sons of God?
In John 3:16 Jesus was called God's only Begotten Son.
In Exodus 4:22 "Thus saith Jehova, Isreal is my son, even my firstborn." Isreal was called God's First Son.
In Jeremiah 31:9 "I am a father to Isreal, and Ephraim is my firstborn." Ephraim is God's First Son and First Born.In Psalm 2:7 "... Jehova had said onto me (David), thou art my Son; this day have I begotten thee." David was called God's Begotten Son.

Were Jesus's Miracle's Unique?
If Jesus is believed to be GOD because he could do miracles, he could heal leprosy, he could cause blind men to see, or raise the dead, then what about the others who performed the same miracles?

Elisha and Elijah fed a hundred people with twenty barley loaves and a few ears of corn (2 Kings 4:44).

[Elisha told Naaman, who was a leper, to wash in the river Jordan (2 Kings 5:14) and he was healed. Elisha caused a blind man to see in (2 Kings 6:17,20).

Elijah and Elisha raised the dead in (1 Kings 17:22, and 2 Kings 4:34). Even Elisha's dead bones restored a dead body in (2 Kings 13:21).
Indeed Jesus had prophesied that people will worship him uselessly and will believe in doctrines not made by GOD but by men "But in vain they do worship me, teaching for doctrines the commandments of men.

(Matthew 15:9)"

In Matthew 15:9 above, we see Jesus warning that Trinity (the bogus lie) will dominate, and people will take Jesus as GOD and worship him, which is a total sin according to what Jesus said !!
Allah Almighty (GOD) in the Noble Quran (The Muslims' Holy Scripture) states in Verse 5:72 "They do blaspheme who say: 'God is Christ the son of Mary.' But said Christ: 'O Children of Isreal ! worship God, my Lord and your Lord.' "

Also in Noble Verse 5:73 "They do blaspheme who say God is one of three in a Trinity: for there is no god except One God. If they desist not from their word (of blasphemy), verily a grievous penalty will befall the blasphemers among them."
And also in Noble Verse 4:171 "O People of the Book! Commit no excesses in your religion: Nor say of God aught but the truth. Christ Jesus the son of Mary was (no more than) an apostle of God, ..."

The Point that I am trying to prove:

Muslims believe that Prophet Jesus peace be upon him is a messenger from God. He was sent from God Almighty to deliver God's words to his people. Jesus was never God, nor ever claimed to be God. Jesus was a humble wonderful human being just like the rest of the Prophets and Messengers of God. Muslims also believe that Jesus was never crucified, nor ever died on the cross, nor ever wanted to die on the cross, nor ever was sent to earth to die on the cross .

Apparently, every TV and radio entity has a copy of it. You'd think, by now, it would have been leaked. Clearly, a national survey was conducted that showed sports fans to be so brain-deficient that piles of pure, untreated nonsense should regularly be presented as fact, and it will be accepted as fact.

Mississippi State-Auburn, an SEC Network telecast on MSG Saturday, included a sideline interview with Auburn man Charles Barkley. When it was over, play-by-player Dave Neal said: "What an ambassador for this university he has been!"

Geez. Barkley's an excessive boozer, gambler and night crawler who has done time for DUI after hooking up with a hooker. As a Nike peddler, he was selected to tell the nation: "I am not a role model." More recently he admitted to accepting illegal cash while playing basketball at Auburn.

If Auburn had more "ambassadors" like Barkley, it would be a medium security prison.

Yesterday, after Eli Manning threw the ball out of bounds after he was hit -- duly noted by Fox's Joe Buck -- one pass after Giants receiver Victor Cruz dropped a pass -- also duly noted by Buck -- Buck noted Manning is "now oh-for-three" passing. And that didn't prevent Fox from later posting Manning's wildly misleading passer rating.

ESPN's voices, all weekend, announced the debut of the "New, expanded, three-hour Sunday NFL Countdown Show!" -- as if it's good news, as opposed to what it is: another ESPN exercise in absurd excess.

All week, on TV and radio, we heard from players, coaches, team owners who were asked to describe where they were and what they felt on Sept. 11. Turns out their recollections and feelings weren't much different from many of us, but, as usual, the media suppose that tragedy hurts sports figures more.

On local radio shows, might it have been better to have heard the 9/11 recollections of local listeners?

Yesterday, two minutes into Eagles-Rams, Fox twice told us Michael Vick was last season's Comeback Player of the Year -- as if that's a wonderful thing. Comeback from what, a bad season? In other words, NFL standards now allow players who are released

Weather Spotters Aim to Keep B.C. Safe:

Posted: 04 Mar 2012 04:55 PM PST
http://www.eham.net/articles/27837

From Jim Maczko's point of view, Saturday's meeting of the Battle Creek region's weather spotters couldn't have come at a better time. Overnight, a string of severe storms had struck the nation's eastern half, causing deaths in four states. Just hours earlier, an official warning of high winds in the area had ended. And still fresh in everyone's memory was the destructive windstorm that swept through Battle Creek and Emmett Township on May 29, 2011, felling trees and damaging homes and businesses. "We have to stay prepared and stay ready," said Maczko, warning coordination meteorologist with the National Weather Service office in Grand Rapids. About a hundred volunteers with their eyes on the sky and their hearts in the right place came to learn more during the annual refresher course for SkyWarn, a program of the federal weather agency. Ken Nierman of Battle Creek said he has volunteered as a weather spotter for about 12 years. "It's something I can do as a civilian to add to the safety of the community," said Nierman, who is the emergency coordinator for Radio Amateur Civil Emergency Services, or RACES, a group of ham-radio experts who help officials communicate during local, regional or national emergencies.

//
Learn Morse Code to Help Disaster Victims, Radio Hams Told:

Posted: 04 Mar 2012 04:53 PM PST
http://www.eham.net/articles/27836

JOHOR BARU: Amateur radio enthusiasts should learn Morse code so that they can respond to emergencies better. South Johor Amateur Bandwidth Radio Association patron Tunku Abdul Jalil Tunku Osman said such a skill was useful, especially during natural disasters. "During the 2004 tsunami, the emergency response teams that were deployed to Aceh used Morse code to find victims as phone lines were damaged. "In the major flood that hit Kota Tinggi and several other districts in the state, our members used two-way radios to help," he said after attending the association's annual general meeting here yesterday.

//
Historically Speaking: Morse Started In Art, Not Technology:

Posted: 04 Mar 2012 04:51 PM PST
http://www.eham.net/articles/27835

Danielson, Conn. -- It took a tragedy for Samuel F. B. Morse to change his life from painting to inventing. Morse was born April 27, 1791, in Charlestown, Mass., the first child of Woodstock native Jedidiah Morse Jr. and his wife, Elizabeth Breese. Jedidiah Morse was a Puritan and his children were brought up in a praying household and with the virtue of self-sacrifice. Samuel Morse showed artistic talent very early. He attended Phillips Academy in Andover, Mass., and graduated with distinction from Yale College, his father's alma mater, in 1810. He was 19. While in Europe in 1830, Morse met Louis Daguerre, who, at that time, was recognized as a celebrated designer for the theater. He was, earlier, also known as the inventor of the diorama. By 1839, Daguerre announced his daguerreotype as a "gift, free to the world." It would revolutionize the art world, and Morse was impressed with the implications of this new photographic process. Morse, meanwhile, continued his portrait work. While in Washington painting Lafayette's likeness, he received word by a horse messenger that his wife, Lucretia Walker Morse, was sick. He hurried back to their home in New Haven, but arrived after she had been buried. In his grief and guilt, having been away from his family, he turned his efforts to the pursuit of swift, long-distance communication. Morse made contact with Charles Thomas Jackson, an authority on electromagnetism. Morse began to experiment with and develop a single-wire telegraph. His Morse code would change the way the world communicated.

Ham Radio Allows Students to Contact Foreign Countries:

Posted: 05 Mar 2012 04:28 PM PST
http://www.eham.net/articles/27841

KJHK radio is not the only campus radio station.Tucked in acorner of Learned Hall, the KU Amateur Radio Club has a long-standing history with KU. Since it was formed in 1952, KU students have used the radios in the room, known as HAM radios, to communicate with and compete against people from across the globe. For most competitions, the goal is to contact as many people from a given area state or world wide as possible.
Long-distance contact is known as DXing, which is possible thanks to two large antennae on the roof of Learned. "Using this equipment, I've talked to people in France, Italy, Chile and Great Britain," said Michael Shook, a senior from Peoria, Ill., in the Amateur Radio Club. "I really like DXing and talking to someone from tens of thousands of miles away." Right now, there are a few upcoming amateur radio competitions, including one focused on contacting people from Kansas. Another competition, known as Field Day, takes place during the summer, where over 35,000 HAM radio operators from the United States and Canada participate in a variety of contests.

//
New System To Forecast Space Weather:

Posted: 05 Mar 2012 04:25 PM PST
http://www.eham.net/articles/27840

A new system has been developed by British scientists that will forecast space weather in an effort to better protect satellites orbiting our planet from damaging solar storms. Led by researchers at the British Antarctic Survey (BAS), the SPACECAST project is expected to provide reliable web-based forecasts so that satellite operators will be able to take action to keep their navigational, communication, and scientific satellites from the radiation that solar storms produce. Researchers from six European countries partnered with two European companies and with colleagues from the US to use satellite data, ground-based measurements of the Earth's magnetic field, and computer models to make accurate forecasts of space weather. "For the first time, we can now forecast radiation levels for a whole range of different orbits, from geo-stationary to medium earth orbit where there is a tremendous growth in the number of satellites," Richard Horne, BAS's lead researcher of the project, said in a recent press release. GPS satellites, which orbit closer to Earth, passing through the

so-called Van Allen radiation belt -- a ring of charged particles trapped within a magnetic field encircling the planet above the equator -- are typically at a higher risk than other types of satellites.

Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

Kids Will Ham It Up, Radio Style:

Posted: 06 Mar 2012 04:34 PM PST
http://www.eham.net/articles/27854

In the event of hurricanes, fires, floods, earthquakes and other disasters, you can count on amateur (or Ham) radio to provide vital links to agencies and city services such as fire, police and ambulance. On Tuesday, March 20, local kids can join Surrey Museum and Surrey Emergency Program Amateur Radio Society (SEPAR) in an amateur radio emergency communications workshop at the museum, at 17710 56A Ave. The session (from 2 to 4 p.m.) will focus on how amateur radio provides communities with emergency communications when commercial systems are not operational. The hands-on workshop is designed for kids age nine and older. Admission is free, but space is limited; preregister by calling 604-592-6956. Workshop participants will talk to people in other countries, experience digital communications without the internet, learn how radio waves travel, simulate a ground control/International Space Station contact, try Morse code and watch videos. Also, kids will learn that new technology is not always superior to old technology and is anything but obsolete.

//
Father, Son Team Up in 'Outer Space':

Posted: 06 Mar 2012 04:32 PM PST
http://www.eham.net/articles/27853

Two Anderson Township amateur radio operators recently sent and received a photo from a satellite that was manually deployed from the International Space Station. Farrell Winder and his son, Jeff Winder, had helped in the development of SuitSat-1 - a worn-out Russian spacesuit that was recycled, outfitted with an amateur radio transmitter and batteries, and tossed from the International Space Station in 2006. Amateur radio operators were able to receive its signals on earth, but the batteries ran down in two weeks and the space suit eventually burned up as it spiraled into earth's atmosphere. The limited success of SuitSat-1, however, inspired the development of a much newer advanced concept called ARISSat-1, which was launched in August 2011 from the International Space Station.

//
W2E - Doomsday 2012 - Special Event:

Posted: 06 Mar 2012 04:33 PM PST
http://www.eham.net/articles/27852

The event celebrates the end of the Mayan Calendar and what has been characterized in popular culture as Doomsday 2012. The special 1x1 Call - W2E is short for "World 2 End" Special event operators will be making QSOs on the following frequencies, plus or minus: 3.866 MHz, 7.266 MHz, 14.266 MHz, 21.366 MHz, and 28.366 MHz.

//
Henryville, IN Tornado:

Posted: 06 Mar 2012 04:35 PM PST
http://www.eham.net/articles/27842

On Friday March 2nd an inbound cold front brought extreme weather to the Ohio Valley area. The Clark County RACES team conducted a Skywarn net relaying weather reports to the Louisville, KY National Weather Service office. This front spawned several tornadoes which took a track through the Northern part of Clark and other nearby counties. After the storms passed we started receiving reports of massive destruction in the Henryville and Marysville Indiana areas.

Just explain why you can't use a spellchecker. There is no excuse for
mispellings unless you're a tard boy.

> > > with lines like that, we should all bow down and praise your flame
>

==> + DAYTON HAMVENTION®: DAYTON HAMVENTION HONORS QST TECHNICAL EDITOR
JOEL HALLAS, W1ZR, WITH TECHNICAL ACHIEVEMENT AWARD

On March 6, the Dayton Hamvention® Awards Committee announced the recipients of Hamvention's four annual awards. QST Technical Editor Joel Hallas, W1ZR, was named the winner of the Technical Achievement Award. The recipient of the Amateur of the Year is S. Suri, VU2MY. Steven Betza, WZ2V, was selected as the recipient of the Special Achievement Award. The Deutscher Amateur Radio Club -- Germany's IARU Member-Society -- was selected as the Club of the Year. Read more here <http://www.arrl.org/news/dayton-hamvention-honors-em-qst-em-technical-editor-joel-hallas-w1zr-with-technical-achievement-awar>.

==> + ON THE AIR: NEW 60 METER PRIVILEGES NOW IN EFFECT

As of March 5, US amateurs have new privileges on the 60 meter band. In addition to an increase in effective radiated power from 50 to 100 W, hams can now transmit CW and PSK31 on the following channel-center frequencies:

- Channel 1: 5332.0 kHz
- Channel 2: 5348.0 kHz
- Channel 3: 5358.5 kHz
- Channel 4: 5373.0 kHz
- Channel 5: 5405.0 kHz

Amateurs can also transmit USB voice and PACTOR III on the following suppressed carrier frequencies (the frequencies typically shown on transceiver displays):

- Channel 1: 5330.5 kHz
- Channel 2: 5346.5 kHz
- Channel 3: 5357.0 kHz
- Channel 4: 5371.5 kHz
- Channel 5: 5403.5 kHz

For more information, please see 60 Meter Operations -- New Privileges and Recommended Practices <http://www.arrl.org/files/file/Regulatory/Recommended_Practices_for_60_Meters%20-%20Version%206_4.pdf>, published <http://www.arrl.org/news/arrl-publishes-new-guidelines-for-60-meters> by the ARRL HF Band Planning Committee. A revised ARRL band chart <http://www.arrl.org/files/file/Hambands_color.pdf> is also available. Watch for the article "New Privileges on 60 Meters" by ARRL Regulatory Information Manager Dan Henderson, N1ND, in the April 2012 issue of QST.

==> ON THE AIR: ARRL SEEKS COMMENTS ON PROPOSED 9 CM BAND PLAN

A few months ago, the ARRL UHF/Microwave Band Plan Committee asked the Amateur Radio community about current, planned and projected uses of the amateur bands between 902 MHz and 3.5 GHz. The response was beyond our expectations, with hundreds of comments and suggestions received. Thanks to all of you who took the time to share information with us. After reading the feedback, the committee began working on the band plans; the first draft plan ready for review is for the 9 cm band (3300-3500 MHz). Read more here <http://www.arrl.org/news/arrl-seeks-comments-on-proposed-9-cm-band-plan>.

==> + PROPAGATION NEWS: ACTIVE SUNSPOT REGION 1429 PRODUCES SOLAR FLARES, CORONAL MASS EJECTIONS

This week has been an active week for our Sun. An X-1.1 class solar flare erupted from the Sun on March 4 at 11:13 PM EST (0413 UTC March 5), sending an explosion of plasma and charged particles -- a coronal mass ejection (CME) -- hurtling through space. Forecasters at NOAA's

Space Weather Prediction Center are saying that this CME should miss Earth, but it will hit Mercury and Venus. Then on March 6 at 7:28 PM EST (0028 UTC March 7), the Sun released a solar flare, the strongest one this year. The X-5 class flare hurled another CME into space, but it is too soon to tell if this is an Earth-directed flare. This activity is coming from sunspot 1429, which is currently making its way around the northern hemisphere of the Sun.

Sunspot 1429 -- which emerged on the Sun on March 2 and is estimated to be at least four to five times larger than Earth -- is slowly turning to face Earth, so if any such eruptions do occur, they are increasingly likely to be geoeffective.

When a CME hits the Earth's atmosphere -- approximately 72 hours after exploding on the Sun -- the low bands will be depressed and signals will be weaker the lower the frequency. The absorption rate will be most severe on 160 meters, less on 80 and somewhat better on 40 meters. The maximum usable frequency (MUF) -- the highest frequency at which a radio wave can propagate between given terminals by ionospheric propagation alone, independent of power -- will be lower and auroral propagation on the VHF bands is quite possible.

When aurorae occur, the electrons hit the ionosphere at the North and South geomagnetic poles, creating ionization. Waves that would normally travel off into space are bouncing off the aurora and being redirected back toward Earth. This can create opportunities for long-distance propagation via VHF and UHF. Read more here <http://www.arrl.org/news/active-sunspot-region-1429-produces-solar-flares-coronal-mass-ejections>.

==> + DON'T BE FOOLED: CHECK OUT THE APRIL ISSUE OF QST

This April issue of QST remembers the wireless heroes of the RMS Titanic and the SS Carpathia 100 years ago, and also takes readers on a voyage to the South Orkney Islands for the VP8ORK DXpedition -- and more. So set aside a couple of hours, grab a beverage and get ready to have some radio fun with the April issue of QST.

In 2011, the Third Annual ARRL Homebrew Challenge presented the toughest challenge to date. In 2006, we asked readers to build a 5 W PEP 40 meter sideband and CW transceiver. In 2009, we upped the ante, looking for a 50 W linear amplifier to go along with the transceiver. For 2011, we challenged hams to come up with a single or multiband transceiver for 6 and/or 10 meters. Find out who walked away with the honors in "Homebrew Challenge III - And the Winner Is..." by QST Technical Editor Joel R. Hallas, W1ZR.

Eric Keerbs, AD7HM, discovers a way to let your radios talk to your computer using an interface converter in his article "Level Converter to Allow Full Control of Peripherals by Computer or Radio." In "A Transceiver-to-Amplifier Interface," Ed Toal, N9MW, presents an interface that you can use to safely switch your older linear amplifier

from your new transceiver. Paul Danzer, N1II, takes a look at window line and standing wave ratio in his article "Balanced Line SWR Measurement."

It's been 100 years since the RMS Titanic -- heralded as "unsinkable" -- struck an iceberg and sank to the bottom of the Atlantic, taking 1511 passengers and crew with it. Retired US Coast Guard Reserve Commander Richard Paton takes a look at the tragedy -- with a focus on Jack Phillips and Harold Bride, the two Marconi wireless operators on the Titanic -- in his article "Radio's Role in the Titanic Disaster." The "Vintage Radio" column profiles the wireless operator aboard the rescue ship, the SS Carpathia.

The VP8ORK DXpedition to the tip of the Antarctic Peninsula saw seals, dolphins and big pileups. Join Michael Mraz, N6MZ, as he recounts the Microlite Penguin DXpedition to the South Orkney Islands in "South of Sixty South." Make plans to join the ARRL and the ARRL EXPO at the 2012 Dayton Hamvention and the 2012 ARRL National Convention in California. Find out all you need to know about these two headlining events in "ARRL EXPO 2012 -- Save the Dates" by ARRL Marketing Manager Bob Inderbitzen, NQ1R.

NCJ Managing Editor Rick Lindquist, WW3DE, takes a look at the ICOM IC-9100 MF/HF/VHF/UHF transceiver in this month's Product Review. He says the rig is "compact and versatile. The IC-9100 handles almost any type of operating on the 160 meter through 2 meter bands, plus 70 and 23 cm."

Of course, there are the usual columns you know and expect in the April QST: Happenings, Hints & Kinks, The Doctor Is In, Short Takes, How's DX and more. Look for your April issue in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the ARRL Web page <https://www.arrl.org/join-arrl-renew-membership/>.

==> + FCC NEWS: FCC REDUCES FORFEITURE FOR FLORIDA MAN ACCUSED OF USING UNAUTHORIZED EQUIPMENT

In November 2011, the FCC issued a Notice of Apparent Liability for Forfeiture in the amount of $10,000 to Michael Perry of Cross City, Florida. In a Forfeiture Order released on March 6, the FCC reduced the forfeiture that Perry must pay to $450. Perry was accused of operating a radio transmitter without the requisite FCC authorization and his failure to operate a Citizens Band station, "willfully violat[ing]" Section 301 of the Communications Act of 1934, as amended and Sections 95.409 (by operating an unlicensed and non-certificated CB transmitter) and 95.411 (by operating an unlicensed radio transmitter with two amplifiers) of the FCC's rules. Read more here <http://www.arrl.org/news/fcc-reduces-forfeiture-for-florida-man-accused-of-using-unauthorized-equipment>.

==> ARRL ANNUAL AWARDS: NOMINATIONS FOR ARRL AWARDS NOW OPEN

Each year, the ARRL Board of Directors has the opportunity to select recipients for a number of awards in various categories that honor Amateur Radio operators. The nomination period is now open for the ARRL awards that are designed to recognize educational and technological pursuits in Amateur Radio, as well as an award to honor a young Amateur Radio operator. ARRL members can nominate hams for the Herb S. Brier Instructor of the Year Award, the Hiram Percy Maxim Award, the ARRL Microwave Development Award, the ARRL Technical Service Award, the ARRL Technical Innovation Award and the Knight Distinguished Service Award. Read more here <http://www.arrl.org/news/nominations-for-arrl-awards-now-open-1>.

==> SOLAR UPDATE

Tad "If we can make it through the night we will see the Sun <http://www.youtube.com/watch?v=kiCuxOL7Ag4>" Cook, K7RA, reports: This has been quite a week for dramatic solar activity: The average daily sunspot number was up nearly 26 points to 69.4, while the average daily solar flux rose nearly 17 points to 121.9. The latest forecast has solar flux at 140 on March 8-9, 135 on March 10-11, 130 on March 12-13, 125 on March 14-15, then 130, 125, 120, 115, 115, 110 and 110 on March 16-22, then back down to 105 on March 23-25. The predicted planetary A index for March 8-10 is 75, 28 and 15, then 10 on March 11-13, 5 on March 14-16, then 12, 15, 10, and 8 on March 17-20, and 5 on March 21-27. Look for more information on the ARRL website on Friday, March 9. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Good Charlotte's March On <http://en.wikipedia.org/wiki/Good_charlotte>.

==> + DXCC NEWS: FOUR OPERATIONS APPROVED FOR DXCC CREDIT

ARRL DXCC Manager Bill Moore, NC1L, reports that four operations -- the current VK0TH and AX/VK0TH (Macquarie Island) operation, the current T6BP (Afghanistan) operation, the 2011 6O0M (Somalia) operation and the December 2011-January 2012 9U3TMM (Burundi) operation -- have been approved for DXCC credit. "If you have had these operations rejected in a recent application, please send an e-mail <bmoore@arrl.org> to the ARRL DXCC Desk," Moore said. "Please note that due to heavy e-mail volume, you may not receive a reply. Once updated, results will appear in Logbook of The World (LoTW <https://p1k.arrl.org/lotwuser/default>) accounts, as well as online in the daily listings <http://www.arrl.org/dxcc>."

==> THIS WEEK IN RADIOSPORT

This week:

- March 10 -- AGCW QRP Contest
- March 10-11 -- Idaho QSO Party; EA PSK63 Contest
- March 11 -- North American Sprint (RTTY); SKCC Weekend Sprint

- March 11-12 -- Wisconsin QSO Party
- March 14-15 -- CWops Mini-CWT Test

Next week:

- March 17 -- 10-10 International Mobile Contest; Feld Hell Sprint; AGCW VHF/UHF Contest
- March 17-18 -- North Dakota QSO Party; Oklahoma QSO Party; Virginia QSO Party; Russian DX Contest
- March 17-19 -- BARTG HF RTTY Contest
- March 19 -- Run for the Bacon QRP Contest
- March 22 -- NAQCC Straight Key/Bug Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> + ENTER THE SEVENTH ANNUAL ARRL PHOTO CONTEST!

Have you ever wanted to see a photo of yours in QST, the annual ARRL Amateur Radio Calendar or another ARRL publication? Well, here's your chance! If you're among the winners, not only will your photographic skill be propagated far and wide, but we're offering $100 as the First Prize. The winning photo and three runners-up will be published in QST. All submitted photos will also be considered for the 2013 ARRL Calendar. Read more here <http://www.arrl.org/news/enter-the-seventh-annual-arrl-photo-contest>.

==> NEW QUICKSTATS POLL NOW AVAILABLE ON ARRL WEBSITE

Four new poll questions have just been published on the QuickStats page <http://www.arrl.org/quickstats> on the ARRL website. Let your voice be heard!

Questions in this month's QuickStats poll:

- When operating CW, do you send the symbol "@" (di-dah-dah-di-dah-dit), or do you spell out "at" (di-dah/dah)?
- Is your primary station computer a desktop, laptop or tablet?
- Does your local Amateur Radio club still publish a newsletter?
- How many times has your primary call sign changed over the years?

Visit the QuickStats page <http://www.arrl.org/quickstats> and be sure to bookmark it in your browser. Results from this QuickStats poll will be published in the June 2012 issue of QST on the QuickStats page, located in the rear advertising section of the magazine. Along with monthly poll results, QST QuickStats offers colorful charts and graphs that highlight interesting Amateur Radio statistics.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- March 9-10 -- ARRL Louisiana State Convention
<http://www.arrl.org/hamfests/louisiana-state-convention-52nd-annual-acadiana
-hamfest>,
Rayne, Louisiana; ARRL Oklahoma State Convention

-1>,
Claremore, Oklahoma
- March 10-11 -- ARRL Roanoke Division Convention
<http://www.arrl.org/hamfests/roanoke-division-convention-charlotte-hamfest-t
m>,
Concord, North Carolina
- March 17 -- ARRL Nebraska State Convention
<http://www.arrl.org/hamfests/nebraska-state-convention-end-of-winter-hamfest
>,
Lincoln, Nebraska; ARRL Southern Florida Section Convention
<http://www.arrl.org/hamfests/southern-florida-section-convention-2>,
Stuart, Florida; ARRL West Texas Section Convention
<http://www.arrl.org/hamfests/west-texas-section-convention-57th-annual-st-pa
trick-s-day-hamfest>,
Midland, Texas
- March 23-24 -- ARRL Maine State Convention
<http://www.arrl.org/hamfests/maine-state-convention-2>, Lewiston,
Maine
- April 7 -- ARRL North Carolina State Convention
<http://www.arrl.org/hamfests/north-carolina-state-convention-raleigh-hamfest
-1>,
Raleigh, North Carolina
- April 14 -- ARRL Delta Division Convention
<http://www.arrl.org/hamfests/delta-division-convention-3>, Bartlett,
Tennessee
- April 14-15 -- Communications Academy 2012
<http://www.arrl.org/hamfests/communications-academy-2012>, Seattle,
Washington
- April 20-22 -- ARRL Idaho State Convention
<http://www.arrl.org/hamfests/idaho-state-convention-2>, Boise, Idaho;
63rd International DX Convention
<http://www.arrl.org/hamfests/63rd-international-dx-convention>,
Visalia, California
- April 21 -- ARRL Delaware State Convention
<http://www.arrl.org/hamfests/delaware-state-convention-delmarva-amateur-radi
o-electronics-expo-1>,
Georgetown, Delaware; ARRL Louisiana Section Convention
<http://www.arrl.org/hamfests/louisiana-section-convention-1>, Monroe,
Louisiana
- May 4-6 -- EMCOMMWEST
<http://www.arrl.org/hamfests/emcommwest-convention-1>, Reno, Nevada
- May 18-20 -- Dayton Hamvention
<http://www.arrl.org/hamfests/dayton-hamvention-3>, Dayton, Ohio
- June 1-3 -- ARRL Northwestern Division Convention
<http://www.arrl.org/hamfests/northwestern-division-convention-seapac-3>,
Seaside, Oregon

- June 2 -- ARRL Georgia Section Convention
<http://www.arrl.org/hamfests/georgia-section-convention-atlanta-hamfest-1>,
Marietta, Georgia
- June 8-9 -- ARRL West Gulf Division Convention
<http://www.arrl.org/hamfests/west-gulf-division-convention-ham-com-1>,
Plano, Texas
- June 9 -- ARRL Arkansas State Convention
<http://www.arrl.org/hamfests/arkansas-state-convention>, Rogers,
Arkansas; ARRL Tennessee State Convention
<http://www.arrl.org/hamfests/tennessee-state-convention-2>, Knoxville,
Tennessee

...Are you, perchance, under the impression that only one poster
outside of ASB-L is replying to this sub-thread?

You don't recognise the poster to whom I was replying is the renowned
k00k, Blobby, aka blobandhisblowupdoll? That's very strange.
Incidentally, meowmix has a bigger claim, in my estimation, to the
"Usenet Legend" appellation, but he doesn't use it.

Snarky

1628. spelling lame as indicator of Aspies

The bad spelling was probably to disguise the spelling
superpowers so common to Aspergers patients.

Getting a clue as to why spelling lames became
so very popular on usenet?

Second Biggest Flare Of the Solar Cycle:

Posted: 07 Mar 2012 01:31 PM PST
http://www.eham.net/articles/27862

NASA models using data from the Solar Terrestrial Relations Observatory (STEREO) and the Solar Heliospheric Observatory (SOHO) have now provided more information about the two CMEs associated with the two March 6 flares. The first is traveling faster than 1300 miles per second; the second more than 1100 miles per second. NASA's models predict that the CMEs will impact both Earth and Mars, as well as pass by several NASA spacecraft - Messenger, Spitzer, and STEREO-B. The models also predict that the leading edge of the first CME will reach Earth at about 1:25 AM EST on the morning of March 8 (plus or minus 7 hours). =Such a CME could result in a severe geomagnetic storm, causing aurora at low latitudes, with possible disruption to high frequency radio communication, global positioning systems (GPS), and power grids. The sun erupted with one of the largest solar flares of this solar cycle on March 6, 2012 at 7PM EST. This flare was categorized as an X5.4, making it the second largest flare - after an X6.9 on August 9, 2011 - since the sun's activity segued into a period of relatively low activity called solar minimum in early 2007.

//
Magnetic Storm Watch March 8 UTC:

Posted: 07 Mar 2012 01:03 PM PST
http://www.eham.net/articles/27855

The CME that erupted late on March 4 passed ACE around 0400 UTC March 7 (11:00 p.m. EST March 6). As a result, storming reaching the G2 (Moderate) level continues at this time. Another CME, part of the recent R3 (Strong) Radio Blackout event at 0024 UTC March 7 (7:24 p.m. EST March 6) is forecast to pass ACE early morning UTC on March 8 (start of day EST March 8).

i'm dyslexic. how would the choice of several words help me? obviously
i don't need to explain what word blindness is to a genius like you.

>> with lines like that, we should all bow down and praise your flame
>
>You should get on your knees and worship my pork sword.

you want a man worshipping your penis? have you been out of the
closset long?

>> aweseomness and worship you like a usenet godd. godd of mummmy laming
>> spankards, that is.

>
>The curse of the mummy perhaps?

you took the easy option. instead of replying to what i said, you
where a coward and copped out and decided to take the easy 'i can
speel english and j00 can't, route. impresive.

Amateur Radio Newsline(tm) Report 1804 - March 9 2012

Amateur Radio Newsline report number 1804 with a release date of March 9th, 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T. The Dayton Hamvention announces its 2012 award winners, the Sun erupts with a massive C-M-E hurled toward Earth, Brazil bans DXpedition operations from Saint Peter and Saint Paul, new rules now in effect for U-S hams on 60 meters, and a new movie about going into space from Richard Garriott, W5KWQ. All this and more on Amateur Radio Newsline(tm) report number 1804 coming your way right now.

(Billboard Cart Here)

**

RADIO HONORS: HAMVENTION ANNOUNCES 2012 AWARD WINNERS

Its honors time in amateur radio. This as the Dayton Amateur Radio Association announces the names of these years Hamvention Award winners. Bill Pasternak, WA6ITF, is in the newsroom with more:

--

This year the Dayton Hamvention Awards Committee has gone world wide in choosing who would receive the Hamvention's 2012 honors. Named as Radio Amateur of the Year award recipient is Mr. S. Suri, VU2MY, of Hyderbad, India. Mr. Suri can be described as the Hirum Percy Maxim of that nation. Among his numerous achievements, VU2MY was instrumental in establishing the art and science of amateur radio in India as well as leading the effort to establish the world acclaimed National Institute of Amateur Radio. Staying with his avocation, Mr. Suri has lead search, rescue and recovery efforts in many natural emergency events throughout India and elsewhere.

Technical Achievement Award recipient Joel Hallas, W1ZR, of Westport, Connecticut, is likely best known for his monthly QST column titled "The Doctor Is In." This ongoing series is designed to answer many of the basic and not-so-basic technical questions of ham radio that readers may have on their minds. More important, W1ZR responds to these questions in an easy to read format that might best be cited as having a unique appeal especially to newcomers to the hobby.

In addition to his writing for QST, W1ZR is the author of several well read books. These include such titles as Basic Radio, Basic Antennas,

The ARRL Guide to Antenna Tuners, Care and Feeding of Transmission Lines and Understanding and Using Your Antenna Analyzer. He has also garnered many technical awards and remains one of the top technical authors in the field of amateur radio.

This years Special Achievement Award recipient is Steven Betza, WZ2V, of Endicott, New York. According to the Awards Committee, Betza enjoys teaching students by using live experiments and missions. Through a project called "Blue Horizon," WZ2V has already licensed 38 new hams, set the world record for the highest amateur balloon at 125,000 feet, and demonstrated many technical feats relating to that record breaking flight. He also has contributed in a major way to college and high school education programs in Electronic Engineering.

Last but by no means least, the annual Club of the Year Award goes to Deutsche Amateur Radio Club. Better known by its initials DARC, the group has organized Germany into one unified national radio society that can easily be compared to the ARRL here in the United States. The DARC provides educational and technical support for radio amateurs and shortwave listeners. Prior to formal regulations in Germany, the DARC provided guidance in terms of frequency and power management. Today, in addition to all of its other responsibilities, the DARC plays a major role in training and licensing across Germany and is well respected throughout the European Union.

With our sincere congratulations to all of this years Hamvention Award winners, I'm Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

--

The winners will receive their honors at the 2012 Dayton Hamvention. Its scheduled for May 18th to the 20th at the Hara Arena in the Dayton suburb of Trotwood, Ohio. Amateur Radio Newsline plans to be there to bring you all the sound of this years Dayton Hamvention event. (Hamvention 2012)

**

PROPAGATION: SUN EJECTS LARGE CME

The largest solar flare in five years began racing toward Earth on Wednesday March 7th, threatening to unleash a torrent of charged particles that could disrupt communications world-wide.

As this report is being prepared, the government's Space Weather Prediction Center had issued a warning that the effects of the Coronal Mass Ejection or CME were expected to begin around 7 a.m. Eastern time on Thursday, March 8th. Forecasters say the flare was growing as it sped outward from the sun.

Joseph Kunches is a scientist for the National Oceanic and Atmospheric Administration. He said that this particular solar storm was likely to last through Friday morning, March 9th but warned that the region of

the Sun that erupted can still send more CME's our way. Kunches noted that another set of active sunspots is ready visible on the solar disk and that these could also erupt and send more CME's our way.

This latest solar storm comes on the heels of an earlier and weaker solar eruption happened Sunday, March 4th. For updates on this and other solar flare-ups please keep an eye on www.spaceweather.com. (Spaceweather, NOAA, others)

**

BREAKING DX NEWS: BRAZIL BANS PY0S DX OPERATIONS

The Southgate News reports that radio amateur are now prohibited from operating DXpeditions from the Brazilian Archipelago of Saint Peter and Saint Paul also known as PY0S. This is a remote group of islands near the equator whose maximum elevation is only 18 about meters above sea level. It's also the nearest point of Brazil to Africa, lying about 1820 kilometers from Guinea Bissau. St. Peter & St. Paul was rated number 16 in 2011 DXCC list of most wanted entities.

In a report credited to PS8RF and the Brazilian Amateur Radio League and some DX groups in Brazil have shown their displeasure with this government ban in postings on various social websites. PS8RF told Southgate that there is already a major mobilization by the Brazilian ham community aimed at urging the nations Senators and Federal Representatives to reverse the decision on the to ban. PS8RF notes that the biggest concern among Brazilian hams is that this decision could open unheard restrictions to other entities in Brazil as in other parts of the world where there is no amateur radio activity. More on this breaking news item is on-line at www (dot) teresinadxgroup (dot) com. (Southgate, PS8RF)

**

RADIO LAW: NEW US 60 METER RULES NOW IN EFFECT

Effective Monday, March 5th United States radio amateurs were granted new operating privileges on the 60 meter band. In addition to an increase in effective radiated power from 50 to 100 watts, hams can now transmit CW and PSK31. More information on what modes can be used on what frequencies is on-line at the ARRL website. The quick link to it is tinyurl.com/60-meters-now. (ARRL)

**

RADIO LAW: OTTAWA CANADA LOOKS AT BIG HAM ANTENNA RESTRICTIONS

Ottawa Canada's proposed rules for where private radio operators can put their antennas need another look. This according to the City Council's Rural-Affairs Committee which met two days after the city's Planning Committee reached a similar decision. Amateur Radio Newsline's Don Carlson, KQ6FM, reports:

--

According to the on-line Ottawa Citizen, the regulations are aimed at restricting big and intrusive antenna installations while staying out of the way of small ones. But Ottawa area hams have warned City Councilors that they do not agree with the way that they are written,.

Under the rules, antennas on residential properties would be exempt from public consultations as long as they are under 15 meters in height and at the back of a house.

Radio amateurs counter that this type of a regulation would leave little room for a working antenna above many trees and roof lines. Also that it unduly restricts unobtrusive antennas that would be less visible in front yards than telephone wires, and it doesnt distinguish between an urban house and a rural one, where neighbors might be much too far away to care which yard has an antenna in it.

Like the Planning Committee the Rural-Affairs Committee approved the rules their staff had made up, but nevertheless asked for tweaks and improvements to be made before the issue heads to City Council for a final vote on March 28.

The Canadian Province of Ottawa is home to about 1,400 amateur radio operators. City Council members have already been told that ham radio operators comes are a vital resource during rare disasters like extended power failures. Amateur radio enthusiasts were instrumental in setting up communications during the 1998 ice storm, particularly on the hard-hit South Shore of Montreal.

For the amateur Radio Newsline, Im Don Carlson, KQ6FM, in Reno.

--

According to the March 1st story, the city of Ottawa cannot actually control the placement of private or commercial antennas. That's the purview of Canadian federal telecommunications regulator Industry Canada. However Industry Canada does give municipalities a chance to comment when it's making decisions so that citizens can express what a city thinks is right for them. Now the Ottawa City Council must convince Industry Canada to adopt them. (ottawacitizen.com)

BREAK 1

>From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the WA4TEN repeater serving the city of Knoxville, Tennessee.

(5 sec pause here)

**

RESCUE RADIO: TRAINED EMCOMM OPERATORS NEEDED IN WAKE OF INDIANA TORNADO

Ham radio operators were activated after a rash of tornadoes hit in several states. We have more in this report:

--

Trained ham radio communicators are needed in Clark County, Indiana following tornadoes that devastated the area on March 2nd.

In a posting to the Indiana Ham remailer picked up on QRZ.com, Jeff Brady, N9WSV, who is the Assistant Emergency Coordinator for Clark County, Indiana, says that more operators are needed to assist in recovery efforts Brady says that they could use additional operators to man various posts even if its only for a few hours a day.

But do not just show up on site. Rather, if you can assist first contact N9WSV by phone at 502-777-7304 or e-mail to n9wsv (at) arrl (dot) net. If you are in the area he is monitoring the146.94 repeater which requires a 67hz sub-audible access tone.

N9WSV adds that the local team of ham radio operators have put in many hours and any relief is greatly appreciated.

--

More on this story in future Amateur Radio Newsline reports. (W8ISH, IN_HAM, QRZ.com)

**

PUBLIC SERVICE: BOSTON AREA HAMS NEEDED FOR 44TH PROJECT BREAD WALK FOR HUNGER EVENT

The 44th running of the Boston, Massachusetts area Project Bread Walk for Hunger takes place on on Sunday, May 6th. Communications planners say that they licensed radio amateurs to provide communications support for the Project Bread Staff and volunteers along the 20 mile walk. If you are interested in helping out this year, please take your web browser to www.mmra.org/wfh to log in and fill out the signup form. Questions go to wfh12 (at) mmra (dot) org. (KA1NCF)

**

RADIO POLITICS: A TINY MOVE TOWARD CONFIRMING NEW COMMISSIONERS

There could be some movement on the stalled FCC nominee front, but not very much. Amateur Radio Newsline's Cheryl Lasik, K9BIK, reports:

--

According to a spokesperson for Senator Charles Grassley his staffers met with those of Commerce Committee Chairman Senator Jay Rockefeller on Monday February 27th to discuss the senator's hold on two pending FCC Commissioner nominations. These are Jessica Rosenworcel and Ajit Pai.

The Grassley spokesperson called the meeting a "development" rather than "progress." She added that she would not further characterize the meeting beyond saying it was about the nominations, Senator Grassley's hold threat and a possible resolution.

The Grassley warning stems from his request for documents related to the FCC's LightSquared waiver. These are documents that the FCC has refused to provide based on the agency's claim that Senator Grassley is not the chair of a relevant committee. That decision by the FCC to effuse the request has sparked a confrontation between the senator and the regulatory agency.

For the Amateur Radio Newsline, I'm Cheryl Lasik, K9BIK, in Zion, Illinois.

--

The FCC has been without a full complement of commissioners since last spring, when it was reduced to four by the exit of Meredith Attwell Baker. It has been at three since the retirement of Michael Copps at the end of last year. (B&C)

**

ENFORCEMENT: FLORIDA CB OPERATOR ORDERED TO PAY A REDUCED $450 FINE

The FCC has affirmed a reduced fine of $450 issued to a Florida C B radio operator based only on his proven inability to pay a much higher $10,000 Notice of Apparent Liability to Monetary Forfeiture. In ordering Michael W. Perry of Cross City to pay the reduced amount, the commission turned away his claim that he was not using a non-certified transmitter or an external power amplifier on the 11 meter band.

In its order, the FCC indicated that there was ample physical evidence in this case and that the $10,000 fine was being reduced solely based on Perry proving that the fine would be a financial hardship on him. However it also cautioned Perry that a party's inability to pay is only one factor in its forfeiture calculation analysis. The FCC stated that it has it has previously rejected inability to pay claims in cases of repeated or otherwise egregious violations. Therefore, future violations of this kind may result in significantly higher forfeitures that may not be reduced due to Perry's financial circumstances.

Perry was given the customary 30 days from the date that the Forfeiture Order was affirmed to pay the $450. If he fails to do so the matter could be turned over to the Department of Justice for collection. (FCC)

**

ENFORCEMENT: NO STAFF AND YOU GET A FINE

The FCC issued a notice of apparent liability to Taylor Broadcasting, which owns WJTB AM in Elyria, Ohio. This for allegedly failing to maintain management and staff presence at its main studio.

In issuing the proposed $10,000 fine the FCC said that its agents visited WJTB to inspect it in March 2010 but found the main studio locked and apparently empty. According to the FCC, a person who identified herself as Ms. Taylor drove up and them and said that they would have to talk to a Mr. Taylor. She gave the agents a phone number but even armed with that contact information the agents were unable to reach him or gain access to the studio.

Later, after the FCC wrote a letter of inquiry, the company replied that its personnel do not work specific days and times, but rather are scheduled as needed. It also said that that the agents should have pushed the entry buzzer. But when FCC agents returned in August, they again found the door locked, with no one answering knocks, and no entry buzzer button to press.

In issuing the proposed fine, the FCC says that Taylor Broadcasting's claim that station personnel are scheduled as needed has not resulted in a meaningful management and staff presence at its main studio. The base fine for such cases is $7,000 but the commission set the penalty at $10,000, saying Taylor's continued failure to comply with the commission's main studio requirements even after being advised of this demonstrates a deliberate disregard for the rules.

Taylor Broadcasting was given the customary 30 days from the date the Notice of Apparent Liability was issued to pay it or to file an appeal. (FCC)

**

RADIO WEATHER: HIGH WINDS SHUT DOWN ILLINOIS TV STATION

Dual station WTVO and WQRF in Rockford, Illinois was forced off the air on Friday, March 2nd and staff evacuated from the building. This as heavy snow and low altitude winds caused guy wires on the stations 700 foot high tower to whip around wildly.

The stations Chief Engineer Mike Real. In a media interview he said that in all the years that he has been at WTVO and WQRF that he has never seen the tower guy system reacting in that way. He noted that the swaying guy wires had the ability to actually start shaking the tower down, or cause damage to the it which is what we wanted to check on. Because of this the station stayed off the air as crews examined the tower over the weekend.

In addition to the evacuation at WTVO and WQRF, 12 homes near the tower were evacuated Friday night. After the inspection was completed, WTVO-WQRF resumed broadcasting on Sunday night, March 4th. (WTVO-WQRF)

HAM HAPPENINGS: MARTLESHAM MICROWAVE ROUND TABLE APRIL 28-29

The 2012 Martlesham Microwave Round Table takes place April 28th and the 29th. This year's venue is the BT Adastral Park, Martlesham Heath, in the United Kingdom near the city of Suffolk.

Speakers scheduled so far include J.R. Miller, G3RUH; Andy Talbot, G4JNT; B.R. Coleman, G4NNS, and a number of other well known U-K microwave experimenters. The United States will be represented by well known author Kent Britain, WA5VJB of Grand Prairie, Texas.

This promises to be one of the best Martlesham Microwave Round Table in history. More information is on-line at mmrt.homedns. org. (UK Microwave Group)

NAMES IN THE NEWS: VE3CGN APPOINTED RAC ONTARIO SEC

Some names in the news. Fist up is Scott Carter VE3CGN who has been appointed as the new Section Emergency Coordinator for A-R-E-S in Ontario, Canada. According to Radio Amateurs of Canada, Carter was the former District Emergency Coordinator for the Tecumsah District and holds many certifications in emergency management. He is also very active with the Salvation Army Team Emergency Radio Network. His appointment was effective on March 1st. (RAC, VE3AJB)

**

NAMES IN THE NEWS: W5LFL AND W5KWQ - MAN ON A MISSION - THE MOVIE

And next we travel back in time to 1983. That's when then NASA astronaut and ham operator Owen Garriott, W5LFL, made the first manned amateur radio transmission from space. His pioneering effort from flight STS-9 paved the way for todays International Space Station ARISS program.

Several decades later, Owen's son Richard, W5KWQ, would fly to the ISS and use the same method to talk to his dad and many others here on planet Earth. Now, these historic moments have been captured in the exciting new documentary titled Man on a Mission. A film that reveals Richard Garriotts quest to become the first second generation American in space.

In a note to Amateur Radio Newsline via First Run Features, both W5LFL and W5KWQ ask that hams spread the word about this documentary to your club members and associates in the amateur radio community. Currently,

Man on a Mission is available nationwide via Video on Demand. A DVD release is planned for May 2012. More about this documentary is on-line at firstrunfeatures.com/manonamission. The films trailer ca ne seen at tinyurl.com/garriott-film. (Firstrun Features)

**

WORLDBEAT: UK SPECIAL 600 METER PERMITS EXTENDED

United Kingdom Notices of Variation to amateur radio licenses for special research permits to operate in the band 501 to 504 kHz have been extended to December 31st 2012. This as telecommunications regulator Ofcom has begun discussions with the Radio Society of Great Britain about the timetable for implementing the new secondary allocation to the amateur service, 472 to 479 kHz that was recently approved at WRC-12. The agreed upon availability date for this band to begin to become available for administrations world-wide to begin proceedings to open to their ham radio communities is effective as of January 1st, 2013. A United Kingdom Notices of Variation is the equivlant to an FCC issued Special Temporary Authority or STA grant here in the USA. (RSGB)

**

HAM RADIO IN SPACE: HAMSAT VO-52 GOES SILENT

The HAMSAT VO-52 amateur radio satellite that suddenly ceased operating last month could return to the air. According to V-U-2-W-M-Y, the satellite is in what he calls "excellent health" following recovery efforts and is currently under observation by ground controllers in India.

By way of background, on February 28th all transmissions from HAMSAT VO-52 ceased. Since then neither its beacon nor it's 435 to 145 MHz linear transponder had been heard by stations on the ground. However it now looks as if the bird is back to life, but there is one caveat.

VU2VMY notes that HAMSAT VO-52 is actually the property of the government of India. Therefore unlike other amateur radio satellites that are owned, operated and maintained by non-governmental agencies, detailed information on HAMSAT VO-52 cannot be shared with anyone in accordance with the prevailing governmental regulations. However VU2WMY adds that a decision about switching its transponder back on is

pending clearance.

VU2WMY adds that this is the first ever interruption in the services of the bird since HAMSAT VO-52 was commissioned on May 5th of 2005. (VU2VMY)

**

HAM RADIO IN SPACE: VA3OOG TO BE FIRST CANADIAN TO COMMAND THE ISS

The BBC reports that astronaut Chris Hadfield, VA3OOG, who also holds the U-S call KC5RNJ will be the first Canadian to command the International Space Station.

According to the news report, Hadfield will begin his journey when he launches to the ISS on board a Russian Soyuz lift vehicle near the end of this year. For his first three months on-orbit the 52-year-old ham radio operator will serve as a flight engineer in the Expedition 34 crew. Then, in March 2013, he will assume command of Expedition 35 for three months before returning to Earth.

This will not be Hadfield's first trip into space. On past missions to orbit he became the first Canadian to undertake a spacewalk and was the first and only Canadian to board the Russian Mir space station.

VA3OOG was also the first Canadian to operate his country's major contribution to the space shuttle program. That being its famed robotic arm that was used in numerous space experiments, on-orbit repairs and to help build the ISS.

You can read more about Chris Hadfield, VA3OOG, and his coming trip to the ISS on line at tinyurl.com/va3oog-on-orbit. (BBC, Space Today)

WORLDBEAT: TOKYO JAPAN HOME TO WORLDS TALLEST BROADCAST TOWER

A ceremony to mark the completion of the world's tallest freestanding broadcasting tower was held in Tokyo on Friday, March 2nd. Construction on the Tokyo Sky Tree tower began in 2008. It was completed a few days prior to its dedication ceremony.

The Sky Tree stands 2,080 feet tall and is claimed to be the tallest structure of its type ever built. It will eventually be the home of most broadcasting and two-way radio operations in that city.

Video of the new tower and the dedication ceremony is on-line at tinyurl.com/tall-tokyo-tower. And before you ask if will also be the home of any sort of ham radio relay operation we can only say that your guess is as good as ours. (RW)

**

WORLDBEAT: DRM COMING TO INDIA

All India Radio has outlined its digitization plan. This during the 18th Annual Broadcast Engineering Society of India event.

According to All India Radio Director General, a pair of one megawatt transmitters at Rajkot and Kolkata are likely to be operational by the end of March and an additional 72 Digital Radio Mondiale transmitters would be commissioned between June of this year and March 2013.

The ongoing rollout by All India Radio has gained the interest of receiver manufacturers, who were present at the event with their latest products. Digital Radio Mondiale member companies Nautel, Digidia, Fraunhofer, Harris and Thomson Broadcast attended the conference this year. (Radio Magazine)

**

ON THE AIR: FLEMISH RADIO AMATEURS COMMEMORATE THE SINKING OF THE TITANIC 100 YEARS AGO

Three special call signs will be activated from April 1st to the 30th from Belgium by the Flemish Radio Amateurs organization. This to honor those who perished 100 years ago in the sinking of the steam ship Titanic.

OO100MGY by operated from the city of Antwerp. OR100MGY will take to the air from Knokke-Heist while OT100MGY will be on from Londerzeel.

During the weekend of April 14 through April 15, all three stations will be active during a marathon session from 12:00 Saturday until 16:00 Sunday UTC. Each of these stations has a special and unique QSL card available so that three different styles can be acquired. (FRA)

**

DX

In DX, word that the AX stroke VK0TH operation from Macquarie Island, the December 2011 and January 2012 9U3TMM DXpedition to Burundi and the 2011 6-Oh-Zero M operation from Somalia have all now been approved for DXCC credit. Also approved is the current T6BP operation from Afghanistan, If you had any of these operations rejected in a recent application send a note to bmoore (at) arrl ()dot) org to have your record updated. Moore notes that the AX stroke VK0TH operation is in addition to the VK0TH that has already been approved for DXCC recognition.

On the air look for the E51M DXpedition that is going to North Cook Islands. Its now announced that it will also be active as E51MCW from Rarotonga, South Cook Islands between April 11th and the 14th. Operations will be on all bands, including 60 meters using CW, SSB and the Digital modes. QSL via DJ8NK, direct or via the bureau.

AG1LE will be active stroke KP2 from the Radio Reef Contest Station KP2M on St. Croix between April 4 to the 11th. QSL as directed on the air.

Lastly, F8FGU will be active as CN2RN from High Atlas, Morocco between April 3rd and the 30th. His operations will be on the High Frequency bands using CW and SSB. QSL via his home callsign, either via the bureau or direct.

(Above from various DX news sources)

THAT FINAL ITEM: PHILADELPHIA JOURNALISTS HONOR A FAMOUS RADIO AMATEUR

And finally this week, a special honor has been bestowed on a broadcast journalist who is considered to be the driving force that put manned amateur radio operations into space. He was truly a broadcast pioneer and a part of the Amateur Radio Newsline family as well. Mark Abramovich, NT3V, is here with the details:

--

Many Newsline listeners recognize the name Roy Neal - the space voice of NBC News for many years and a big contributor to Newsline.

Well, what most may not know is the late Roy Neal, K6DUE, actually grew up here in Philadelphia and got his start in the broadcasting business right here.

A few months back, the Broadcast Pioneers of Philadelphia, inducted Roy Neal into their Broadcasters Hall of Fame.

Gerry Wilkinson, chairman of the board of the Broadcast Pioneers of Philadelphia, says Roy Neal got his start in the early days of radio and TV in Philadelphia.

"He was public affairs/news director at WIBG," Wilksinson says. "Then, he went over to WPTZ, Channel 3, which is now KYW-TV. It was owned by Philco and for four or five years he did television programs for them."

Wilkinson says Neal was bitten by the space bug early and there was no doubt that's what he wanted to talk about and cover the most.

And, Wilkinson says, he had the privilege over the years of keeping in touch with Neal - even after his retirement from the broadcast business.

"When you talked to him on the phone there was just story, after story, after story that he would tell you and he was just really a remarkable gentleman," Wilkinson recalls.

Wilkinson says Roy Neal never forgot his roots.

"He still loved Philadelphia," Wilkinson says. "The first three chapters of his book all deal with Philadelphia and he certainly never forgot Philadelphia."

Book you say?

Don't bother looking. Roy never finished that book. But sent several of his close friends, including Wilkinson, the first three chapters.

You can read it at the Broadcaster Pioneers website by going to the web address inserted in the text version of this story on our website arnewsline.org.

Finally, Wilkinson says while it took some time to getting Roy into the Philadelphia Hall of Fame, it was an honor well-deserved.

"He's one of us," Wilkinson says. "He's from Philadelphia. And, we really believed that what he did in Philadelphia and then later on in his career that he deserved to be honored."

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

For us here at Amateur Radio Newsline its hard to believe that Roy has been gone some nine years. It seems like only yesterday when his signature sign off would end one of these newscasts. (Link to Roy Neal's book: http://www.broadcastpioneers.com/roynealbook.html) (NT3V)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline(at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

A reminder that the nominating period for the 2012 Amateur Radio Newsline Young Ham of the Year Award is now open. Full details and a downloadable nominating form are on our website at arnewsline.org/yhoty.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, AE5DW, saying 73 and we thank you for listening.

Harvey Chase, W4TG, SK at 96

Posted: 07 Mar 2012 08:51 AM PST
http://forums.qrz.com/showthread.php?336978-Harvey-Chase-W4TG-SK-at-96&goto=newpost

It is with regret that I write of the death of Harvey, W4TG, who had been a
ham since 1931. He was an avid CW op--rumor has it that he didn't buy a mic
until sometime in the 80's. Of particular note--besides being a ham for
over 80 years--is that he was a survivor of the invasion of Pearl Harbor.

He will be missed by many--especially his wife, Bessie, and the ham radio
community of middle Georgia. Please see his page at qrz.com for more
information and http://www.legacy.com/obituaries/mac...&pid=156341082 to
view his obituary and leave comments for his family.

Amateur radio operators are still needed in Clark County, IN. Contact info is below if you can assist. Thanks!!

Just wanted to put the word out we are still continuing operations in Clark County. We are up to manning 10 posts throughout the county. We could use operators to man posts even if it is for a few hours, many of our team have put in many hours and relief is greatly appreciated. This is also great on the job training for ARES / RACES groups in the surrounding counties. Please contact me via phone 502-777-7304 or if you can reach the 146.94 (67hz tone) repeater, check in with Clark EMA W9JBQ.

Thanks to everyone that has helped us out so far, we couldn't have done it without you!

Disaster volunteers, please curb your enthusiasm! Says this Article

Posted: 05 Mar 2012 09:45 PM PST
http://forums.qrz.com/showthread.php?336758-Disaster-volunteers-please-curb-your-enthusiasm!-Says-this-Article&goto=newpost

In the wake of every U.S. disaster there is an influx of people who want to help, and the situation in the Midwest and Southeast after last week's deadly tornadoes is no exception. But to many of the early arrivals who parachute in to help, disaster relief experts have a message: yes please, but not so fast.

For the first few days after Friday's twisters devastated large swathes of the Midwest and southeastern U.S., the Indiana Department of Homeland Security was strongly discouraging ad hoc volunteers as well as gawkers who flocked to the scene.

"We had people driving through looking immediately after it happened and it was a significant problem," said Denise Derrer, public information officer for the Indiana Department of Homeland Security. The dangers of downed power lines, debris and gas leaks meant that they needed to rely on trained emergency workers, and not worry about other people dropping in to help.

"If you have never run a chainsaw before, maybe now is not the time to learn," she said. "We are trying to get the word out."

"What people tend to do is they will go to where the actual tornado touchdown has been," said Joe Tolan, president of the United Way in Louisville, Kentucky which also covers the southern part of Indiana. "That is rarely the best thing to do in the first few days. It adds to the confusion and clutter."

That□s where the volunteer receiving centers like one that opened Monday morning in Jeffersonville, Indiana come in. The center, set up by the United Way and its partners is located in a vacant car dealership, hastily cleaned and adapted into a makeshift workspace over the weekend as a place to organize, train and deploy volunteer teams to do jobs after the disaster command center has determined what's needed.

Jeffersonville is about 15 miles down the freeway from devastated towns of Henryville and New Liberty, far enough to be out of the way of emergency teams still trying to restore services.

When the center's doors opened on Monday morning, more than 100 people were there, waiting to roll up their sleeves.

"We figured there was going to be a little organized bedlam this morning and we were right,□ said Tolan.

Tornado Outbreak March 2, 2012 Southern Indiana

Posted: 05 Mar 2012 06:42 PM PST
http://forums.qrz.com/showthread.php?336741-Tornado-Outbreak-March-2-2012-Southern-Indiana&goto=newpost

419705_2460177804397_1850751887_1492531_1534211658_n.jpg

On Friday March 2nd a strong cold front approached the Southern Indiana area. This system unleashed several powerful tornadoes.

Clark County Indiana RACES activated a weather net during the storm event and was relaying weather reports to the National Weather Service in Louisville. Once the storm passed we started getting reports of massive damage in the Northern parts of Clark County Indiana in the the vicinity of Henryville and Marysville. Clark County Emergency Coordinator John Shean N9TV made contact with our Les Kavanaugh Director of Clark County Emergency Management. Around 4pm it was determined that the Clark County RACES team was needed to provide communications.

Core members of our RACES group raced to the scene to setup our command post and started dispatching amateurs to posts through the affected area and setup tactical frequencies and call signs. During this time the county 800 mhz system was overloaded and all cell phone networks were down in the area. Operations continued through the night directing search and rescue efforts and health and welfare operations.

The National Weather service survey teams have determined the affected areas were hit with EF-4 and EF-1 tornadoes.

http://www.crh.noaa.gov/lmk/?n=march...ornadooutbreak

The situation is starting to stabilize but as of this evening we are continuing to provide communications linking volunteers and supplies to the appropriate places. The group anticipates maintaining operations during the

period of 0800 - 1800 through the remainder of the week. We have been taking notes and documenting things that have gone right and areas we could address with training or equipment.

Jeffrey Brady

AMSAT Theme at Dayton 2012: Running with Fox

The 2012 Dayton Hamvention will be held this year on 18 - 20 May 2012. As has been the case for the many years Hamvention will be at the Hara Arena Complex on the north side of Dayton. AMSAT will occupy the same booths (444-449) in Ball Arena, right across from the ARRL area and just inside the door from the Satellite Demonstration area.

The AMSAT theme for 2012 is "Running with Fox". We will have multiple exhibits of the new AMSAT satellite on display.

Visit AMSAT's Dayton Hamvention page for all details on activities:

http://www.amsat.org/amsat-new/hamve...012/Dayton.php

Some of the activities will include:

+ Life size Fox models will be on display as well as diagrams of the modules inside the 10cm square satellite.

+ Operational prototype of ARISSat-1 on display.

+ AMSAT Thursday Night Get-together at the Tickets Pub & Eatery.

+ The sixth annual AMSAT/TAPR Banquet will be Friday night May 18 at the Kohler Banquet Center. The price for the Banquet is $30. Seating is limited and reservations are required. Follow the links on AMSAT's Dayton page.

+ The AMSAT Forum will be on Saturday May 19.

AMSAT has a limited block of rooms reserved at the Country Inn & Suites in Fairborn, OH. Please contact Martha at the AMSAT office for room price and availability during Hamvention. Priority for rooms will be given to those

volunteering to work in the AMSAT booth for multiple 2 hour shifts during Hamvention. The hotel web page is:

http://www.amsat.org/amsat-new/hamve...2012/Hotel.php

The phone number for the AMSAT office is 301-589-6062. Other hotels in the immediate area of the Country inn & Suites include the Fairfield Inn, Ramada Inn, Hampton Inn, Fairborn Holiday Inn, Red Roof Inn and the Homewood Suites if additional accommodations are needed.

Further information on Hamvention 2012, including advance ticket sales and motel accommodations, can be found at http://www.hamvention.org.

Dick Daniels, W4PUJ Memorial Service Video Posted

Bob McGwier, N4HY has posted a video of the February 25 memorial service attended by family, friends, and colleagues for AMSAT's Dick Daniels, W4PUJ who passed away on February 14, 2012:

http://youtu.be/pGhn1eC52Wo

AMSAT President Barry Baines, WD4ASW read excerpts from the obituary written by Jan King, W3GEY/VK4GEY and included personal comments of his experience knowing Dick and working with him. The text of Dick's obituary is posted on the AMSAT web at: http://tinyurl.com/W4PUJ-Obituary.

Barry observed in his comments at the memorial service that NASA announced AMSAT Fox-1 satellite's acceptance into their ELaNa launch program on February 14, the day Dick passed away. Dick's legacy for amateur radio in space will continue.

Bob recalled, "Dick was always supportive and helpful to me and like all who knew him, understand the size of our loss. Dick was the epitome of solidarity, always honoring his obligations, with a big sense of responsibility with no obvious sense of entitlement to anyone's thanks. Dick was always seemingly asking himself 'what have I done for you

lately?' We've lost the irreplaceable."

Eric Rosenberg, W3DQ wrote of his memories of Dick, "He was a great guy, wonderful to work with, both professionally and within AMSAT. He was treasure trove of information and defined corporate knowledge and memory. His collection of Oscar 10 telemetry on those hard sectored disks was legendary around here, but not as much as his pool table, upon which many of the early satellites were put together."

Bob, N4HY took a collection of photographs with his phone camera which has added to his online album:

http://n4hy.smugmug.com/AMSAT/Dick-D...W4PUJ-Memorial

[ANS thanks Bob McGwier, N4HY, Eric Rosenberg, W3DQ, Jan King W3GEY/VK4GEY, and AMSAT President Barry Baines, WD4ASW for the above information]

COMPASS-1 Satellite End of Mission

The COMPASS-1 CubeSat was designed and built by students from the Aachen University of Applied Sciences in Aachen, Germany. It has been in orbit since its launch from India on April 28, 2008.

This week Mike Rupprecht, DK3WN reported on his DK3WN SatBlog that on Saturday, February 25 a single beacon was received. COMPASS-1 underwent a complete restart and the thresholds for heater and battery voltages were set to new levels. Battery temperatures tracked with the received telemetry data have shown some very cold spikes. This may be affecting operation of the satellite.

On March 3, Mike received the following message from Professor Dr. Bernd Dachwald, Faculty of Aerospace Engineering FH Aachen at the University of Applied Sciences:

Dear supporters and friends of our COMPASS-1 mission,

First, let me thank you very much for your support in trying to

save the life of our COMPASS-1 satellite during the last days,

but also during the last years of "routine" operations.

It seems that our mission now comes to an end. The projected life-

time of COMPASS-1 was half a year. The tiny guy has outperformed

this value by a factor of more than seven. April 28th would have

been its 4th birthday and if it was a human, it would now be

about 500 years old (Cubesat-years are short).

So, if you have more important things to do (and I guess so), we

cannot expect you to continue your efforts in saving its live.

With your support, you have made things possible that we would

never have been able to achieve with our own resources and I

appreciate your support very much.

So, COMPASS-1, rest in peace. (Nevertheless, if you still want

to try to awake it from the dead, feel free to do so.)

I hope that we will soon be able to build and launch COMPASS-2

and that you will be still available, all over the world, as a

ground station to command and fly our new bird. We will keep

you informed.

Cheers and thanks for all,

Bernd

Operators may periodically listen for the COMPASS-1 CW beacon on 437.275 MHz CW beacon every 3 minutes. Any reports are very appreciated.

The DK3WN SatBlog tracked monitoring and attempts at recovery over the past week:

+ On Sunday, February 26 no signals were heard from COMPASS-1

+ On Monday, February 27 no signals were heard; Several attempts to reset the satellite were unsuccessful.

+ On Tuesday, February 28 first report received after nothing heard for two days. Decoded telemetry showed the satellite had reset. Control stations reset voltage and heater thresholds to conserve power:

Power Level Critical Battery Capacity

Heater Active Battery Heater ON

Power Safe Counter 0 http://www.dk3wn.info/p/?p=26334)

Please continue to monitor 437.275 MHz for the COMPASS-1 CW beacon. Current status can be read on-line on the DK3WN SatBlog at: http://www.dk3wn.info

Mike has written telemetry decoders for several satellites, including COMPASS-1. These may be found at: http://www.dk3wn.info/software.shtml

[ANS thanks Mike Rupprecht, DK3WN for the above information]

VO-52 Not Heard

Reports have been posted that India's VO-52 HAMSAT satellite, launched on May 5, 2005 from India, has not been heard during expected passes since February 28.

Summaries from stations monitoring for VO-52 cam be viewed at: http://oscar.dcarr.org/

AMSAT INDIA Secretary Nitin, VU3TYG, posted on February 29 their last known status, "We are aware of the current situation. Myself and Mani, VU2WMY tried listening to the beacon and work thru the satellite during the 04:05 UTC pass over India but nothing was heard."

Nitin will post further updates when more news is available from ISRO. Amateur satellite operators are encouraged to post VO-52 status on http://oscar.dcarr.org/ Status Page.

[ANS thanks AMSAT INDIA Secretary Nitin, VU3TYG for the above information]

Satellite Special Events Announced

TP8 - France March 9-11

The Council of Europe Radio Amateur Club (CERAC - TP2CE) will be active as TP8CE between March 9-11 to celebrate the 40th anniversary of the European Youth Center. Operations planned on all HF bands and modes, and possibly the satellites. QSL via F5LGF. An online log search will be available at:

http://ewwa.free.fr

6H - Mexico April 13-18

Members of the Grupo DXXE will activate the special event callsign 6H6IARU between April 13-18 to celebrate the 87th anniversary of the founding of the International Amateur Radio Union (IARU), and to celebrate "World Amateur Radio Day" on April 18th.

This year's theme for the "World Amateur Radio Day" is Amateur Radio Satellites: "Celebrating 50 Years in Space" in remembrance the launch of OSCAR 1 on December 12, 1961, and the launch of OSCAR 2 on June 2, 1962.

Operations will be on all bands between 160-6 meters, as well as the amateur radio satellites from different Grid Locators throughout Mexico. QSOs with this station are valid for the IARU Region 2 award, the various FMRE awards and the DXXE award . QSL via N7RO or LoTW.

[ANS thanks Ohio/Penn DX Bulletin No. 1051 for the above information]

Coverage of Next Cubesats on AMSAT-UK Web

AMSAT-UK has compiled a series of very informative web page reports about upcoming Cubesat launches. Read up on the next flock of birds slated for launch. Follow the links to photos, satellite videos, and additional technical data on the AMSAT-UK web.

Antares Launch Slip Delays Dove-1 Satellite

http://www.uk.amsat.org/5061

The 3U amateur radio satellite Dove-1 (145.825 MHz AX.25 FM) was originally planned to launch on the Antares launcher on February 28 but reports indicate it may be Fall before it is launched.

Space.com reports that on February 21 Orbital Sciences Corporation announced a further slip and the launch of Antares could now be delayed until as late as September. Read the space.com report at: http://tinyurl.com/Antares-Delay (space.com)

The new Dove-1 (DO-17 was the original Dove satellite) will transmit on 145.825 MHz 1200 bps AFSK AX.25 FM downlink with telemetry data, including temp/power supply/current/RSSI/solar vector/acceleration, approximately every 30 seconds. The beacon can transmit at up to 1 watt and will use a quarter wave monopole antenna cut from a tape measure.

It also has a 2.4 GHz half-duplex, spread spectrum radio with patch antenna that will be used for main payload downlink and telecommand uplink. The data rate will be 115 kbps.

The planned orbit is 280 by 270 km at 51.6 deg inclination which will give Dove-1 a lifetime of about 2 weeks before re-entry.

Vietnam Student CubeSat F-1

http://www.uk.amsat.org/5025

Vietnamese students have produced a video about their amateur radio CubeSat F-1, callsign XV1VN. The F-1 is an educational CubeSat to be launched in the summer of 2012. It will carry a low resolution C328 camera with 640×480 resolution and two Yaesu VX-3R transceivers using 145.980 and 437.485 MHz.

+ VX-3R1

-Frequency: 437.485MHz, FM Narrow

-Power supply: directly from solar cells, only operates in sunlight

-Output power: max 0.3W, half-wave dipole antenna -Modulation scheme: Morse code beacon (10 chars) using PWM CW -Beacon interval: every 30 seconds (configurable)

+ VX-3R2

-Frequency: 145.980MHz , FM Narrow

-Power supply: rechargeable battery, operates in the dark by default but can be commanded to operate in sunlight as well -Output power: max 1.0W, half-wave dipole antenna -Modulation scheme: AFSK 1200bps, half duplex -Telemetry interval: one AX.25 packet every 30 seconds

TechEdSat to use 'SatPhone'

http://www.uk.amsat.org/5018

TechEdSat will be deployed from the International Space Station (ISS). It is a 1U CubeSat that will demonstrate Plug and Play power architecture and two way communication via the satellite phone/data networks Iridium and Orbcomm.

There will be a 437MHz beacon transmitting 1 watt to 1/4 wave monopole. Commanding is via the commercial networks and there is a 2 week watchdog timer to stop the beacon in the event of no commands being received.

TechEdSat will be launched along with Raiko, FITSat-1, We-Wish and F-1 to the ISS aboard HTV-3, currently planned to launch July 18, 2012. From there, it will be deployed into Low Earth Orbit using the JAXA J-SSOD deployer, from the Japanese Experiment Module (JEM also known as Kibo).

Wiki - TechEdSat http://en.wikipedia.org/wiki/TechEdSat

Kibo Robot Arm http://kibo.jaxa.jp/en/about/kibo/rms/

FITSAT-1 CubeSat to use 5.8 GHz and Optical Comms

http://www.uk.amsat.org/2037

The Amateur Radio CubeSat FITSAT-1 plans to transmit 115.2 kbps digital data in the Amateur Satellite Service 5.8 GHz band and will also carry an Optical Communications experiment.

FITSAT-1 (aka NIWAKA) is a 1U CubeSat (10*10*10cm) that should be be deployed from the International Space Station by robot arm in late 2012. It will generate about 2W RF output using a 16W DC input.

The main mission will be to demonstrate high speed data transfer from a satellite, it can transmit a VGA-size (640×480 pixel) JPEG photograph in only 5 to 6 seconds.

The second mission is to determine if a satellite can be made to appear as an "artificial star" using high-output LEDs in flash mode. The light from this flash will be received by the ground station, which has a telescope with photomultiplier linked to a 5.8GHz parabola antenna. This is a basic experiment to investigate the possibility of optical communication with satellites.

A UHF AX25 1k2baud transceiver will be carried for telemetry and telecommand purposes and a UHF CW beacon will also be provided. It will be deployed along with the satellites RAIKO and WEWISH into a 350x350km 51.6deg inclination orbit.

The following downlink frequencies have been coordinated by the IARU Satellite Frequency Coordination Panel: CW 437.250 MHz, FM 437.445 MHz, High speed data 5840.00 MHz.

Euroluna OZ9LUNA CubeSat Launch Update

http://www.uk.amsat.org/5153

Euroluna are a Danish amateur team participating in the $30 million Google Lunar X PRIZE contest to be the first privately funded team to land and drive a rover on the Moon. The President of Euroluna, Palle Haastrup OZ1HIA gives an update on the Romit1 CubeSat and plans for Romit2 and Romit3.

Romit1 is a 2U CubeSat that is planned to launch on the Interorbital Systems Neptune 9 rocket. After deployment Romit-1 will stabilize itself prior starting its engine to power itself into a higher orbit. If everything goes well it should, after a year, be out in a 700 km orbit, having started in a 310 km orbit.

It is hoped that radio amateurs across the world will assist the team in retrieving the data sent down, for example, they can gather images from the six cameras. The downlink frequency is 437.505 MHz at 1200bps.

The group are currently looking for a launch opportunity for Romit2 as well as Romit3 that is planned to reach the Moon.

[ANS thanks AMSAT-UK for the above information]

April 18 World Amateur Radio Day 2012 - 50 Years in Space

Every year on April 18 the IARU celebrates World Amateur Radio Day to note its anniversary starting in 1925.

This year's theme for the World Amateur Radio Day 2012 is Amateur Radio Satellites: "Celebrating 50 Years in Space" in remembrance the launch of OSCAR 1 on December 12, 1961, and the launch of OSCAR 2 on June 2, 1962.

The AMSAT News Service would like to publicize the events your group is planning for April 18, 2012. Just send the information to JoAnne, K9JKM (k9jkm@amsat.org) and we'll get the news out.

[ANS thanks the IARU for the above information]

Amateur Radio on the International Space Station (ARISS) Status Report

February 27, 2012

1. Upcoming School Contacts

An Amateur Radio on the International Space Station (ARISS) contact was successful for Parkside Elementary School in Atlanta, Georgia on Friday, March 2 at 16:42 UTC via station K6DUE in Greenbelt, Maryland. The ARISS contact is part of a comprehensive education plan which will pique students' interest in Science, Technology, Engineering and Math (STEM). An article about this contact appears on the NASA Talk Web site where ideas are shared about the contact and lesson plans. Contact audio may be available on NASA-TV.

http://nasatalk.com/component/resour...ct-to-iss.html

The 5th Geniko Lykeio Katerinis in Katerini, Greece has been completed for their Amateur Radio on the International Space Station (ARISS) contact on Friday, March 2 at 17:03 UTC. This activity has been integrated into the school curriculum covering astronomy and ham radio issues. Special attention has been given to the ISS regarding its role

in humanity and science, its orbit, and the everyday life of the astronaut. ISS courses were based on ESA's education tool, "ISS Education Kit."

2. ARISS Contact Featured at John Glenn Event

On Monday, February 20, an ARISS contact was held during the John Glenn Event at the State Records Office of Western Australia in Perth, via telebridge station AH6NM in Hawaii. The contact was held in celebration of the 50th anniversary of John Glenn's orbit of the Earth, when the population of Perth turned on its lights and Glenn observed the city was visible from space, leading to Perth's nickname, "City of Lights." The event opened with a pre-recorded video address given by Senator Glenn. Speeches from Australia's leading scientists were also given, followed by the ARISS contact with Dan Burbank, KC5ZSX on the ISS. The event was streamed live on the internet and was covered by television stations and ABC (Australian Broadcasting Corporation) Radio.

3. Italian Students Experience ARISS Contact

An Amateur Radio on the International Space Station (ARISS) contact was held between 1° Circolo Didattico Nicola Fornelli located in Bitonto, Italy and on-orbit astronaut Don Pettit, KD5MDT on Friday, February 24. The students had all their questions addressed concerning what it takes to become an astronaut and what it is like to live on the ISS. The contact highlighted their studies covering life in space, communications, space conquests and research, artificial satellites and the ISS. Approximately

300 people turned out for the event, including Italian Air Force officers and media representatives.

4. ARISS International Team Teleconference Held

The monthly ARISS International Team teleconference was held on Tuesday, February 21. Topics of discussion included a World Radiocommunication Conference 2012 (WRC-12) abstract concerning Nano and Pico satellites, the status of Ham TV and an update on the replacement VHF Ericsson. Minutes have been posted: http://ariss.rac.ca/arisstel2012-02-21.htm

5. Astronaut Training Status

Astronaut Alexander Gerst, who passed his amateur radio license exam on February 13, has been given the callsign KF5ONO. He is scheduled to fly with Expedition 40 in May 2014.

An introductory session is planned for Gregory Wiseman, KF5LKT (Expedition 40, May 2014) on Monday, February 27 and a preflight session is scheduled for Expedition 32 astronauts Sunita Williams, KD5PLB and Akihiko Hoshide, KE5DNI on Monday, March 5. Williams and Hoshide will fly later this year.

[ANS thanks Carol, KB3LKI, for the above information]

Amateur Radio is Attracting a New Generation of Enthusiasts:

Posted: 08 Mar 2012 04:08 PM PST
http://www.eham.net/articles/27884

At an age when most kids are cruising the Internet, Adam Simeth is exploring ham radio. Simeth, 16, has been intrigued with the century-old technology since his dad introduced him to it a few years ago. "With the Internet, you find a chat room, you click on and you join," Adam said. "With ham radio, you have to tune around and find a frequency that people are talking on. You can actually go all around the world and hear yourself as an echo." Adam is one of the young people keeping the tradition of amateur radio alive in the digital age. In an era of instant messaging, tweeting and text messaging, loyal ham radio practitioners young and old feel a sense of responsibility - and enjoyment - to keep ham radio use alive and well. They like the technological challenge of mastering the medium, the thrill of communicating with other like-minded people, and the ability to help out in times of crisis. "You're talking to people as opposed to typing," said Charles Wackerman, president of the Moore County Amateur Radio Society. "You're talking to a specific person that you may or may not ever meet."

//
Changes Needed to Antenna Rules, Say Rural Councilors:

Posted: 08 Mar 2012 04:07 PM PST
http://www.eham.net/articles/27883

EMC News - A proposed policy outlining the city's involvement in situating cell-phone towers and antennas didn't pass muster at the city's agriculture and rural affairs committee last week. The city doesn't have any authority over where the towers will be placed - that's the responsibility of Industry Canada, a federal agency. But the city can put together a protocol for how it will advise Industry Canada on proposed towers and that policy is something two city committees considered last week. The planning committee found little fault with the strategy, which provides a mechanism for residents and the city to provide comments to Industry Canada. But later in the week, on March 1, rural councillors brought up issues that would affect their wards. The agriculture and rural affairs committee directed the city's top planner to go back and make some changes to the protocol that would make it easier for amateur radio enthusiasts to continue to put up small antennas to be used for HAM radios. The draft city

policy would have exempted antennas of less than 15 metres in height, as long as they are installed at the back of homes. But that leaves little room for the antennas many radio operators install in their homes, often in rural areas, said members of the Ottawa Amateur Radio Club. Glenn MacDonnell, president of the club, pointed out that the city's proposed policy would cover any antennas on the front or sides of buildings, including satellite dishes.

Mohawks Seek Recognition for WWII Code Talkers:

Posted: 08 Mar 2012 01:34 PM PST
http://www.eham.net/articles/27866

A Mohawk veterans group wants the federal government to recognize the contributions of "code talkers" during the D-Day invasion of Europe during World War Two. The Navajo "code talkers" were the largest group of Native Americans during the 1940's to use their language skills in the south Pacific against the Japanese.

Lie much, Snookie? No proof as one would expect.

You know, it's not like the auk *awards* actually mean anything in the
first place anyway. Especially with grossly deformed troglodytes like
Poop Snooky designating who is a kook and who isn't. It's the pot-
kettle syndrome actually.

Mt. Carmel High Schoolers Launch Helium Balloon:

Posted: 09 Mar 2012 04:21 PM PST
http://www.eham.net/articles/27886

Students at Mount Carmel High aim high, about 100,000 feet straight up. Recently, the Amateur Radio Club at the school launched a helium balloon into near-space. The balloon was tied to the student's spacecraft: a small styrofoam box equipped with sensors to track data as well as tiny video cameras and a still camera to record the journey. The students named the craft Icarus-1. Lindsay White, a sophomore, is the club's president. "What we did that was unique in this launch was we had pictures being sent down live to anyone who had the right decoding software. That really hasn't been tried on many other balloon launches," she said. It was a team effort to put the project together. Tim Kinsey, a senior, said they launched the balloon on a Saturday morning at the school. They used all the helium they had to give the nylon balloon its 8 pounds of lift. Club member Alex Kim worked on the antenna with two of the mentor engineers. 'We were trying to find the point where the feedback would be lowest. Once we found it, we soldered the wires together and it worked," he said.

Auk is a group of misguided, paranoid misfits and Homosexual pariahs
attempting to assert the superiority they never had by harassing and
accusing others of possessing the same paranoia and mental instability
they themselves possess.

http://www.eham.net/articles/27888

In the event of hurricanes, fires, floods, earthquakes and other disasters, you can count on amateur (or Ham) radio to provide vital links to agencies and city services such as fire, police and ambulance. On Tuesday, March 20, local kids can join Surrey Museum and Surrey Emergency Program Amateur Radio Society (SEPAR) in an amateur radio emergency communications workshop at the museum, at 17710 56A Ave. The session (from 2 to 4 p.m.) will focus on how amateur radio provides communities with emergency communications when commercial systems are not operational.

//
Ham Radio Network to Help Disaster Communications:

Posted: 10 Mar 2012 04:19 PM PST
http://www.eham.net/articles/27887

He was responding to a representation made by a member of the HAM radio community on their readiness and availability to act in disaster situations during a discussion on the topic 'Media and Disasters' here today. Organised in connection with the ongoing international workshop on disaster risk reduction and contingency planning, Surakshaayanam 2012, representatives of the media including Deputy Editor, Frontline Ventikesh Ramakrishnan, Associate Editor of India Today M G Radhakrishnan and Malayala Manorama Bureau Chief John Mundakkayam delineated various aspects of media reportage on disaster management.

PRM12WT is Open for Comments

Posted: 11 Mar 2012 01:17 PM PDT
http://forums.qrz.com/showthread.php?337613-PRM12WT-is-Open-for-Comments&goto=newpost

Dear friends,

PRM12WT which is a Petition for Rule Making regarding PRB-1 extension using a 14th Amendment argument needs your comments and support.

Even if your comments are very short, it will be helpful to show community interest. The Petition is very difficult to find on both versions of the

FCC website, however you can locate it using google and searching for PRM12WT. The link below will bring you right to the comment area on

the FCC site for this petition. You then click on "Submit a filing on PRM12WT" and you can make your voice heard.

Please feel free to forward this to anyone or post it elsewhere.

Sincerely,

Leonard J. Umina

W7CCE

//
OLTMS LEO-1 Flight Report

Posted: 09 Mar 2012 07:56 AM PST
http://forums.qrz.com/showthread.php?337279-OLTMS-LEO-1-Flight-Report&goto=newpost

The flight of LEO-1 was a great success. Aside from technical difficulties, the launch went well and was a lot of fun for all. The flight reached a maximum altitude of 97,000 which was verified by a chase team member from a direct packet received directly on his HT. The flight was not that fast going up, but it was a scorcher on its way down. It was launched from Gluckstadt, MS and landed near Ashville, AL on a fighting bull farm.

All equipment and science projects were accounted for since it landed in a pine tree at the edge of a pasture. The pine tree was about 100 feet tall

and was hanging from about the 70 foot level. Luckily a friend, Shane-N4XWC, who likes to climb trees was on one of the chase teams and was there and helped recover it all. There were many hams involved in the chase teams. Listed below are some of the individuals and hams that contributed to this extraordinary event.

(Team 1) Jim Coker(AE5SK), Jim Rapp(WS7EOC);

(Team 2) Bill Richardson(N5VEI), Coley Richardson, Martin McCandless, Adam Lewis(KF5JSY)

(Team 3) Shane Wilson(N4XWC) and friend

(Team 4) Bobby Robinson(Science Teacher) and daughter

(Team 5) Zac Hollingsworth W4ZAC and Brady Bunt KF4YPT

(Team 6) Tom Randle is (W4BM)

All science projects were accounted for and are being analyzed at this time. We also duplicated a phenomenon that we got from an experiment last year. The phenomenon happened when we sent up a roll of film in a plastic roll container. Last year, the film was developed and a few of the frames had orange and red flame images across them and some had an ethereal blue flame or haze across them. No scientist that we have talked to has been able to identify what particle might have collided with the film or the phenomenon. This year the same thing happened on one frame of the film. We took great measures to ensure that there were no accidental exposures. The phenomenon around the third frame in from the end this year. Once all science experiments are fully completed, I will have a report available.

On a final note, we are now in 2nd place for VHF/UHF telemetry reception distance at ARHAB.org. They track worldwide amateur radio ballooning records. A single packet was received in North Carolina when the balloon was at or near peak altitude. It traveled 512 miles. Due to a weather front in the area it provided perfect conditions for VHF propagation. The 50mw voice beacon was heard near the balloons peak from Sumrall, MS. Jimmy Ready (N5LRQ) trained his beams on it and was able to make out a portion of the secret message. Overall the balloon was a great success, and next year□s launch is already being planned. A slideshow of all the pictures can be found at www.tinyurl.com/otmsradio under the photo gallery.

73,

Bill Richardson, N5VEI

Amateur Radio Groups Given Donation:

Posted: 11 Mar 2012 06:28 PM PDT
http://www.eham.net/articles/27894

Amateur radio operators in Berks County will have improved long-range capabilities to help civil authorities with auxiliary communications thanks to a donation from the corporation that owns the Titus Station power plant in Cumru Township. GenOn Energy has donated $3,600 to the Amateur Radio Emergency Service, known as ARES, and Radio Amateur Civil Emergency Service of Berks County. The latter is the local club of amateur radio enthusiasts. ARES operates during emergencies under the auspices of the Federal Emergency Management Agency and consists of amateur radio operators throughout the United States.

//
Home Sweet Ham: Good Conditions for Ham Radio Sways Couple to Buy ND Home:

Posted: 11 Mar 2012 06:28 PM PDT
http://www.eham.net/articles/27893

FARGO, N.D. -- James Stiles doesn't hunt, fish, bird watch or yet dig for dinosaur bones -- the typical hobbies that draw people to North Dakota. He's moving to the state to increase his stock as a ham radio operator. The 57-year-old Stiles, retired for five years from a career as a computer whiz with the U.S. Department of Defense, recently bought with his wife Sue a house sight unseen -- on the Internet auction site eBay, no less -- in the small southeastern North Dakota town of Edgeley. The town is not named for being on the edge of the world. But Stiles hopes he can hear it from there. Yes, the price was right, the state is safe, the people are friendly, the town has a welcoming website. But perhaps most importantly, there's plenty of room for a 40-year amateur radio operator to become famous. "Yes, I am a ham radio operator. This really was a factor," Stiles said in a phone interview from Myrtle Beach, S.C., where he's spending the winter. Stiles said the state is ideal for his hobby because there's less congestion on the radio frequency and the Aurora conditions, or Northern Lights allow for communications over greater distances. In addition, no place is the best place for a ham radio operator, many of whom compete to find people in obscure places.

//
Triathlon DX Contest announcement

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/oWcZnxy51r8/triathlon_dx_contest_announcement.htm?utm_source=feedburner&utm_medium=email

It all started in August of 2011. That was about when it occurred to Mike, SV5BYR that a big Greek Contest was missing from international Ham Radio Contest Calendar

//
ECI-QRP Spring Meeting

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/hWMrJws98TE/eci_qrp_spring_meeting.htm?utm_source=feedburner&utm_medium=email

Well folks another winter has nearly passed us by and already I’m seeing Robins in the yard

//
GOMX-1 to test CubeSat Space Protocol

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/ADt1v-jxXRQ/gomx_1.htm?utm_source=feedburner&utm_medium=email

GOMX-1 is an amateur radio 2U CubeSat built by students in Aalborg, Denmark

//
New ARES logos

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/9c2_qEFlvP0/new_ares_logos.htm?utm_source=feedburner&utm_medium=email

The ARES/SURA logos (see url below), designed by Tyler Tidman VA3DGN are now available for use by all ARES / SURA members and groups

//
BBC - Morse Code Sound Sculpture

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/4g50XdxqHVY/morse_code_sound_sculpture.htm?utm_source=feedburner&utm_medium=email

BBC Radio 4 show Saturday Live broadcast on March 10 features Kevin Collins
who recalls his fathers passion for Morse code

//
Special Callsign for Autumn Social Event

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/HX1MnX5klss/special_callsign_for_autumn_social_event.htm?utm_source=feedburner&utm_medium=email

A social event has been organised by the Royal Naval Amateur Radio Society
to take place in Coventry

//
Ham moves to 'ideal' North Dakota

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/Z0CLU_r5GOc/ham_moves_to_ideal_north_dakota.htm?utm_source=feedburner&utm_medium=email

a couple are moving to North Dakota as they consider it an ideal state in
which to operate amateur radio

//
IRLP Topic Channels go live

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/8nZ49ghR7LM/irlp_topic_channels_go_live.htm?utm_source=feedburner&utm_medium=email

The long-awaited IRLP Topic Channels have now gone live! IRLP users are now
able to log onto reflector channels allocated for topics ranging from
DX'ing to music, media, history and Election 2012 as well as others

//
IARU Monitoring System Newsletter

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/QeOgtl1mzyw/iaru_monitoring_system_newsletter.htm?utm_source=feedburner&utm_medium=email

The February issue of the IARU Monitoring System (IARUMS) newsletter
reports on the Dutch produced Datawell buoys that have been transmitting in
the amateur radio 10m band

//
Bob Heil audio talk at UK National Hamfest 2011

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/S1D4BI6plWk/bob_heil_audio_talk.htm?utm_source=feedburner&utm_medium=email

Gerard M3XYP has just posted on Youtube the Bob Heil audio talk from the
2011 UK National Hamfest

On the Record With Cornel Topala, W9CA:

Posted: 12 Mar 2012 05:43 PM PDT
http://www.eham.net/articles/27897

Growing up in Romania, Cornel Topala fell in love with amateur radio. With that love came a desire to be able to speak and broadcast freely -- something he knew he could not do under the Communist regime of Nicolae Ceausescu. He immigrated to the United States in 1980 at age 21, got married and started his own business, CorTek Endoscopy, which builds medical equipment. His Wauconda business houses the radio equipment for W9CA, or Whiskey Niner Charlie Alpha in ham radio speak, which is the name of the local ham radio operators' club. The club has a national reputation because it frequently wins its class in the American Radio Relay League's annual Field Day competition. The competition, meant to see how many contacts a group can make worldwide in 24 hours, has a very practical purpose. Ham radio operators are a critical backbone for emergency response when disaster knocks out phone service and other communications.

//
'We're The Eyes And Ears':

Posted: 12 Mar 2012 05:43 PM PDT
http://www.eham.net/articles/27896

There is a not-so-secret force patrolling area events in neon vests, helping to keep the public safe in case of emergencies. The Chautauqua Amateur Radio Service is a 28-member strong group of volunteers that can be seen at many area events, including Saturday's DJDC St. Patrick's Day Parade and The Resource Center's 3-on-3 basketball tournament. "We set up a perimeter of emergency communications. Basically, we're the eyes and ears for the police, the fire departments," said Dan Trippy, president of the Chautauqua Amateur Radio Service. If the group spots anyone in need of assistance at an event, they are able contact the proper authorities through their radios.

AMSAT NEWS SERVICE

ANS-071

ANS is a free, weekly, news and information service of AMSAT North America,
The Radio Amateur Satellite Corporation. ANS reports on the activities of a
worldwide group of Amateur Radio operators who share an active interest in
designing, building, launching and communicating through analog and digital
Amateur Radio satellites.

Please send any amateur satellite news or reports to:

ans-editor@amsat.org

In this edition:

* Howard Long, G6LVB featured speaker at the 2012 AMSAT/TAPR Banquet

* AMSAT-NA Receives US Space Command Authorization for Keps Distribution

* AMSAT-UK Announces Colloquium 2012 & Issues First Call for Speakers

* New Satellite Group Formed in Cuba

* India VO-52 Satellite Recovery in Progress

* March 17 for AMSAT-LU Balloon Test Flight of LUSEX Satellite Systems

* KB8VCO and W8ZCF ARISSat-1 SSTV Contact Featured in the Press

* Echolink Satellite Nets Launched

* Satellite Shorts From All Over

* Amateur Radio on the International Space Station (ARISS) Status Report

AMSAT News Service Bulletin 071.01

From AMSAT HQ SILVER SPRING, MD.

March 11, 2012

To All RADIO AMATEURS

BID: $ANS-071.01

Howard Long, G6LVB featured speaker at the 2012 AMSAT/TAPR Banquet

The AMSAT/TAPR Banquet on Friday night, May 18 is one of the main AMSAT activities during the 2012 Hamvention at Dayton.

AMSAT is pleased to announce that Howard Long, G6LVB will be the featured speaker for the evening event. Howard will be talking about his FUNcube Dongle, the 64 - 1700 MHz Software Defined Receiver. This innovative USB device is the size of a thumbdrive and has an SMA antenna socket. Multiple SDR control and display software programs can

be used with the FUNcube Dongle.

Banquet tickets will not be sold at the AMSAT booth during the Hamvention so reservations must be made through the AMSAT Store: http://www.amsat-na.com/store/item.php?id=100158 Tickets are $30 apiece.

Volunteers are needed to help at the AMSAT booth at Dayton. Gould WA4SXM, is looking for volunteers to help man the AMSAT booth during the 2012 Hamvention. People are needed all 3 days for 2 hour shifts. Please send the days and times you are available to help as well as how many shifts you are willing to work via e-mail to wa4sxm at amsat.org. Monitor http://www.amsat.org/amsat-new/hamve...012/Dayton.php for the latest AMSAT at Dayton news and developments

[ANS thanks Gould Smith, WA4SXM for the above information]

AMSAT-NA Receives US Space Command Authorization for Keps Distribution

AMSAT's Keeper of the Keps, Ray Hoad, WA5QGD wrote, "I am pleased to announce that AMSAT's request to re-distribute AFSPC Keplerian elements from SpaceTrack has been approved for the period April 1, 2012 to April 1, 2013. Our USSTRATCOM ODR (Orbital Data Request) to distribute the KEPs was approved on March 1, 2012. We are "good to go" for another year."

Thanks to the US Air Force Space Command, Perry Klein, W3PK and Paul Williamson, KB5MU for their help in this process.

[ANS thanks Ray Hoad, WA5QGD for the above information]

AMSAT-UK Announces Colloquium 2012 & Issues First Call for Speakers

The AMSAT-UK International Space Colloquium will be held on September 14-16, 2012.

The colloquium attracts an international audience from across Europe as well as North America and the Middle East. Attendees range from the builders of the CubeSats and Nanosats, those who communicate through them and beginners who wish to find out more about this fascinating branch of

the hobby.

It provides a rare opportunity to chat with satellite designers and builders, discussions frequently continue until the early hours of the morning.

A Gala dinner is held on the Saturday evening along with the fund raising auction.

AMSAT-UK invite speakers, about amateur radio space and associated activities, for this event. They are also invited to submit papers for the ☐Proceedings☐ document which will be published at the same time but printed papers are not mandatory. We normally prefer authors to present talks themselves rather than having someone else give them in the authors☐ absence. We also welcome ☐unpresented☐ papers for the Proceedings document.

FIRST CALL FOR SPEAKERS

This is the first call for speakers for the AMSAT-UK International Space Colloquium 2012 which, due to the Olympic & Paralympic Games, will be held this year on the weekend of September 15-16, 2012 at the Holiday Inn, Guildford, GU2 7XZ, United Kingdom.

This Colloquium will take place a few weeks before the planned launch of AMSAT-UK☐s FUNcube-1 satellite carrying a 435/145 MHz linear transponder for SSB/CW communications.

AMSAT-UK invites speakers, to cover topics about micro-satellites, CubeSats, Nanosats, space and associated activities, for this event.

They are also invited to submit papers for subsequent publishing onthe AMSAT-UK web site. We normally prefer authors to present talks themselves rather than having someone else give them in the authors☐ absence. We also welcome ☐unpresented☐ papers for the web site.

We appreciate that it is not always possible to give a firm indication of attendance at this stage but expressions of interest would be appreciated.

Submissions should be sent *ONLY* to G4DPZ, via the following routes:

e-mail: david dot johnson at blackpepper dot co dot uk

Postal address at http://www.qrz.com/db/G4DPZ

AMSAT-UK also invite anyone with requests for Program Topics to submit them as soon as possible to G4DPZ. Invitations for any papers on specific subjects will be included in the future call. Likewise if anyone knows of a good speaker, please send contact and other information to G4DPZ.

[ANS thanks Dave Johnson, G4DPZ and AMSAT-UK for the above information]

New Satellite Group Formed in Cuba

Hector Martinez, CO6CBF reports that the Cuban Amateur Radio Federation (FRC) has created its first official Satellite Group.

Hector said that himself, Raydel CM2ESP, and Pavel CO7WT worked to form the group and made the request to the FRC headquarters. The request was approved on March 3, 2012. The official name is Grupo de Radioaficionados para Operaciones Satelitales (GROS).

The principal mission is to promote amateur radio by satellites in Cuba and motivate Cuban hams to operate on the satellites.

Grupo de Radioaficionados para Operaciones Satelitales is planning their first meeting in Havana City, Cuba.

[ANS thanks Hector Martinez, CO6CBF for the above information]

India VO-52 Satellite Recovery in Progress

Mani, VU2WMY, Secretary & Station-In-Charge at the Upagrah Amateur Radio Club VU2URC in India reported that on March 6 the ISRO Satellite Centre recovered operation and control of HAMSAT VO-52. This satellite had been heard during expected passes since February 28.

Mani wrote, "I can share at this moment is 'HAMSAT VO-52' is in 'Excellent Health' after recovery operations. Right now, it is under observation. The decision in regards to switching 'ON' the transponder is pending clearance from ISRO. This decision expected soon. The user community will be informed well in advance about the transponder switching."

ISRO Announces Plan to Turn on Dutch Transponder

On March 8, Mani, VU2WMY, reported that news had been received from Mr. T. Parimalarangan, HAMSAT VO-52 Operations Director at ISTRAC/ISRO that, "After 'In-Orbit Maintenance Operations' the decision to turn 'ON' Transponder No 2 i.e. The Dutch Transponder made by William Leijenaar PE1RAH on March 8 during orbit # 37006 over India."

Dutch Transponder Activation on Hold for One Week

Unfortunately, we are sorry to inform that the 'Expert Committee' overseeing the VO-52 (HAMSAT) performance has advised to extend the 'Observation Period' by an other week.

Hence, the decision to switch on the transponder # 2 is now put 'ON HOLD' till further notice. Inconvenience caused to the users is regretted.

This latest decision is just only a postponement and nothing to worry about the health of the spacecraft. W re-assure you all that VO-52 is very strong and in a 'Perfect Health' condition.

Once the Dutch transponder is switched on it will use the following frequencies:

Uplink frequency: 435.250 MHz

Downlink frequency: 145.900 MHz

Beacon: CW at 145.859330 MHz (145.86 MHz)

Output level of Beacon Carrier: 18 dBm

ISRO invites a 'Critical Comparative Signal Report' between the Indian and Dutch transponder would be of great help for further evaluations and necessary actions for the maintenance the transponder in good and healthy condition for better services and also, the inputs would be very valuable to the respective transponder designers. Please send your feedback to tprangan@istrac.org.

Summaries from stations monitoring for VO-52 can be entered and viewed on the Live OSCAR Satellite Status Page: http://oscar.dcarr.org/

[ANS thanks Mani, VU2WMY, Secretary & Station-In-Charge at the Upagrah Amateur Radio Club for the above information]

March 17 for AMSAT-LU Balloon Test Flight of LUSEX Satellite Systems

AMSAT-Argentina announced they are planning to test systems of the LU Satellite EXperiment (LUSEX) satellite during a high altitude balloon flight up to 100,000 feet. This is scheduled for March 17 at 1500 UTC. Direct reception of the balloon flight is estimated to extend to 400 miles from the City of Junin, west of Buenos Aires, Argentina. (See http://www.amsat.org.ar/junincubr.jpg for estimated coverage map.)

The payload will feature several radio and telemetry experiments:

Crossband FM Repeater

Uplink 435.950 MHz FM (123 Hz tone)

Downlink 145.950 MHz FM

SSTV Downlink 145.950 MHz FM

ROBOT-36 in real time, showing the view from the balloon every 5 minutes during ascent/descent, longer interval at high altitude. Video will also be recorded and recovered at the end of the flight.

APRS Data

APRS 1200 baud packet on 144.930 MHz, and 145.950 MHz.

Telemetry Downlink 145.950 MHz

If the crossband repeater is in use a warning bip at 40 seconds will indicate telemetry is coming, which is sent if the repeater is not in use. If the repeater continues to be busy then 2 bips will indicate APRS packets will be sent.

CW telemetry (modulated FM on 145.950 MHz)

Sent every 5 minutes with the following sequence: CQ LU7AA, sequence number, external and internal temperatures °C and battery voltage.

User Telecommand Experiment

The 435.950 up / 145.950 down crossband repeater will accept user DTMF command to return a signal report. Sending B* on the uplink will return S5 (average signal strength) or P10 (S9+10 signal strength) modulated CW tones

on the 145.950 MHz FM downlink.

APRS trajectory will update every minute, including speed, height, external and internal temperatures and 7.2v battery voltage. This can be monitored directly on 144.930 MHz for stations in range. It will also display at: http://aprs.fi/?call=lu7aa-11 . The APRS symbol will display as a balloon during ascent, and as a glider during parachute descent. The AMSAT-LU APRS Igate LU7AA-10 on 144.930 and 430.930 MHz will be active. Maps for UI-View APRS tracking can downloaded from http://www.amsat.org.ar.

Stations making a contact via the balloon payload may qualify for a certificate. See http://www.amsat.org.ar/certsat.html for details.

AMSAT-LU thanks the members of Radio Clubs of Junin, QRM Belgrano, APRS Group, Don Bosco Ramos Mejia School, gliders Clubs of Zarate, Junin and Cañuelas, and the twelve Amsat-LU members development team. Reports from radio amateurs during previous flights are appreciated and they look forward to your reports during the March 17 flight.

Photos and reports of prior flights can be viewed on-line at:

http://www.amsat.org.ar/lu4aao/exper..._parapente.htm

The LU Satellite EXperiment web page is at: http://lusex.org.ar

[ANS thanks AMSAT-LU for the above information]

KB8VCO and W8ZCF ARISSat-1 SSTV Contact Featured in the Press

The Cincinnati (Ohio) Press web featured a story about the successful SSTV contact via ARISSat-1 between Farrell Winder, W8ZCF and his son, Jeff Winder, KB8VCO.

The Winders teamed together and after many, many tries were successful in sending and receiving a picture of Farrell Winder's automobile license plate.

The Winders used two computers, two radios, and two rotatable outside antennas on towers to aim and to pinpoint the satellite antenna. Conditions were challenging as the satellite was traveling at 18,000 MPH at an altitude of 225 miles, which provided a window of opportunity of only up to about nine minutes while its footprint was passing within

range of Cincinnati.

The successful end result was a lot of hard-earned fun and excitement to work with very small signals from ☐outer space☐ and overcome the setback caused by the missing antenna on ARISSat-1.

The picture the Winders sent and received is apparently one of the only complete pictures sent and received. Two other operators tried a similar undertaking, but received just portions of pictures.

Since ARISSat-1 had no propulsion system to sustain altitude it entered the Earth's atmosphere on Jan. 4, 2012 and disintegrated.

The story can be read on-line at: http://tinyurl.com/ARISSat-Cincinnati

[ANS thanks Farrell Winder, W8ZCF and Jeff Winder, KB8VCO for the above information]

Echolink Satellite Nets Launched

New Echolink SAT-CHAT Net

Vince Waelti, K9TSU has established a new, open net, the "Sat-Chat" on the *AMSAT* server on EchoLink. This net meets at 1900 Central US Time (UTC-5) every Saturday evening. Everyone is invited to check in. Also links to -L and -R systems for on-air repeater coverage are welcome. Vince can be reached at k9tsu(at)hotmail(dot)com if you have

any questions.

Hudson Valley SatCom Net on Echolink

Stu Ballinger, WA2BSS says the next Hudson Valley SatCom net will meet on-air (146.97 MHz. Mt. Beacon Repeater) and on the Echolink node N2EYH-L on March 15 at 2000 Eastern US time (UTC-4).

Houston AMSAT Net on Echolink

The Houston AMSAT Net meets on the Echolink *AMSAT* server every Tuesday evening at 2000 Central US Time (UTC-5). Checkin to the net is taken via Echolink if you are not in radio range of Houston.

[ANS thanks Vince Waelti, K9TSU; Stu Ballinger, WA2BSS; and Bruce Paige, KK5DO for the above information]

Amateur Radio on the International Space Station (ARISS) Status Report March 5, 2012

1.School Contacts

Dilworth Elementary School in San Jose, California had an Amateur Radio on the International Space Station (ARISS) contact on Monday, March 5 at 18:33 UTC. The ARISS contact is part of a comprehensive education plan which will pique students' interest in Science Technology, Engineering and Math (STEM).

An Amateur Radio on the International Space Station (ARISS) contact was held with ESA ESTEC in Noordwijk, Netherlands on Tuesday, March 6 at 13:11

UTC via station ON4ISS in Belgium. The radio activity is part of an educational program around André Kuipers' mission Spaceship Earth which targets children who are 10-14 years of age. Part of this program consists of mission assignments Kuipers gives to Dutch school children. The winners of each challenge will be invited to the radio contact. Other activities include lessons and experiments.

2. ESA Awards ARISS Contact to Winners of Competition

Students from three schools, the American School of the Hague, the International School of Amsterdam and the British School in the Netherlands, took part in an Amateur Radio on the International Space Station (ARISS) contact on Monday, February 27 via station IK1SLD in Italy. This ARISS contact with astronaut André Kuipers was offered as a prize by the European Space Agency (ESA) to those schools who submitted the best suggestions for experiments or demonstrations that could be performed in microgravity on board the ISS using common everyday items. The youth were given lessons on radio signals and communications which involved local radio ham experts.

3. Atlanta, Georgia Youth Radio ISS Astronaut

On Friday, March 2, an Amateur Radio on the International Space Station (ARISS) contact was held between astronaut Don Pettit, KD5MDT on the ISS and Parkside Elementary School in Atlanta, Georgia. The radio link was provided by station K6DUE in Greenbelt, Maryland. Questions were asked concerning the education and training needed to become an astronaut and about how space affects one's appetite and sleep. The contact was part of a comprehensive education plan using NASA related activities to pique students' interest in Science, Technology, Engineering and Math (STEM). Audio was carried live on the NASA TV hour. East Atlanta Patch posted an article on the contact.
http://eastatlanta.patch.com/article...#video-9240102

4. Pettit Chats with Greek Students via ARISS

Students attending the 5th Geniko Lykeio Katerinis in Katerini, Greece experienced a successful Amateur Radio on the International Space Station (ARISS) contact on Friday, March 2. The youth spoke with Don Pettit about the experiments onboard the ISS and asked how he communicates with his family during his mission. The contact complemented lessons covering astronomy and amateur radio with special attention given to the ISS regarding its role in humanity and science, its orbit and the every day life of the astronaut. ISS courses were based on ESA's education tool "ISS Education Kit." Five hundred were in attendance and another hundred connected to the internet to view the streaming video. Media coverage included two television stations.

5. Amateur Radio Newsline Covers ARISS

On March 2, Amateur Radio Newsline report #1803 carried an article about the recent ARISS contact held during the John Glenn Event in Perth, Australia. The event celebrated the 50th anniversary of John Glenn's orbit

of the Earth, when the population of Perth turned on its lights and Glenn observed the city was visible from space, leading to Perth's nickname, "City of Lights." To view, "Ham Radio in Space: Amateur Radio Celebrates John Glenn over Perth Australia," see: http://www.arnewsline.org/storage/scripts/nsln1803.txt

[ANS thanks Carol, KB3LKI, for the above information]

/EX

In addition to regular membership, AMSAT offers membership in the President's Club. Members of the President's Club, as sustaining donors to AMSAT Project Funds, will be eligible to receive additional benefits. Application forms are available from the AMSAT Office.

Primary and secondary school students are eligible for membership at one-half the standard yearly rate. Post-secondary school students enrolled in at least half time status shall be eligible for the student rate for a maximum of 6 post-secondary years in this status. Contact Martha at the AMSAT Office for additional student membership information.

And, with that please keep in mind that the Sun accounts for 99.8% of the Solar System's mass. 1,300,000 Earths could fit inside of the Sun. Jupiter is as big as the Sun's core. 1,300 Earth's could fit inside of Jupiter.

KG6YPI's "RemoteHams.com" Enhances Remote-Controlled Radio Capability

Posted: 12 Mar 2012 03:55 PM PDT
http://forums.qrz.com/showthread.php?337792-KG6YPI-s-quot-RemoteHams-com-quot-Enhances-Remote-Controlled-Radio-Capability&goto=newpost

Brandon Hansen, KG6YPI, continues to make significant improvement to his www.RemoteHams.com remote radio service with the addition of a custom client installed on a users computer. Remotehams.com offers Internet-controlled receivers and transceivers from around the world, including transmit capability. The custom client includes VoIP capability eliminating the need for a service such as Skype for audio. It also includes such features as visual level displays of both receiver and transmit audio, easy selection of audio sources, and simple adjustment of audio levels. The audio quality on such remotes as that offered by Scott, WA6LIE in Salinas, California is excellent.

Beyond these features Brandon has done a superb job of creating a very attractive, easy-to-use radio interface that makes using these radios both simple and fun. It even includes capability to send and receive CW. I use

WA6LIE's radio on a regular basis from my home and find that it is almost like having his Elecraft K3 right on my desk here in Hong Kong.

You can give the system a try by going to:

Mobile operations at risk for Missouri Ham Radio Operators

Posted: 12 Mar 2012 11:29 AM PDT
http://forums.qrz.com/showthread.php?337756-Mobile-operations-at-risk-for-Missouri-Ham-Radio-Operators&goto=newpost

Norm Lampton, KC0FNA, the MO Section State Goverment Liasion has alerted Missouri ham radio operators of a bill that has been filed that if unmodified could make operating an Amateur Radio mobile a crime because of Missouri Senate Bill No. 717. Missouri state Senator Stouffer introduced this to the Missouri Senate. To summarize, his statement,

- This act creates the traffic offense of distracted driving. Under the terms of the act, a person commits the offense of distracted driving if the person, while operating a motor vehicle on the highways of this state:

(1) Fails to give full time and attention to the operation of the motor vehicle;

(2) Fails to maintain a proper lookout while operating a motor vehicle; or

(3) Engages in any other activity which causes the operator to be distracted from the primary mission of driving such motor vehicle.

A person who violates the provisions of the act shall be guilty of a Class C misdemeanor, unless an accident is involved then it shall be a Class A misdemeanor.

Using a mobile would be a violation of this act. In fact if you sneeze then wipe your nose you violate the act. It is directed at texting and cell phone use, but it is so overly broad that it catches almost anything that isn□t driving the car.

I am going to try to get this fixed but it would be of much help if we could alert the membership to contact their state senator and voice concerns.

Members can find their Senate and House members at this link

.

Contact with the Senators is urgent but contact with House members would be helpful.

The ARRL has taken a position on distracted driving:

.

On that page is a link to the President□s letter to the National Safety Council in July 2009 and the League□s policy statement on distracted driving:

.

York Radio Club and Fox Radio Relay League Participate in First Hamvention:

Posted: 13 Mar 2012 06:14 PM PDT
http://www.eham.net/articles/27904

Elmhurst, IL -- The York Radio Club will host the first annual Hamvention at 8 p.m. March 16 at the Community Bank of Elmhurst. All local HAM radio operators and anyone interested are invited to come and find out more about what York Radio Club and Fox River Radio League do throughout the year.

//
John 'Harvey' Chase, W4TG (SK):

Posted: 13 Mar 2012 06:13 PM PDT
http://www.eham.net/articles/27903

Silent Key - The term given to a deceased amateur radio operator. The amateur radio hobby besides being science based enjoys something few other hobbies can boast... Meeting people from all over the world, even if it's seldom face to face. In the United States, there are just over 700K ham radio operators, twice that many in Japan. Every time I turn on my ham radio, I never know where or who I may talk to next. Besides the ability to communicate world wide, getting to know some of my fellow operators via the airwaves is much of the hobbies appeal to me. I think my speech is poor enough that frankly not a lot of people want visit with me... except when I'm talking though my amateur radio's "bug" or straight key. Normal speech for me is impossible, but using Morse code I'm pretty good, and that has allowed me the opportunity to get to know some of my fellow operators around the world. One such operator I was fortunate enough to work (communicate with) twice in the last year was Harvey - W4TG. Harvey died this week at the age of 96 in the heart of Georgia. Since I never actually spoke to Harvey, I expect he had a southern drawl... I mentally put one with the Morse code he sent. Harvey was a WWII vet. In fact, he was there where the war started for the USA on December 7, 1941. Harvey told me he couldn't believe the things he saw at Pearl Harbor that day... from the pictures and movie film I've seen of the attack, I can see why.

//
Golden Gate Bridge -- Special Event:

Posted: 12 Mar 2012 05:00 PM PDT
http://www.eham.net/articles/27902

N6G, Special Event station, celebrating the 75th Anniversary of the opening of the Golden Gate Bridge. Event Details: May 26, 27 2012, 00:00 - 23:59, or later if needed. Phone only. Frequencies of 21.265, 14.265 and 7.265 +/- QRM. (Also possibly 10 and 80 meters added) QSL direct via AE6YB.

It's bad enough how many of the AUK'ers have bad
criminal histories and brain disorders, but for them
to poke at others about criminal records (real or faked)
is downright stupid.

That's why I compare AUK'ers to the telephone ""PRANKS""
of the internet group PRANKNET. They are/were
idiots who accused random people of being
child molesters when several of the top leaders
of PRANKNET genuinely ARE criminally
convicted child molesters.

The very top guy allowed, condoned and supported
racism about Pakistani immigrants even though he
is actually one himself, and living in his Mommy's
apartment to boot.

Their ideas of what was funny or fair
was similarly psychopathic.

It doesn't take a genius to know you're ugly, Snookems. You are as
ugly as a cyclops. There should have been a law against letting your
parents breed.

==> + PUBLIC SERVICE: HAMS IN INDIANA, KENTUCKY AND OHIO PROVIDE
SUPPORT DURING AND AFTER TORNADO OUTBREAK

A devastating storm system moved across the United States on March
2, spawning a slew of tornadoes that contributed to at least 28
fatalities in Indiana, Kentucky and Ohio. These tornadoes followed an
earlier outbreak that began on February 28 and left 13 dead across
Kansas, Missouri, Illinois and Tennessee and battered parts of
Kentucky. The Clark County (Indiana) Emergency Management Agency
activated the local RACES team to help provide communications support,
hams in Eastern Kentucky set up SKYWARN nets to assist the local
National Weather Service office and Cincinnati-area hams supported the
National Weather Service and the American Red Cross. Read more here
<http://www.arrl.org/news/hams-in-indiana-kentucky-and-ohio-provide-support-d
uring-and-after-tornado-outbreak>.

==> + ON THE AIR: UNDERSTANDING THE NEW 60 METER PRIVILEGES

On March 5, radio amateurs were granted new privileges on the 60 meter band. The effective radiated power level was increased from 50 to 100 W, along with the ability to use CW and the digital modes PACTOR III and PSK31.

"CW operators seem to have little problem figuring how where they need to transmit, but some PSK31 operators are reading the text of the FCC's Report & Order and coming away a bit confused," said ARRL Regulatory Information Manager Dan Henderson, N1ND. "The R&O states: 'We adopt a modified instruction for PSK31 channel use to correct an error introduced in the NPRM. To have a PSK31 signal transmitted on the center frequency, the control operator should not set the carrier frequency to the center frequency but should instead set the carrier frequency 1.5 kHz below the center frequency (i.e., the same as for phone and data emissions).'

"The word 'carrier' in this context means the suppressed carrier frequency of a transceiver when operated in the USB mode, but some have taken it to mean the PSK31 signal itself," Henderson noted. "They read this text and come to the conclusion that the PSK31 signal should be 1.5 kHz below the channel center. They are mistaken. The PSK31 signal must be in the center of the channel." Read more here <http://www.arrl.org/news/60-meters-one-week-later>.

==> + ON THE AIR: MARK YOUR CALENDARS: IT'S TIME FOR THE SPRING FMT

The Frequency Measuring Test (FMT) continues its successful "round-table" format when it takes to the airwaves on the evening of April 19 (April 20 UTC). The test moves to Thursday from the November FMT's usual Wednesday evening, giving everyone an opportunity to participate. Recognizing the higher solar flux, the FMT will lead off with a 20 meter segment -- one transmission beaming east, and the other west from Connie Marshall, K5CM, in Oklahoma -- with both transmissions on the same frequency. The sponsors are particularly interested in your comments on frequency differences observed between the directions due to propagation-related effects. Read more here <http://www.arrl.org/news/mark-your-calendars-it-s-time-for-the-spring-fmt>.

==> + AT THE WORKBENCH: THE ARRL HOMEBREW CHALLENGE III -- AND THE WINNER IS...

The previous ARRL Homebrew Challenges have been to build a 5 W PEP 40 meter sideband and CW transceiver (Homebrew Challenge I) and then a 50 W linear amplifier to follow it (Homebrew Challenge II). This third challenge moved up the spectrum into frequencies that might be of interest to Technician class amateurs -- 10 and 6 meters.

There were two separate entry categories for this challenge: single band or multiband. The single band unit could have been for either 10 or 6 meters and had to output 25 W PEP on SSB and CW, with a cost target of $150. The multiband unit had to put out the same power on both bands and be built for under $200 of parts. Each entry category

had detailed requirements for receiver and transmitter performance. The FCC requirements for transmitter spurious response of -43 dB on 10 meters -- and particularly the -60 dB on 6 meters -- were expected to be tough. The first category had a prize of $200, while the second offered $300. While we heard from others who expected to participate, two entrants brought or sent us working transceivers by the November 1, 2011 deadline. Read more here <http://www.arrl.org/news/the-arrl-homebrew-challenge-iii-and-the-winner-is>.

==> + FCC NEWS: FCC SEEKS TO MODIFY HAWAIIAN HAM'S LICENSE

On March 15, the FCC issued an Order Proposing Modification, seeking to change the license class of Todd Wilson, WH6DWF, of Honolulu, Hawaii, from General to Technician. The FCC stated that granting General class Amateur Radio operator privileges to Wilson was "improper." In November 2011, the ARRL VEC sent an electronic data file to the FCC, requesting that the FCC issue Wilson a new General class license. Based on this application, the FCC granted Wilson a General class license on November 29, 2011. In January 2012, the ARRL VEC notified the FCC that Wilson's information was incorrect and he did not qualify for a General class license; the ARRL VEC asked the FCC to modify Wilson's license to show him to hold a Technician class license. Read more here <http://www.arrl.org/news/fcc-seeks-to-modify-hawaiian-ham-s-license>.

==> W1AW ANNOUNCES SPRING OPERATING SCHEDULE

With the switch from Standard Time to Daylight Saving Time, W1AW Station Manager Joe Carcia, NJ1Q, has updated the W1AW operating schedule to reflect the change. Your local standard times have not changed, but the UTC times they reference have. Read more here <http://www.arrl.org/news/w1aw-announces-spring-operating-schedule-1>.

==> ON THE AIR: ARRL SEEKS COMMENTS ON PROPOSED 9 CM BAND PLAN

A few months ago, the ARRL UHF/Microwave Band Plan Committee asked the Amateur Radio community about current, planned and projected uses of the amateur bands between 902 MHz and 3.5 GHz. The response was beyond our expectations, with hundreds of comments and suggestions received. Thanks to all of you who took the time to share information with us. After reading the feedback, the committee began working on the band plans; the first draft plan ready for review is for the 9 cm band (3300-3500 MHz). Read more here <http://www.arrl.org/news/arrl-seeks-comments-on-proposed-9-cm-band-plan>.

==> SOLAR UPDATE

Tad "Waiting for the Sun <http://www.youtube.com/watch?v=M24Yhd7N91s>" Cook, K7RA, reports: The average daily sunspot numbers over the past reporting week (March 8-14) were 88.3, a rise of nearly 19 points; the average daily solar flux rose more than 12 points to 134.2. Three new sunspots emerged. The first was sunspot group 1421 on March 9, which began with a relative

area of 90. In the days following, it went to 80, 50, 80, 70 and 60. Two more sunspot groups -- numbered 1433 and 1434 -- appeared on March 11, with a combined relative area (in millionths of a solar hemisphere) of 240, then 130, 140 and 150. The sunspot number peaked on March 11 at 103, and the solar flux on March 10 at 148.9 and again on March 13 at 140.7. The outlook for the next few days has solar flux at 115 on March 15, 110 on March 16, 105 on March 17-21, 110 on March 22-23, and back down to 105 on March 24-27. There was a great deal of geomagnetic activity on March 9, with a planetary A index at 68, and again on March 12 with planetary A index of 28. An M-class x-ray flare occurred on March 15 at 0752 UTC, and if you catch it soon enough, you can see the resulting x-ray flux <http://www.swpc.noaa.gov/rt_plots/xray_5mBL.html> on the GOES monitor. The predicted planetary A index for March 15-18 are 15, 20, 15 and 8, and then 5 for March 19-27. The vernal equinox will occur at 0514 UTC on March 20. The shift to spring generally means favorable conditions for HF propagation. Look for more information on the ARRL website on Friday, March 16. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Simon and Garfunkels's Old Friends/Bookends <http://en.wikipedia.org/wiki/Bookends>.

==> + ARRL WARNS MEMBERS TO BE AWARE OF BOGUS E-MAILS

Some ARRL members with arrl.net e-mail accounts have recently received bogus e-mails, notifying them of a bill that supposedly needs to be paid. The e-mail instructs the reader to click on a link to view the bill; clicking on the link could release a virus that can infect your computer. Please be aware that these e-mails are not coming from the ARRL. "If you receive an e-mail like this and it looks like it originated from ARRL, please do not respond," explained ARRL IT Manager Michael Keane, K1MK. "The best thing you can do when receiving bogus e-mails is to simply add them to the spam list in your computer's e-mail program and delete it. Please don't forward it to ARRL HQ -- we will have already seen it and are already responding to it."

==> THIS WEEK IN RADIOSPORT

This week:

- March 17 -- 10-10 International Mobile Contest; Feld Hell Sprint; AGCW VHF/UHF Contest
- March 17-18 -- North Dakota QSO Party; Oklahoma QSO Party; Virginia QSO Party; Russian DX Contest
- March 17-19 -- BARTG HF RTTY Contest
- March 19 -- Run for the Bacon QRP Contest
- March 22 -- NAQCC Straight Key/Bug Sprint

Next week:

- March 24-25 -- CQ WW WPX Contest (SSB)
- March 26 -- QRP Homebrewer Sprint

- March 28 -- SKCC Sprint
- March 28-29 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> + ENTER THE SEVENTH ANNUAL ARRL PHOTO CONTEST!

Have you ever wanted to see a photo of yours in QST, the annual ARRL Amateur Radio Calendar or another ARRL publication? Well, here's your chance! If you're among the winners, not only will your photographic skill be propagated far and wide, but we're offering $100 as the First Prize. The winning photo and three runners-up will be published in QST. All submitted photos will also be considered for the 2013 ARRL Calendar. Read more here <http://www.arrl.org/news/enter-the-seventh-annual-arrl-photo-contest>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- March 17 -- ARRL Nebraska State Convention <http://www.arrl.org/hamfests/nebraska-state-convention-end-of-winter-hamfest>,
Lincoln, Nebraska; ARRL Southern Florida Section Convention <http://www.arrl.org/hamfests/southern-florida-section-convention-2>,
Stuart, Florida; ARRL West Texas Section Convention <http://www.arrl.org/hamfests/west-texas-section-convention-57th-annual-st-patrick-s-day-hamfest>,
Midland, Texas
- March 23-24 -- ARRL Maine State Convention <http://www.arrl.org/hamfests/maine-state-convention-2>, Lewiston,
Maine
- April 7 -- ARRL North Carolina State Convention <http://www.arrl.org/hamfests/north-carolina-state-convention-raleigh-hamfest-1>,
Raleigh, North Carolina
- April 14 -- ARRL Delta Division Convention <http://www.arrl.org/hamfests/delta-division-convention-3>, Bartlett,
Tennessee
- April 14-15 -- Communications Academy 2012 <http://www.arrl.org/hamfests/communications-academy-2012>, Seattle,
Washington
- April 20-22 -- ARRL Idaho State Convention <http://www.arrl.org/hamfests/idaho-state-convention-2>, Boise, Idaho;
63rd International DX Convention <http://www.arrl.org/hamfests/63rd-international-dx-convention>,
Visalia, California
- April 21 -- ARRL Delaware State Convention

Amateur Radio Newsline(tm) Report 1805 - March 16 2012

Amateur Radio Newsline report number 1805 with a release date of March 16th, 2012 to follow in 5-4-3-2-1.

The following is a QST. More on ham radios role in the wake of a recent tornado outbreak; FEMA asks the FCC to permit text to speech EAS transmissions; interference from ocean buoys discovered on 10 meters and a DXpedition to Mali is cancelled due to political unrest in that nation. Find out the details are on Amateur Radio Newsline(tm) report number 1805 coming your way right now.

RESCUE RADIO: ARES HAMS FILL MULTIPLE ROLES DURING KENTUCKY SEVERE WEATHER OUTBREAK

Amateur Radio operators in Hardin and surrounding Kentucky counties provided critical communications during and after the severe weather outbreaks on February 29th, and again on Saturday March 3rd. Amateur Radio Newsline's Cheryl Lasek, K9BIK, is here with the details:

--

Members of the Hardin County Kentucky Amateur Radio Emergency Service were activated initially by the National Weather Service. This as a resource to relay significant weather information directly to their office in Louisville.

Hardin County ARES provided weather spotting, logistics, disaster assessment, and shelter coordination assistance. Throughout the severe weather, they were busy maintaining communications with served agencies, with hams in adjacent counties, other ARES units, and to amateur radio station WX4NWS which is located at the Louisville National Weather service office.

Knowing in advance the high probability for dangerous weather, several of the volunteer radio amateurs took personal time off from work in order to perform this public service.

In the aftermath of these deadly storms, Hardin County Amateur Radio operators continued to serve with agencies in affected areas in Southern Indiana and Eastern Kentucky, providing communications, disaster assistance, and support for ongoing search, rescue and recovery operations.

Fred Jones, WA4SWF, is the Region 4 Assistant Section Emergency Coordinator for the ARES in Eastern Kentucky. He e-mailed Newsline that as of March 11th there were Amateur Radio emergency Service nets still in operation on 8 repeaters in Eastern Kentucky. Whether or not these nets have been secured is unknown as we go to air.

For the amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

According to Shelby Ennis, W8WN, who is the Emergency Coordinator of the Hardin County ARES, 20 operators were active during the emergency on February 29th and 27 volunteered on March 3rd. (WA4SWF, KE4EK)

**

RESCUE RADIO: FEMA WANTS FCC TO ALLOW CAP TEXT TO SPEECH NOW

The Federal Emergency Management Agency better known by the acronym FEMA has asked the FCC to reconsider portions of its latest EAS Report and Order. Specifically in the area dealing with message standards.

In its filing, FEMA told the commission that portions of its 5th Report and Order on EAS limit the ability of local emergency management officials to obtain all of the benefits of Common Alerting Protocol messaging standards for EAS. Especially those that deal with text to speech conversion .

The FCC had put off the text-to-speech conversion issue for a separate rule making proceeding. But FEMA claims that one possible consequence of not allowing such conversions now is that Common Alerting Protocol messages supplied without audio content could cause a C-A-P equipped EAS device to interrupt a stations normal programming and only convey an EAS header tone. Or it might only transmit an alert signal and an end-of-message notification.

FEMA says that for radio stations this would mean that no information usable by the public would be conveyed. As such, FEMA is urging the FCC to reconsider and to allow speech-to-text technology to support EAS radio operations now.

(RW, Radio Today, Observer)

**

COMMUNICATIONS LAW: HOUSE ENERGY AND COMMERCE COMMITTEE APPROVES TWO FCC REFORM MEASURES

The House Energy and Commerce Committee voted 31 to 16 on Tuesday March 6th to approve an FCC reform bill that puts shot clocks on FCC decisions, requires disclosure of items before votes, and limits on merger conditions.

The cable, phone and broadcast industries all supported the FCC reform efforts as outlined in HR 3309, while House Democrats said the measure

will needlessly tie the FCC's hands and could lead to endless litigation. Democrats have vowed to defeat the measure.

At the same time the House also passed a second, non controversial FCC reform bill. HR 3310 that simply requires the FCC to conduct a biennial survey of the state of competition in the marketplace that will be published online and submitted to Congress. (B&C)

ON THE AIR: IRLP TOPIC CHANNELS INAUGURATED

The long-awaited Internet Radio Linking Project or IRLP Topic Channels have now gone live. IRLP- users are now able to log onto reflector channels allocated for interests ranging from DX'ing to music, media, history, the upcoming 2012 election and many others.

For those not aware, the Internet Radio Linking Project was the result of research and development by Dave Cameron, VE7LTD, back in 1998. This as a way of using the Internet to interconnect repeaters world-wide. With the advent of IRLP Topic Channels the concept has developed into a global discussion real-time forum on almost any topic of interest to those signed on.

For up-to-date information on the IRLP Topic Channels please visit www.irlptopics.net. To locate an IRLP node near you go to status.irlp.net on the world-wide-web. (W7RAT, Southgate)

**

INTRUDER WATCH: BUOYS ON 10 METERS

The source of some mysterious weak signals on 29.684 MHz with an 81.9 Baud and 130 Hz shift have been located. According to the February IARU Region One newsletter, the signals came from the Spanish coastal area and were audible across all of Europe but only during band openings and only by directional antennas.

It turns out the source of transmissions by Datawell buoys. These buoys, produced in the Netherlands are used for measuring water temperatures and wave heights. They are designed to transmit with 75 milliwatts on frequencies between 27 and 40 MHz.

Dick Van Empelen, PA2GRU, of Heemstede in the Netherlands has since visited the Datawell Company and has informed them that the buoy transmissions on the amateur service 10 meter band are illegal. The operations chief promised to inform all Datawell offices about the situation. (IARU-R1)

BREAKING NEWS: PLANNED MALI DXPEDITION ON HOLD DUE TO POLITICAL UNREST

Some breaking news in the world of DX. This with word that political unrest has led to a planned DX operation to Mali being put on

indefinite hold.

Two weeks ago members of the "Italian Dxpedition Team" announced that they were planning to be active as TZ5T from Mali between April 12th to the 27th. However, their Pilot station Art Lorenzo, IK7JWY, has now issued a statement that the situation of civil war in Mali between the government and Tuareg insurgents is worsening. Because of this and other concerns Mali authorities will not issue licenses to radio amateurs who may be targeted because of radio equipment.

For this reason the DXpedition has been postponed until a yet to be determined later date. For updates please check in regularly at www (dot) i2ysb (dot) com on the World-Wide Web. And we will have more DX news later on in this weeks report. (OPDX)

PROPAGATION: YET ANOTHER CME HEADS TOWARD EARTH Spaceweather reports that the sun has again erupted in a way that will likely affect radio propagation here on Earth for several days. Especially on the High Frequency bands. We have more in this report:

--

Sunspot AR1429 unleashed another strong flare on March 13th. The category M 7.9 explosion produced a significant Coronal Mass Ejection or CME that solar forecasters predicted would reach Earth at 06:20 UTC, plus or minus 7 hours, on March 15th and whose effects on propagation could last for several days.

As a result, geomagnetic storms are possible when the charged cloud arrives that could produce auroral displays in the Northern-most latitudes. This in turn could lead to aurora propagation at 50 Mhz and above.

Ironically, a bright comet is at the same time diving into the sun. The comet was recently discovered NASA's Solar and Heliospheric Observatory SWAN instrument. As such its been named "Comet SWAN."

The comet's death plunge or "swan dive" as some astronomers are calling it comes just as the sun has unleashed the strong flare. Because of

this some of the SOHO images of the comet are confused to some degree by energetic protons striking the camera's imaging sensor.

For the amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

For updates on this and other solar activity we suggest that you check spaceweather.com for the latest information. (Spaceweather, Space.com)

**

ENFORCEMENT: FCC AFFIRMS $25000 FINE FOR UNLICENSED SAN JOSE CA FM BROADCAST OPERATIONS

The FCC has affirmed a $25,000 Notice of Apparent Liability issued to Gabriel A. Garcia of San Jose, California. This for a 2010 series of unlicensed radio transmissions heard on 92.9 MHz, 93.7 and 104.3 MHz all traced to Garcia residences.

Garcia was issued four notices of unlicensed operation from the FCC before being issued the proposed fine in 2011. The base penalty in such cases is $10,000 but the agency has said that Garcia operated on multiple frequencies, on multiple occasions, and called his behavior particularly egregious. This because his transmissions allegedly interfered with the Aviation Radio Services band.

Garcia never responded to the proposed fine. Having not heard an appeal from him since issuing the NAL last March, the FCC now has finalized the $25,000 fine and given him the customary 30 days to pay. If he fails to do so the case may be referred to the Department of Justice for collection. (FCC)

**

COMMUNICATIONS COORDINATION: FREQUENCY COORDINATION FOR 2012 POLITICAL CONVENTIONS COMMITTEE FORMED

Broadcast engineers have formed a committee to coordinate spectrum use at the Democratic and Republican conventions this summer. According to member Ray Benedict PolComm 2012 was formed in an effort to head off radio and TV personnel who may show up at the conventions and then try to use their wireless mics and two-way radios without first going through the frequency coordination process.

The Republican convention is Aug. 27th to the 30th in Tampa, Florida and the Democratic convention is September 3rd to the 6th in Charlotte, North Carolina. The committee says that it will seek a temporary rules waiver to allow TV Channels 14, 16 and 17 to be used as communication channels in Tampa and TV Channels 14, 16, 17, 18, 19 and 20 in Charlotte.

Broadcast engineering consultant Louis Libin is the PolComm 2012 chairman. Libin has chaired frequency coordination committees for past seven national political conventions. (RW)

**

NEW PRODUCTS: THE TALENT POD FROM HENRY ENGINEERING

A fascinating new piece of merchandise has come along that while not meant for ham radio, deserves a mention.

Henry Engineering, the California-based company owned by Hank Landsberg, WB6MEU, has come out with a broadcast product that could also be of interest to contesters, DX'ers as well as dedicated multi-operator stations such as during Field Day. Called the Talent Pod, the unit is a desktop local host controller for microphones and headphones that the company says solves audio problems often encountered when doing remote broadcasts.

Talent Pod is a mini-console made for use by an announcer. It gives that person full control of his or her mic and headphones. It lets the announcer turn the mic on and off and create a mix of local and return audio in the headphones. The mic button is illuminated and is visible in outdoor settings. A cough button momentarily mutes mic audio.

There are also two separate inputs for local and return audio, with a volume control for each. The operator can control the volume level and mix of the headphone audio.

To prevent confusion between the local and return audio, Talent Pod also has two pan switches, so the announcer can independently position the local and return audio in the center, left or right channel of the headphones.

As most hams involved in contesting and multi-op DXing will note, all of these functions could easily be adapted to use in an amateur radio multi operator station environment. All it takes is a bit of imagination. More information on the Talent Pod is on line at www.henryeng.com. (RW)

HAM RADIO HONORS: ARRL OPENS NOMINATIONS FOR SEVERAL AWARDS

The nomination period is now open for a number of ARRL awards that are designed to recognize educational and technological pursuits in Amateur Radio, as well as an award to honor a young Amateur Radio operator. These include the Herb S. Brier Instructor of the Year Award for educators and the Hiram Percy Maxim Award is for a licensed radio amateur under age 21 to name only two. In all there are a half a dozen awards this year. For more information take your web browser to tinyurl.com/arrl-awards-2012 or contact Steve Ewald, by e-mail to wv1x (at) arrl (dot) org. (ARRL)

**

HAM HAPPENINGS: INTERNATIONAL MUSEUMS WEEKEND REGISTRATION NOW OPEN

The International Museums Weekend special event operations will take place on the weekends of June 16th through the 17th and again on June 23rd and 24th. Radio amateurs are encouraged to participate in this event by setting up stations in their local museums.

The International Museums Weekend organizer Harry Bloomfield, M1BYT in Leeds in the U-K. He asks that all those intending to take part in the event to register their museum operation at www.ukradioamateur.co.uk/imw.

This is not only a fun event but one that permits you to showcase amateur radio to non-hams world wide. (WIA News)

**

HAM HAPPENINGS: CELEBRATING THE MORSE CODE

New York's QSY Society Amateur Radio Club will be hosting a special event station at the Samuel F. B. Morse Estate at Locust Grove in the city of Poughkeepsie. This in celebration of his creation of the Morse Code in 1832. The operation will run from 8:30 a.m. to 1:30 p.m. Eastern Daylight Time on Saturday April 14th using the special event callsign K2QS. Transmissions will be centered on 7.034 on 40 meters and 14.034 MHz on 20. Hams making contact with K2QS will be eligible for a special commutative QSL card. QSL requests go to David Ruth at 48 Hoof Print Road, Millbrook, New York, 12545. ((KB2VJP)

**

NAMES IN THE NEWS: STEVE FLETCHER G4RFC NAMED RSGB OLYMPIC FACILITATOR

Some names in the news. The Radio Society of Great Britain has announced that Steve Fletcher, G4RFC, has been appointed as the U-K national society's Olympic Facilitator. According to a press release, Fletcher will be drawing together all the information on radio amateur special events associated with the upcoming Olympic and Paralympic Games in the UK. S As such he wants to hear about any individual plans so the RSGB website can show who is doing what, when and where. Fletcher can be reached by e-mail to g4rfcinfo (at) yahoo (dot) co (dot)uk. (GB2RS)

**

NAMES IN THE NEWS: G6LVB TO SPEAK AT AMSAT-NA - TAPR HAMVENTION BANQUET

Howard Long, G6LVB will be the featured speaker at the 2012 AMSAT/TAPR Hamvention Banquet on Friday night, May 18th in Dayton, Ohio. Long will be talking about his FUNcube Dongle and the 64 to 1700 MHz Software Defined Receiver. Banquet tickets will not be sold at the AMSAT booth during the Hamvention therefore reservations must be made ahead of time through the AMSAT Store. Its located in cyberspace at tinyurl.com/amsat-na-store. Tickets are priced at $30 each. (ANS)

**

NAMES IN THE NEWS: K9EID UK AUDIO TALK POSTED TO YOUTUBE

And a talk about improving audio on the ham radio bands given by Bob Heil, K9EID, has been posted on-line by M3XYP. Recorded at the United Kingdom 2011 National Hamfest, the video is in five parts and can be found at www.youtube.com/user/m3xypsar/videos (M3XYP)

THE CHANGING OF THE GUARD: PACIFIC DXER RON WRIGHT ZL1AMO S.K.

Another of those sad changing of the guard moments. This with word that the ham radio community has lost legendary Pacific DX'er and DXpeditioner Ron Wright, ZL1AMO.

Word went out two weeks ago that Wright had been admitted to the North Shore Hospital in New Zealand because of a collapsed lung but recovered. The last medical update noted that ZL1AMO was in stable condition.

According to reports, Wright was still in the hospital at the time of his death on March 6th. Services for ZL1AMO were to be held at the Morrison Fuenral Home in Henderson, New Zealand on Saturday March 10th. At the time of his passing Ron Wright, ZL1AMO, was age of 75. (OPDX, NZ Herald)

**

HAM RADIO IN SPACE: CALL FOR SPEAKERS AT 2012 AMSAT UK SPACE COLLOQUIUM

A call has gone out for speakers for the AMSAT-UK 2012 International Space Colloquium. This years gathering will take on the weekend of September 15th to the 16th at the Holiday Inn, Guildford, England. Also being sought are papers for subsequent publishing on the AMSAT-UK web site.

Submissions should be sent via e-mail to david dot johnson at blackpepper dot co dot uk or to the postal address for G4DPZ found on QRZ dot com. More information on this event is on-line at www (dot) uk (dot) amsat (dot) org/colloquium/twelve.

This years Colloquium will take place only a few weeks prior to the planned launch of AMSAT-UK's FUNcube-1 ham radio satellite. (AMSAT-UK)

**

HAM RADIO IN SPACE: AMATEUR RADIO SATELLITE COORDINATION FORMS REVISED

Hans van de Groenendaal, ZS6AKV, reports that the Amateur Satellite Frequency Coordination request form has been updated and is available for download from www.iaru.org/satellite. Also on the IARU satellite web page are a number of guideline documents which will assist satellite builders, including a document on the ITU requirements for amateur radio satellites. ZS6AKV is the IARU Satellite Advisor. (ZS6AKV)

**

HAM RADIO IN SPACE: AMSAT-NA RECEIVES OKJ TO RE-DISTRIBUTE KEPS

AMSAT's Ray Hoad, WA5QGD has announced that the organizations request to re-distribute US Air Force Space Command Keplerian elements from SpaceTrack has been approved for the period April 1, 2012 to April 1, 2013. AMSAT's request to distribute the orbital element data was approved on March 1st. (ANS, WA5QGD)

**

WORLDBEAT: RNW MEDIA NETWORK WEBLOG TO END MARCH 22

The Radio Netherlands Media Network Weblog will be closing for good at the end of the winter shortwave broadcast season on Saturday March 24th. This as the result of a new mandate by the the Holland-based broadcaster that effective on January 1, 2013, it will no longer be possible to provide coverage of international media news.

The Weblog is written and edited by Andy Sennitt and contains over 15,000 media news items published since October 2003. Sennitt says that it will remain online as a searchable archive. To prevent spam, it will no longer be possible to add comments, but the nearly 14,000 comments already received will still be available for viewing.

The last Media Network newsletter will be e-mailed to subscribers on March 22nd. (Media Network)

**

WORLDBEAT: GREECE TURNS OFF 11 MEDIUM WAVE TRANSMITTERS

The Administrative Board of the Greek Public Broadcaster has ordered the switch-off of eleven medium wave transmitters. This as a result of new austerity measures due to the financial situation being faced by that European nation. This leaves only nine medium wave transmitters with their respective Greek Public Radio programs in operation. The action was adopted by the Administrative Board after a meeting on February 17th. (GreekRadio.com)

**

RADIOSPORT: 2012 CQIR CONTEST CELECRATES IRTS 80TH ANNIVERSARY

>From the radiosports file, word that the CQIR contest is taking place at not long after this newscast goes to air. That being from mid-day on Saturday March 17th to mid-day on the 18th.

This years contest will be the international showpiece event for the Irish Radio Transmitters Society`s 80th anniversary celebration. Paul O'Kane, EI5DI, advises that his contest logger will be free and unrestricted for the contest. Also that his SD may be downloaded from ei5di.com.

CQIR entrants should be aware that the Russian DX contest overlaps with it. You can easily tell the difference between the two in that Russian stations will send a 2 character district code instead of a serial report as used in the CQIR competition.

Full rules for the CQIR contest are available on-line at www.irts.ie. (IRTS)

**

DX

2E1EUB, will once again be active as from Eastern Scotland as 2M1EUB for 7 days beginning March 24th. He will be located in the Cairngorms National Park operating on 160 and 80 meters and several ham satellites. QSL as directed under 2M1EUB on QRZ.com.

The current XW1A and XWOZJZ operations from Laos have been approved for DXCC credit. Bill Moore, NC1L, who heads up the DXCC Desk at ARRL headquarters made the approval official on Tuesday, March 13th.

EI7CC will be on the air from Lesotho as 7P8PB through April 3rd. Activity will be holiday style and he will operate when circumstances permit. QSL via EI7CC, either direct or via the bureau. Logs will be uploaded to Logbook of the World immediately after his return to Ireland.

A large group from Germany and Poland plan to be active from the Pacific island of Tonga until March 24th. They are using the callsign is A35YZ. QSL via DL7DF.

Down the road a bit comes word that DK9FN will once again return to Temotu Province be active as H40FN between this December 22nd and January 7th of 2013. QSL H40FN via HA8DD. More details will be forthcoming.

Lastly comes news that F4CYZ will be operational from Morocco as CN2YZ through years end. His activity will be from the city of Tangier and especially on the weekends. The Mediterraneo DX Club is supporting his activities and is also providing a Web site with a log-check. Its in cyberspace at www.mdxc.org/cn2yz.

(Above from various DX news sources)

THAT FINAL ITEM: BILL BEFORE CONGRESS TO LET ASTRONAUTS KEEP SPACE SOUVENIRS

And finally this week, a dispute between NASA and some former astronauts over ownership of space artifacts has led to a bill in Congress that would give the Mercury, Gemini and Apollo astronauts "full ownership rights." This, to items such as checklists and personal logs from their missions. Amateur Radio Newsline's Don Wilbanks, AE5DW, has the rest of the story:

--

Known as H.R. 4158 the proposed legislation grows out of an effort last year by Apollo 13 Commander Jim Lovell to sell the lunar module activation checklist that had been used to convert the moon lander into a space lifeboat on the periled 1970 Apollo 13 mission. The sale brought record-setting $388,375 but it was put on hold after the National Aeronautics and Space Administration demanded proof that the former astronaut owned the item.

Now comes H.R. 4158 that was introduced by Representative Ralph Hall of Texas. Hall is the chairman of the House Science, Space and Technology Committee. He measures cosponsor was Representative Eddie Bernice Johnson, also of Texas. It has since amassed an additional fifteen cosponsors.

In a letter to heir congressional colleagues the two key sponsors wrote that the legislation would allow the first generation of astronauts to retain spaceflight artifacts that have been in their possession. In many cases for more than 40 years.

Under the proposed measure, astronauts from the Mercury, Gemini and Apollo programs would be allowed to keep items such as personal logs and checklists. The only thing off limits would be rock samples gathered on those early lunar missions. The so-called ?_oMoon Rocks.?__

After meeting with Lovell and several other former astronauts last month, NASA Administrator Charles Bolden said that these are American heroes. He called them fellow astronauts and personal friends who have acted in good faith. As such, Bolden says that they are committed to working together to find the right policy and legal paths forward to address outstanding ownership questions.

H.R. 4158 has bi-partisan support and is expected to make it all the way through the Congressional rule making process.

For the Amateur Radio Newsline, I'm Don Wilbanks, AE5DW, in New Orleans.

--

This was not the first time that NASA has challenged the sale by an astronaut of a piece of space memorabilia. In 2010, NASA challenged Apollo 14 astronaut Edgar Mitchell's attempt to sell a camera he took to the moon. Mitchell eventually agreed to donate the camera to the Smithsonian's National Air and Space Museum. (collectspace.com; physorg.com, others)

New Kensington Ham Radio Group Goes 'Old-School' Global:

Posted: 15 Mar 2012 06:05 PM PDT
http://www.eham.net/articles/27928

He has to listen closely to hear through the static, but University of Pittsburgh student Geoff Wolf can just barely make out the strained beeps of Morse code emanating from somewhere in the south Asian country of Sri Lanka. Wolf, of Harrisburg, belongs to the Skyview Radio Society, an amateur ham radio group that draws members from throughout Western Pennsylvania. Members meet at their radio station and clubhouse in New Kensington and broadcast locally and throughout the world. "All you need is a radio, a wire and a power source," said Larry Kelley of Murrysville, one of about 80 society members. "People will get on and see how many folks throughout the world they can talk to." In today's age of cellphones, the Internet and numerous other modes of communication, it might seem quaint that ham radio is still around. But it has a distinct advantage over many other forms of modern communication.

//
John W. Watson, W9MGI (SK):

Posted: 15 Mar 2012 06:05 PM PDT
http://www.eham.net/articles/27927

Aledo, Ill. -- John William Watson, 92 of Preemption, passed away Tuesday March 13, 2012 at the Monmouth Nursing Home. Funeral service will be Saturday March 17, 2012 at 2:00 p.m. at the Corman Memorial Home Roseville. Family will receive friends one hour prior to the service. Burial will be in the Roseville Cemetery, Roseville. Memorials may be made to the Preemption United Methodist Church or Roseville American Legion. Please sign the online guestbook at www.cormanmh.com. Corman Memorial Home in Roseville is in charge of the arrangements.
He was born June 23, 1919 in Roseville, the son of Tracy Ivan and Lula Fisher Watson. He married C. Maxine Wallis on July 3, 1949 at the Roseville United Methodist Church. He graduated from Roseville High School in 1937. He enlisted in the Army Air Corps April 1, 1941 and served overseas until the end of WWII as an aircraft radio repairman. He was employed by the Rock Island Arsenal from April 1949 to Oct.2007 - 58 years. He was an avid amateur radio operator since 1937 along with two high school buddies Kirk Sanderson and George Kirkpatrick who have continued to keep a weekly schedule throughout the years W9MGI. John also

enjoyed fishing.

Listen to Solar Storm Activity in New Sonification Video:

Posted: 15 Mar 2012 06:05 PM PDT
http://www.eham.net/articles/27926

(PhysOrg.com) -- What does a solar storm sound like? It's a "sonification" of measurements from two spacecraft during the most recent storm. Take a listen in this video. This sonification of the recent solar storm activity turns data from two spacecraft into sound. It uses measurements from the NASA SOHO spacecraft and the University of Michigan's Fast Imaging Plasma Spectrometer (FIPS) on NASA's MESSENGER spacecraft at Mercury. The creator is Robert Alexander, a design science doctoral student at the University of Michigan and NASA fellow. The researcher who created it is Robert Alexander, a University of Michigan design science doctoral student. Alexander is a composer with a NASA fellowship to study how representing information as sound could aid in data mining.

Hams in IN, KY and OH Provide Support During and After Tornado Outbreak:

Posted: 15 Mar 2012 01:01 PM PDT
http://www.eham.net/articles/27919

A devastating storm system moved across the United States on March 2, spawning a slew of tornadoes that contributed to at least 28 fatalities in Indiana, Kentucky and Ohio. These tornadoes followed an earlier outbreak that began on February 28 and left 13 dead across Kansas, Missouri, Illinois and Tennessee and battered parts of Kentucky.

//
Understanding the New 60 Meter Privileges:

Posted: 15 Mar 2012 12:59 PM PDT
http://www.eham.net/articles/27918

On March 5, radio amateurs were granted new privileges on the 60 meter band. The effective radiated power level was increased from 50 to 100 W, along with the ability to use CW and the digital modes PACTOR III and PSK31.

Mark Your Calendars: It's Time for the Spring FMT:

Posted: 15 Mar 2012 12:59 PM PDT
http://www.eham.net/articles/27917

The Frequency Measuring Test (FMT) continues its successful "round-table" format when it takes to the airwaves on the evening of April 19 (April 20 UTC). The test moves to Thursday from the November FMT's usual Wednesday evening, giving everyone an opportunity to participate.

//
The ARRL Homebrew Challenge III -- and the Winner Is...

Posted: 15 Mar 2012 12:58 PM PDT
http://www.eham.net/articles/27916

The previous ARRL Homebrew Challenges have been to build a 5 W PEP 40 meter sideband and CW transceiver (Homebrew Challenge I) and then a 50 W linear amplifier to follow it (Homebrew Challenge II). This third challenge moved up the spectrum into frequencies that might be of interest to Technician class amateurs -- 10 and 6 meters.

//
FCC Seeks to Modify Hawaiian Ham's License:

Posted: 15 Mar 2012 12:58 PM PDT
http://www.eham.net/articles/27915

On March 15, the FCC issued an Order Proposing Modification, seeking to change the license class of Todd Wilson, WH6DWF, of Honolulu, Hawaii, from General to Technician. The FCC stated that granting General class Amateur Radio operator privileges to Wilson was

"improper." In November 2011, the ARRL VEC sent an electronic data file to the FCC, requesting that the FCC issue Wilson a new General class license. Based on this application, the FCC granted Wilson a General class license on November 29, 2011.

//
W1AW Announces Spring Operating Schedule:

Posted: 15 Mar 2012 12:57 PM PDT
http://www.eham.net/articles/27914

Need Legal help NY -- Dutchess County:

Posted: 15 Mar 2012 12:57 PM PDT
http://www.eham.net/articles/27898

I am writing this letter in hopes that I may get some really needed help and support from the ham community at large. My name is Myles N2EHG, I am a telecommunications engineer and radio amateur. I live in a small town outside of Poughkeepsie New York. I moved there a year ago to take care of my mother, who is ill and needs around the clock care. My idea was to enjoy the quiet and beauty of the area in hopes that the setting would help my mother improve and allow me also to enjoy my only hobby, amateur radio.

Amateur Radio Operators to Gather at St. Patrick's Day Hamfest:

Posted: 16 Mar 2012 05:04 PM PDT
http://www.eham.net/articles/27934

While those attending this weekend's St. Patrick's Day Hamfest may not all know each other by name, they likely will recognize each other's call signs. Randy Karch, president of the Midland Amateur Radio Club, has been known for about 30 years by the sign N50VH. Others opt for "vanity call signs" that are made up of their initials or stand for their favorite team. Whatever the jumble of letters, Karch said the call sign is a signature for those who pride themselves on their status as a "ham" or amateur radio operator. "We try to promote our own self-learning, self-study, self-participation," he said. The group will share secrets of their trade with the public during Saturday's 57th annual St. Patrick's Day Hamfest and ARRL West Texas Section Convention. The event is planned for 8 a.m. to 2 p.m. at the Downtown Lion's Club and will include informational booths, competitions and demonstrations.

//
Prevention is In the Air: Getting Ready for National Public Health Week:

Posted: 16 Mar 2012 05:02 PM PDT
http://www.eham.net/articles/27933

"CQ, CQ Celebrating National Public Health Week!" "CQ, CQ Celebrating National Public Health Week!" If you're an aficionado of amateur radio -- or ham radio as it's also known -- this is the call you might hear coming out of Oklahoma City on April 6. In layman's terms, it means "Calling all stations, calling all stations! Celebrating National Public Health Week!" In honor of this year's National Public Health Week observance, which runs April 2-8, officials with the Oklahoma City-County Health Department will hold a special drill in which all of its amateur communications equipment will be activated and users will attempt to make as many contacts as possible within 24 hours. It's not your typical National Public Health Week activity, but it may be the most unique. "With amateur radio, the best way to learn to communicate effectively is to immerse yourself," said Dave Cox, deputy director of the Oklahoma City-County Health Department and a 25-year ham radio operator. "Our ultimate last option when everything else fails is amateur radio." Amateur radio is part of the department's emergency response toolkit and allows officials to continue to communicate with staff in the field as well as fellow first responders in the event that a

disaster disables traditional communication channels. As Cox said, "you can take everything else down...and ham radio still works." This is the second year the department has held a National Public Health Week-inspired amateur radio drill. Last year, Cox said operators made contact with fellow ham radio operators in 32 states and four different countries.

IARU Announces New Amateur Satellite Frequency Coordination Form

Frequency coordination for amateur radio satellites is provided by the International Amateur Radio Union (IARU) through its Satellite Advisor, an official appointed by the IARU Administrative Council, its top policymaking body. This post is currently held by Hans van de Groenendaal, ZS6AKV.

Hans describes his role, "The IARU Satellite Advisor is assisted by an Advisory Panel of qualified amateurs from all three IARU Regions. The panel meets regularly via Skype to consider amateur satellite frequency coordination requests for satellites planned for operation on frequencies in the amateur service. The panel members often provide advice and assist satellite builders with the selection of the best possible frequencies to meet the objectives of their mission."

The Amateur Satellite Frequency Coordination request form has been updated (Version 27) and is available for download from: http://www.iaru.org/satellite.

On the IARU web satellite page there are also available a number of guideline documents which will assist satellite builders, including a document on the ITU requirements for Amateur Radio Satellites.

The list of amateur radio satellites coordinated by the IARU is posted on-line at: http://www.amsat.org.uk/iaru

[ANS thanks Hans van de Groenendaal, ZS6AKV for the above information]

Watch for Packets from US Naval Academy Ice Goat 1 Buoy

This month a group of Oceanography and Aeronautical engineering students from the US Naval Academy, led by Lt. Commander John Woods, a military instructor in oceanography, deployed a buoy rigged to monitor weather in the harsh conditions of the arctic. They delivered the "Ice Goat 1," buoy to the northern part of Alaska traveling by plane, then helicopter and finally snowmobile to the arctic ice off of the coast of Point Barrow, Alaska. Once the ice melts the buoy will begin its sea voyage.

Ice Goat 1 also carries an APRS beacon operating on 145.825 MHz. The position packets can be relayed via the ISS digipeater. However, the ISS only rises 1.5 degrees above the horizon at arctic latitudes. Reports of direct reception of the 145.825 MHz beacon are sought from any lucky

Alaskan, and perhaps eventually Pacific Northwest amateur radio stations (depending on ocean current) who may be in range. Please send reports of reception to: wb4apr@amsat.org.

This week, W3ADO, the US Naval Academy Amateur Radio Club has posted a notice via the ISS digipeater:

W3ADO]APRS,RS0ISS-3*,qAR,N4XS-3::BLN1 :APRS Arctic Buoy in Barrow Alaska. Watch for pkts!

The science mission of this buoy will broadcast webcam images and measure a variety of environmental parameters including air temperature, barometric pressure, and possibly under ice acoustics. As the buoy collects information about the surrounding parameters all data will be compiled on an internal data logger and transmitted back to USNA using an Iridium satellite data link.

[ANS thanks Bob Bruninga, WB4APR for the above information]

India HAMSAT VO-52 Recovery Successful

A report received from the ISRO Satellite Centre at Bangalore, India on March 14 says the HAMSAT VO-52 is back on the air. Mani, VU2WMY wrote, "The commands to 'Turn On' the PE1RAH Dutch transponder was successfully sent during 14:00 UT 35 deg ascending node pass over Bangalore, India. The commands were successfully received,

acknowledged and confirmed by telemetry. The beacon signal was heard loud and strong here at Bangalore."

Stations in Europe and North America reported good signals from VO-52 immediately after the transponder was activated. The beacon was heard with two-way contacts completed through the transponder.

The HAMSAT team requests detailed initial reports be sent to: tprangan@istrac.org and a copy to wmy@isac.gov.in

would be greatly appreciated.

HAMSAT VO-52 frequencies are:

Uplink: 435.2250 - 435.2750 MHz SSB/CW

Downlink: 145.9250 - 145.8750 MHz SSB/CW

Beacon: 145.8600 MHz CW

The CW beacon is sending: HI HI HI THIS IS VU SAT WITH THE DUTCH MODE UV TRANSPONDER MADE BY WILLIAM LEIJENAAR 73 DE PE1RAH

Upon successful recovery of VO-52 Mani, VU2WMY sent the following message on behalf of the HAMSAT team:

I take this opportunity to sincerely thank each and every

user and well wishers, who have been following and monitoring

closely all those events and activities that followed since

the interruption on 28th February 2012.

Thanks for all those encouraging and supporting expressions!

The initial telemetry reports indicated all the crucial and

critical parameters to be normal and satisfactory and we do

hope 'HAMSAT VO-52' would be available with much stronger power.

The overall spacecraft health is in 'Excellent Condition' and

all that we need to do is to monitor the transponder parameters.

14:05 UT on 14 March was a moment of great satisfaction and joy

to all of us here in bringing 'HAMSAT VO-52'back to life. It also

gives us great pleasure to note that 'HAMSAT VO-52'from India/ISRO

has a earned a name in the history of 'Amateur Radio Satellites'.

On behalf of everyone, I take this opportunity to sincerely thank

particularly, Mr. Parimalarangan-Operations Director for his hard

work and great efforts besides his exemplary technical competence

and skills exhibited in recovering back 'HAMSAT VO-52'.

Also my sincere thanks to Mission Director Mr. R. Suresh and the

entire 'HAMSAT VO-52' Mission Management and Project teams for all

the support, encouragement and recognition provided to 'Amateur

Radio World'.

My Good wishes to VO-52 and the transponders on-board for a 'Healthy

and Long Life'. My Good wishes & greetings, once again to William,

PE1RAH.[ANS thanks Mani, VU2WMY, Secretary & Station-In-Charge of the Upagrah Amateur Radio Club VU2URC at the ISRO Satellite Centre for the above information]

International Effort at Sea Gets UT1FG/MM Back on Satellites

This week John Papays, K8YSE shared an international amateur radio goodwill success story in getting Captain Yuri Bodrov, UT1FG/MM back on the air after a power supply failure at sea.

UT1FG/MM was enroute aboard his cargo ship from a Pacific port in Nicaragua bound for Montreal Canada via the Panama Canal and into the Gulf of Mexico. Yuri, an avid 6 meter and satellite operator, reported that his 12 volt power supply had failed shortly after leaving port.

John wrote, "The bad news was relayed amongst those of us who had been following Yuri and working him in wet grids as he traveled. Brainstorming started with ideas tossed around via emails. One idea was to buy a power supply and ship it Fedex to Yuri's agent in Panama and hope it got there in time. But Yuri felt that there would not be enough time for that to happen. We only had a few days."

Searching with Google and QRZ achieved contact with Captain Manolis Joannou, HP1CQ, also a sea captain and president of the Panama Canal Amateur Radio Association. Manolis was able to find a power supply that could operate off the 220 VAC ship mains and provide 12 volts to Yuri's IC-706 radio.

Captain Manolis made his way via a motor launch to Yuri's ship and hand delivered the new power supply. The two Captains spent an hour together before parting. Yuri was back on the air, working satellites from the Gulf of Mexico.

For a full story, complete with photos visit:

http://www.papays.com/sat/power/ut1fgpanama.html

[ANS thanks John Papays, K8YSE for the above information]

Open Source CubeSat Space Protocol Flight Test Aboard GOMX-1

Cubesat Space Protocol (CSP) is a small network-layer delivery protocol designed for Cubesats. The idea was developed by a group of students from Aalborg University in 2008. The protocol is based on a 32-bit header containing both transport and network-layer information. Its implementation is designed for, but not limited to, embedded systems such as the 8-bit AVR microprocessor and the 32-bit ARM and AVR from Atmel. The implementation is written in GNU C and is currently ported to run on FreeRTOS or POSIX operating systems like Linux and BSD.

GOMX-1, a 2U CubeSat designed and built by more than 15 students at Denmark's Aalborg University is expected to launch in late 2012 into a near sun syncronous orbit on a DNEPR rocket from Yasny in Russia with a number of other amateur radio satellites.

The GOMX-1 mission will qualify a number of satellite subsystems in space, providing extensive in-flight data. A camera payload will take color images of the Earth and an experimental Software Defined Radio receiver will be carried and its performance characterized. The mission will also test the use of the open source Cubesat Space Protocol for a complete mission including the space link.

GOMX-1 plans to use GMSK telemetry with selectable 1k2/2k4/4k8/9k6 rates on UHF with approx 28dBm power to a deployed antenna.

For more information refer to these web pages:

GOMX-1 web page: http://gomspace.com/

Cubesat Space Protocol: http://code.google.com/p/cubesat-space-protocol

[ANS thanks the GOMX-1 Team at Aalborg University for the above information]

RAX-2 Amateur Radio Cubesat Scientific Success

The University of Michigan RAX-2 amateur radio cubesat has achieved success in detecting the communication disrupting anomaly in the upper atmosphere it was designed for.

On March 9, Matt Bennett KF6RTB reported on behalf of the RAX-2 team, "This is unbelievable!! After more than three years of hard work and dedication by my team and professor at Michigan, our chief scientist confirmed today that the RAX-2 spacecraft we designed, built, and launched into space has detected the communication-disrupting anomaly in the upper atmosphere that we've been looking for!"

The primary objective of the mission is to use the onboard radar receiver in conjunction with a powerful radar station in Alaska to study the formation of a plasma anomaly known for causing the scintillation of radio signals in the UHF and higher bands. This effect is known to inhibit our space radar tracking capabilities and ground-space communications. Studying this anomaly in this bi-static radar configuration (ground based transmitter, space-base receiver) will provide scientists with a better understanding of these anomalies that has not been achievable with ground radars alone.

Mark concludes, "The RAX Team would like to acknowledge and say thank you to the amateur radio satellite community for all of their support on this mission. We've really enjoyed interacting with fellow operators while collecting and analyzing telemetry. We've also learned a great deal about satellite operations from each other."

RAX-2: 437.345 MHz, 9600 bps GMSK http://rax.engin.umich.edu/

Mission Science Operations http://rax.sri.com/

Satellite Shorts From All Over

A team of 10 operators, from the Aguas-Calientes Amateur Radio Club will activate Isabel Island, grid DL71, using the callsign XF1AA. The planned dates are March 16-21. Ismael, XE1AY, is one of the operators and is active on the satellites. If you should hear Ismael on the birds, please give him the air time to work as many as he can. (OPDX Bulletin 1050 & K8YSE)Magyar OSCAR-72 (MO-72) has made the very first Hungarian photographs from space. Please visit: http://tinyurl.com/MO72-FirstPhotos (cubesat.bme.hu)Mark Hammond, N8MH is hosting an AMSAT table at the RARSFEST in Raleigh, NC on Saturday, April 7. Mark is looking for volunteers to assist. If you can help with this AMSAT publicity effort contact Mark at

marklhammond@gmail.com.Plan ahead for August: EMike McCardel, KC8YLD is looking for volunteers for the AMSAT presence at the Ohio State ARRL Convention which will be held Saturday August 4, 2012 in conjunction with Voice of Aladdin's Columbus Hamfest. Plans are being formed for a display table, satellite demos, and a speaker is needed for a satellite forum. If you are interested in helping out or would like to propose a forum talk please contact EMike at: kc8yld@amsat.orgPaul, 2E1EUB says his next mobile satellite operations as 2M1EUB from his van will be starting March 24 for 7 days from the east coast of Scotland. Main operations are planned for AO-7 Mode A/B and other satellites as available. Paul will post his latest information on amsat-bb and also on the lookup at QRZ.com for 2M1EUB.Also Paul, 2E1EUB will be guest speaker at the Telford and District Amateur Radio Society (TDARS) on Wednesday, March 21, where he will give a talk about amateur radio satellites. In 2011 Paul was awarded the prestigious Louis Varney Cup for Advances in Space Communication, which was presented to him at the Telford Hamfest. More information is posted on Southgate: http://tinyurl.com/Telford-TalkISS astronaut Don Pettit, KD5MDT demonstrates physics in space in several videos posted on the 'Science off the Sphere' web pages. This is a partnership between NASA and the American Physical Society. Watch at: http://www.physicscentral.com/sotsEnjoy a flight over the northern lights aboard the ISS when you watch the video at: http://tinyurl.com/ISS-FlyOverAurora (SpaceDaily.com)Central States VHF Society Conference is planned for July 26-29 in Cedar Rapids, Iowa. A conference hotel rate of $93 per night is being arranged. More information will become available as the web page at http://www.csvhfs.org/ is updated.The 50 MHz and Up Group is hosting this year's Microwave Update Conference from October 18 to 21 in Santa Clara, CA. Check their web at: http://www.microwaveupdate.org for more info as it becomes available. Abstracts for papers, or requests for more information can be sent by e-mail to: mud2012papers at gmail dot comCongratulations to Rick Tejera, K7TEJ on earning VUCC Satellite Award #227! Rick says, "Thanks to all who worked me over the past two years to get me here."

[ANS thanks everyone for the above information]

ARISS Status Report - 12 March 2012

1. Upcoming School Contacts

An ARISS contact has been scheduled for Istituto Tecnologico Statale Trasporti e Logistica "Leone Acciaiuoli", Ortona, Italy on Sunday, March 18 at 11:31 UTC. The Ortona Maritime Institute "Leone Acciaiuoli" (I.T.N) is a technical high

school that prepares the student for a career as a merchant ship officer or to continue his university studies in the field of engineering disciplines. Among the subjects taught at the school are navigation, astronomy, celestial navigation, satellite navigation, telecommunications (including satellite telecommunications), mathematics and physics. Since 1991, the Institute has taken part in the "International Day of Planetaria" which provides an opportunity for educating the public in the areas of planetaria, science and technology. On this day, the public is able to

visit the Planetarium, laboratories, astronomical telescope and other

astronomical equipment. The ARISS contact will be held as part of the day's activities.

2. California Students Radio Dan Burbank on Space Station

On Monday, March 5, Dilworth Elementary School in San Jose, California participated in an Amateur Radio on the International Space Station (ARISS) contact with Dan Burbank, KC5ZSX. Burbank fielded 19 questions put to him by the students about the challenges encountered while living in space. The contact took place during the NASA Destination Station exhibit at The Tech Museum located nearby and complemented lessons on Science Technology, Engineering and Math (STEM).

3. Astronaut André Kuipers Answers Children's Questions via ARISS

An Amateur Radio on the International Space Station (ARISS) contact was held between André Kuipers and school children at the Space Expo in Noordwijk, Netherlands on Tuesday, March 6 via station ON4ISS in Belgium. The radio

activity was part of an educational program around Kuipers' mission Spaceship Earth which targets youth who are 10-14 years of age. Part of this program consists of mission assignments that Kuipers gives to Dutch school children. The winners of each challenge were invited to the radio contact. Other activities included lessons and experiments.

4. Hams who Experimented with ARISSat Make the News

Farrell and Jeff Winder, the father and son who helped in the development of SuitSat-1, made the news recently when they used ARISSat's transponder and after several tries, successfully sent and received a picture of Farrell Winder's automobile license plate. Community Press posted the story, "Father, son team up

in 'outer space'." See:

/EX

In addition to regular membership, AMSAT offers membership in the President's Club. Members of the President's Club, as sustaining donors to AMSAT Project Funds, will be eligible to receive additional benefits. Application forms are available from the AMSAT Office.

Primary and secondary school students are eligible for membership at one-half the standard yearly rate. Post-secondary school students enrolled in at least half time status shall be eligible for the student rate for a maximum of 6 post-secondary years in this status. Contact Martha at the AMSAT Office for additional student membership information.

Thomas Cantine Jr. W2TQF Memorial Scholarship Available:

Posted: 17 Mar 2012 05:20 PM PDT
http://www.eham.net/articles/27935

FULTON, NY -- This scholarship was established after the untimely death of Thomas G. Cantine Jr, who was an active amateur radio operator for over 50 years. Obtaining his license at the age of 13 in 1957, Tom held the call sign: W2TQF. Tom's hobby of amateur radio led to a career as a sales engineer and engineering consultant. Tom taught amateur radio classes, was a volunteer examiner, active in ARES (Amateur Radio Emergency Service), RACES (Radio Amateur Civil Emergency Service) and was a charter member of the Fulton Amateur Radio Club and served as the president of the radio club for several terms. This scholarship has been set up in memory of Tom and his passion for amateur radio. The purpose of amateur (ham) radio is to foster the art of wireless communications, and to encourage goodwill, cooperation, education, and emergency preparedness among licensees at local, national, and global levels.

ROFLMAO! "Libelous." Hee. Very nice self-destruction, BlobSock. BTW, not all sockpuppets are Blob's. Only the ones arguing for him, carrying his water, are his socks, because no actual people behind those nyms would support a has-been like him. Even then, at his best, only pedoK00ks were suitable prey for him, back when real pedos could still be found on usenet. Mark Morgan's frogger, frex, is most likely Woger Wiseman, unless the frogger is laming Woger, in which case it's more likely Lloyd Davies. The MMFC has more potential members, but those two are the president and treasurer.

> And of which you notably can't produce.

Haven't bothered to produce, BlobSock, because it's more trouble than it's worth, and quite frankly, the mere presence of your nym on that page is proof enough, considering how difficult it is to get someone from a nomination to an award, unless they campaign. Blobby, you campaigned.

> > I >doubt
> > most people are possessed of that much free time.

> Quixote chasing windmill's.

It's not impossible, but for volunteer news digest writers like moi, it takes too long. Since your disingenuous refusal to accept what I'm telling your sock is merely meant to cover up the fact that you remember winning the awards in question perfectly well (the older one is only 5.5 years old), I venture to guess that it must sting like a

bitch.

Snarky

Not at all. There are many sockpuppeteers on usenet:

Earl Gordon Curley (June 2001) (deceased)
Bradley L. "Bard" Jesness (December 2002)
Louis Turi (January 2003)
Raymond Ronald Karczewski (October 2003) (bailed)
Edmond Heinz "Edmo" Wollmann (December 2003)
Chuck "Chuckles the Clown" Lysaght (April 2004)
Uni/ArtistMike (April 2004)
HIV Steve aka Dwight Rapper (June 2004)
Alexa Cameron (July 2004)
Linda Gore (August 2004)
Michael Sean "EQ" Worley (September 2004)
Nicky "OMNIMAN" Scalia (January 2005)
Lance Sheetz (February 2005)
Steve "BowTie" Young (April 2005)
Gerald Newton (September 2005)
Richard M Scoville, a.k.a. Free Speech Store (March 2006)
Babaloonie (April 2006)
The "Outer Filth" 'Trio' (August 2006)
Antonio "Jabriol" Santana (December 2006)
01/07 PorchMonkey4Life
02/07 Duane Arnold, alias "Maximum Hag"
04/07 Michael "Howdy/TrumpetoftheLord" Schmidt and Sylvia "PSYLVIA"
Sullivan
(tie)
05/07 Darla Pere
07/07 Nunya Bidness AKA Massive Prong and Spurious Response
09/07 Robert "Mop Jockey" Wolfe
02/08 Alan Connor posting as "Tom Newton"
03/08 Johnny Wizard
08/08 Bloxy/Nukleus/Librarian
10/08 Captain Neal AKA Gregory Hall
11/08 bobandcarole

02/12 Ras Mikaere "Eunuch" Enoch (Michael McCarty)

PorchMonkey4Life, the Trio, BowTie, and Jabriol are all k00ks whose
brains have come into my possession, for varying periods of time.

> > Not like you have credibility...
>
> lol! Look who's babbling.

Sure, BlobSock.

> ''The "buttplug" has ten limbs which extend down to the ears, and is

> >
> > iow, if *you* say it, it must be true?

No, if AUK says it, as a group, it is most likely true. I made the
nomination, IIRC, but an unseconded nomination dies, if it remains
unseconded by the end of the month. I have never used any of my socks
to second a nomination I made, and, in fact, I always make it clear to
anyone capable of reading a sig (or header info) that my socks are
actually mine. Pity that k00ks can so rarely read that well...

> >Signposts to the months for

Thanks for confirming yourself as a BlobSock, "Mary." I said that to
"Lou Keemia," another (bloody fucking obvious) BlobSock.

> >I want to see if your lames reach Grade 3 level, or head
> > for kindergarten.
>
> Not lames, Quasemoto, absolute truth.

I see I shouldn't expect you to be able to read my .sigs, Blobby. That
is, once I'm back on a newsserver again (probably won't be a free one
-- the best of them still suck more than GG).

Snarky

If it is indeed a sock you'll have no problem proving it, right,
Snooky?

You can post yer proof here:

X----------

>BTW,
> not all sockpuppets are Blob's.

Now that's flawed logic at its purest. He's stating that in his
deranged opinion it's impossible for us to have friends and/or
associates who will post positively. The mere thought of it is totally
illogical and so typical of poop snooky. The UTB sticks together,
asswipe.

> Only the ones arguing for him,
> carrying his water, are his socks, because no actual people behind

LMAO!! You sound so much like craig chilton you must be related
somehow. Are you an "egalitarian" too as well as a part time peter
eater? :-) According to ko0ky craig people who don't believe exactly
like he does or posts in defense of somebody he dislikes is a sock.
> those nyms would support a has-been like him.

It may chap yer ass to know it but we have many associates in the UTB
and throughout usenet

LOL!!! Snooky must actually believe that tripe.
The vast majority of the world hasn't even heard of auk let alone
accept them as the world authority on ko0ks. The mighty auk had no
''awards'' for 2 years because they were running like pussy's from a
legal lawsuit brought on by their libelous actions. It was a grin to
see that faggot pinku sensi the tranny run like a limp handed bitch ..
LOL!!

clayton mcgill aka poop snooky better watch what he says and does
considering he was bone fuckin' sto0pid enough to leave his personal
information uncovered. <smile>

> considering how difficult it is to get
> someone from a nomination to an award, unless they campaign. Blobby,
> you campaigned.

Let's get something straight, Snooky. We've maintained from day one
that the only thing the ko0k awards accomplish is to give the
recipients more publicity than they already had. Or perhaps a lawsuit
ala Novins if you libel the wrong person. auk is totally washed up and
dying a slow death. Hell, you can't even keep a vote wrangler
anymore..LOL!! We laughed wholeheartedly at "bob on this" larter and
rusty "take it up the ass and grunt" tavick.

Try reading our sig-line sometime when you finish your reading
comprehension lessons.

"Publicity is publicity, good or bad it's STILL publicity"~ Alice
Cooper.

Anybody can start a group and designate people as ko0ks but as we all
know that holds about as much water as a cullender.

Amateur Spectrum Used for Australian Formula One Grand Prix:

Posted: 18 Mar 2012 06:10 PM PDT
http://www.eham.net/articles/27936

Consistent with past major sporting events, such as the Sydney Olympic games, the Melbourne Commonwealth Games and previous Formula One Grand Prix, the ACMA will licence some organisations coming from overseas to use, on a temporary basis, a small number of channels within the 70cm band. The Amateur Service is a secondary user in this band and has no to claims for protection from interference. Also one frequency in the 2 meter band is being used. The period of temporary use will be from Wednesday 14th March to Monday 19th of March. The WIA has a flexible attitude to use of amateur spectrum to support these major events that show cases the operational ability of Australian organisers.

But not many morons who would have me believe that bobandcarol have
no friends or supporters anywhere. They have many friends and
supporters throughout usenet. Like myself they are members of the UTB.

It isn't really a matter of supporting them per say. It's a matter of
your arguments being so lame only imbeciles would blindly accept them
as gospel.

One thing strikes me as peculiar. Most of these have names for the alias they supposedly use. bobandcarole has no alias listed. Can't you provide the sock name they supposedly used or did you just pencil it in?

Connecticut ARES Takes on Increased Disaster Relief Role:

Posted: 19 Mar 2012 05:49 PM PDT
http://www.eham.net/articles/27942

The role of ham radio in emergency communications continues to grow, and will become even more vital in the future. That was the message from Wayne Gronlund, Connecticut Section Emergency Coordinator, at the annual meeting of Connecticut ARES over the weekend. A series of natural disasters last year showcased the importance of ham radio, including Tropic Storm Irene, the pre-season nor'easter in October, and the tornadoes that swept western Massachusetts last summer, Gronlund said. Illustrating his remarks with a powerpoint presentation, he noted that the snowstorm in particular strained the system because electricity and phone service were disrupted for up to two weeks, especially in the Farmington area. The two disasters led to formation of the governor's two-storm study panel, and ham radio has become part of disaster planning by the newly revamped Department of Emergency Management and Homeland Security (DEMHS).

Ham Radio Deluxe 6.0 Preliminary Features List Released

Posted: 20 Mar 2012 06:44 PM PDT
http://forums.qrz.com/showthread.php?338912-Ham-Radio-Deluxe-6-0-Preliminary-Features-List-Released&goto=newpost

Tampa FL, St. Paul MN, Pittsburgh PA - September 19, 2011

HRD Software, LLC is pleased to announce a preliminary list of features for Ham Radio Deluxe v6.0, due to be released in time for the Dayton Hamvention. ☐In the past five months, we☐ve spent a lot of time addressing the backlog of bugs and defects. We☐ve also ported the code base from Visual C++ 6.0 to Visual Studio 2010,☐ said Mike Carper, WA9PIE. ☐But we also recognize that product development also needs to include new features that will sustain the appetite for improvement within the user base.☐

Ham Radio Deluxe v6.0 will include improved awards reporting, contest interfacing, additional digital modes, support for various keyer products, improved and simplified layouts, log export in a number of requested formats, and rig support for a number of popular unsupported radios like the Ten Tec Eagle and rotors like the M2.

☐In all, we have between 30 and 40 new compelling features planned for potential inclusion in version 6,☐ said Carper. ☐That☐s probably about 25% of the items on the drawing board. It☐s our intention to continue to grow the product for the users.☐

HRD Software, LLC plans to release the final specific list of features approximately 30 days prior to the 2012 Dayton Hamvention.

HRD Software, LLC is on the web at http://www.hrdsoftwarellc.com or http://www.ham-radio-deluxe.com

Voices of Almonte Students Reached International Space Station 10 Years Ago

Posted: 20 Mar 2012 06:15 PM PDT
http://www.eham.net/articles/27948

EMC News - When the crew of Expedition 3 came over the western horizon a decade ago, at a speed close to 27,700 kilometres per hour (kph), about 370 kilometres (km) above the earth, a remarkable adventure was about to start at R. Tait McKenzie Public School in Almonte. At 5:46 a.m. Nov. 23, 2001, one student from each grade level, kindergarten to Grade 8, was ready to speak by amateur radio with the commander of the International Space Station (ISS) as he passed high overhead in orbit. This exciting educational project took place before most students and parents are usually out of bed. By 5:30 a.m. there was standing room only along the sides and back of the school gym. Shortly before 5:45 a.m., there was a hush as everyone waited for the ISS to come into radio range. This prearranged contact was the result of months of preparation and a successful school application to the newly established Amateur Radio on the International Space Station (ARISS) program. The radio arrangements were ready to go thanks to the support of volunteers from the Almonte Amateur Radio Club. When the telephone call from NASA came Nov. 1, we learned that our contact with the ISS was scheduled in 22 days. There was some drama in the school gym before the students were able to talk with the commander of the ISS. "November- Alpha -1-Sierra-Sierra, this is R. Tait McKenzie Public School calling." The first call to the ISS went unanswered. So did the second and third calls to NA1SS. Concerned faces were visible and whispered conversations started. "Something must be wrong." We didn't know our radio contact coordinator, Bob Clermont (VE3AKV) was watching the clock very carefully as he made each call. The ISS wouldn't be within radio range for more than a minute - and he knew it. On the fourth call, there was the voice of the ISS commander. "Oh, you are up," he joked. Visible relief swept across the gym. Great drama.

2012 Titanic Event Pigeon Forge TN:

Posted: 19 Mar 2012 05:00 PM PDT
http://www.eham.net/articles/27945

ONE OF OVER 2,208 PASSENGER CREW STORIES - CAPTAIN EDWARD JOHN 'E.J.' SMITH, DIED APRIL 15, 1912 Being the Captain of the RMS Titanic was to be the crowning glory of a long and distinguished career. Edward J. Smith was 62 years old and had been at sea for nearly 50 years. Serving on a variety of ships, he had become popular with his crew and with passengers, and many wealthy people would only sail on a ship under his command. As Captain of Titanic, he would receive a substantial salary, as well as a "no-collision" bonus. E.J. Smith was married and had a daughter. Retirement and spending time with his family filled his thoughts on the maiden voyage of the greatest ship ever built. As Titanic launched from Southampton, England, Captain Smith narrowly averted a collision with a smaller boat, the New York, and some saw the incident as a bad omen. He normally dined alone, but on the night of April 14, 1912, he was the guest of honor at a dinner hosted by wealthy Philadelphians George and Eleanor Widener. He excused himself from the dinner early, possibly because Titanic had received warnings of ice in the vicinity. He retired to his cabin and was later awakened by the collision with the iceberg. He quickly made his way to the bridge and was reportedly seen at various locations during the ensuing hours, but his actions during the chaos of the sinking remain largely a mystery. What he expected as his crowning glory instead became the end of his career:and the end of his life.

I noticed a few snippets from a search engine that mentioned Herb's name along with 'kv4fz'. It sounds like he has his call sign back, is that correct?

I thought he was treated shabbily after his efforts to clean up the net that was breaking the law, so I hope he really does have the call sign again.

One of the great present-day amateur radio operators.

+ Available on ARRL Audio News <http://www.arrl.org/arrl-audio-news>.

==> + NEW ARRL MEMBERSHIP BENEFITS COMING IN JUNE

The ARRL is excited to announce two new membership benefits that
will be introduced in June 2012. In addition to the print copy of QST,
all members will have access to an online digital edition of QST -- at
no extra cost. You will be able to access QST from anywhere -- on
nearly any computer, laptop, mobile device, smartphone and tablet
(including Apple iPad, iPhone, iTouch and devices using the Android
operating system). Members will also gain access to archived issues of
QST from December 1915 to the present; previously, only issues through
2007 were available to members. If you are familiar with the current
periodicals archive, that platform will be expanded to include all of
QST from December 1915 through December 2011. A second, new archive
will be introduced for issues beginning January 2012, featuring
enhanced functionality including full-text search. Read more here
<http://www.arrl.org/news/coming-soon-new-arrl-membership-benefits>.

==> + ARRL ANNOUNCES NEW DXCC FEE STRUCTURE

The DX Century Club (DXCC) is the premier Amateur Radio operating award. Available to hams around the world, tens of thousands of awards have been issued since 1945 under the modern award program. In 2012, the DXCC program is not only still thriving, but it is growing, both in participation and in numbers of award options. The addition of Logbook of the World and soon, the addition of an Online DXCC Application utility, will continue to help the program grow. Effective Monday, April 2, the way DXCC fees are assessed will change. These changes will include both rate increases and rate decreases. Read more here <http://www.arrl.org/news/arrl-announces-new-dxcc-fee-structure>.

==> + 2012 NATIONAL HURRICANE CONFERENCE TO FEATURE AMATEUR RADIO ACTIVITIES

The National Hurricane Conference -- scheduled for March 26-29 in Orlando, Florida -- will feature several Amateur Radio activities. The National Hurricane Conference leadership continues to recognize the valuable contributions of Amateur Radio and has invited several radio amateurs to participate in two sessions. Read more here <http://www.arrl.org/news/2012-national-hurricane-conference-to-feature-amateur-radio-activities>.

==> + ON THE AIR: SPECIAL EVENT STATIONS PLANNED FOR LONDON 2012 OLYMPIC AND PARALYMPIC GAMES

Some special event call signs will be activated to celebrate the London 2012 Olympic and Paralympic Games: 2O12L from London, England and 2O12W from Barry, Wales. The London 2012 Inspire program has granted the Radio Society of Great Britain (RSGB) -- Great Britain's IARU Member-Society -- use of the "Inspire mark" for these stations. Both stations will be on-the-air for the duration of the Games, July 27-August 12. Read more here <http://www.arrl.org/news/special-event-stations-planned-for-london-2012-olympic-and-paralympic-games>.

==> + EXECUTIVE COMMITTEE TO MEET THIS WEEKEND IN MISSOURI

The ARRL Executive Committee will meet Saturday, March 24 in St Louis, Missouri. Agenda items include a review of the ARRL policy on repeater coordination, a look at how the mandated study on Amateur Radio -- as outlined in Section 6414 in the just-passed payroll tax legislation -- will be implemented, the first periodic review of the National Broadband Plan Committee report, discussion of the proposed changes to the FCC's rules as set forth in report from the ARRL Electromagnetic Compatibility Committee and more . ARRL President Kay Craigie, N3KN, serves as chairman of the Executive Committee. Click here <http://www.arrl.org/news/executive-committee-to-meet-this-weekend-in-missouri> for more information, including a link to the meeting's agenda.

==> SOLAR UPDATE

Tad "The Sun has long been set
<http://www.poets.org/viewmedia.php/prmMID/21699>" Cook, K7RA, reports:
Solar activity declined this week - the average daily sunspot numbers
were off by more than 13 points to 75.1, while the average daily solar
flux dropped more than 32 points to 102.1. Solar flux values have also
dropped below 100 for the past two days; they are expected to remain
there until March 28. The next short-term peak in solar flux is
expected at the 135 level for April 3-6. The predicted solar flux for
March 22 is 95. On March 23-26, expect 90, then 95, 100 and 100 on
March 27-29, 130 on March 30-April 2, then 135 on April 3-6, and 130,
120, 115 and 105 on April 7-10, and 100 on April 11-15. The predicted
planetary A index is 7 on March 22, 5 on March 23-27, 10 on March 28, 8
on March 29-31, 5 on April 1-2, 8 on April 3-4, 5 on April 5-9, then
12, 5, 5, 15 and 10 on April 10-14, and 5 again on April 15-23. Look
for more information on the ARRL website on Friday, March 23. For more
information concerning radio propagation, visit the ARRL Technical
Information Service Propagation page
<http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad
Cookism" is brought to you by William Wordsworth's The Sun Has Long
Been Set <http://www.poets.org/viewmedia.php/prmMID/21699>.

==> + TAPR OPENS "INTEREST LIST" FOR HERMES SDR

Tucson Amateur Packet Radio (TAPR) announces the opening of the
"interest list" for the openHPSDR Hermes single-board Software Defined
Radio. The Hermes interest list is used by TAPR to determine the number
of Hermes boards to manufacture in the pending initial production run
this spring. Hermes is a long-awaited addition to the openHPSDR project
lineup, advancing through four prototypes while evolving from a
USB-based to an Ethernet-based transceiver in about two years. Hermes
is a Direct-Down-Conversion receiver, a Direct-Up-Conversion 500 mW
transmitter and a gigabit Ethernet interface all on one board. Also on
board is an RF-quiet switch-mode power supply, which allows Hermes to
run from a single 13.8 V dc source. Read more here
<http://www.arrl.org/news/tapr-opens-interest-list-for-hermes-sdr>.

==> THIS WEEK IN RADIOSPORT

This week:

- March 24-25 -- CQ WW WPX Contest (SSB)
- March 26 -- QRP Homebrewer Sprint
- March 28 -- SKCC Sprint
- March 28-29 -- CWops Mini-CWT Test

Next week:

- March 31-April 1 -- Missouri QSO Party
- April 1 -- UBA Spring Contest (SSB)
- April 3 -- ARS Spartan Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest

Calendar <http://www.hornucopia.com/contestcal/index.html> for more
information. Looking for a Special Event station? Be sure to check out
the ARRL Special Event Stations Web page
<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

And we've been around since at least 1997 so the odds are in our
favor...

> I know of no one named "Pope Snooky".

Sure ya do! It's the correct moniker for none other than the clueless
fucktard clayton "butt-plug" mcgill, usenet loser and court jester
from canaDUHHH.

Amateur Radio Newsline(tm) Report 1806 - March 23 2012

Amateur Radio Newsline report number 1806 with a release date of March 23rd, 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio and social networks respond following an earthquake in Mexico; an A-P-R-S equipped ocean buoy is released off the coast of Alaska; Missouri hams could be hit hard by a proposed distracted driving law; London Olympic ham radio stations are announced and the birds are back. Find out what we mean on Amateur Radio Newsline(tm) report number 1806 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: HAM RADIO AND SOCIAL NETWORKS RESPOND TO MEXICO EARTHQUAKE

Amateur radio operators and the social media have responded in the wake of an earthquake that hit Southwest Mexico on March 20th. Bill Pasternak, WA6ITF, is in the newsroom with what we know so far:

--

What has been described as a powerful and prolonged earthquake rocked parts of Mexico on Tuesday, March 20th. The 7.6 magnitude temblor near the Pacific Coast resort town of Acapulco. According to news reports, some homes were toppled near the quakes epicenter. Electricity and telephone communications was lost for a time. But despite the quake's power, Mexico's President Felipe Calderon and officials across the country said that there were no reports of serious injuries.

While there was some damage to the nation's internal communications infrastructure, Mexico's connection with the outside world for the most part remained unscathed. So far nothing has been heard about activation of any domestic Mexican ham radio emergency group. As we go to air, the only international ham radio operation we have heard about is a group called the International Radio Emergency Support Coalition. IRESC President, Urcun Canel, TA0U, in Istanbul, Turkey worked with about 8 or 9 hams in Mexico passing early damage assessment reports to the European continent. Some of this communications audio was posted to Facebook:

--

Actuality audio communications. Hear it by downloading the MP3 audio file of this newscast at www.arnewsline.org

--

You can hear the entire communications session at tinyurl.com/iresc-mexico-quake. But the real story in this case is the response by the people in the affected areas.

While telephone and cellphone service was jammed as is the case after events like this, broadband connections were still open and quite useful. Anyone watching or listening to broadcast news reports often heard tweets from residents of the quake hit area being quoted as news sources and giving short eye-witness assessments via Twitter.

Also, broadcast news organizations world-wide were asking people with relatives in the quake zone to call in or post to the stations website the latest news they might have. In other words, news organizations were literally handling health and welfare traffic that until a year or two ago was primarily the domain of radio amateurs involved in emergency communications.

Quite a change from day's gone bye.

For the Amateur Radio Newsline, Im Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

--

More in future Amateur Radio Newsline reports. (ARNewsline, published news reports with audio from IRESC Facebook posting)

**

RESCUE RADIO: CONNECTICUT ARES FRONT AND CENTER ON EMCOMM PREPAREDNESS

The role of amateur radio in emergency communications continues to grow and will become even more vital in the future. That was the message from Connecticut Section Emergency Coordinator, Wayne Gronlund, N1CLV, at the annual meeting of that states ARES groups over the weekend of March 17th and 18th.

According to Gronlund, a series of natural disasters in 2011 showcased the importance of amateur radio in emergency situations. These included tropic storm Irene, a pre-season nor'easter in October, and the tornadoes that swept western Massachusetts last summer.

Illustrating his remarks with a Power Point presentation, N1CLV noted that the snowstorm in particular strained the system because phone and electrical service were disrupted for up to two weeks. Especially in the Farmington area.

These two disasters led to formation of Governor Deniel Malloy's two-storm study inquiry. Among the panel's recommendations is holding a real time training exercise this year. One that would involve municipalities, the Red Cross and ARES to determine what assets are

available and what improvement is needed.

Such a state-wide exercise is now scheduled for July 28th to the 30th and will involve amateur radio resources. More is on the web at tinyurl.com/ct-rescue-radio. (Hartford Examiner)

**

LEGAL HAPPENINGS: PROPOSED MISSOURI DISTRACTED DRIVING LAW HAS NO EXEMPTIONS FOR ANYONE

Missouri drivers including hams, C-B operators, emergency response personnel and even someone just tuning a vehicles A-M radio could find themselves standing before a judge. This if a new distracted driving law is enacted as proposed to that states legislature. Matthew Chambers, NR0Q is here with the rather strange details:

--

If you were to get pulled over this morning and told that you were getting a ticket for distracted driving because you took a sip of coffee during your morning commute would you be surprised. If a Missouri Senate Bill written by Senator Bill Stouffer, of Saline County passes, this is what Missouri drivers could be facing.

Senate Bill 717 would make it a class C misdemeanor to "Fail[s] to give full time and attention to the operation of the motor vehicle; Fail[s] to maintain a proper lookout while operating a motor vehicle; or Engage[s] in any other activity which causes the operator to be distracted from the primary mission of driving such motor vehicle."

There are no exemptions for hands-free devices, two-way or CB type radios, or for operators of emergency vehicles or law enforcement personnel. If passed as written, the police officer writing a ticket to enforce this would most likely also have to write themselves a ticket for distracted driving as well.

For the Amateur Radio Newsline, I'm Matthew Chambers, NR0Q near Macon, Missouri.

--

While it may sound funny to think of a police officer having to cite himself for using his departments radio communications system, it might one day happen in the "show me" state. The rather short but complete text of this proposed law is on-line at tinyurl.com/mo-distracted-driving. (NR0Q)

**

RADIO RESEARCH: ICE GOAT 1 APRS BUOY GOES TO SEA OFF ALASKA COAST

A group of Oceanography and Aeronautical engineering students from the U-S Naval Academy have deployed a radio equipped ocean buoy rigged to monitor weather in the harsh conditions of the arctic. Named Ice Goat

1, the buoy was placed off of the coast of Point Barrow, Alaska. Once the winter ice melts the buoy will begin its sea voyage.

In addition to its scientific monitoring gear, Ice Goat 1 carries an APRS beacon operating on 145.825 MHz. The position packets can be relayed via the International Space Station digipeater. However, as the ISS only rises 1.5 degrees above the horizon at arctic latitudes reports of direct reception of the 145.825 MHz beacon are being sought from any Alaskan, and eventually Pacific Northwest amateur radio stations that may be in range of Ice Goat 1. Reception reports go by me-mail to wb4apr(at) amsat (dot) org. (AMSAT, WB4APR)

**

RADIOSPORTS: LONDON OLYMPIC COMMEMORATIVE HAM RADIO STATIONS ANNOUNCED

Some special event call-signs will be activated to celebrate the London 2012 Olympic and Paralympic Games.

The London station, 2012L will be active through the duration of the games. It will be located at the historic Eltham Palace, south-east London on and will operate all modes on 160 through 2 meters. More information about it is on the web at www.2O12L.com.

The Welsh station 2O12W will be operational on all bands from 160 meters through 23 centimeters and all modes including SSTV and satellites. It will be located at Whitmore Bay, on Barry Island, More information on the web at www.2O12W.com

2O12L and 2O12W will go on the air July on 27th. The Radio Society of Great Britain has been granted use of the games Inspire trdemark for these stations. Special QSL cards will be available to all stations contacted. (G4IRN)

RADIO RULES: TOWERS VS. BIRDS - CATS GET THE BLAME

The birds are back. New interim regulatory procedures will take effect soon for certain new towers to address bird kills. Yet the issue remains a sensitive one for many people in broadcasting, two-way radio and others who own and maintain tall lighted tower structures. Amateur Radio Newsline's Bruce Tennant, K6PZW, has the details:

--

A new report from the FCC is likely to be scrutinized by anyone involved in the debate. Among its assertions is that by best estimate communications tower strikes by avian creatures do kill 6.6 million birds a year in the United States. Even so, while proposed regulatory changes may affect the total somewhat, bird deaths from towers are, and will remain, only a tiny fraction of bird deaths from all causes.

The report also notes that while communications towers contribute to the overall adverse impacts of all human activities on bird populations, communications tower collisions are only responsible for approximately 0.3 percent of the more than 2 billion annual bird deaths that currently occur due to cats and other predators. In addition, these deaths occur against a backdrop of high natural mortality to migrating birds due to a number of factors. Although the absolute number of birds killed at communications towers is large, towers are a relatively minor contributor to total human-caused avian mortality, and the impact of these deaths is likely even smaller when considered in the context of high natural mortality.

These findings are part of a Federal Communications Commission report assessing the environmental impacts of its Antenna Structure Registration System. The report was prepared by the Maryland based firm the URS Group for the FCC's Wireless Telecommunications Bureau.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

The report is likely to continue the ongoing debate over what the permanent tower registration rules and procedures should be. You can read the details at tinyurl.com/The-Final-PEA. (FCC, CGC, RW)

**

RADIO LAW: FCC SEEKS INPUT ON EMERGENCY SHUTOFF OF CELLULAR SERVICE

The FCC wants to know how you feel about the government or private enterprises using its ability to order a shutdown of broadband communications systems in times of emergencies or perceived emergencies. Amateur Radio Newsline's Cheryl Lasek, K9BIK, reports:

--

The Federal Communications Commission's Public Safety and Homeland Security Bureau and Wireless Telecommunications Bureau are jointly seeking comment on issues related to intentional interruptions of Commercial Mobile Radio Service by government authorities for matters deemed in the interest of public safety. The issue stems from Bay Area Rapid Transit's shut-down of cellular telephone service on August 11th of last year in the face of political and social protests taking place in the San Francisco area.

According to General Docket Number 12-52, any intentional interruption of wireless service, no matter how brief or localized, raises

significant concerns and implicates substantial legal and policy questions. The service interruption last summer drew sharp criticism, and state and local governments have recently grappled with how to address possible future events.

The FCC says that it is concerned that there has been insufficient discussion, analysis, and consideration of the questions raised by intentional interruptions of wireless service by government authorities. As a result, Docket 12-52 seeks comment on the legal constraints and policy considerations that bear on an intentional interruption of wireless service by government agencies for the purpose of ensuring public safety.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

General Docket Number 12-52 caries a commentary cutoff date of April 30th and a reply comment date of May 30th. The entire text is on line in Adobe PDF format at tinyurl.com/turn-off-cellphones.

(FCC)

REGULATION: CLERICAL ERROR LEADS FCC REQUESTS MODIFICATION OF HAWAII HAMS LICENSE

In one of those awkward "oops someone goofed moments," the FCC has been forced to issue an order that proposes modifying the license of Todd Wilson, WH6DWF, of Honolulu, Hawaii, from General to Technician.

No, Wilson did nothing wrong. In fact he appears to simply be the innocent victim of a clerical error by the administering Volunteer Examiner. It happened this way:

Back in November of 2011, the ARRL V-E-C sent an electronic data file to the FCC, requesting that the agency issue a Wilson a General class license which it did. A few weeks later in January 2012, the ARRL V-E-C notified the FCC that Wilson's information was incorrect and he did not qualify for a General class license. The ARRL V-E-C also requested that the FCC to modify Wilson's license to show him as a Technician class license holder.

On March 15, the FCC issued an Order of Proposed Modification, seeking to change Wilson's license class from General to Technician. In its order the FCC said that granting General class amateur radio privileges to Wilson had been improper. That the grant of General class operator privileges to Wilson was erroneous because he was not eligible to receive examination credit for one of the elements an applicant must pass in order to be granted a General class operator license. Rather, he appears to be currently authorized to operate with General class operator privileges due to an error made during the application

process.

But it may not be over yet. Under the law, Wilson has until April 14th to appeal the modification order by submitting a written statement containing sufficient evidence to show that the modification would not be in the public interest. If he fails to do so, the license modification back to Technician class will come into effect. (FCC)

ENFORCEMENT: A SECOND $25000 FINE ISSUED TO AN UNLICENSED CALIFORNIA BROADCASTER

In what may well be a time record between FCC actions, the Commission has reaffirmed a second $25,000 fine against California resident Gabriel Garcia. This time for not allowing a commission inspection of various unlicensed radio stations in the San Jose area.

As reported last week, in May 2011, the Enforcement Bureau's San Francisco office originally issued a $25,000 penalty because it said Garcia was operating illegal stations on three frequencies in the San Jose area and apparently interfering with the Aviation Radio Services band. The commission said that Garcia did not respond to the notice, so the fine has now progressed into a Notice of Forfeiture.

Now the FCC has affirmed the second $25,000 forfeiture based on Garcia's refusal to give its inspectors access to the properties from which the stations were allegedly operating. This, to permit physical inspection of the equipment being used.

If Garcia fails to pay the two fines in the allotted 30 days each, the matters will likely be turned over to the Department of Justice for collection. (FCC)

ENFORCEMENT: FCC INVESTIGATING 450 - 470 MHZ INTERFERENCE IN PA

The FCC has issued a Notice of Unauthorized Operation and of Interference to Licensed Radio Stations to a pair of Lurgan, Pennsylvania residents. Amateur Radio Newsline's Heather Butera-Howell, KB3TZD, is here with the details:

--

In a letter to the unnamed parties, the North-East Region Enforcement Bureau in Philadelphia stated that it had received a complaint from a licensed telecommunications provider of interference in the 450 to 470 MHz band. Also, that they had traced the interference to a radio transmitting device operating in Lurgan, Pennsylvania.

On February 17th agents confirmed by direction finding that the source of the interference was emanating from a residence in Lurgan. During an equipment inspection, agents confirmed that the device causing the

interference was designed to jam radio transmissions.

In its letter to the Lurgan residents, the FCC notified them that unauthorized operation of a radio transmitting device designed to jam radio communications must cease immediately. It warned them that the continued operation of such a device may result in seizure of the offending equipment and/or a court order prohibiting them from operating such devices. Also that this type of unauthorized operation could subject them to substantial monetary forfeitures and criminal sanctions including imprisonment.

The two people involved in this matter were given 10 days from receipt of the notice to provide information regarding the entity from whom they purchased the device, including copies of any receipts or invoices. They were also given the opportunity to respond with any other information that they believe relevant to the notice.

Fr the Amateur Radio Newsline, I'm Heather Butera-Hpwell, KB3TZD, not far away in Berwyck, Pennsylvania.

--

The two Lurgan residents were also advised that the Notice of Unauthorized Operation they received or their response to it would not preclude the FCC from pursuing additional sanctions based upon its investigation of this incident. (FCC Northeast Enforcement Bureau)

WORLDBEAT: CHELMSFORD NAMED UK BIRTHPLACE OF RADIO

The United Kingdom now has a city named as the birthplace of radio. At least in that nation. Jeremy Boot, G4NJH, is here with the details:

--

Chelmsford, acknowledged as the birthplace of radio and home to the Marconi Company for many years, is one of three new cities created to mark the Queen's Diamond Jubilee.

This year also marks the 100th anniversary of the establishment by Marconi of the first purpose built radio factory in New Street, Chelmsford in 1912. New Street is marked with a blue plaque noting the historic significance.

And this comes to you from G4NJH in Nottingham.

--

As an asaide, for those who never heard the term the Queen's Diamond Jubilee, this will be an extended weekend from June 2nd to the 5th to celebrate the 60th anniversary of Queen Elizabeth the 2nd. The Queen came to the throne on February 6, 1952 and her coronation took place on June 2nd 1953. (RSGB)

**

HAM RADIO IN SPACE: HAMSAT VO-52 RECOVERY SUCCESSFUL

Some good news about the HAMSAT VO-52 ham radio satellite. A report received from the ISRO Satellite Centre in Bangalore, India on March 14 says HAMSAT is back on the air and operating properly.

According to VU2WMY commands to reactivate Dutch-built PE1RAH orbital transponder on HAMSAT were sent during an ascending pass over India. The commands were acknowledged and confirmed by return telemetry. At the same time the beacon signal was heard loud and strong in Bangalore.

Stations in Europe and North America reported good signals from VO-52 immediately after the transponder was activated. Two-way contacts were soon completed through the HAMSAT VO-52 transponder. (VU2WMY)

**

HAM RADIO IN SPACE: NEW HAM-SAT GROUP FORMED IN CUBA

Hector Martinez, CO6CBF reports that the Cuban Amateur Radio Federation has created its first official Satellite Group. CO6CBF says that he along with CM2ESP and CO7WT worked to form the group and made the formal recognition request to the Federation headquarters that was approved on March 3rd.

The official name of the organization is the Grupo de Radioaficionados para Operaciones Satelitales. Its principal mission is to promote amateur radio by satellites in Cuba and motivate Cuban hams to operate on the satellites. Its first meeting is being planned for Havana in the not to distant future.

(CO6CBF)

ON THE AIR: UK MUSEUM STATION TO COMMEMORATE SINKING OF THE TITANIC

Special event station GB100MGY will be on air from April 6th to the 26th. This to mark the 100th anniversary of sinking of the Titanic in 1912.

This operation will take place from the Fort Perch Rock Marine Radio Museum at New Brighton in the UK. In addition to the regular HF bands the planners of GB100MGY have received special permission from UK telecommunications regulator Ofcom to use the callsign on 502 kHz. If you do not have gear to transmit on 502 kHz, crossband QSO's will be available to 3.566 or 7.066 Mhz from April 12th to the 18th as propagation permits.

For more information on this special event operation, please take your web browser to www.fortperchrockmarineradiomuseum.co.uk. (Via e-mail)

**

RADIOSPORTS: WORLD-WIDE IRON HAM CONTEST RESCHEDULED TO DECEMBER

The World-Wide Iron Ham Contest, which was originally planned to take place in June, has now been re-scheduled. In order to avoid having two South American contests in the same day the Araucaria Dx Group decided to move the Iron Ham competition to the last full weekend in December. As a result, the World-Wide Iron Ham Contest will begin on Saturday December 29th at 12:00 UTC and end on Sunday December 30th at 11:59 UTC. More on this event in both English and Portugese is on line at www.araucariadx.com/ih. (PY5EG)

**

DX

In DX, The Buddies in the Caribbean mini-DXpedition group will be operational from Montserrat between April 8th to the 16th, with a new group of operators who have never experienced the other side of a pileup. Because of severe baggage limits on the flight from Antigua to Montserrat they will be limited to low power radios and Buddipole portable antenna systems. There will be several villa stations in operation on 160 through 10 meters using CW, SSB, and RTTY or PSK. At the same time, several teams will be battery-only, field portable either from Montserrat beaches or scenic mountain tops. QSL via Logbook of the World, eQSL, or mail to the operator's home callsign.

DL7BC will be active from slas FH from Mayotte Island March 20th to 6th. Please QSL as directed on the air.

WA2YUN is currently operational portable KH9 from Wake Island and will be active another year or more. Activity is on the Nigh Frequency bands including 160 and 80 meters. He has also been active on 6 meters. QSL via K2PF.

F4DTO and F4GFE will be active from Albania as ZA100I between April 22nd to the 29th. Operations will be on 40 through 10 meters on SSB only. QSL via F4DTO, direct or by the bureau.

Members of the Malaysian Amateur Radio Transmitter Society and the 9M4SDX Team will be active as 9M0L from Pulau Layang Layang Island, East Malaysia, between April 10th and the 24th. The team will have 4 stations using Spider Beam antennas. QSL direct to the 9M0L Team Penang, PO BOX 125, GPO 10710, Penang Island, Malaysia or by the bureau to Malaysian Amateur Radio Transmitter's Society.

Lastly, W7GJ and ZL1RS will once again team up to do a 6 and 2 meter EME DXpedition to Niue between September 9th and the 21st, W7GJ will use the callsign ZK2GJ, while ZL1RS will probably use his old callsign of ZK2RS. QSL ZK2GJ via W7GJ and ZK2RS via ZL1RS direct only.

**

THAT FINAL ITEM: CREATING THE HAM RADIO TRIATHLON CONTEST

And finally this week, a new radiosporting event will begin in 2013. And it has its roots in sports history. Amateur Radio Newsline's Norm Seeley, KI7UP, is here with the details:

--

It all started back in August of 2011. That was about when it occurred to Mike Balaskas, SV5BYR of Dodcanese, Greece, that a big Greek sponsored radiosport event was missing from international ham radio contest calendar. By the end of that September Balaskas' idea had matured and so the Ham Radio Triathlon Contest was born.

For those of you who do not follow the world of sports, a triathlon involves completion of three continuous and sequential endurance events. And as you have already guessed, it is a Greek word.

But unlike the world of athletics, those planning the Ham Radio Triathlon DX Contest had to change things a bit to make this activity become reality. In trying to simulate the original Triathlon athletic event, planners chose three major ham radio modes for the competition. For the initial outing these will be SSB, CW and RTTY.

The Ham Radio Triathlon will be a 24 hour non-stop event that will take place the fist full weekend of February. It will debut next year on Saturday, February 2nd of 2013. And from what we have read of the proposed rules winning this one won't be easy but it sure looks like a lot of fun.

For the Amateur Radio Newsline, Im Norm Seeley, KI7UP, on this side of the Atlantic and the Western part of the United States reporting from Scottsdale, Arizona.

--

SV5BYR says that there is still a lot of work to be done and more details to be announced. We suggest that you keep an eye on triathlon-dx-contest.blogspot.com in the coming months to learn more. (SV5BYR)

Trans-Atlantic Amateur Radio on 7, 10 and 144 MHz

Posted: 23 Mar 2012 02:24 AM PDT
http://forums.qrz.com/showthread.php?339226-Trans-Atlantic-Amateur-Radio-on-7-10-and-144-MHz&goto=newpost

Trans-Atlantic Amateur Radio on 7, 10 and 144 MHz

The Project Blue Horizon 6 high-altitude transatlantic balloon flight is scheduled for Friday, March 23 at 2300 EST (0300 Saturday UT) from Owego, NY transmitting on 7.1023 and 10.1466 MHz CW and 144.390 MHz FM APRS.

The Project Blue Horizon team is attempting to break current Amateur Radio high-altitude balloon record for duration and duration (57 hours 2 minutes). The team currently estimate a 4400 mile flight spanning 100 hours.

Please see http://www.projectbluehorizon.com/ for detailed flight path information.

The payload will be carried beneath a 54,000 cubic foot capacity helium-filled balloon cruising between 85,000 and 100,000 feet.

During the flight amateurs worldwide are encouraged to monitor the N2XE CW telemetry beacons at 7.1023 and 10.1466 MHz. The balloon is also equipped with an APRS beacon at 144.39 MHz using the call sign KD2AUD.

Amateurs can send reports via e-mail to pbh18.data@gmail.com or manually enter received data points at http://www.projectbluehorizon.com/

More information about the program is at the Project Blue Horizon website. Launch and flight updates will also be available on Twitter @PBHVI

NOTE: If you or anyone else knows a Ham operator in the Azores who can communicate with the payload please send the contact information to pbh18.data@gmail.com Blue Horizon will require communications with the payload as it approaches the Azores.

ILLW registrations ahead of time

Posted: 23 Mar 2012 02:01 AM PDT
http://forums.qrz.com/showthread.php?339223-ILLW-registrations-ahead-of-time&goto=newpost

ILLW registrations ahead of time

The entries to this year's International Lighthouse and Lightship Weekend in August are slightly ahead of expectation, although only 160 have registered and half the countries are so so far represented.

Australia remains in the lead with 35 registrations just ahead of Germany on 33, followed by the USA on 21 and England 14.

Others come from Argentina, Brazil, Chile, Curacao, Denmark, Finland, France, Honduras, Ireland, Isle of Man, Italy, Netherlands, New Zealand, Northern Ireland, Poland, Portugal, Puerto Rico, Scotland, South Africa, Sweden and Wales.

The next months ahead are expected to see a lot more sea-going nations added to this fun event.

To enter do visit the website at illw.net for the 15th annual International Lighthouse and Lightship Weekend held on August the 18th and 19th.

Apex School Phones NASA, 250 Miles Up:

Posted: 22 Mar 2012 05:27 PM PDT
http://www.eham.net/articles/27968

APEX -- For about 30 minutes more than 600 young students sat cross-legged with their eyes glued forward at Salem Elementary School's gymnasium quietly listening. It wasn't a movie that completely captured their attention, but a black handset and a satellite image. On the other end of the handset was NASA Astronaut Don Pettit and he was calling from space. Pettit and two other astronauts are living on the International Space Station for a mission that ends in May. At the time of the call- made 10 a.m. Wednesday via amateur radio-Pettit and his fellow crewmembers were traveling about 250 miles above Earth over the Indian Ocean near Australia at 17,500 miles per hour. The students created and asked their own questions about everything from space hygiene to scientific experiments.

//
Civic-Minded East Contra Costa Amateur Radio Club Operators Ham It Up:

Posted: 22 Mar 2012 05:24 PM PDT
http://www.eham.net/articles/27967

They don't play Words With Friends, but some have friends across the world. Their electronic accessories don't begin with "i." In the event of an actual emergency, you would be glad to have one for a neighbor. Ham radio operators have always been a subset of society, but with digital devices making everyone a communications guru of sorts, it's easy to forget this small segment of the population. Yet, for the civic-minded sort with a hankering to connect and serve, there's a local source for would-be radio folk. East County has an enclave of hams with a vivid social life. Delta Amateur Radio Club members meet in person at 7 p.m. the last Thursday of every month at the Pittsburg Environmental Center, 2581 Harbor St. They come together to swap stories and equipment and technical tips. Newcomers are welcome. "If you think you might like to become a ham, come to a meeting!" club president Mary-Jane Walker insisted. Or maybe take in a breakfast with members of the larger county club, club treasurer Drew Hanson said. The perception that amateur radio operators are shut-ins is untrue. Walker started hamming it up 30 years ago. Newly widowed, her daughter and son-in-law encouraged her to join them in their hobby. "I joined to meet people," Walker said. "I've made a lot of friends over the years."

//
Technology And Storm Spotter Training:

Posted: 22 Mar 2012 05:21 PM PDT
http://www.eham.net/articles/27966

Severe weather awareness week is upon us. Wednesday morning the emergency sirens were tested in the metro. But as we share our lives and storm stories through social media sites more and more, it's important to have a trained eye. George Bellairs has been tweeting long before Twitter even existed. "Communication has always been a two-way street," said Bellairs. "I've been a ham radio operator going on 17 years. I've been a storm spotter the same amount of time. Each season, you'll find Bellairs close to his ham radio. "The longer you're there the higher your skill level," said Bellairs. As a trained weather spotter, he relays severe weather conditions across Douglas County. "It's like being a trained driver on the streets. You have to know what you're doing to be observant," said Bellairs It's that kind of training that brought dozens to a spotter training class Wednesday night. "This is a great opportunity to get new information as far as the new technologies," said participant Travis Turner. "Now we have all this new technology that anybody and everybody can use," said Turner. He says what started as information coming solely from trained spotters on ham radio is now spreading to social media sites like Facebook and Twitter.

//
In High-Tech Age, Ham Radio Communication Has Advantages:

Posted: 22 Mar 2012 05:19 PM PDT
http://www.eham.net/articles/27965

He has to listen closely to hear through the static, but University of Pittsburgh student Geoff Wolf just barely can make out the strained beeps of Morse code emanating from somewhere in the south Asian country of Sri Lanka. Wolf of Harrisburg is a member of the Skyview Radio Society, an amateur ham radio group that draws members from throughout western Pennsylvania. Members meet at their station and clubhouse in New Kensington and broadcast both locally and throughout the world. "All you need is a radio, a wire and a power source," said Larry Kelley of Murrysville, one of about 80 society members. "People will get on and see how many folks throughout the world they can talk to." The society has been holding a series of classes this month for those interested in obtaining a first-level amateur radio license, classified as a technician license. Society radio officer Bob Bastone of East Deer said that while there are rocket scientists who are ham radio operators, "you don't have to be a rocket scientist to do it." In today's age of cellphones, the Internet and numerous other modes of communication, it might seem quaint to some that ham radio is still around. But ham operators have a distinct advantage over many forms of modern communication. Where cellphones, telephones, Internet-connected computers and even satellite phones must be routed through a variety of choke points and require electric power, ham radios can "go direct" and talk straight through to one another because each station is independent. That feature makes them indispensable from an

emergency-services standpoint.

New ARRL Membership Benefits Coming in June:

Posted: 22 Mar 2012 11:51 AM PDT
http://www.eham.net/articles/27951

The ARRL is excited to announce two new membership benefits that will be introduced in June 2012. In addition to the print copy of QST, all members will have access to an online digital edition of QST -- at no extra cost. You will be able to access QST from anywhere -- on nearly any computer, laptop, mobile device, smartphone and tablet (including Apple iPad, iPhone, iTouch and devices using the Android operating system). Members will also gain access to archived issues of QST from December 1915 to the present; previously, only issues through

2007 were available to members.

Figures that you'd have nothing to say (about convicted wife-beater/
child-abuser/stalker/death threat-utterer/ridiculous midget Emmett
Earl Gulley), except inane questions to do with your net-KKKopping
obsession (What is it, now, ten years? Ten years or more since you
launched your mad crusade against whatever it was that was giving you
butthurtz), Classic Tholenator. You were asked a direct, not leading,
question, by a non-anonymous poster (check it out, he's even more
outer-filthed than I am, and I'm seriously outer-filthed), and you
refused to answer. Pathetic.

The Demon of Mockery <popesnarky@gmail.com> writes:

262> Newsgroups:
alt.usenet.kooks,alt.fucknozzles,alt.slack,rec.radio.amateur.policy,comp.os.os2.advocacy

262> Figures that you'd have nothing to say (about convicted wife-
beater/
262> child-abuser/stalker/death threat-utterer/ridiculous midget
Emmett
262> Earl Gulley),

What do your allegations about Emmett Earl Gulley have to do with
alt.usenet.kooks,alt.fucknozzles,alt.slack,rec.radio.amateur.policy,
comp.os.os2.advocacy, Snarky?

262> except inane questions to do with your net-KKKopping obsession

What does your classic erroneous presupposition have to do with
alt.usenet.kooks,alt.fucknozzles,alt.slack,rec.radio.amateur.policy,
comp.os.os2.advocacy, Snarky?

262> (What is it, now, ten years? Ten years or more since you
262> launched your mad crusade against whatever it was that was giving
you
262> butthurtz), Classic Tholenator.

Who is "Classic Tholenator", Snarky? There is nobody in this
newsgroup
using that alias.

262> You were asked a direct, not leading, question, by a non-
anonymous
262> poster (check it out, he's even more outer-filthed than I am, and
262> I'm seriously outer-filthed), and you refused to answer.

What does the direct question have to do with alt.usenet.kooks,
alt.fucknozzles,alt.slack,rec.radio.amateur.policy,comp.os.os2.advocacy,
Snarky?

262> Pathetic.

Your post was indeed pathetic, Snarky. No need to tell me about it.

**

RESCUE RADIO: HAM RADIO AND SOCIAL NETWORKS RESPOND TO MEXICO EARTHQUAKE

Amateur radio operators and the social media have responded in the wake of
an earthquake that hit Southwest Mexico on March 20th. Bill Pasternak,
WA6ITF, is in the newsroom with what we know so far:

If by that you mean we enjoy using him as our personal pinata and
asserting our obvious superiority you are correct. Poop Snookie is
great for a few laughs at his expense.

> is it true love or just infatuation?

Using Pope Snookie Butt-plugs fractured logic we should assume you are
one of his dirty socks because you post positive on his behalf....

Sussex Tech Becomes Radio Active; Amateur Radio, Electronics Expo April 21:

Posted: 23 Mar 2012 06:16 PM PDT
http://www.eham.net/articles/27970

Ham radio operators and electronics enthusiasts will gather at Sussex Technical High School in Georgetown Saturday, April 21, for the annual Amateur Radio & Electronics Expo. The event, often referred to as a hamfest, features equipment displays, demonstrations and forums that focus on advances in technology and radio communications. The gates open at 6:30 a.m. for the flea market, and doors to the expo open at 7:30. Admission is $5. CBers, electronics hobbyists, boaters and everyone who has an interest in communications and electronics are welcome to attend this yearly event. Electronics equipment, accessories, parts and related items will be offered for sale by several national companies and by vendors in the outdoor flea market.

1836. The Oneness of God is the message of Jesus and all the Prophets, peace be upon them !!!!!!!!!!!!!!!!!!

Newsgroup: rec.radio.amateur.policy
Date: 2012-03-25 16:44:51 UTC
From: BV BV <bv8bv8bv8@gmail.com>
Message-ID: <e7e9feeb-af59-4b43-a920-4c0243bd29cf@q11g2000vbu.googlegroups.com>
Source record: 250934

The Oneness of God is the message of Jesus and all the Prophets, peace be upon them

The message that was brought by the Messiah (peace be upon him) was the call to worship God, the One, the Lord of the Messiah and the Lord of the worlds:

"Now this is eternal life: that they may know you, the only true God, and Jesus Christ, whom you have sent"
John 17:3 - NIV

"A certain ruler asked him: 'Good teacher, what must I do to inherit eternal life?'
'Why do you call me good?' Jesus answered. 'No one is good - except God alone.'"
Luke 18:18-19 - NIV

"The devil led him up to a high place and showed him in an instant all the kingdoms of the world.
And he said to him, 'I will give you all their authority and splendour, for it has been given to me, and I can give it to anyone I want to.
So if you worship me, it will all be yours.'
Jesus answered, 'It is written: "Worship the Lord your God and serve him only."'"
Luke 4:5-8 - NIV

Believing in and worshipping Allaah alone, besides Whom there is no other god, is the greatest teaching brought by the Messiah, and it is the greatest teaching brought by all the Prophets.

"One of the teachers of the law came and noticed them debating.
Noticing that Jesus had given them a good answer, he asked him, 'Of all the commandments, which is the most important?'
'The most important one,' answered Jesus, 'is this: "Hear, O Israel, the Lord our God, the Lord is one.
Love the Lord your God with all your heart and with all your soul and with all your mind and with all your strength."

The second is this: "Love your neighbour as yourself." There is no commandment greater than these.'
'Well said, teacher,' the man replied. 'You are right in saying that God is one and there is no other but him.
To love him with all your heart, with you all your understanding and with all your strength, and to love your neighbour as yourself is more

important that all burnt offerings and sacrifices.'
When Jesus saw that he has answered wisely, he said to him, 'You are not far from the kingdom of God.' And from then on no one dared ask him any more questions."
Mark 12:28-34 - NIV

But do not think that this advice was given to Israel or to his own people only. Rather this is the basis of the teachings of all the Prophets. The same advice appears in the Gospel of Matthew, in similar wording, after which he says:
"All the Law and the Prophets hang on these two commandments."
Matthew 22:39 - NIV

This belief in the oneness of God is indeed the message of all of the Prophets.

Allaah says (interpretation of the meaning):
"And We did not send any Messenger before you (O Muhammad) but We revealed to him (saying): Laa ilaaha illa Ana [none has the right to be worshipped but I (Allaah)], so worship Me (Alone and none else)"
[al-Anbiya' 21:25]

This is the basic message to which the Messiah called people and warned them against differing from that.

Allaah says (interpretation of the meaning):
"Surely, they have disbelieved who say: 'Allaah is the Messiah ['Eesa (Jesus)], son of Maryam (Mary).' But the Messiah ['Eesa (Jesus)] said: 'O Children of Israel! Worship Allaah, my Lord and your Lord.' Verily, whosoever sets up partners (in worship) with Allaah, then Allaah has forbidden Paradise to him, and the Fire will be his abode. And for the Zaalimoon (polytheists and wrongdoers) there are no helpers"
[al-Maa'idah 5:72]

This is the basic principle on which we should all agree.

Allaah says (interpretation of the meaning):
"Say (O Muhammad): 'O people of the Scripture (Jews and Christians): Come to a word that is just between us and you, that we worship none but Allaah (Alone), and that we associate no partners with Him, and that none of us shall take others as lords besides Allaah.' Then, if they turn away, say: 'Bear witness that we are Muslims'"
[Aal 'Imraan 3:64]

It is alien to true Christianity, this futile attempt to reconcile the belief in the Oneness of God, which is the message brought by the Prophets, and which is clearly stated in their Bible, and affirmed in the Torah in particular, with their belief in the trinity.

It says in the American Encyclopedia:
The belief in the Oneness of God - as a theological movement - began at a very early stage in history, and in fact it preceded the belief in trinity by many decades. Christianity developed from Judaism, and

Judaism firmly believes that there is one God.
The path that led from Jerusalem (the home of the first disciples of Christ) to Nicea (where it was decided in 325 CE that Christ was equal to God in essence and eternal nature) can hardly be described as a straight path.
The doctrine of trinity which was affirmed in the fourth century CE bears no resemblance to the original teachings of Christ concerning the nature of God. Au contraire, it is the opposite, a deviation from that teaching. Hence it developed in opposition to the belief in One God...
(27/294).

You can refer to the views of some of those Christians who still believe in the Oneness of God in the sameAmerican Encyclopedia, 27/300-301
It is difficult to comprehend, so no wonder you were never able to comprehend it. But what is strange is that you believe in something that it is impossible to understand, unless we deceive ourselves and say that this understanding will come on the Last Day:

"We understand that as much as our minds are able to, and we hope that we will understand it more clearly in the future, when the veil is removed from all things in heaven and on earth. But for now, the extent to which we do understand it is enough!"

Yes, the truth will become perfectly clear to you in the future, as it is clear to us today, praise be to Allaah, on the Day on which Allaah will gather the Messengers and make them bear witness concerning their nations.

Allaah says (interpretation of the meaning):
"And (remember) when Allaah will say (on the Day of Resurrection): 'O 'Eesa (Jesus), son of Maryam (Mary)! Did you say unto men: Worship me and my mother as two gods besides Allaah?' He will say: 'Glory be to You! It was not for me to say what I had no right (to say). Had I said such a thing, You would surely have known it. You know what is in my inner-self though I do not know what is in Yours; truly, You, only You, are the All-Knower of all that is hidden (and unseen).
117. 'Never did I say to them aught except what You (Allaah) did command me to say: Worship Allaah, my Lord and your Lord. And I was a witness over them while I dwelt amongst them, but when You took me up, You were the Watcher over them; and You are a Witness to all things. (This is a great admonition and warning to the Christians of the whole world).
118. 'If You punish them, they are Your slaves, and if You forgive them, verily, You, only You, are the All-Mighty, the All-Wise.'
119. Allaah will say: This is a Day on which the truthful will profit from their truth: theirs are Gardens under which rivers flow (in Paradise) -- they shall abide therein forever. Allaah is pleased with them and they with Him. That is the great success (Paradise).
120. To Allaah belongs the dominion of the heavens and the earth and

all that is therein, and He is Able to do all things"
[al-Maa'idah 5:116-120].

Do you know there is an Italian song titled, "Shaddup You Face"? It was composed by Joe Dolce. I have it in an Italian-American songbook I bought at Amazon.com.

Thumbs Up for Amateur Radio:

Posted: 24 Mar 2012 06:15 PM PDT
http://www.eham.net/articles/27973

Malacca: With the internet, e-mailing, Skype-styled personal and family voice calls and not forgetting the indispensable cellphone extensively hogging the communication limelight, amateur radio (HAM radio) still continues to be tagged as an 'evergreen hobby' minus the loss of appeal. Testifying to this proud outlook are some 50 faithful and new members of the Malacca Amateur Radio Community (MARC) led by co-ordinator Heng Lye Huat. The group is also continually encouraging school and college students as well as young working professionals and retirees to join the fold and is scoring encouraging response. Established 30 years ago by the late William Tan, MARC which is affiliated to the Malaysian Amateur Radio Transmitter Society (MARTS) is now spearheaded by his wife Jenny Yong (9M2JS) and sons Eugene and Terrence. The group continues to thrive enthusiastically over related facets and aspects like constructing, experimenting and communicating using radio equipment.

Emergency Team Honors 2:

Posted: 24 Mar 2012 06:13 PM PDT
http://www.eham.net/articles/27972

The Shelby County Office of Preparedness Reserve Program, under the leadership of Community Emergency Response Team coordinator Eugene Jones, recently honored two of its outstanding members -- Willie Hollinger of Cordova and Alexander "Ham" Hilliard of Bartlett. Hollinger and Hilliard were applauded for going above and beyond to teach the public about the importance of disaster preparedness and disaster communications. A reserve since 1995, Hollinger serves as the public education and CERT officer. With more than 25 years of experience, he is known for his kindness, gentle humor, generosity, and depth of public safety knowledge. Hollinger has taught countless number of students how to survive disasters as a certified CERT instructor. He has created several videos of regional and national disasters that are shown during the CERT classes. He also has built many of the life-size props used during the hands-on portion of these classes.

Eliminating The Middleman in the Information Revolution:

Posted: 25 Mar 2012 05:44 PM PDT
http://www.eham.net/articles/27977

Rob Duerr gets his information about crime in Edmonton direct, unfiltered and unexpurgated -- from his bank of high-tech police scanners. EDMONTON -- While the multitudes muddle along with traditional information sources (newspapers, television, radio stations, or their dot-com equivalents), while the rest of us cop that next fix from the billion-brained beasts of Facebook and Twitter, the few, the proud, the very, very skeptical prefer to get their news in a somewhat less-conventional way. By eavesdropping on the cops. Rob Duerr earns his daily bread repairing and installing CB and Ham radios for trucking companies, by programming police scanners for local newsrooms in search of, well, the news. He then goes home and, you guessed it, listens to police scanners or talks on his ham radio with other guys who, often as not, also listen to police scanners. This guy is tuned in, turned on and plugged in. All day, every day.

//
Philip D. Ingraham, W2OSY (SK):

Posted: 25 Mar 2012 05:37 PM PDT
http://www.eham.net/articles/27976

Philip D. Ingraham (Phil) of 175 Deerland Ave., Painted Post, NY, expired on Friday, March 23, 2012, at Founders Pavilion in Corning, NY. He was born on December 11, 1916, at Hornell, NY, the son of Robert and Ratie Ingraham. His parents; two brothers, Robert and Lee; and a daughter, Sandi Slater, have predeceased him. Phil is survived by his loving wife, Beatrice (Bea) of 69 years; a nephew, Robert Ingraham of Vancouver, CA; a niece, Helen Francis of Silver City, NM; and a great nephew, Kevin Crowe, of Tucson, AZ. Phil graduated from Painted Post High School in 1936. He worked for Painted Post Post Office and Quigley's Drug Store prior to enlisting in the U.S. Army Air Corps in 1942. Phil married Beatrice Mathews in 1942 in St. Louis, MO, near Scott Field, IL, where he was stationed at the time. He served in the South Pacific for nearly three years. He was a M/Sgt. In the Army Airways Communications System in the U.S. Army Air Force and was honorably discharged in 1945. He was an Amateur Radio Operator (W2OSY). He was the first radio operator to be licensed in Painted Post by the Federal Radio Commission (now the Federal Communication Commission). This took place in 1934. Phil enjoyed life, he

loved people, ham radio, traveling, photography, children, animals, and birds. He enjoyed writing poetry over the years and had several poems published. He worked at Corning Radio and Corning Building Co. prior to being employed by Corning, Inc. He retired from Corning, Inc. in 1976 having been employed at their laboratories as an electronic technician in Corning and Sullivan Park. He had 20 years of active service before an accident whereby he had to take a disability retirement. He was a member and an Ordained Deacon in the First Presbyterian Church in Painted Post where he has been a member since 1945. He sang in the Church Choir, was at one time a member of the Barbershoppers, and loved playing the electronic organ at home. He was a member of the American Legion and the VFW in Corning.

Let me get this straight . . .
We're going to be "gifted" with a health care
plan we are forced to purchase and
fined if we don't,
Which purportedly covers at least
ten million more people,
without adding a single new doctor,
but provides for 16,000 new IRS agents,
written by a committee whose chairman
says he doesn't understand it,
passed by a Congress that didn't read it but
exempted themselves from it,
and signed by a Dumbo President whosmokes,
with fundingadministered by a treasury chief who
didn't pay his taxes,
for which we'll be taxed for four years before any
benefits take effect,
by a government which has
already bankrupted Social Security and Medicare,
all to be overseen by a surgeon general
who is obese,
and financedby a country that's broke!!!!!
'What the hell could possibly go wrong?'

"ith" regard, what YOU see or don't see is irrelevant, Jethro.
LOL!!!!!!!!

>can you point it out for the layman and describe in detail how you are
> doing your... magic?

Certainly, first we remain anonymous. Just like clueless faggot scott
salberg, Poop Snooky allowed his personal information to be directly
linked to his b-rate trolling. Mistake numero uno. It's a given that
Snookie doesn't want his ugly face plastered all over the toilets of
usenet for use as a target but now all he can do about it is whine
like a bitch. It's a good laugh at his expense.

> >Using Pope Snookie Butt-plugs fractured logic we should assume you are
> >one of his dirty socks because you post positive on his behalf....
>
> i was asking you a question. how does that make me pro snarkie?

His new name is "Poop Snookie" a fitting and deserved designation. The
fact that you won't use it is telling to say the least.

> ok. i'll enteratin

"enteratin" this..yer still too suo0pid to use a spell checker...

> your flight of fancy for a while. lets say i am 'one of his dirty socks', which one am
i,the >left, the right or the one he fucks when looking at pr0n? i'm sure an astute and on
the >ball chap like you, can tell me which i am.

If ya are a sock yer the bloomin' idiot who wears strange buttplug
looking devices on yer bald ass head and allows usenet to see the pics
and torment you because of it. Snookie needs to take that chrome dome
to a fortune teller. They can use it to see a vision....

BWAAAAAHAHAHAHAHAHAHAHAHAHA!!!!!

Hi,

I invite you to join http://www.coollectors.com, the World's Free Marketplace & Community for Collectors.

Coollectors allows Collectors to Buy, Sell, Exchange and Catalog a wide range of items from the world of Collections, all free of charge!

Coollectors is not only a dynamic and a vibrant marketplace but also a passionate community of collectors where users can communicate with other collectors of the same interest, exchange collectibles and ideas online.

Members also enjoy free community's sources: clubs, lists, articles & events

Thanks,
Jenny

MyGAREC 2012 is announced

Posted: 27 Mar 2012 07:35 AM PDT
http://forums.qrz.com/showthread.php?339762-MyGAREC-2012-is-announced&goto=newpost

MyGAREC 2012 is announced

The Global Amateur Radio Emergency Conference (GAREC), now coined as 'MyGAREC 2012', will be held at the Thistle Port Dickson Resort, Negeri Sembilan, from November 12 to 14. It attracts participants from around the world.

The first GAREC was in 2005 and is the premier annual event attended by those with an interest in amateur radio providing emergency communications during training exercises or in response to disasters.

MyGAREC 2012 has been timed to immediately follow the IARU Region 3 Conference in Vietnam (November 5 to 9) which has as its theme disaster relief communications.

General information including information on the venue, registration fees and the tentative agenda and the registration forms will be posted on the website www.mygarec2012.com by the end of this month.

This website will be updated frequently to keep all updated with the latest news and program changes.

Among the draft topics to be discussed are the HF Emergency Operating Procedure, the Future of GAREC, presentations from the three regions of the IARU and also some presentations from societies with recent disaster relief communications operations.

For more information you may also email info@mygarec2012.com

Apex Students Talk with Space Station:

Posted: 26 Mar 2012 06:06 PM PDT
http://www.eham.net/articles/27978

Last Wednesday, students at Salem Elementary in Apex came together in the school's multipurpose room for a once-in-a-lifetime event. Fourteen students, six of them winners of the school's science fair a few weeks earlier, made their way onto the stage for their turn to ask a question of astronaut Don Pettit 241 miles up and on the other side of the Earth aboard the International Space Station. The event, more than a year in the making, was made possible by NASA's Teaching from Space and the Amateur Radio on the International Space Station ARISS) project. Astronauts periodically take a few minutes out of their schedule to talk with students around the world about their research and what it is like to live and work in space. Last week Salem Elementary got its turn. This week students at California Polytechnic State University, San Luis Obispo, are scheduled to connect with astronaut Dan Burbank aboard the ISS.

http://feedproxy.google.com/~r/AmateurRadioNews/~3/PXOIj3TQJc8/easy_elsie.htm?utm_source=feedburner&utm_medium=email

Richard, SM2TOS, and some other radio amateurs, using the callsign SG2SNF,
will make an expedition to the Lancaster bomber, which crashed at Porjus
(WW Loc. JP97UA) in Sweden on 29 October 1944

>LOL!!!!!!!!

realy? a simple typo has you loling like a demented chimp. it must be nice being you, where such simple pleasures give such
joy and merriment. i bet you'd die from a heart attack laughing at a spoonerism, you cupid stunt. as for what i think being
irrelevant, why did you reply to me? replying to me is contradicting your claim.

>>can you point it out for the layman and describe in detail how you are
>> doing your... magic?
>
>Certainly, first we remain anonymous.

don't be silly, they're a bunch of elite hackers, you are a wannabe 'usenet legend' who is far from legendary, unless you
mean for your stupidity which is scrawled all over your reply to me. in which case, well claimed, old man.

> Just like clueless faggot scott
>salberg, Poop Snooky allowed his personal information to be directly
>linked to his b-rate trolling. Mistake numero uno.

it seems to have escaped your razor sharp intelect, like everything else, that snarky doesn't give a fuck what a bafoon
thinks of his countenance. the fact a pick of him was found by you or one of the retinue of tards you keep, prooves this. as
for b-rate trolling, you've posted an awfull lot about that, which, sadly for you, says quite the opposite. you are so deeply
hooked the hook is danglingling out of your kyber pass. if you had a brain, you'd cut the line and swim back off into usenet

obscurity and continue living your 'usenet legend' fantasy and keep your head down. you are not that bright as you will prove
by replying to me.

> It's a given that
>Snookie doesn't want his ugly face plastered all over the toilets of
>usenet for use as a target but now all he can do about it is whine
>like a bitch. It's a good laugh at his expense.

would that be mistake 'dos' as you started off strong and, somehow, got lost straight after you started trying to count. may
i suggest learning to count in english before you try a non navive tongue to you?

>> >Using Pope Snookie Butt-plugs fractured logic we should assume you are

>>
>> i was asking you a question. how does that make me pro snarkie?
>
>His new name is "Poop Snookie" a fitting and deserved designation. The
>fact that you won't use it is telling to say the least.

i see. you're one of those tiny minded dolts who believe if you are not with me/us you are against me/us. that says more
about you than i can be arsed to put into words, mr humphries. if you where any more close and/or small minded, you'd be
suffering from locked in syndrome.

>> ok. i'll enteratin

<the sound of a cavalcade of irony and pkb meters exploding into derisive laughter>
>"enteratin" this..yer still too suo0pid to use a spell checker...
</the sound of a cavalcade of irony and pkb meters exploding into derisive laughter>

i'm dyslexic, how will a spell checker help me, mr (as shown) expert in its use? please, don't let that stop your glow of
false superiority be overshadowed by your ignominy.

>> your flight of fancy for a while. lets say i am 'one of his dirty socks', which one am i,the >left, the right or the one he fucks when looking at pr0n? i'm sure an astute and on the >ball chap like you, can tell me which i am.
>
>If ya are a sock yer the bloomin' idiot who wears strange buttplug

so you cannot tell if i'm one of his socks or not. a complete lack of supprize there.

>looking devices on yer bald ass head and allows usenet to see the pics
>and torment you because of it. Snookie needs to take that chrome dome
>to a fortune teller. They can use it to see a vision....

i haven't seen any sign of your tormenting him working, i have seen the bastard son of stupidity, ignorance and arrogance
flinging shite in the hope that, by some shere chance, some will stick. beyond that. nada.

Welsh Politician to Visit Amateur Radio Station

Posted: 26 Mar 2012 11:42 PM PDT
http://forums.qrz.com/showthread.php?339737-Welsh-Politician-to-Visit-Amateur-Radio-Station&goto=newpost

Conservative North Wales Assembly Member, Mark Isherwood has been invited by MW1CFN to better understand modern amateur radio by visiting a welsh station.

Mr. Isherwood readily accepted the invitation, whereby it is hoped a positive image of our hobby can be put forward.

mark-isherwood.jpg

John Rowlands, MW1CFN says "Mark Isherwood is a very hard working politician and takes a genuine interest in the activities within his area. He is enthusiastic to find out more about a hobby that is not always as well-presented in the public imagination as it could be."

Mr. Rowlands continues "In particular, it is clear that permitted development rights within the planning system, despite some lobbying by the RSGB, have yet to accommodate the needs of the amateur community in the UK, despite the widespread popularity of the hobby. I hope Mr. Isherwood's visit will mark the beginning of a process to clarify and improve planning law for amateurs throughout the UK.

Mr. Isherwood's visit is currently being arranged with his office, and likely to take place in a few weeks' time.

AMSAT NEWS SERVICE

ANS-085

ANS is a free, weekly, news and information service of AMSAT North America, The Radio Amateur Satellite Corporation. ANS reports on the activities of a worldwide group of Amateur Radio operators who share an active interest in designing, building, launching and communicating through analog and digital Amateur Radio satellites.

Please send any amateur satellite news or reports to:

ans-editor@amsat.org

Volunteers are needed to help at the AMSAT booth at Dayton. Gould WA4SXM, is looking for volunteers to help man the AMSAT booth during the 2012 Hamvention. People are needed all 3 days for 2 hour shifts. Please send the days and times you are available to help as well as how many shifts you are willing to work via e-mail to wa4sxm at amsat.org. Monitor http://www.amsat.org/amsat-new/hamve...012/Dayton.php for the latest AMSAT at Dayton news and developments.In this edition:

* AMSAT-NA BOD Nominations Due

* ARISS Mentor Introduction at Dayton 2012

* NASA'S GRAIL MOONKAM Returns First Student-selected Lunar Images

* Satellite Operation Planned for UK Olympic Special Event Station

* Masat-1 Experiment Required Silent Mode for a Short Period of Time

* HAMSAT VO-52 User Reports Requested

* Satellite Shorts From All Over

* 2012 AMSAT-NA Symposium Update

* New Feature For SatPC32 Adjusts Doppler From Satellite Point of View

* ARISS Status Report - 19 March 2012

AMSAT-NA Board of Directors Nominations

It is time to submit nominations for the upcoming open seats on the AMSAT-NA Board of Directors. A valid nomination requires either one current Member Society, or five current individual members in good standing, to nominate an AMSAT-NA member for the position.

Three directors have terms expiring this year: Tom Clark, K3IO; Lou McFadin, W5DID; and Gould Smith, WA4SXM. The three nominees receiving the highest number of votes will be seated as regular board members with two year terms. The two nominees receiving the next highest number of votes will be seated as alternates for one year.

Written nominations, consisting of names, calls and individual signatures, should be mailed to: AMSAT-NA, 850 Sligo Ave #600, Silver Spring, MD, 20910. They must be received no later than June 15th. No other action is required.

Nominations may also be made by electronic means including e-mail, FAX, or electronic image of a petition. Electronic petitions should be sent to MARTHA@AMSAT.ORG or faxed to 301-608-3410, and also must be received by June 15th. If using any electronic submission, there is a second, verifying step:

ELECTRONIC SUBMISSIONS WITHOUT THIS SECOND, WRITTEN VERIFICATION ARE NOT VALID UNDER THE EXISTING AMSAT-NA BYLAWS. A verifying traditional written petition MUST be received at the AMSAT-NA office at the above address within 7 days following the close of nominations.[ANS Thanks AMSAT Secretary Alan Biddle, WA4SCA for the above information]

ARISS Mentor Introduction at Dayton 2012

AMSAT and ARRL are teaming up during the 2012 Hamvention to recruit new ARISS (Amateur Radio on the International Space Station) mentors. Friday and Saturday (May 18 & 19) at 4pm in the ARRL stage area AMSAT will explain the need for additional ARISS mentors and the requirements and responsibilities needed to help provide a reliable conversation between astronauts and selected schools or groups. We encourage anyone interested in helping make future school contacts with the ISS successful to please attend.

[ANS Thanks the ARISS Team for the above information]

NASA'S GRAIL MOONKAM Returns First Student-selected Lunar Images

WASHINGTON -- One of two NASA spacecraft orbiting the moon has beamed back the first student-requested pictures of the lunar surface from its onboard camera. Fourth grade students from the Emily Dickinson Elementary School in Bozeman, Mont., received the honor of making the first image selections by winning a nationwide competition to rename the two spacecraft.

The image was taken by the MoonKam, or Moon Knowledge Acquired by Middle school students. Previously named Gravity Recovery And Interior Laboratory (GRAIL) A and B, the twin spacecraft are now called Ebb and Flow. Both washing-machine-sized orbiters carry a small MoonKAM camera. Over 60 student-requested images were taken aboard the Ebb spacecraft from March 15-17 and downlinked to Earth on March 20.

"MoonKAM is based on the premise that if your average picture is worth a thousand words, then a picture from lunar orbit may be worth a classroom full of engineering and science degrees," said Maria Zuber, GRAIL mission

principal investigator from the Massachusetts Institute of Technology in Cambridge, Mass. "Through MoonKAM, we have an opportunity to reach out to the next generation of scientists and engineers. It is great to see things off to such a positive start."

GRAIL is NASA's first planetary mission to carry instruments fully dedicated to education and public outreach. Students will select target areas on the lunar surface and request images to study from the GRAIL MoonKAM Mission Operations Center in San Diego.

The MoonKAM program is led by Sally Ride, America's first woman in space, and her team at Sally Ride Science in collaboration with undergraduate students at the University of California in San Diego. More than 2,700 schools spanning 52 countries are using the MoonKAM cameras.

"What might seem like just a cool activity for these kids may very well have a profound impact on their futures," Ride said. "The students really are excited about MoonKAM, and that translates into an excitement about science and engineering."

Launched in September 2011, Ebb and Flow will answer longstanding questions about the moon and give scientists a better understanding of how Earth and other rocky planets in the solar system formed.

NASA's Jet Propulsion Laboratory in Pasadena, Calif., manages the GRAIL mission for NASA's Science Mission Directorate in Washington. GRAIL is part of the Discovery Program managed at NASA's Marshall Space Flight Center in Huntsville, Ala. Lockheed Martin Space Systems in Denver built the spacecraft.

To view the student-requested images, visit: http://images.moonkam.ucsd.edu

For more information about MoonKAM, visit: https://moonkam.ucsd.edu

For more information about GRAIL, visit: http://www.nasa.gov/grail

[ANS thanks NASA and Michael Williams, K9QHO for the above information]

Satellite Operation Planned for UK Olympic Special Event Station

This week John Warburton, G4IRN announced The Radio Society of Great Britain will activate two special event callsigns to celebrate the London 2012 Olympic and Paralympic Games:

2O12L (Two Oscar One Two Lima) from London, England2O12W (Two Oscar One Two Wales) from Barry, Wales

The London station, 2012L will be active through the duration of the Games, located at the historic Eltham Palace, south-east London on 160m-2m, all modes. More information on the web site: http://www.2O12L.com

The Welsh station 2O12W will also be active on all bands from 160m to 23cms and all modes including SSTV and satellite from Whitmore Bay, Barry Island, Vale of Glamorgan, Wales. More information on web site: http://www.2O12W.com.

2012L and 2012W go on the air on 27th July 2012.

[ANS thanks The Radio Society of Great Britain and Southgate News for the above information]

Masat-1 Experiment Required Silent Mode for a Short Period of Time

Masat-1 (MO-72) recently has been switched to a 'silent mode' on March 16, March 21, and March 22 to perform long term, sensitive electromagnetic measurements which require the switching off the satellite's transmitter. In silent mode, all RF transmission from the satellite is turned off, while the satellite receiver makes the required measurements. After these experiments regular telemetry transmission resumed operation.

MO-72 Call sign: HA5MASAT

TX frequency: 437.345 MHz

Modulation: CW (120 char/min.), 2-GFSK (625 and 1250 bit/s) TX

power: 100 and 400 mW

Soundcard software to capture and decode the GFSK telemetry can be downloaded from: http://cubesat.bme.hu/en/radioamatoroknek/ The latest keplerian elements are also available on this site.

[ANS thanks the Masat-1 Team and AMSAT-UK for the above information]

HAMSAT VO-52 User Reports Requested

AMSAT-India Secretary Nitin, VU3TYG says the user feedback form (in Word format) requested by VO-52 controllers has been posted on the web for download from: http://www.amsatindia.org/reports/VO-52-Feedback.doc

HAMSAT VO-52 controllers at ISRO thanked amateur radio operators for the reports received after VO-52 was reactived with the Dutch Transponder. They are in the process of documenting anomaly analysis and Transponder 2 Switch ON' report containing the feedback from users.

Reports are requested to be sent in the Word format as attachments to e-mail sent to: tprangan@istrac.org and copied to wmy@isac.gov.in.

[ANS thanks AMSAT-India Secretary Nitin, VU3TYG and Mani, VU2WMY at India ISRO Satellite Centre for the above information]

Satellite Shorts From All Over

AMSAT to facilitate student satellite contacts at Dayton. All students attending the 2012 Dayton Hamvention are encouraged to come by the Satellite Demonstration Area just outside of the Ball Arena entrance and make a contact using the amateur satellites. There will be AMSAT volunteers there to explain how to make the contacts and during actual satellite passes will try to get as many students as possible to complete contacts. There are lists of satellite pass times in the satellite demonstration area and at the AMSAT booth (BA444-BA449). (Gould, WA4SXM)
NASA released a new narrated animation depicting the planned 2014 launch of

the Orion spacecraft on the Exploration Flight Test-1 (EFT-1) mission to a 3600 mile altitude orbit:http://tinyurl.com/OrionOrbitTest (YouTube) Full article at: http://tinyurl.com/OrionArticle (UniverseToday)
Paul, 2E1EUB says his next mobile satellite operations as 2M1EUB from his van will be starting March 24 for 7 days from the east coast of Scotland. Main operations are planned for AO-7 Mode A/B and other satellites as available. Paul will post his latest information on amsat-bb and also on the lookup at QRZ.com for 2M1EUB.
The Project Blue Horizon 6 high-altitude transatlantic balloon flight took off on Friday, March 23 at 2300 EST (0300 Saturday UT) from Owego, NY transmitting on 7.1023 and 10.1466 MHz CW with the N2XE call sign and 144.390 MHz FM APRS using the KD2AUD call sign. Please send reports via e-mail to pbh18.data@gmail.com or manually enter received data points at http://www.projectbluehorizon.com/ More information is available on their web page.
Congratulations to Rick Walter, WB3CSY, for earning VUCC Satellite certificate #228 with 165 confirmed grids. Rick wrote, "I would like to thank the many satellite operators who continually take time to stop during their travels and give us rare grids. It would be much more difficult to obtain this prestigious award without their help."
The next Hudson Valley Satcom Net is Thursday March 29, 8:00PM EDT (UTC-4) on the 146.97 MHz Mt. Beacon ARC Repeater and also on the N2EYH-L Echolink Node. More information at: http://www.hvsatcom.org and http://www.wr2abb.org/ (Stu, WA2BSS)
Watch the BBC video of UKube-1, planned to launch in 2013: http://www.bbc.co.uk/news/uk-scotlan...-west-17439236 UKube-1 will carry a set of AMSAT-UK FUNcube boards that will provide a 435/145 MHz linear transponder for SSB/CW amateur radio communications. See also: http://www.uk.amsat.org/5933
John, K8YSE reported that Yuri, UT1FG/MM, who has been so active on the birds may be off the air for a short time. He is navigating the St. Lawrence Seaway and has been too busy to operate on the satellites. There are many inspection requirements for a ship coming into the Great Lakes and his duties are such that he does not have much free time. He will be in Montreal shortly. All of his equipment is working fine. Yuri will be operating as time permits.
The Winter 2012 TAPR Packet Status Register Journal now available for download: http://www.tapr.org/psr/psr117.pdf. You can download previous editions from http://www.tapr.org/psr.html. This quarterly Journal is full of Technical, Non-Technical and User Digital information and articles.
Watch a video of time lapse images from the ISS showing how stars appear from space: http://vimeo.com/ajrclips/starsfromspace. A jaw dropping flight of the ISS over the aurora can be viewed at: http://tinyurl.com/AuroraGreatLakes
USAF and Lockheed have Satellite Problems Too: http://tinyurl.com/milsat-rescue At least their problems had a happy ending.
New Echolink Net. Saturday evenings at 8pm Eastern. The NET is titled "SATCHAT". Check in at the AMSAT Conference on Echolink and join the conversations about satellites, ask questions and hear what other people in the country are doing for satellite activity. It is hosted by Vince Waelti,

K9TSU. Stop by and add your experiences to the group.

[ANS thanks everyone for the above information]

Symposium 2012 Monday Trip to the Kennedy Space Center

Those attending the 2012 AMSAT Symposium and interested in a Monday Trip (Oct 29) to the Kennedy Space Center please contact Martha via email: martha at amsat.org.

The trip will include a round trip bus from the hotel and entrance to the Space Center. The cost will be about $100. This is a wonderful experience for those that haven't been and for those that have been multiple times. We need to get an idea of how many will participate to select the correct bus.

[ANS Thanks Gould, WA4SXM for the above information]

New Feature For SatPC32 Adjusts Doppler From Satellite Point of View

Erich, DK1TB has added a new feature into SatPC32 V12.8b which will allow adjustment for doppler shift between two separate stations so each will appear to be on the same frequency. From a ground station point of view each station will see a different doppler shift unless they are located physically near each other. What is desired is that both stations will appear on the same frequency from the satellite receiver's point of view.

The whole idea of doppler correction is to be at a constant frequency within the satellite receiver passband. To do that you have to adjust your uplink frequency constantly. And you have to adjust your downlink frequency to continue to hear yourself or someone else using full doppler correction.

Erich has now added the option of seeing the frequency you are on at the satellite receiver. This is a common frame of reference so if you tell someone you'll be on 435.845 at the satellite, they can be on that same frequency even though your terrestrial dial frequencies will be much different. Just adjust your receiver or use the up/down buttons in SatPC32 to set your frequency shown in the "Sat" window. That frequency will remain constant as your uplink and downlink are controlled by SatPC32.

Staying at a constant frequency at the satellite allows many stations to share the bird without drifting into each other. And being able to know exactly where you are in the passband without doing the calculation in your head gives you more time to concentrate on making a successful QSO.

This feature is implemented by loading a patch file for SatPC32, V12.8b which can be found in the "downloads" link at: http://www.dk1tb.de - Scroll down to Section 7, Patches.

Erich, DK1TB donates the proceeds from the sale of SatPC32 to AMSAT. When you purchase this software you are helping AMSAT. You can download the software from the SatPC32 website at: http://www.dk1tb.de/ A CD-ROM with the software is available from the AMSAT Store: http://www.amsat-na.com/store/item.php?id=100017 To activate the downloaded version of the program, you can purchase a registration code via the AMSAT

online store or by calling the AMSAT office. See:
http://www.amsat-na.com/store/item.php?id=100020

[ANS thanks John Papay, K8YSE for the above information]

(ARISS) Status Report March 19, 2012

1. Upcoming School Contacts

Centre de Formation de la Base Airienne de Payerne, Switzerland had an Amateur Radio on the International Space Station (ARISS) contact on Wednesday, March 21 at 08:39 UTC. The contact was held in the museum "Clin d'Ailes", located on the Payerne Swiss Airforce Base that has on display military aeronautics exhibits from the second half of the 20th century. Mr. Claude Nicollier, HB9CN, who is the first Swiss astronaut and president of the Museum Foundation, attended the event. The Clin d'Ailes Swiss Air Force Museum Ham Radio Club, holding callsigns HB4FR and HB9SPACE, set up its radio for the contact. Students launched a stratospheric balloon equipped with video and photo cameras and sensors and beacons two weeks prior to the event. After the ARISS contact, they presented the videos, photos and the analysis of the recorded sensor data.

Salem Elementary School in Apex, North conducted an ARISS contact on Wednesday, March 21 at 14:09 UTC via station VK5ZAI in Australia. This contact is part of a comprehensive education plan which will pique students' interest in Science, Technology, Engineering and Math (STEM).

2. Liberty Junior High Radios Don Pettit on ISS

Students attending Liberty Junior High School in Burbank, Illinois experienced a very successful Amateur Radio on the International Space Station (ARISS) contact on Wednesday, March 14. Over 800 students, teachers and guests were present as students put their questions to astronaut Don Pettit, KD5MDT on ISS. The ARISS contact highlighted the school's comprehensive education plan covering Science, Technology, Engineering and Math (STEM) subject matter. Other activities students participated in included investigating thermal properties of different materials, building models of the ISS and exploring the cast distances of space and the effect of distance and radio waves.

3. Belgium Contact Successful

An Amateur Radio on the International Space Station (ARISS) contact was held on Friday, March 16 between Middenschool de Regenboog Bree in Bree, Belgium and on-orbit astronaut Andri Kuipers, PI9ISS. A newly licensed 14 year girl operated the radio during the event while students had all 15 of their prepared questions answered. The contact was carried out as part of a curriculum covering the micro-gravity environment, history of manned spaceflight, commercial spaceflight and the construction of the ISS.

4. Leone Acciaiuoli Students Question ISS Astronaut

On Sunday, March 18, Dan Burbank, KC5ZSX fielded ten questions from youth attending the Istituto Tecnologico Statale Trasporti e Logistica "Leone

Acciaiuoli" in Ortona, Italy via an ARISS contact. Approximately 200 people were in attendance, including representatives from two television stations. AMSAT-Italia also provided coverage, streaming video on the Internet. The contact complemented science courses taught at the school such as Navigation, Astronomy, Mathematics, Physics and Satellite Communications and was a featured activity during the International Day of Planetaria.

5. ARISS-U.S. Schools Selected

The NASA Teaching From Space office received 27 U.S. proposals for ARISS contacts that will be scheduled during the second half of this year. The U.S. Selection Committee reviewed the proposals and selected 18 schools for these contacts. The schools will be notified of their status earlythis week.

[ANS thanks Carol, KB3LKI, for the above information]

/EX

In addition to regular membership, AMSAT offers membership in the President's Club. Members of the President's Club, as sustaining donors to AMSAT Project Funds, will be eligible to receive additional benefits. Application forms are available from the AMSAT Office.

Primary and secondary school students are eligible for membership at one-half the standard yearly rate. Post-secondary school students enrolled in at least half time status shall be eligible for the student rate for a maximum of 6 post-secondary years in this status. Contact Martha at the AMSAT Office for additional student membership information.73,

This week's ANS Editor,

Dee Interdonato, NB2F

Nobody can prove 100 percent whether somebody is using a sock or not
unless they tell you in no uncertain terms. That's why Poopy is only
making a fool out of himself when he accuses Bob and Carol of using
socks, especially when there is no past history of bandc using
socks.

It actually doesn't matter who you are because it's quite obvious if
you aren't Pope Poop you have your head shoved squarely up his
fartbox.

Fisher's Ghost Amateur Radio Club Hosting Exhibition at Library:

Posted: 27 Mar 2012 05:54 PM PDT
http://www.eham.net/articles/27984

Did you know there was such a thing as social networking long before Facebook or Twitter were even dreamed of? Amateur radio enthusiasts have been using electronics to communicate with people across the globe for nearly a century. The Fisher's Ghost Amateur Radio Club will be displaying a range of electronic devices at Campbelltown Library until March 31. Club treasurer Lynn Kelly said the group's members had provided a grand collection of about 30 radio devices dating back as far as the 1930s.

//
New Ham Radio Club Hosts 'Field Day' March 31:

Posted: 27 Mar 2012 05:53 PM PDT
http://www.eham.net/articles/27983

When disaster strikes and traditional communications, like telephones, are knocked out, ham radio operators are among the first to step in to fill the gap. About 30 area operators have started a new club, called the Grayson County Amateur Radio Society. It will be hosting a field day from 8 a.m. to 1 p.m. Saturday, March 31, at the merchants' building at the Grayson County Fairgrounds. Club secretary Roy Herman said the primary goal for the field day is for members to practice emergency preparedness. But it's also a chance to demonstrate what they do, and what can be done, with ham radios and a chance for those interested in becoming operators to ask questions and get some hands-on time with equipment. "This is a great opportunity for people to get hands-on experience, especially young people," he said. Besides having a radio set up for local communications, the operators may be able to reach their international counterparts depending on weather conditions, he added.

//
Getting The Word Out When All Else Fails:

Posted: 27 Mar 2012 05:51 PM PDT
http://www.eham.net/articles/27982

In times of emergencies, seconds and minutes matter. It's especially true in an area where vast forests, high ridges and low-lying areas can cripple normal radio and cell phone reception. And in turn, delaying or losing

contact can be the difference between life and death. That's about to change at Cumberland Falls State Resort Park, thanks to a United States Army MARS radio repeater which will be permanently installed within two to three months. The repeater will be placed on top of the park's water tower, which is located near the Dupont Lodge. Being atop one of the park's highest places will give an outstanding signal, and will link the region to state Emergency Management headquarters in Frankfort. In addition, the repeater will connect with trained amateur radio, or "ham radio" operators in the region, which can be used not only for severe weather spotting, but to alert the park on local, state and national emergencies. An added bonus will be the repeater's use in getting out emergency information on incidents affecting the park.

Roger and Lloyd have won some awards as the Mark Morgan Fan Club.

Golden Killfile August 2006 (as "an old friend")
Busted Urinal September 2008
Golden Killfile October 2008

AC commented the other day that it is amazing these
shit freaks haven't won more awards.

Not so. You were the cruel party, not Steve.

And that is why you are to this day held in such low esteem.

1907. My husband is on medication.

Newsgroup: rec.radio.amateur.policy
Date: 2012-03-29 05:43:44 UTC
From: Gav Morgan <"Jewish Wittch"@Houghton.iud>
Message-ID: <5gtibj.m5s.19.1@news.alt.net>
Source record: 251005

My husband, Mark Morgan, is not always responsible for his comments to this or any other group.
I have to stand in support of him, as any good wife would do, and would be expected to do.

Mark is under a Doctor's care and, as such, is required to take several prescriptions each and every day. Sometimes, when Mark misses a prescribed pill, he doubles up. This causes him, on occasion, a bit of confusion.

I would appreciate it if you detractors would show a semblance of compassion for my husband. He means well, but can become easily confused. His is a fragile Ego. He doesn't deal well with controversy.

Thank you for considering this request.

Southgate Amateur Radio News RSS Feed

//
Tony's 10-metre band report

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/Ru2xVhgkN4Q/march_29.htm?utm_source=feedburner&utm_medium=email

Not similar to last week, early week poor but from Wednesday OK and at the
weekend blitzing!

//
NTIA: No objection to additional Data Modes on 60 meters

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/KyHnmBMz8gQ/ntia_clarifies_position_on_60_meter_digital_privileges.htm?utm_source=feedburner&utm_medium=email

In response to requests for clarification from the ARRL, the National
Telecommunications and Information Administration (NTIA) has confirmed that
it has no objection to the use of a broader range of data emissions by
amateurs on the five 5 MHz frequencies on 60 meters

//
Operators wanted for Campbell Island DXpedition

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/Uc4YKkxdSDs/dxpedition_to_campbell_island.htm?utm_source=feedburner&utm_medium=email

The Hellenic Amateur Radio of Association of Australia (HARAOA) is
organising a DXpedition to ZL9 Campbell Island (OC-037) New Zealand between
November 17th and November 30th 2012

//
Ottawa relaxes rules for personal antennas

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/fqDIBe8jzc8/city_relaxes_rules_for_personal_antennas.htm?utm_source=feedburner&utm_medium=email

A compromise between the city and amateur radio enthusiasts means they’ll
get a bit more freedom to put up private antennas on their houses and in
their yards, Ottawa city council agreed Wednesday

//
QB50 Newsletter

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/bAjcEr_5d5k/qb50_newsletter.htm?utm_source=feedburner&utm_medium=email

The QB50 project is planning the largest ever deployment of CubeSats and
their March newsletter is now available for download

//
All Ireland 446MHz Activation

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/5oSzFiOtvVs/all_ireland_446mhz_activation.htm?utm_source=feedburner&utm_medium=email

On Monday 9th April 2012 at 2PM, all over Ireland, people will get to high
places such as hill tops to try to DX using PMR 446 radios

//
Mission success for PBH-18 balloon

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/RSV60OJ7Dqo/mission_success_for_pbh18_balloon.htm?utm_source=feedburner&utm_medium=email

The amateur radio balloon flight PBH-18 has been declared a success

//
ESA - CubeSats satellite operations update

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/FSKKKjFW0jg/esa_cubesat_update.htm?utm_source=feedburner&utm_medium=email

ESA have issued an update on the amateur radio CubeSats that were launched
on February 13

//
Student CubeSats BEESAT-2 and BEESAT-3

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/5obzNayY4Ac/student_cubesats_beesat2_and_beesat3.htm?utm_source=feedburner&utm_medium=email

Two CubeSats, built by students at the Technical University of Berlin, are
expected to launch in the 4th quarter of 2012 from Baikonour into a 575km
circular 65 degree orbit

//
Exercise with Camp Murry, Washington and Alberta

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/fNbLxWfoDFQ/exercise_with_camp_murry_washington_and_alberta.htm?utm_source=feedburner&utm_medium=email

Doug Howard, VE6CID, Southern Alberta District Emergency Coordinator (DEC),
has details of an exercise planned for this Saturday

Correct, and to give awards without 100 percent surety shows the
ignorance of this incarnation of auk.

>That's why Poopy is only
> making a fool out of himself when he accuses Bob and Carol of using
> socks, especially when there is no past history of bandc using
> socks.

We've said it before and we'll say it again. We DO NOT use
sockpuppets. We challenge ANYBODY to present proof that we use or have
used sockpuppet nyms.

Why would we give the smackdown credit to an unknown entity? Our b&c
nym is widely known all over usenet and we enjoy the prestige or
perhaps notoriety it brings by using a version of it at all times when
tormenting/humiliating the retards and clueless idiots like Poop
Snookster..

```
**********************************************
The ARRL Letter

Published by the American Radio Relay League
**********************************************

March 29, 2012

Editor: S. Khrystyne Keane, K1SFA <k1sfa@arrl.org>

ARRL Home Page <http://www.arrl.org/>ARRL Letter Archive
<http://www.arrl.org/arrlletter/>Audio News
<http://www.arrl.org/arrlletter/audio/> + Available on ARRL Audio News
<http://www.arrl.org/arrl-audio-news>.

==> + ON THE AIR: NTIA -- NO OBJECTION TO ADDITIONAL DATA MODES ON 60
METERS

In response to requests for clarification from the ARRL, the
National Telecommunications and Information Administration (NTIA) has
confirmed that it has no objection to the use of a broader range of
data emissions by amateurs on the five 5 MHz frequencies on 60 meters.
ARRL's original understanding was that the NTIA preferred that the use
of 2K80J2D emission be limited to Pactor III. The NTIA now says that
that is not the case. Read more here
<http://www.arrl.org/news/ntia-no-objection-to-additional-data-modes-on-60-me
ters>.

==> + ON THE AIR: ONLINE DXCC APPLICATION TO DEBUT APRIL 2

Beginning April 2 at 12:01 AM EDT (0401 UTC), the ARRL's new Online
DXCC tool will be ready to accept applications, allowing hams to supply
the data from traditional paper QSLs in a digital form to apply for a
new DXCC award or endorsement. Submitting a DXCC application using
Online DXCC is easier than making a paper application, saving both time
and money. Read more here
<http://www.arrl.org/news/online-dxcc-application-to-debut-april-2>.

==> + JOE WALSH, WB6ACU, IS AN ANALOG MAN

Grammy Award winning rock-and-roll legend Joe Walsh, WB6ACU, returns
with Analog Man, set to be released June 5. This is Walsh's first solo
album since 1992's Songs for a Dying Planet. According to Walsh's
website, Analog Man is both modern and timelessly soulful, packed with
Walsh's wit, charm and chops; it delivers an incredibly raw and
intimate sound. "It's been 20 years and I have a lot to say," Walsh
```

explained. "These songs [on Analog Man] come from the heart."

No stranger to the analog way of life, Walsh -- an ARRL Life Member -- enjoys operating on 75 meters AM. AM -- or amplitude modulation -- has been around the amateur bands since the 1930s. Its advocates say that AM offers a warm, rich audio quality that provides for more personal interaction and that AM's simplicity circuit design encourages hands-on restoration, modification and homebrew construction to an extent no longer found among contemporary radios. Many hams who operate AM say they enjoy the simple, roomy electrical and mechanical designs of the older radios, claiming that they can more easily be modified and tinkered with than their modern counterparts. Other enthusiasts claim that these vintage radios sound better than their silicon descendants, saying that the tube audio from vintage gear is "warmer" and more aesthetically pleasing than the audio produced by the typical modern transceiver. Read more here
<http://www.arrl.org/news/joe-walsh-wb6acu-is-an-analog-man>.

==> + ARRL HQ: TWO POSITIONS OPEN AT ARRL HQ

The League is currently looking to fill two open positions at ARRL Headquarters in Newington. One position is in the Membership and Volunteer Programs Department and the other is in the Education Services Department. Travel is required for these full-time positions.

MVP Awards and Programs Assistant

This person who fills this position will assist in all activities found within the MVP Department, with initial priority given to assisting with Logbook of The World (LoTW
<http://www.arrl.org/logbook-of-the-world>) support functions. Other duties include supporting the DXCC and other awards programs, W1AW station operations and contesting program support. Candidates should hold an Amateur Extra class license, participate in contests and DXCC, and be an experienced user of LoTW. A Bachelor's degree is preferred. Click here
<http://www.arrl.org/files/file/About%20ARRL/Employment/Awards%20and%20Programs%20Assistant%20%282%29.pdf>
for a job description.

Education Services Instruction and Resource Coordinator

The person who fills this position will, among other duties, identify, review and organize resources needed by license instructors, teachers and Scout leaders, develop curricula/lesson plans, instructional media for instruction of ham radio license and other ham radio related topics (including radio science and basic electronics topics for use by classroom teachers) and develop an orientation course for license instructors and materials for instructor training. Candidates should hold an Amateur Extra class license (or be willing to achieve this within one year from date of hire) and a wide range of operating experience. Experience with instructional media is a plus. A Bachelor's

degree, along with teacher certification (and/or experience as a teaching or training professional) with Amateur Radio, electronics, science or technology subjects is required. Click here <http://www.arrl.org/files/file/About%20ARRL/Employment/FT%20Ed%20Svcs%20Instruction%20and%20Resource%20Coordinator-announce%20Mar12%20%282%29.pdf> for a job description.

How to Apply

To apply, please send your cover letter and resume via e-mail <mlevesque@arrl.org>, or complete the application <http://www.arrl.org/files/media/News/Revised_Employment_Application.pdf>, print it out and mail it with your resume and cover letter to Monique Levesque, ARRL, 225 Main St, Newington, CT 06111. You can also fax your application, cover letter and resume to 860-594-0298. Please include your salary history and salary requirements. The ARRL is an equal opportunity employer.

==> + QST AUTHOR SERIOUSLY INJURED

Commander Richard Paton, USCGR (Ret) -- author of "Radio's Role in the Titanic Disaster" in the April 2012 issue of QST -- was seriously injured in a motorcycle accident in Tolland, Connecticut on March 22. He is in the Intensive Care Unit at Hartford Hospital.

"It was a great shock to hear the news," said ARRL Chief Executive Officer David Sumner, K1ZZ. "Dick and his wife Carol live in the same town that I do and sit right behind me at church. I knew nothing about his article until it was in print, because I was in Geneva attending WRC-12 while the April QST was being put together. My congratulatory e-mail reached him while he and Carol were on a cruise in the Pacific. The accident occurred soon after they returned home."

Commander Paton, 67, was injured when his motorcycle collided with an automobile. At last report the accident was still under investigation.

"While Dick is not a radio amateur, his extensive maritime experience and inquiring mind combine to lead him to be curious about many of the things that intrigue us as hams," Sumner said. "I hope ARRL members who enjoyed his contribution to QST will join me in keeping Dick in their thoughts and prayers as he fights to recover."

==> SOLAR UPDATE

Tad "Never did Sun more beautifully steep <http://www.poets.org/viewmedia.php/prmMID/15877>" Cook, K7RA, reports: Eight new sunspot groups appeared this week, but the average daily sunspot number declined four points to 71.1, while the average daily solar flux rose by less than two points to 103.7. On March 22, three new sunspot groups appeared, numbered 1441, 1442 and 1443. Two more groups appeared on Friday, 1444 and 1445, while 1442 vanished from view. On March 24, group 1441 disappeared, and on March 25 new group 1446 emerged. On March 26, groups 1440, 1443 and 1446 faded away, but

1442 -- not seen since four days earlier -- re-emerged. On March 27, group 1444 disappeared and 1447 appeared, and on March 28 new group 1448 arrived. For the short term, planetary A index is predicted to be 10 on March 29, 5 on March 30-April 9, then 12 on April 10, and back to 5 on April 11-12, then 15 and 10 on April 13-14, followed by 5 on April 15-23. The solar flux prediction shows flux values of 110 and 115 on March 29-30, 120 on March 31-April 2, 125 on April 3-5, and a big jump to 140 on April 6. On April 7-11, the predicted solar flux is 130, 125, 120, 110 and 105. On April 12-15, the predicted solar flux is 100. It then goes to 105 and 110 on April 16-17, and back to 100 on April 18-21. Another broader peak of 140 is predicted for May 1-3. Look for more information on the ARRL website on Friday, March 30. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by William Wordsworth's Composed upon Westminster Bridge, September 3, 1802 <http://en.wikipedia.org/wiki/Composed_upon_Westminster_Bridge,_September_3,_1802>.

==> + ARRL TO CLOSE IN OBSERVANCE OF GOOD FRIDAY

ARRL Headquarters will be closed in observance of Good Friday on Friday, April 6. There will be no W1AW bulletin or code practice transmissions <http://www.arrl.org/w1aw-operating-schedule> that day. ARRL Headquarters will reopen Monday, April 9 at 8 AM Eastern Daylight Time. We wish everyone a safe and enjoyable holiday weekend.

==> LUXEMBOURG ISSUES STAMP TO CELEBRATE 75 YEARS OF AMATEUR RADIO

Founded in 1937, the Réseau Luxembourgeois des Amateurs d'Ondes Courtes (RL <http://www.rlx.lu/index.html>) -- that country's IARU Member-Society -- is celebrating its 75th anniversary. In honor of this milestone, Luxembourg's Entreprise des Postes et Télécommunications (P&TLuxembourg) has issued a .60 € postage stamp <http://www.pt.lu/portal/lang/en/Philatelie/stamps/pid/4292> (about 80 cents in US currency); P&TLuxembourg is that country's government owned corporation for mail and telecommunications. This is one of three commemorative stamps issued by Luxembourg in 2012 .

==> THIS WEEK IN RADIOSPORT

This week:

- March 31-April 1 -- Missouri QSO Party
- April 1 -- UBA Spring Contest (SSB)
- April 3 -- ARS Spartan Sprint

Next week:

- April 6 -- NCCC RTTY Sprint
- April 7 -- LZ Open 40 Meter Sprint Contest; PODXS 070 Club PSK 31 Flavors Contest (local time)

- April 7-8 -- QRP ARCI Spring QSO Party; SP DX Contest
- April 11 -- NAQCC Straight Key/Bug Sprint
- April 11-12 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Tom Evans (aka bit rot, aka TommyTard, aka Blobby ShitKnot) is a kook.

He's threatened to:
torch Greg Hall's boat (but he's too much of a chickenshit to take action);

threatened to call the cops to Greg Hall's boat by filing a false police report (but he's too much of a coward to do so);

threatened to post Greg Hanson's personal information (where is that, by the way, TommyTard? Still manufacturing it?);

tried to post yer personal information (but failed spectacularly);

harasses Emmett non-stop, even when Emmett's not posting (but he's not an obsesso, and if you don't believe that, just ask him. He'll tell you he's not. In 1000 posts or more. All of them about Emmett.);

harasses Greg Hall non-stop, because he's stupid enough to believe everyone who disagrees with him is Greg Hall;

is netkkopping and trying to TOS anyone who looks crosswise at him (but has thus far failed in TOS'ing anyone, despite his crowing claims, because he's an impotent, frothing kook ignored by all NNTP admins);

has claimed that I am Greg Hall *and* some other unidentified person (at the same time, and both wrong), living in Florida *and* New Zealand *and* Australia (at the same time, and wrong on all three counts);

and he posted well over 2000 meltdown rants, by his own admission (but he's not melting down in a weeks-long, froth-belching, donkey blowing tirade. Just ask him, he'll tell you. In 2000 posts or more.).

When FNVWE Peter J. Ross told him to quit frothing, then plonked him, that was a big ol' size-16 boot to his crotch. TommyTard's still picking bits of

boot from his vagina.

--

Bill Keesing's Life Phrase:
"Put the key of despair into the lock of apathy. Turn the knob of mediocrity
slowly and open the door of despondency - welcome to my life."

And it's in a flaming tail-spin. Fasten yer seatbelt and put yer tray
upright, Bill. This might be a bumpy ride.

Porksword Organthruster, that low-life stalking fucknut who has made it his
life's work to harass the half-retarded half-midget Emmett Earl Gulley, Jr.
(and does a half-assed job of it) online is actually Bill Keesing from
Aukland, NZ.

Porksword Organthruster's curriculum vitae:
http://groups.google.com/groups/search?&as_ugroup=alt.usenet.kooks&as_uauthors=Porksword+O
rganthruster&safe=off

Bill Keesing
Flat 16, 5 Edgars Road, Grey Lynn\Westmere (Cox's Bay), Auckland, NZ 1002
+64 9 376 0106
zz9pluralzalpha@orcon.net.nz

Here's the proof:

First, we'll look at Bill Keesing's post to usenet as Porksword
Organthruster, in which he outed himself. This is a long post, so we'll
include a link to it, and you can peruse it at your leisure.
http://groups.google.com/group/alt.usenet.kooks/msg/0646a49cb01010c4
Message-ID: <1646859.huUyflWWV1@FishhookU>

Now, the above full post is a bit hard to read and follow, so let's dig out
the salient points. This, you should read carefully, and laugh about
heartily.
(Note that I've removed the 'at' (@) sign from email addresses, so they are
fully readable in Google Groups.)

Ok, in the above snippet of the above whole post, we see Alison Kerr (Bill Keesing's landlord) admonishing him for having a smelly apartment that's stacked full of boxes, and is setting up a date and time for an inspection to be sure Bill Keesing obeys the landlord's cleanliness rules.

Now, Bill Keesing has changed the WHOIS of his domain since outing himself (help.geek.nz, taken from the email address in the post from Porksword Organthruster (AKA Bill Keesing) above):
http://whois.domaintools.com/help.geek.nz
domain_datelastmodified: 2011-03-29 T16:24:12+13:00 <<=== NOTE DATE
registrant_contact_name: Bill Keesing

registrant_contact_address1: 28 The Warehouse Way
registrant_contact_address2: Northcote
registrant_contact_city: Auckland
registrant_contact_country: NZ (NEW ZEALAND)
registrant_contact_phone: +64 9 999-9999
registrant_contact_email: an@orcon.net.nz
The above address is Orcon broadband and telephone.

But PRIOR to 29 Mar 2011 (the day after he accidentally posted the information above to usenet, outing himself as a stalking, harassing, defaming, libeling scumbag kook who likes to pick on retarded midgets online), the WHOIS for Bill Keesing's domain read as follows:
registrant_contact_name: Bill Keesing
registrant_contact_address1: Flat 16-5 Edgars Road
registrant_contact_address2: Grey Lynn
registrant_contact_city: Auckland
registrant_contact_country: NZ 1002
registrant_contact_phone: +64 9 376 0106
registrant_contact_email: zz9pluralzalpha@orcon.net.nz

Now, you may be saying, "Well, that doesn't prove anything at all! You could just be making all of this up."

Well, you COULD call the telephone number (+64 9 376 0106) to hear Bill Keesing sobbing about stupidly outing himself on usenet as a stalking, harassing, defaming, libeling scumbag kook who likes to pick on retarded midgets online. :-)

But, there are other ways to ascertain that the above is true.

Bill Keesing has posted a photo online here:
http://www.metvuw.com/index-content.php?date=20090721
http://www.metvuw.com/photoofweek/photo-20090721-03.jpg

Here's a quote on that web page from Bill Keesing (AKA Porksword Organthruster):
Bill Keesing
"'Sunlight shining through the fog over Cox's Creek in Cox's Bay, Auckland. The picture was taken by a Canon Powershot A410 on the automatic setting. The picture was taken looking towards the northwest. It was a nice, crisp walk to catch the bus into work that morning' wrote Bill. The photograph was taken at 08:26 on 3 June 2009."

Now, to find exactly where this photo was taken, we have to start from where Bill Keesing (AKA Porksword Organthruster) lives:
Here's the Google Street View of his low-rent stink-factory apartment on Edgars Road:
http://maps.google.com/maps?q=5+Edgars+Road,+Grey+Lynn,+Auckland,+NZ+1002&sll=-36.854309,174.72672&sspn=0.000906,0.001714&hnear=5+Edgars+Rd,+Auckland+1022,+Auckland,+New+Zealand&layer=c&cbll=-36.854409,174.726653&panoid=sBrQtzc2Zi9iHTfDv8FNyw&cbp=12,106.23,,0,5.49&ie=UTF8&hq=&ll=-36.854308,174.726721&spn=0,0.001714&z=19&iwloc=A

Note the row of letterboxes just 'round the bend on Edgars Road, and the low doorway just past them that leads into the electrics room. Behind the electrics room is where Bill Keesing (AKA Porksword Organthruster) is storing the boxes that were cluttering his apartment and making it stink so badly.

The apartment address, the letterboxes, the doorway to the electrics room, the stinky apartment, and the boxes cluttering Bill Keesing's apartment are all mentioned in the emails from Alison Kerr to Bill Keesing, posted to usenet by Porksword Organthruster (AKA Bill Keesing).

Now, from the metvuw.com link above, where Bill Keesing submitted a photo, we know that Bill Keesing takes the bus to work, and that he walks to the bus stop. Looking at Google Maps shows that there is only one way out of that end of Edgars Road. So, let's follow along Edgars Road and see if any of the Google Street View photos match the photo that Bill Keesing (AKA Porksword Organthruster) submitted to metvuw.com.

We find that if we go down Edgars Road about one block to the intersection of Edgars Road and Kingsley Street, and continue straight on Edgars Road to the next 'hop' on Google Street View past that intersection, we see the same photo in Google Street View as Bill Keesing (aka Porksword Organthruster) submitted to metvuw.com. Note that, just like Bill Keesing said of his photo, Google Street View is looking in a northwesterly direction.

One block from his apartment is where Bill Keesing took that photo he submitted to metvuw.com.

==========

So, what do we have here:
1} We have a conversation between Alison Kerr (landlord) and Bill Keesing (tenant) about his "really smelly", cluttered apartment, posted to usenet accidentally by Porksword Organthruster. If Porksword OrganThruster is not Bill Keesing, how did he come into possession of that personal email exchange?

2} Immediately after discovering that he'd accidentally posted this embarrassing and identifying information, Porksword Organthruster disappeared from usenet, whereas before he would post every day to harass the half-retarded, half-midget Emmett Earl Gulley, Jr. of Melbourne, FL, US. If Porksword Organthruster were NOT Bill Keesing, why would he care if Bill Keesing's address were revealed, and run from usenet as he did?

3} The address in the old help.geek.nz domain registration information by Bill Keesing, and in the emails from Alison Kerr to Bill Keesing (and accidentally posted by Porksword Organthruster) match exactly, as does the description of the property in question.

4} We have a photo submitted by Bill Keesing to metvuw.com, that is only one block from the address specified in the old registration information by Bill Keesing (and in the emails from Alison Kerr to Bill Keesing, accidentally posted by Porksword Organthruster).

5} Bill Keesing suddenly changed the information in his domain registration to inaccurate information, in an attempt to hide his true whereabouts, after he'd found that he'd outed himself on usenet as a stalking, harassing, defaming, libeling scumbag kook.

6) Bill Keesing is an AUK (alt.usenet.kooks) denizen from WAY back. I trust you can do your own search to verify this.

7} Bill Keesing discontinued his http://users.iconz.co.nz/keesing site, when he'd been using it in the signatures of some of his website forum posts as far back as May 29, 1998 and as recently as January 01, 2011. That matters little, as the Wayback Machine has archived it.

8} After being outed as a creepy, smelly, hoarding online stalker, Bill Keesing (aka Porksword Organthruster) flounced from usenet (21 Apr 2011, Message-ID: <1630688.KXDNF0lm0F@FishhookU> titled "I am out of here.", his farewell kook speech), only to return incognito.

Here's the link to his site ('user.iconz.co.nz/keesing' redirects to 'www3.iconz.co.nz/bill'):
http://replay.waybackmachine.org/19970301092752/http://www3.iconz.co.nz/bill/

On that web page, Bill states, "I am currently employed by the Internet Company of New Zealand as a Customer Support Officer...". The Internet Company of New Zealand is iconz.co.nz / iconz.net.

And here's Bill Keesing's photos. Note that he LOOKS like a stinky, hoarding stalker (and that photo is 14 years old... his looks have probably not improved with age):
http://replay.waybackmachine.org/19970703074321/http://www3.iconz.co.nz/bill/images/bill.jpg
http://replay.waybackmachine.org/19970703074321/http://www3.iconz.co.nz/bill/images/bill.gif

He's also got another website:
http://petrolhead.orconhosting.net.nz/Photography/MOTAT/thumb.html
Note the text blurb at the bottom: "All images Copyright Bill Keesing"
According to the photographs' EXIF data, the pictures on this site were taken with a Canon EOS 350D DIGITAL camera (Serial #0430202293) that Bill got from Scott & Kerry-Sue Thomson, also of Aukland, NZ. In fact, that's them in the picture of the interior of the trolley, with the baby stroller. Kerry-Sue Thomson is Bill Keesing's daughter (can you believe Bill was ever allowed to breed?!).

==========

The above information can lead us to only one incontrovertible conclusion: Bill Keesing of Aukland, NZ, that stinky hoarder, is Porksword Organthruster, that stupid, stalking, harassing, defaming, libeling scumbag kook who likes to pick on retarded midgets online.

==========

Now that Bill Keesing (AKA Porksword Organthruster) has stupidly outed himself, he probably thinks that the majority of the damage is done. Not so,

by quite a long shot.

1} The domain registration information for Bill Keesing's domain (help.geek.nz) is inaccurate, meaning that should someone report that domain for inaccurate WHOIS information, the host would most likely terminate that domain, or force Bill Keesing to re-enter the old, accurate information.

2} His employer will most likely find out about Bill Keesing's proclivity for stalking, harassing, defaming, libeling and picking on retarded midgets online, as well as his poor hygiene and obsessive hoarding. The consequences of this are unforetold.

3} His landlord will most likely find out about Bill Keesing's extra-curricular activities which so consume him that he neglects his apartment, allowing it to become a cluttered stinkhole.

4} His family will most likely find out that Bill Keesing is an embarrassment to the family. Forever after they find out, he'll always wonder if they're still saying behind his back, "I wonder if he's still a creepy online stalker?", as they quietly tell their children to avoid him.

Relax, Bill.
It's all in good fun, right?
It's just words, right?
Words can't hurt you, right?

Right, Bill?

Amateur Radio Newsline(tm) Report 1807 - March 30 2012

Amateur Radio Newsline report number 1807 with a release date of March 30th, 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T. The next Global Amateur Radio Emergency Conference to be hekd in Malaysia; 1700 South African hams let their licenses lapse, World amateur Radio Day to celebrate 50 yesrs of ham radio in space, Japan to launch five new hamsats, DXCC is going on-line and Roving Reporter Pierre Pulinmyleg returns with a truly out of this world April 1st story. Find out where Pierre is this year on Amateur Radio Newsline(tm) report number 1807 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: MY GAREC 2012 TO BE HELD IN MALAYSIA IN NOVEMBER

The 8th Global Amateur Radio Emergency Conference now coined as MyGAREC 2012, will be held from November 12th to the 14th in Malaysia. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

--

Among the draft topics to be discussed at My GAREC 2012 are High Frequency Emergency Operating Procedures, presentations from the three regions of the IARU and presentations from societies with recent disaster relief communications operations. Also to be discussed will be the future Global Amateur Radio Emergency Conference itself.

GAREC began in 2005 and is now the premier annual event attended by those with an interest in amateur radio providing emergency communications during training exercises or in response to disasters. As such it attracts participants from around the world.

General information including information on the venue, registration fees and the tentative agenda and the registration forms will be posted on the website www.mygarec2012.com by the end of this month. That website will be updated frequently to keep all updated with the latest news and program changes. For specific information you can e-mail to info (at) mygarec2012 (dot) com

For the Amateur radio Newsline, Im Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

MyGAREC 2012 has been timed to immediately follow the IARU Region 3 Conference to be held in Vietnam from November 5th to the 9th. It too has as its theme disaster relief communications.

(VK3PC, MyGarec 2012 Team)

**

RESTRUCTURING: NTIA SAYS PACTOR III IS NOT THE ONLY DIGITAL MODE FOR 60 METERS

Some breaking news for those who operate the 60 meter band. In response to requests for clarification from the ARRL, the National Telecommunications and Information Administration says that it has no objection to the use of a broader range of data emissions by amateurs on the five 5 MHz frequencies on 60 meters.

In an e-mail response to ARRL Chief Executive Officer David Sumner, K1ZZ, Karl Nebbia, the Associate Administrator of the NTIA Office of Spectrum Management, stated, that his organization had no interest in limiting the types of emission used by the amateurs as long as the data emission does not exceed the 2.8 kHz bandwidth as generated by the upper sideband transmitter.

Nebbia referred all further inquiries to the FCC, which he says sets the conditions for use of the five 5 MHz frequencies by radio amateurs.

The ARRL said that its original understanding was that the NTIA preferred that the use of 2K80J2D emission be limited to Pactor III. The NTIA now says that that is not the case.

But it's not all peaches and roses. This is because the requirement of only one signal per channel remains, as well as the prohibition against automatic operation. Also, the FCC continues to require that all digital transmissions be centered on the channel-center frequencies, which the Report and Order defines as being 1.5 kHz above the suppressed carrier frequency of a transceiver operated in the Upper Sideband mode. The ARRL says that this is typically the frequency shown on the frequency display.

For the Amateur Radio Newsline, I'm Heather Butera-Howell, KB3TZD, in Berwyck, Pennsylvania. (NTIA, ARRL, others)

**

WORLDBEAT: ICASA SAYS OVER 1700 SOUTH AFRICA HAM LICENSES HAVE LAPSED

The Independent Communications Authority of South Africa says that approximately 1700 amateur radio call signs have been marked as having lapsed by the regulatory agency. This is as a result of a substantial cleanup that the ICASA undertook during the last 12 months.

According to the South African Radio League, this is a significant number of former callsigns and that it is likely that many amateurs have unwittingly allowed their licenses to lapse. As an example SARL

says it has 43 paid up members who no longer have valid licenses.

If you are a South Africa radio amateur and believe you might be one of these people whose license inadvertently lapsed, the South African Radio Leagues advises to visit its website where you will find more information and what to do. The URL is www.sarl.org.za. (SARL)

**

HAM CELEBRATIONS: WORLD AMATEUR RADIO DAY TO CELEBRATE 50 YEARS OF HAM RADIO IN SPACE

April 18th is World Amateur Radio Day and celebrates the 87th anniversary of the founding of the International Amateur Radio Union, IARU. Now it has been announced that the theme of this years World Amateur Radio Day is "Amateur Radio Satellites: Celebrating 50 Years in Space."

The name and the theme were chosen in remembrance the launching of OSCAR 1 on December 12, 1961 and OSCAR 2 on June 2, 1962. Several IARU Member Societies have already announced special event stations for various dates during April to celebrate these two early ham radio in space milestones.

Callsigns known as we go to air include 6H6IARU, 3G73IARU and LZ1WARD. The EARD suffix standing for World Amateur adio Day. (IARU-R2)

**

HAM RADIO IN SPACE: JAPAN TO LAUNCH AMATEUR RADIO SATELLITES

Big news on the ham radio space scene. This with word that the Japan Aerospace Exploration Agency has announced the upcoming launch of five amateur radio satellites. This, on two launches taking place this spring and summer. Amateur Radio Newsline's Stephen Kinford, N8WB, is here with more:

--

The first launch is the H2A that takes place on May 17th. It will carry the amateur radio satellite HORYU-2.

This will be followed on July 21st when the HTV3 mission. It will deliver the JEM-Small Satellite Orbital Deployer or J-SSOD to the International Space Station. That unit will enable small satellites to be deployed from the ISS using the Japanese Experiment Module robot arm.

The Japanese amateur radio satellites WE-WISH and FITSAT-1, along with San Jose State University's TechEdSat and Vietnam's F-1 will also be delivered to the I-S-S on this mission. Plans are for them to be deployed to orbit on September 20th.

For the Amateur Radio Newsline, I'm Stephen Kinford, N8WB, in Wadsworth, Ohio.

--

We will have more ham radio space related news later on in this weeks Amateur Radio Newsline report. (JN1GKZ, Southgate)

**

CHANGING TIMES: ON-LINE DXCC

A new DXCC tool that brings the program partially on-line is to debut on April 2nd. Bill Pasternak, WA6ITF, is in the newsroom with more:

--

Actually, initial word of the DXCC going on-line came not from the ARRL but rather from the Ohio-Penn DX newsletter and was later confirmed by the ARRL DXCC desk. And in a nutshell, here's how it's going to work.

Using an Online DXCC Application, the candidate can select the cards that he or she would like to have checked by a card checker at his or her convenience. The person then types that data into a form which can be saved and retrieved at any time until submitted and make an application for DXCC.

When completed, the applicant will be able to print the list of cards and take the list -- and the cards -- in the same order that they are entered into the form -- to a card checker. He or she will check the cards, note any changes and send the form to ARRL HQ.

For the most part, the card checker's job is exactly the same as before, except he or she does not need to collect a payment. This is because the applicant can pay the DXCC fee on-line.

Once submitted, DXCC staff will have access a given file, make any changes noted by the card checker and process the application.

And oh yes, the good news: The Online DXCC Application will have rates that are half those of a traditional paper QSL application that is sent to ARRL HQ.

More detailed information is on-line at tinyurl.com/dxcc-online

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom, in Los Angeles.

--

The bottom line: Submitting a DXCC application on-line should be easier than making a paper application, saving both time and money. (DXCC, OPDX)

ENFORCEMENT: UNLICENSED BROADCASTER IN PUERTO RICO HAS FINE REDUCED

The operator of an unlicensed FM broadcast station in Puerto Rico has been able to convince the FCC to reduce a fine levied against him based on financial hardship.

After being handed a Notice of Apparent Liability in the amount of $15,000, Eleuterio Lebron of Guayama, Puerto Rico responded to the regulatory agency last September. In his note to the agency he claimed that he was not trying to violate the FCC rules or the Communications Act when he operated an unauthorized station on 88.5 MHz. He went on to say that he thought he could use his Ramsey model PX50 transmitter legally without a license because it was marketed as being Part 15 compliant.

However in its findings the FCC disagreed with Lebron interpretation of Ramsey's marketing. It noted that Part 15 compliance wasn't mentioned. It also stated Lebron's ignorance of the rules doesn't justify or mitigate the violation. Especially as he had been warned before that the transmissions were illegal.

However the agency did reduce the penalty to only $1500 based on documentation submitted by Lebron's backing up his assertion that the original $15,000 penalty amounted to a financial hardship that he could not pay. While it accepted this as a viable reason to reduce the fine, the commission warned Lebron that any future violations may result in higher monetary forfeitures that may not be reduced based on his financial circumstances.

Payment of the reduced fine was due within 30 days of Lebron being officially notified of the FCC's decision in the case. (FCC)

**

RESTRUCTURING: FCC FORMS BROADBAND SPECTRUM RE-ALLOCATION TASK FORCE

The Federal Communications Commission is proposing to re-allocate another 40 MHz of spectrum out of mobile satellite services spectrum for broadband, and has formed an Incentive Auction Task Force. Amateur Radio Newsline's Cheryl Lasek, K9BIK, reports:

--

This is a committee loaded with some well known names in the field of telecommunications. Its purpose will manage the auction process to restructure current broadcast television spectrum for future broadband use.

Ruth Milkman, the former Wireless Bureau chief who is now special counsel to the FCC chairman, will head up the task force. Among others she will be joined by Rick Kaplan, who now heads the FCC's Wireless Division; Julius Knapp, head of the Office of Engineering and Technology; FCC Chief Economist Marius Schwartz; Chief Technologist Henning Schulzrinne and General Counsel Austin Schlick.

Along with the formation of the task force the commission also issued a Notice of Proposed Rulemaking to open up 40 MHz of spectrum in the 2 GHz Mobile Satellite Services band for wireless broadband. The proposed rules would allow flexible use of the targeted spectrum and reflects the directives in the National Broadband Plan.

For the amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

A related Notice of Inquiry seeks comment on more strategies to free up additional spectrum as well. (FCC, TVT)

**

HAM HAPPENINGS: ARRL SPONSORING WEBINAR TO HELP YOU PUBLICIZE FIELD DAY

The ARRL Public Relations Committee will be holding a free Webinar on Thursday evening April 12 for Public Information Officers, radio club officers and anyone else wanting to join in. This, to teach the easiest and most effective way to write a press release for Field Day and actually get it noticed by the mass media in your home region.

The webinar will begin at 9 pm Eastern Daylight Time and will run for about 90 minutes. Several experts in mass media communications will be on hand to teach the tricks of the trade in dealing with radio, television and print publications.

Pre-registration is required. To reserve a spot simply take your web browser to tinyurl.com/arrl-field-day-webinar or directly at https://www3.gotomeeting.com/register/278619454.

Space is limited so if you want to take part you need to sign up today. (ARRL PR Committee)

**

HAM HAPPENINGS: MICROWAVE UPDATE 2012 PUTS OUT CALL FOR PAPERS

This years Microwave Update Conference will be held October 18th to the 21st in Santa Clara, California. Hosted by the 50 MHz and Up Group, a first call is going out to solicit conference papers, presentations and workshops on technical and operational aspects of microwave weak signal amateur radio. This covering the centimeter, millimeter and sub-millimeter to light wavelengths. Tutorials and overviews are also welcome to summarize current know how and to help

and encourage newcomers. For more information on submitting papers as well as all other aspects of the conference please go www.microwaveupdate.org on the World-Wide-Web. (WZ1V)

**

HAM HAPPENINGS: ESPN EMPLOYEES CREATE THE WORLDWIDE AMATEUR RADIO CLUB

Current and former employees of the Entertainment and Sports Network, better known to the public as ESPN, have formed the Worldwide Amateur Radio Club. Located on the grounds of the ESPN facility in Bristol, Connecticut, the group has now been granted the club call WE1SPN .

At present the club has about 40 members. Inaugural operations were to take place on 7.177 MHz at 21:00 UTC on March 29th. This opening gala was to include trying to contact as may radio clubs at Disney theme parks as possible.

The Worldwide Amateur Radio Club is the latest bin a long series of broadcast industry based employee recreation entities. It joins similar employee groups at the CBS, NBC, ABC and Fox networks as well as at a number of broadcast stations nationwide and world-wide.

More about WE1SPN can be found by checking the listing page for their callsign on QRZ.com. (KE6ZGP)

**

HAM HAPPENINGS: SOUTH AFRICA WESTERN CAPE ANTIQUE WIRELESS ASSOCIATION EXPO

South Africa's Western Cape section of the Antique Wireless Association of South Africa will be holding an Expo over Easter weekend from April 6th to the 9th. Location ids the farm owned by John and Judy Martin, ZS1D, and ZS1JEG and located near the town of Stanford. Featured will be a large display of radios of yesteryear and associated equipment. Also a classic radio station will be in operation. Talk-in is on 145.5 MHz simplex as well as on the 145.725 Hermanus repeater. Those planning to attend are encouraged to bring an antique radio to exhibit. (SARL)

**

NAMES IN THE NEWS: VE3CBR APPOINTED PIO FOR RAC NATIONAL FIELD OFFICE SECRETARIAT

Some names in the news. Radio Amateurs of Canada has announced that Alan Bauld VE3CBR has been appointed Public Information Officer to the Field Organization National Secretariat. VE3CBR resides in Stittsville, Ontario just outside Ottawa, and brings with him an extensive background in both management and amateur radio. His appointment is effective immediately. (RAC)

**

NAMES IN THE NEWS: RSGB APPOINTS NEW AROS COORDINATOR

The Radio Society of Great Britain has announced the appointment of Keith Bassett, G7NBU has been appointed as the new Amateur Radio Observation Service or AROS Coordinator with Mario Brashill, G2DPA appointed as a deputy. The RSGB says that together they bring significant experience and skill to the Amateur Radio Observation Service with its broad challenges of investigating matters that might create a negative public of amateur radio. (RSGB)

**

NAMES IN THE NEWS: ANDY SENNITT TO RETIRE FROM RNW END OF APRIL

Andy Sennitt who edited the now closed Radio Netherlands Media Network weblog says that he will be retiring from that international broadcaster at the end of April. Sennitt says that during his last weeks at Radio Netherlands that he will be writing a series of articles reflecting on the changes in international broadcasting since he started appearing on the Media Network radio show in 1981 as well as looking ahead to the coming decade.

This perspective will be published on the Radio Netherlands English language website. Sennitt asks that if you have any memories of Radio Netherlands or any other international broadcasters that you would like to share, please e-mail them to him. He can be reached at at MediaNetwork (at) rnw (dot) nl. Sennitt adds that he will try to include them in the articles as is possible. (Media Network)

**

NAMES IN THE NEWS: WO4W SAYS BETTER TORNADO WARNING SYSTEM NEEDED

In an interview with National Public Radio, veteran T-V meteorologist James Spann, WO4W, recently highlighted the limitations he and his colleagues face when covering tornadoes. Spann, who has become something of a severe weather pundit during his time at Birmingham Alabama's ABC 33/40, says that we are not as good as we think we are, and we have to accept that and work on it and be better.

WO4W says that television stations must stream their long form tornado coverage in a way that is accessible to all portable devices, not just some of them. And says Spann, its important to make the stream easy to find either via a web page or app. You can hear the story on National Public Radio's All Things Considered at tinyurl.com/npr-tornado-alert.

James Spann has long been an outspoken critic of the siren only warning process and the public's over-reliance on them. Following the April 2011 tornado outbreak he wrote a long blog post about the siren mentality titled "The Warning Process Must Be Fixed." Its on the web at tinyurl.com/spann-tornado-warning (NPR)

THE FINAL FRONTIER: NASA ANNOUNCES ISSLIVE! APP

NASA has announced the release of the ISSLive! app for iPhone, iPad and Andoid devices. Amateur Radio Newsline's David Black, KB4KCH, has the details:

--

The ISS Live! app delivers live streaming data from the International Space Station. Users can take a virtual 3-D tour of the Mission Control Center and the space station, and view mission control console displays with real-time data. Interactive educational lessons using the data, as well as crew and science timelines with individual crew member, social media and international science experiment details are also available via the app.

The space agency calls ISSLive! an innovative, interactive application that provides a novel way to learn about the International Space Station while on the go. To learn more and find links to download the ISSLive! app, visit spacestationlive.jsc.nasa.gov. That's where you will find the icons for the iPhone App Store and the Android Market.

I'm David Black, KB4KCH, from the South-East bureau in Birmingham, Alabama.

--

Once again that URL is spacestationlive.jsc.nasa.gov. (NASA)

**

RADIO IN SPACE: NASA CONSIDERING LAGRANGE POINT OUTPOST

NASA is pressing forward on assessing the value of a human-tended outpost near the far side of the moon. One that would embrace international partnerships as well as commercial and academic participation,

According to SPACE.com, William Gerstenmaier is NASA's Associate Administrator for Human Exploration and operations. And in a February 3rd memo Gerstenmaier says that a team is being formed to develop a cohesive plan for exploring a spot in space known as the Earth-moon Lagrange point.

Lagrange points sometimes called liberation points, are places in space where the combined gravitational pull of two large masses roughly balance each other out. This would allow a spacecraft or other object

to essentially park in that spot without being pulled toward either one of the masses.

A pre-memo NASA appraisal of Lagrange Point EML-2, which is near the lunar far side, has spotlighted this destination as the leading option for a near-term space study. EML-2 could serve as a gateway for exploration of multiple destinations including near-lunar space, our own moon, asteroids, the moons of Mars and ultimately, the red planet itself. (Space.com)

**

ON THE AIR: CELEBRATING THE US ISLANDS AWARD PROGRAM

On the air listen out for KL7JR and XYL WL7MY who will be active from the Big Island of Hawaii between April 1st to the 15th. This venture is in celebrating the 18th anniversary of the U.S. Islands Awards program. Operation will be on 80 through 10 meters using the callsign NH7DX. QSL via KL7JR (Southgate)

**

ON THE AIR: HAM RADIO COMMEMORATES THE BATTLE OF SHILOH BATTLE

While a bit short notice, word that the NorthEast Mississippi Amateur Radio Club will be operating a special event station March 30th and April 1st. This in honor of the 150th anniversary of the Civil War Battle of Shiloh, in Tennessee.

The ham radio commemorative will have two stations set up on the grounds of the Shiloh Military Park. Frequencies used will be in the lower part of the General class SSB portions of the High Frequency bands which include the Technician frequencies on 10 meters. Certificates and QSL will be available after the operation has concluded.

The ham radio operation will be held in conjunction with a special reenactment held by Blue Gray Alliance. For more information please e-mail event coordinator Charles Buster, NA5MS to cebuster (at) ms (dot) metrocast (dot) net. (NA5MS)

**

RADIOSPORTS: THE 2012 HOLYLAND CONTEST APRIL 20 - 21

The 2012 Holyland Contest sponsored by the Israel Amateur Radio Club is slated to begin on Friday, April 20th at 21:00 UTC and conclude on Saturday April 21st at 21.00 UTC. Special trophies and newly certificates will be issued to participating hams and SWL's for different classes and modes of operation. The Israel Amateur Radio Club adds that it invites the world-wide ham radio community to be on the bands during the contest as an exercise in the spirit of friendship between all radio amateurs. More about the contest is on line at www.iarc.org. (4Z0X)

**

DX

In DX, F8ATS will be active portable 6W from Senegal between March 30th and April 7th. Operations will be holiday style probably on all HF bands. QSL via the Bureau is preferred.

DL7BC will be on the air from Mayotte through April 6th using the callsign TO7BC on 80 through 10 meters. QSL to his home callsign, either direct or via the bureau.

OH4MDY will be active as XV2RZ from Vietnam until April 16th and says that this time he will pay special attention to digital modes. No frequencies or operating hours are known. QSL via his home callsign, direct only.

ZB3M and ZB2ER will activate the special callsigns ZQ3M and ZQ2ER from Gibraltar between May 5th and June 10th. This operation is to celebrate the Diamond Jubilee of Queen Elizabeth II. QSL via ZB3M direct only. No bureau or electronic QSL's will be accepted for this one.

An international team will activate the callsign E51M from the North Cook Islands from March 28th to April 10th. They will operate on 160 through 6 meters using CW, SSB and RTTY. The QSL manager is DJ8NK.

Lastly, KV1J will be operating from Miquelon Island stroke F-P between July 10th and the 17th. His activity will be on 160 through 6 meters using CW, SSB, RTTY and PSK31. He will generally be on the highest frequency band that is open, and he may try 6 meters if there is an indications of propagation. Also, look for him on the satellites, weather permitting. QSL via KV1J, direct, via the bureau or electronically using Logbook of the World.

(Above from various DX news sources)

**

THAT FINAL ITEM: STRANGE MORSE FROM SPACE

And finally this week, it appears as if radio astronomers have discovered mysterious sources of extremely high-powered radiation across the universe. Amateur Radio Newsline's Newsline's space-faring, roving reporter Pierre Pullinmyleg, says that hams are helping to unravel the mystery.

--

Scientists at NASA say the Fermi space telescope has discovered hundreds of super-high-energy gamma ray sources at the very top end of the electromagnetic spectrum, and that more than a third of them are complete mysteries. Adding to the mystery is the pattern of these gamma rays on spectrograms, showing short bursts of energy that resemble dots and longer ones that look like dashes.

Several radio astronomers who are also radio amateurs noticed these patterns and performed two sets of calculations with amazing results. The frequencies on which the gamma ray sources were discovered correspond with the two-billionth harmonic of 20 meters, and distance calculations show that, had the signals originated on Earth and been re-radiated back toward us, the dates of origin always seem to match up with the dates of major CW contests here on Earth.

One spectrogram currently making the rounds in ham radio astronomy circles clearly shows a pattern which, in Morse code, would read: "Di-dah, di-dah-dah-dit, di-dah-dit, di-dit, di-dah-di-dit," followed by a space and "di-di-dah-dit, dah-dah-dah, dah-dah-dah, di-dah-di-dit." Another reason, they say, to know code.

Reporting from near Alpha Centauri, this is Pierre Pullinmyleg for Newsline.

--

More details on the Fermi Space Telescope's findings and current sample spectrograms are available online at science dot nasa dot gov. We are told that the spectrograms Pierre alluded to in his report are not scheduled to be released until sometime after the 1st of April, in the year 2112. (Pierre Pullinmyleg Annual April 1st Technology Report)

//
CQ columnist Fred Maia, W5YI, SK

Posted: 30 Mar 2012 08:08 AM PDT
http://forums.qrz.com/showthread.php?340155-CQ-columnist-Fred-Maia-W5YI-SK&goto=newpost

CQ columnist Fred Maia, W5YI, a leading amateur radio journalist, educator and pioneer of volunteer examining, passed away on March 28 after a battle with cancer.

Maia, 76, published "The W5YI Report," dubbed "America's Oldest Ham Radio Newsletter," from 1978 to 2003, and has been a CQ contributing editor since 1985. His regulatory affairs column, first titled "Ticket Talk," then "Washington Readout," offered news and perspective on FCC and ITU (International Telecommunication Union) actions, and helped untold numbers of hams wend their way through often-confusing mazes of the volunteer examining and vanity call sign systems.

"Fred was one of those unusual people who was more focused on doing the job than he was on getting credit for doing it," noted CQ Publisher Dick Ross, K2MGA. "His 'job' was to help this hobby grow, and he succeeded admirably."

Maia was also a driving force in amateur and commercial radio licensing and education materials since late 1970. He was the first Volunteer Examiner Coordinator appointed by the Federal Communications Commission in 1984, and his W5YI-VEC group grew into the nation's second-largest VEC after the ARRL. Fred served as President of the W5YI-VEC until his retirement in October of 2000. In 1986, he founded The W5YI Group to develop, publish and sell amateur and commercial radio license study materials. Fred also formed National Radio Examiners to provide examination services as a Commercial Operator License Examination Manager (COLEM), and co-wrote a commercial radio licensing study manual with Gordon West, WB6NOA.

As a longtime member of the National Conference of Volunteer Examiner Coordinators (NCVEC) and its Question Pool Committee (QPC), which develops and maintains the question pools for amateur radio license exams, Fred was deeply involved in many of the changes in amateur radio licensing over the past quarter century. This includes the phased elimination of Morse code requirements for amateur licenses and the current system of three license classes, Technician, General and Amateur Extra.

A resident of Arlington, Texas, Fred was a graduate of the U.S. Air Force Radio Operator□s School, and was first licensed as an amateur radio operator as a teenager in Rhode Island, where he grew up. He is survived by

his wife, Doris, and two daughters. A memorial service will be held,
3:00pm, Saturday March 31, 2012 at Moore Funeral Home, 1219 North Davis
Dr. ,Arlington, TX 76012.

Around the World 28 MHz Balloon

Posted: 30 Mar 2012 12:46 AM PDT
http://forums.qrz.com/showthread.php?340118-Around-the-World-28-MHz-Balloon&goto=newpost

Around the World 28 MHz Balloon

A long duration balloon mission that is using 6 Party Balloons to carry a
50 gram amateur radio 28.222 MHz CW beacon, is hoping to go around the
world.

The ballon was released at 2330 UT (1930 EDT) March 29, from Annapolis in
Maryland and started it's journey heading SE at 6 knots. By 0300 UT, March
30, it had reached a speed of 60 MPH (96 km/h).

It has no APRS, just the 28.222 MHz CW telemetry system and it is hoped to
locate it by signal strength and beam headings only.

The mission is to give an insight into constant-pressure balloons and
especially the use of common mylar party balloons as a fixed volume
envelope. Unfortunately, these balloons have a high mass and so the
theoretical maximum altitude no matter how many balloons are used is only
about 26,000 feet and that is with no payload other than the fixed balloon
mass.

The payload weighs about 50 grams. The team are targeting 6 party balloons
3' in diameter which should give a float altitude around 16,000 feet. The
Telemetry will be in CW on 28.222 MHz (USB DIAL) and will contain Battery
voltage, inside and outside temperatures, and surface luminosity of the
ocean/clouds. It has no GPS. The team will rely entirely on DF bearings and
signal reports.

EMAIL DF reports to W3ADO@homeside.to

Be sure to include:

Your LAT/LONG

Time of observation

Quality of heading (subjective 1 to 10)

The CW string copied

If you have APRS you can uplink your beam heading via APRS.

As the balloon is only flying at 16,000 feet or so it will be vulnerable to
weather. The battery is expected to have a lifetime of about 10 days.

Further information including details of CW telemetry at

http://aprs.org/balloons.html

CWops Announces the CW Academy

Posted: 29 Mar 2012 12:07 PM PDT
http://forums.qrz.com/showthread.php?340044-CWops-Announces-the-CW-Academy&goto=newpost

Whether you□re a newbie who wants to learn Morse code for the first time, a re-tread who wants to clean the rust off your key or a roadrunner who wants to break the 20 wpm wall, the CW Academy has a place for you.

The CWA was created by the CWops club in August, 2011 to provide a place for students of all levels to work with mentors, on and off the air, to learn or improve their CW language skills. It□s fun and, better yet, it□s free!

□For nearly four years I've been trying to learn CW on my own with some small degree of success,□ says Gary, W4GDC. □I was able to send and receive about 8 words per minute with some accuracy. About a month ago I was browsing the CWops website□s CW Academy page and decided to ask for a mentor. Jack W0UCE contacted me within a few days and we arranged a first session. All went well so we set up a regular mentoring schedule. To my surprise I was able to copy 20 wpm within two weeks.□

Following a contact in the ARRL□s Rookie Roundup Pete, W1RM, suggested to Tom, KC9RXI that he enroll in the CWA. Recently, Pete received this email: □Thank you for telling me about the CWops academy. Art, K6XT, is a wonderful mentor. Art□s expertise, thoughtful suggestions and encouragement have made me a better CW operator. For the last three months Art and I have had weekly on air contacts on 30 meters.□

Michael, KF7ADB was a □no-code□ ham, licensed in 2009. But he was intrigued by the dits and dahs that he heard at the low end of the bands. He knew he had to learn CW. □It didn't come easy, but within a few months I managed to learn the code well enough to have a slow-speed QSO and not embarrass myself too much,□ he wrote us. □Over time my CW skills improved but I hit a plateau at about 13WPM. By this time I had also picked up several bad habits, including having to write each character down on a notepad as I heard it. When the other person stopped sending, I□d look down at what I had written on my notepad and hope it made sense.□ After about three weeks of nightly on-air sessions with a CWA mentor Michael was able to copy 30 wpm in his head. This □ opened up a number of opportunities for me in the world of amateur radio, including CW DXing and being invited to operate (at a big) multi-op CW contest (station).□ His improved skills also allowed Michael to become a member of CWops, #869.

Currently, the CW Academy is working with about 35 students and more than 40 club members are serving as mentors. Both numbers are growing each week.

Check-out the CW Academy at: www.cwopsacademy.org and let us help you get up to speed!

NTIA Clarifies Position on 60 Meter Digital Privileges

☐NTIA has no interest in limiting the types of emission used by the amateurs as long as the data emission does not exceed the 2.8 kHz bandwidth generated by the upper sideband transmitter.☐

More details here:
